*re: REVISED Actuarial Valuation Report as of January 1, 2002
Bloomington Fire Department Relief Association Pension Fund*

Dear Board Members:

We have performed an actuarial valuation of the Bloomington Fire Department Relief Association Pension Fund as of January 1, 2002.

The results of our calculations are set forth in the following REVISED report, as are the actuarial assumptions upon which our calculations have been made. We have relied on the basic employee data as submitted by the Bloomington Fire Department Relief Association, and asset figures as submitted by Union Bank and Trust Company and Ms. Sharon North. We have reviewed the submitted data for reasonableness and consistency with prior years' information but we have not audited the data. To the extent that actual data varies from the submitted data, plan liabilities and results will also vary from those show in this report.

This report has been revised to reflect corrected plan provisions as recently reported to our office.

On the basis of the foregoing, we hereby certify that, to the best of our knowledge and belief, this report is complete and accurate and has been prepared in accordance with the requirements of Section 356, Minnesota Statutes, and the requirements of the Standards of Actuarial Work.

Respectfully submitted,

Lance M. Burma, FSA, MAAA, EA

Bloomington Fire Department Relief Association
Commentary

Purpose

The purpose of this valuation is to determine the financial status of the Plan. To achieve this purpose, an actuarial valuation is made at the beginning of each fiscal year as required by Section 356 of Minnesota Statutes.

Report Highlights

The financial status of the Plan can be measured by three different funding ratios:

The *Accrued Benefit Funding Ratio* is a measure of current funding status and, when viewed over a period of years, presents a view of the funding progress. It is based upon benefits which have been earned by service to the valuation date. This year's ratio is 120.26%. The corresponding ratio for the prior year was 140.57%.

The *Accrued Liability Funding Ratio* is also a measure of funding status and funding progress. It is based on the actuarial cost method that has historically been use by the State. For 2002 the ratio is 123.57%, which is a decrease from the 2001 value of 144.12%.

The Projected Benefit Funding Ratio is a measure of the adequacy or deficiency in the contribution level. This year's ratio of 116.54% shows that the current statutory contributions are sufficient in the long run.

Asset Information (Tables 1 and 2)

The Actuarial Value of Assets is determined as the market value of the Special Fund as of December 31, 2001 less liabilities payable as of December 31, 2001. The calculation of the Actuarial Value of Assets is shown in Table 1 on lines F.1 to F.4.

The term "Actuarial Value of Assets" is used to indicate that the value was determined for use in this actuarial valuation. Since Minnesota Statutes refer to this value as "Current Assets", the latter phrase will be used in the remainder of this report.

Actuarial Balance Sheet (Table 8)

An actuarial balance sheet provides a method for evaluating current and future levels of funding. The Current Benefit Obligation used to measure current funding level is calculated as follows:

For Active Members - salary and service are projected to retirement to determine benefits for each member and the ratio of credited service to total service establishes the portion of the projected benefit to be used in calculating the current funding level.

For Non-active Members - the discounted value of benefits.

Actuarial Cost Method (Table 9)

The approach used by the State of Minnesota to determine contribution sufficiency is the Entry Age Normal Actuarial Cost Method. The primary characteristic of this method is that it allocates costs as a level of percentage of payroll.

A comparison of this actuarial method (Table 9) to the actuarial balance sheet (Table 8) illustrates the two techniques for allocating liabilities of active Members to past and future. As noted in the prior section, the balance sheet allocates benefits and the corresponding liabilities, on the basis of service. The method used in Table 9 allocates liabilities so that the cost each year will be a constant percentage of payroll. Both approaches, however, calculate the value of all future benefits the same way (see line F of Table 8 and line A6, column 1, of Table 9).

An Unfunded Actuarial Accrued Liability is computed under the Entry Age Normal Actuarial Cost Method by comparing the liabilities allocated to past service (Actuarial Accrued Liability) to the Current Assets. This amount, line B3, is funded as a level dollar amount determined on a rolling thirty year period.

Sources of Actuarial Gains and Losses (Table 10)

The assumptions used in making the calculations using the Entry Age Normal Actuarial Cost Method are based on long-term expectations. Each year, the actual experience will deviate from the long-term expectation. For an analysis of the major components of the Actuarial Gain or Loss refer to Table 10.

Contribution Sufficiency (Table 11)

This report determines the adequacy of Statutory Contributions by comparing the Statutory Contributions to the Required Contributions.

The Required Contributions, set forth in Chapter 356, consist of:

Normal Costs based on the Entry Age Normal Actuarial Cost Method.

A Supplemental Contribution for amortizing any Unfunded Actuarial Accrued Liability (the Fund is allowed a credit toward Required Contributions equal to 10 % of the Unfunded Actuarial Accrued Liability if it is negative).

An Allowance for Expenses.

Table 11 shows the Fund has a current year contribution deficiency since the Statutory Contribution Rate is 0.91% compared to the Required Contribution Rate of 13.24%.

GASB Disclosure Information (Tables 14 and 15)

Disclosure under GASB Statement No. 27 became effective beginning with 1997 Fiscal Year end. Required disclosure items are included in Tables 14 and 15.

Changes in Actuarial Assumptions

All actuarial assumptions are the same as those used in the prior valuation. Table 12 contains a summary of all actuarial assumptions and methods.

Changes in Plan Provisions

All plan provisions are the same as those used in the prior valuation except for the following change:

\$144 Member Contributions have been eliminated.

. Table 13 contains a summary of current plan benefits.

Bloomington Fire Department Relief Association
Summary of Actuarial Assumptions and Methods

<i>Interest:</i>	5.00% per annum
<i>Mortality:</i>	Pre-Retirement:
	Male - 1971 Group Annuity Mortality Table, without margins, projected to 1976 by Scale E.
	Female - 1971 Group Annuity Mortality Table, without margins, projected to 1976 by Scale E set back 7 years.
	Post-Retirement:
	Male - same as above.
	Female - same as above.
	Post-Disability:
	Male - same as above.
	Female - same as above.
<i>Retirement Age:</i>	Members are assumed to retire after attaining age 50 and completing 20 Years of Service.
<i>Separation:</i>	Graded rates shown in the rate table.
<i>Disability:</i>	Graded rates shown in the rate table.
<i>Social Security:</i>	N/A
<i>Salary Increases:</i>	3.5% per annum.
<i>COLA Increases:</i>	3.5% per annum.
<i>Actuarial Cost Method:</i>	Entry Age Normal Cost Method with normal costs expressed as level percentage of earnings from each Members date of joining the Association to the Members assumed retirement age.
<i>Asset Valuation Method:</i>	Market Value. Trusteed funds are reported by Union Bank and Trust Company. Cash and checking accounts are reported by the Plan's accountant. Other operating revenue as shown on line item B.7 of Table 2 is entered as a balancing amount.
<i>Employee Contributions:</i>	None.
<i>City of Bloomington Contributions:</i>	None
<i>State of Minnesota</i>	

TABLE 12

Contributions: 2% of the Fire and Casualty paid by the City of Bloomington

Payment on the Unfunded Accrued Liability: Any changes in the Unfunded Accrued Liability are amortized as level dollar amount over a new 30 year period.

Administrative Expenses: Prior year administrative expenses (excluding investment expenses) expressed as a level amount per participant.

Family Composition: 100% of Members are assumed to be married. Female is assumed to be three years younger than male.

Duty-related death benefits are increased by 10% for estimated dependent child survivor benefit.

Form of Payment: 75% Joint and Survivor Annuity, Life Annuity if single.

Missing Data: The submitted participant data has been reviewed for reasonableness and constancy with data submitted for prior valuations. We have not audited this data, and the results of this valuation may change based on the accuracy of the underlying data. In cases where submitted data was missing or incomplete, the following assumptions were applied:

Date of Birth:	Average age of participant group based on prior years valuation report.
Date of Hire:	Current valuation date minus years of service.
Years of Service:	Years of service on last year's valuation plus one year.
Sex:	Male.
Deferred Benefit:	Equal to one-third of current year average indexed earnings. Current rate is \$1,561.00 / month.
Salary:	Each Member is assumed to earn the same as Bloomington Policemen.
	Estimated Historical Levels:
	2002 58,308
	2001 56,340*
	2000 53,724
	1999 53,736
	1998 49,464

*Revised from January 1, 2001 report.

Bloomington Fire Department Relief Association
Summary of Plan Provisions

GENERAL

<i>Eligibility:</i>	Members in good and regular standing of the Bloomington Fire Department Relief Association, and who have actively served as fire fighters in the Bloomington Fire Department for at least one month.
<i>Membership Dues:</i>	None.
<i>Index Salary:</i>	The average of the monthly salary for the preceding three years, including the current year of a patrol officer of the highest grade in the employ of the city of Bloomington.
<i>Basic Benefit:</i>	One third of the index salary. All benefits under the plan increase each time a pay increase is granted to the Bloomington Police Department.

RETIREMENT***Normal Retirement Benefit:***

<i>Eligibility:</i>	Age 50 with 20 years of Service.
<i>Amount:</i>	Basic Benefit
<i>Form of Payment:</i>	75% Joint and Survivor if married, Life Annuity if single.

Disability Benefit:

<i>Eligibility:</i>	Inability to perform the duties of a firefighter.
<i>Duty Related Amount:</i>	Basic benefit is payable at time of disability. This benefit is payable during the period of disability. After attainment of age 50, no evidence of disability is required for the benefit to continue.
<i>Non-Duty Related Amount:</i>	The basic benefit is multiplied by 5% for each year of service up to the date of disability (maximum 20 years). This benefit is payable during the period of disability. After attainment of age 50, no evidence of disability is required for the benefit to continue.
<i>Form of Payment:</i>	Same as for retirement.

Bloomington Fire Department Relief Association
Summary of Plan Provisions (continued)

DEATH**Spouse's Benefit**

Duty-Related Amount: 75% of the basic benefit is payable for his or her remaining lifetime. Benefits cease on remarriage of the surviving spouse.

Non-Duty Related Amount: 75% of the basic benefit multiplied by 5% for each year of service up to the date of death to a maximum of 20 years. This benefit is payable for his or her remaining lifetime. Benefits cease on remarriage of the surviving spouse.

Childrens' Benefit:

Eligibility: An active Member who dies and leaves surviving children.

Amount: 12% of the basic benefit is payable to each surviving child until attainment of age 18 or marriage. The maximum benefit paid to all family members will not exceed 100% of the basic benefit.

Lump Sum Death Benefit: \$500 is payable on the death of any active or inactive member:

TERMINATION

Eligibility: 20 years of Service.

Amount: The basic benefit is payable at age 50.
