Background

Wolves are present through northern and parts of eastern Minnesota and cause depredation of livestock through portions of this range. To mitigate the economic damage to livestock producers, the Minnesota Department of Agriculture (MDA) manages the Wolf Damage Compensation Program under Minnesota Statute 3.737. Livestock producers are eligible for 100% compensation for livestock that have been confirmed as lost to wolves from a minimum value of \$100 to a maximum amount of \$20,000 per producer per fiscal year.

This report is submitted in accordance with Minnesota Statute 3.737 Subd. 7:

The commissioner must submit a report to the chairs and ranking minority members of the house of representatives and senate committees and divisions with jurisdiction over agriculture and environment and natural resources by December 15 each year. The report must include:

- (1) all payments made under this section, by county and statewide, in the previous five fiscal years;*
- (2) the program's total revenue by funding source including state appropriations; and*
- (3) how each revenue source is used in expenditures including administrative costs used to carry out this section.*

Wolf Depredation Payments by County and Statewide for Past Five Fiscal Years

[Depredation claims in Minnesota](#) are filed with the Minnesota Department of Agriculture. Claims are initiated by producers and submitted to a local authority with expertise to inspect the site of the loss and determine if evidence supported the loss was due to wolves. Authorities qualified to make this assessment in Minnesota are primarily Minnesota Department of Natural Resources conservation officers and U.S. Department of Agriculture – Animal and Plant Health Inspection Service Wildlife Services staff in counties within Minnesota’s wolf range. Additionally, in Kittson County, the sheriff’s department has also been trained to make depredation assessments due to high amounts of depredation.

If the investigating authority determines that wolves were likely the cause of the loss, then the claim is passed on to an employee of the University of Minnesota (UMN) Extension qualified to assess the current market value of the animal or animals lost. The individuals who perform this service are livestock experts for UMN Extension and are well-qualified to make these determinations. These values are based upon the claimant’s typical first point of sale. If a livestock owner has received an insurance settlement or payments from any other source, the amount of that settlement must be deducted from the market value estimate before any payment can be made. The MDA pays UMN Extension for the evaluation service they provide. When a valuation has been made, the UMN Extension expert completes that portion of the claim form and returns it to the MDA. Claim payments are capped at \$20,000 per fiscal year, per owner. Claims are paid from a General Fund appropriation and federal grant funds when available.

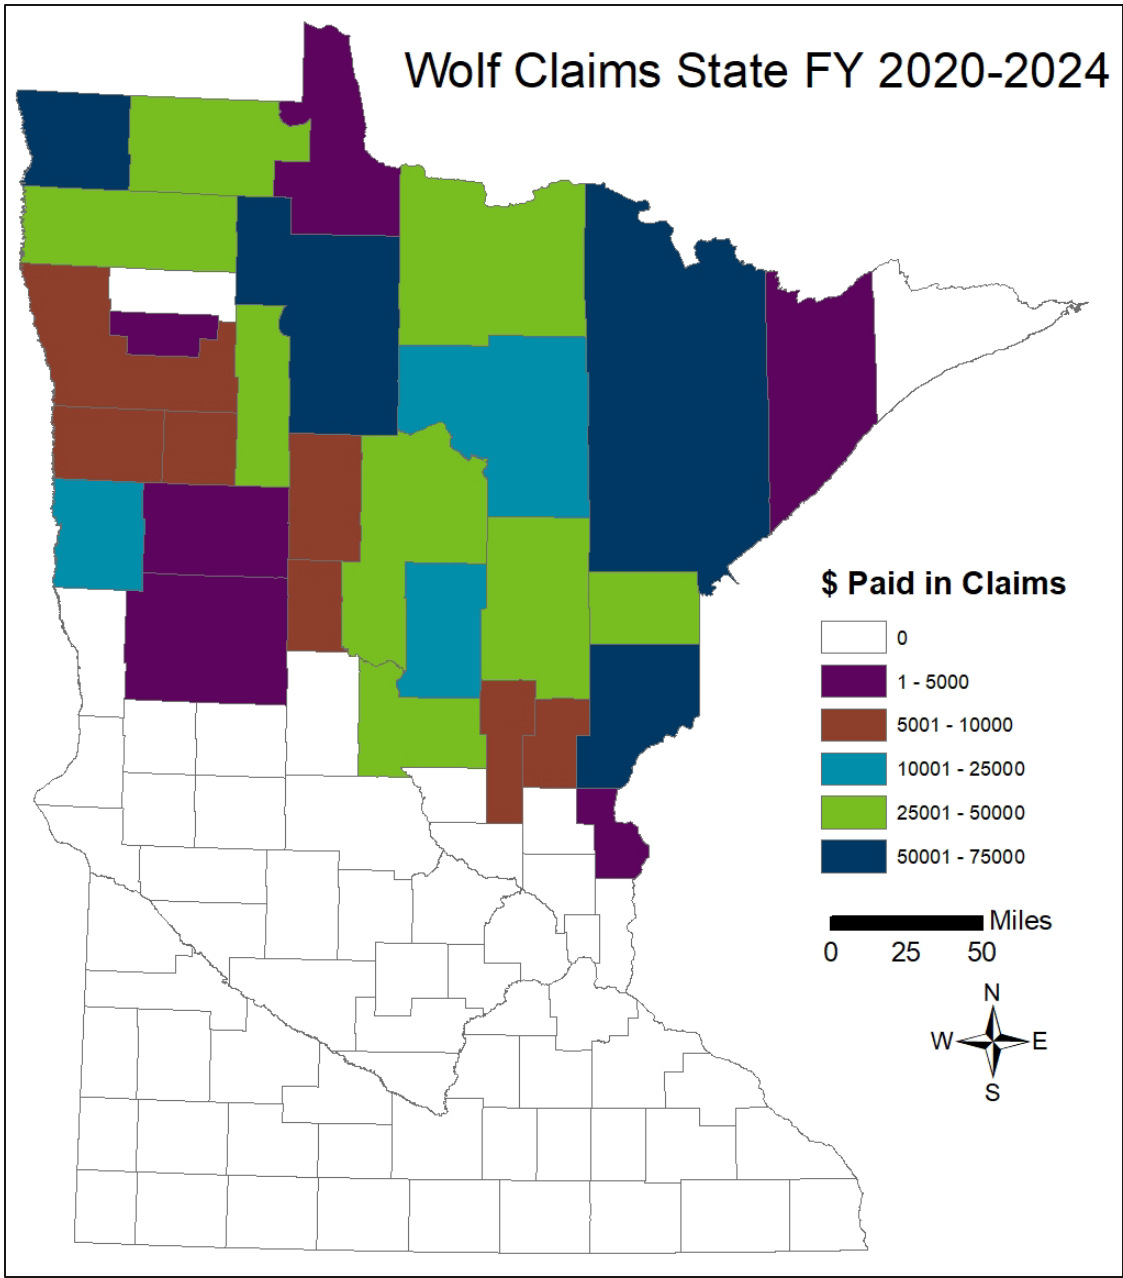

Figure 1. Claim payments made by Minnesota county summed over the past five fiscal years (FY 2020-2024).

Wolf Depredation Revenue and Program Expenses

The MDA received an appropriation of \$175,000 per fiscal year from the General Fund from 2020 – 2024 to pay livestock depredation claims. Those funds were used exclusively to make payments to producers; although beginning in FY20, the funds were also eligible to reimburse University of Minnesota Extension for staff time spent assigning monetary value to lost animals. During fiscal years 2020 – 2022 and 2024, the MDA also received federal funds from the U.S. Fish and Wildlife Services to make compensation payments. These funds are eligible to help cover MDA staff time spent administering the project as well as to pay claims.

A complete list of all appropriated funds as well as expenditures by category are detailed in Table 2.

Table 2: Amounts appropriated for wolf depredation payments by fiscal year and expenditures by category. A description of each column follows the table.

Column description:

Appropriation = G46 and G06 are from the General Fund and F47 is federal funding. G47 is also from the General Fund but is appropriated for elk depredation claim payments. One wolf damage claim was mistakenly paid from G47 in FY22.

Amount = the amount appropriated each fiscal year.

Roll forward = an amount that was rolled in from a previous fiscal year (positive values) or rolled into a subsequent fiscal year (negative values).

Salary = expenditures for administrative time.

Indirect Costs = expenditures to cover department costs.

PT Services = expenditures to cover UMN Extension staff time.

Claims Paid = the total claims paid to producers.

Claims Encumbered = dollars still available to pay claims.

Transferred in = dollars transferred from G47 (elk damage claims).

Transferred out = dollars transferred to G47 to pay elk damage claims.

De-obligated = dollars not expended and returned to funding source.

*Prior to FY2024, funds in F47 were split between claims and grants and only dollars spent on claims were required by the enabling legislation. Beginning in FY2024, funds for claims and grants are intermingled and \$54,095 were paid to grantee's which balances the spending reported for this appropriation.
