# Actuarial Valuation as of January 1, 1994

# PURPOSE AND SUMMARY

The purpose of this report is to present the results of our January 1, 1994 actuarial valuation of the Bloomington Fire Department Relief Association performed in accordance with the provisions of Chapter 356 of the Minnesota State Statutes. In summary, our valuation indicates a required contribution of \$1,832,100 as of January 1, 1994. The contribution must be increased with interest, at the rate of 5% per year until the date of payment. If payment is made as late as December 31, 1994, a contribution of \$1,923,700 is required. This contribution is in addition to estimated member contributions of \$21,500 for 1994. The results of the valuation are discussed in detail in later sections of the report.

The contribution is up slightly from last year's contribution of \$1,856,600 because of the following:

- active membership increased from 149 to 151 members,
- assumed expenses increased from \$73,600 to \$90,300,
- average accrued service per active member increased from 7.9 to 8.3 years.

We certify that this actuarial valuation has been prepared in accordance with Chapter 356 of the Minnesota State Statutes as it applies to the Bloomington Fire Department Relief Association.

# EMPLOYEE DATA

The data provided by the Association is summarized in Table 2(a). The table sets forth a census reconciliation from January 1, 1993 to January 1, 1994. There are 151 active members in the Association as of the valuation date. They have an average attained age of 34.8 and an average entry age of 26.5. Table 2(b) sets forth the prospective benefit each member may expect to receive if he remains in the Association to the normal retirement date assumed in the valuation, age 50 and completion of 20 years of service. These benefits assume 3-1/2% future pay increases per year.

The reported data includes 84 retired members, 10 surviving spouses, 4 disabled members, and 1 surviving child receiving monthly benefits as of January 1, 1994. There are 7 terminated members entitled to receive benefits at age 50.

. Table 2(c) sets forth a list showing the benefit each inactive member is currently receiving or is entitled to receive upon attainment of age 50. No increase is assumed in benefits of terminated vested members for this listing.

Monthly benefits payable from the plan are based on the most recent three year average salary rates of the highest paid non-officer policeman in the City of Bloomington. Consequently, benefits to all inactive members are increased each year. January 1, 1994 benefit levels are determined as follows:

1.	Average Monthly Salary		
	(a) (b) (c) (d)	January 1, 1992 January 1, 1993 January 1, 1994 Average	3,490 3,586 3,712* 3,596
2.	Monthly Benefits		
	(a)	Retirees	
	(b)	(1(d) x 1/3) Surviving Spouses	1,199

(2(a) x 75%)

\*As of January 20, 1994, the 1994 salary had not been determined. We have increased the 1993 salary by our valuation assumption, 3.5%, to get the 1994 salary and benefits.

899

For cost determinations, future benefits are assumed to increase in accordance with the assumed rate of salary increase, 3-1/2% per year.

# ASSETS OF THE SPECIAL FUND

A statement of the assets of the Special Fund as of December 31, 1993 prepared by George Hayden was made available to us by the Association. Our valuation reflects the reported market value of the Special Fund as of December 31, 1993 of \$58,857,734 less salaries, pensions and other expenses of \$112,194 which were payable as of December 31, 1993 for a total of \$58,745,540 used as valuation assets.

### PLAN PROVISIONS

Table 3 is a summary of the principal provisions of the plan. There have been no changes since the last valuation.

### **ACTUARIAL ASSUMPTIONS**

Chapter 356 of the Minnesota Statutes requires that actuarial valuations of public plans be based on an assumed interest rate of 5% per annum and an assumed rate of annual salary increase of 3-1/2% per annum. Other assumptions pertaining to the rates of mortality, turnover, retirement, etc. are left to the discretion of the actuary. All of the valuation assumptions are the same as those used in the January 1, 1993 valuation of the plan. Table 4 is a summary of all of the actuarial assumptions.

### **ACTUARIAL METHOD**

As required by law, the funding method used for the valuation is the entry age normal cost method. Under this method, the normal cost is computed as that percentage of pay which would fund all benefits if that percentage of pay was contributed every year from each fireman's entry into the plan until his retirement. The total normal cost for the plan is the sum of the normal costs for all active members. The normal cost is reduced by the members' contribution for the current year.

The present value of all future benefits payable from the plan for all active and inactive members less the present value of all future normal costs is defined as the accrued liability. The accrued liability is the amount that would have accumulated in the Special Fund if all the actuarial assumptions had been exactly realized in all prior years and if funding for all members, based on current plan benefits, had commenced immediately upon their date of joining the Association.

The total accrued liability is compared to the valuation assets of the Special Fund to determine the status of the plan. Any excess, known as the unfunded accrued liability, is to be funded over a number of years specified by law.

There is currently no unfunded accrued liability. State law does not permit recognizing an amortization credit for over-funded plans.

Any changes in the unfunded accrued liability due to changes in benefits or actuarial assumptions must be paid over a new 30 year period. The total annual contribution due as of the valuation date is the sum of the normal cost, the amortization payment and a \$90,300 provision for administrative expenses. The provision for expected expenses is necessary because administrative expenses are paid from the Special Fund. The \$90,300 amount is estimated from actual expenses paid from the Special Fund during 1993. Interest must be added to the contribution at the rate of 5% from the valuation date to the date of payment. Thus, if payment were made as of December 31, 1994, the January 1 contribution amount must be multiplied by 1.05.

### **VALUATION RESULTS**

A contribution of \$1,856,600 was reported in the January 1, 1993 valuation. This contribution was expected to increase to \$1,919,700 as of January 1, 1994 because the normal cost is expected to increase 3-1/2% each year in accordance with our valuation method.

Table 1(a) sets forth the principal results of this year's valuation. A contribution of \$1,923,700 is required.

The annual contribution is the sum of the normal cost, the amortization payment, and administrative expenses. The normal cost is computed to be a level percentage of pay assuming each firefighter earns the same as a Bloomington policeman. We have assumed this to be \$44,544 for 1994. Under this assumption, there is a total covered "payroll" of \$6,726,100 (151 x \$44,544) and the net normal cost of \$1,741,800 is 25.9% of payroll. The total contribution of \$1,923,700 is 28.6% of payroll.

### CHANGE IN THE UNFUNDED ACCRUED LIABILITY

Chapter 356 requires a reconciliation of the unfunded accrued liability from one valuation to the next valuation. As of January 1, 1993 there was an unfunded accrued liability of (\$5,566,500). As of January 1, 1994, there is an unfunded accrued liability of (\$10,962,900).

This decrease of \$5,396,400 is accountable as follows:

1.	Unfunded accrued liability	
	as of January 1, 1993	(5,566,500)

### 2. Decrease due to:

(a)	Contributions higher than expected	(353,800)
(p)	Investment earnings higher than expected	(4,194,500)
(c)	Miscellaneous actuarial gains	(848,100)
(d)	Total decrease	(5,396,400)

3.	Unfunded accrued liability as of	
	January 1, 1994 (1 + 2.d.)	(10,962,900)

Investment earnings were 13.1% for 1993 versus our assumption of 5%.

### FINANCIAL DISCLOSURE

Government Accounting Standards Board Statement No. 5 requires governmental plans to disclose certain information in their financial statement. Table 1(b) presents this information. The Pension Benefit Obligation represents the value of benefits earned to date. Future benefit increases are assumed. The vested obligation includes a liability only for members with 20 or more years of service. The total obligation includes a liability for all members.

If you have any questions, please let us know. We would be happy to meet with you to discuss further the results of our valuation.

Respectfully submitted,

THE WYATT COMPANY

### Table 3

# BLOOMINGTON FIRE DEPARTMENT RELIEF ASSOCIATION

### Summary of Current Plan Provisions

1. Basic Benefit:

One-third of the final average salary of a policeman of the highest grade, not including officers of the City of Bloomington. Final average earnings is the average of the monthly pay for such a policeman over the past three years. All benefits under the plan increase each time a pay increase is granted to the Bloomington Police Department.

2. Normal Retirement Benefit:

Basic benefit is payable at retirement after attainment of age 50 and completion of 20 years of service.

3. Deferred Vested Benefits:

On termination after completion of 20 years of service, the basic benefit is payable after attainment of age 50.

4. Disability Benefits:

Duty Related -

Basic benefit is payable at time of disability. This benefit is payable while the member remains disabled. After attainment of age 50, no evidence of disability is required for continued payment of the same benefit. Disability is defined as inability to perform the duties of a fireman.

Non-Duty Related -

The basic benefit is multiplied by 5% for every year of service earned up to the time of disability; maximum 20 years. This benefit is payable while the member remains disabled. After attainment of age 50, no evidence of disability is required for continued payment of the same benefit. Disability is defined as inability to perform the duties of a fireman.

Page 1 of 2

### 5. Spouse's Benefit:

Duty Related -

75% of the basic benefit is payable to the surviving spouse for his or her remaining lifetime. Benefits cease on remarriage of the surviving spouse.

Non-Duty Related -

75% of the accrued benefit at time of death is payable to the surviving spouse for his or her remaining lifetime. The accrued benefit is 5% of the basic benefit multiplied by the number of years of service at time of death; maximum 20 years.

Inactive Member -

On the death of any inactive member, 75% of the basic benefit is payable to the surviving spouse for his or her remaining lifetime.

6. Children's Benefit:

On the death of an active member, 12% of the basic benefit is payable to each surviving child until attainment of age 18. Maximum family benefit is 100% of the basic benefit. On the remarriage or death of the surviving spouse, surviving children may receive benefits which in total equal no more than the basic benefit.

7. Lump Sum Death Benefit:

On the death of any active or inactive member \$500 is payable.

8. Membership Dues:

Each member contributes \$144.00 per year payable semi-annually on January 1 and July 1.

Page 2 of 2

### Actuarial Method and Assumptions

1. Interest Rate: 5% per annum.

2. Mortality: The mortality rates used are based on the 1971

Group Annuity Mortality Table, without margins, projected to 1976 by Scale E. The table is used

for all rates of mortality.

3. Withdrawal: The rate of withdrawal is .030 at age 20

decreasing uniformly to zero at age 50 with no

withdrawal after that age.

4. Disability: The Railroad Retirement Board 12th Valuation

rates of disablement loaded for the nature of the

group.

5. Duty/Non-Duty: 75% of all disabilities and deaths are assumed to

be duty-related and 25% non-duty-related.

6. Retirement Age: Members are assumed to retire after attaining age

50 and completing 20 years of service.

7. Salary Scale: 3-1/2% per annum.

8. Valuation Assets: Market value.

9. Funding Method: The entry age normal cost method has been

used with the normal cost determined as a level of percentage of pay each year from the date of joining the Association to the assumed retirement age. Each fireman is assumed to earn the same

as a Bloomington policeman.
