Price of Government

State and Local Government Revenues are Forecast Through 2013

The state general fund forecast represents only a portion of public sector revenues and spending in Minnesota. In broad terms, the "Price of Government" is a measure of the cost of all general government services statewide. It answers the question: How much do Minnesotans pay to state and local governments in total? It is comprehensive and includes nearly all revenues generated by state and local units of government as well as public school districts. All state taxes, property taxes, special assessments, fees and charges are included. Federal taxes are not included. The measure serves as a financial index for the cost of public services in Minnesota.

The annual receipts collected by each unit of government are considered to represent the aggregate costs that Minnesota taxpayers pay for public services. The "Price of Government" measures that cost for each fiscal year relative to Minnesota Personal Income. The result is stated as a percentage of statewide personal income. For calendar year 2008, fiscal year 2009, it is estimated at 15.5 percent. In other words, for every dollar of Minnesota taxpayer personal income, 15.5 cents will be paid to state, county, township, and school districts for services during that year.

Minnesota Price of Government State and Local Revenues as % of Personal Income

Since the price of government focuses on revenues collected by the state, local governments and school districts, it is designed to be a performance measure for both taxpayers in general and policymakers during the budget development process.

The following table shows the revenues raised at each level of government, excluding federal grants and excluding intergovernmental revenues such as state aid to school districts, cities and counties. The results are called "own source" revenues and represent the taxes, fees and charges at each level of government.

In FY 2009, of all payments Minnesotans will make in taxes, fees and charges, the state will collect 59 percent. Counties, cities, and townships will collect about 33 percent, while school districts will collect about 8 percent. However, once intergovernmental aids are considered, the state will spend only 32 percent of the total while non-school local governments will spend 40 percent, and school districts will spend 28 percent.

A table showing price of government data follows. It includes major taxes and other revenue sources for FY 2000 through FY 2013 broken down by level of government.
