Scope and Methodology

This report summarizes and evaluates the finances, basic benefit structure, and investment performance of Minnesota's fire relief associations (relief associations). Relief associations are governmental entities that receive and manage public money to provide retirement benefits for individuals providing the governmental services of firefighting and emergency first response. Relief associations are required under Minn. Stat. chs. 356 and 424A to report annually financial, investment, and plan administration information to the Office of the State Auditor (OSA), and the State Auditor is required to provide a detailed report to the Legislature under Minn. Stat. §§ 6.72 and 356.219.

During 2023, 500 relief associations were required to report to the OSA.¹ This report includes information on all 500 relief associations. The 2022 report included information on 515 of 516 relief associations that were required to report to the OSA that year. Fourteen relief associations transferred their assets to the Statewide Volunteer Firefighter Retirement Plan (SVF Plan), administered by the Public Employees Retirement Association (PERA), and two relief associations dissolved at the end of 2023, resulting in the decrease in the number of relief associations between the 2022 and 2023 reports.

Twenty-one additional relief associations were in the process of joining the SVF Plan and transferred their assets to the State Board of Investment (SBI) in December 2023. Because there were no investments for these relief associations at year-end, certain data will not be included for them in this report.

To obtain analogous comparisons of investment performance, the OSA calculates rates of return for each relief association using a uniform calculation method. Minnesota Statute Section 356.219 requires the OSA to compute and report total portfolio rates of return, net of all costs and fees. Using a uniform calculation method allows for a fair comparison of investment performance among relief associations. Custom benchmark rates of return calculated by the OSA for each relief association provide a standard against which investment performance may be measured for this group. The OSA provides an "Investment Report Card," sent by email to each relief association after review of the relief association's financial and investment reporting forms is completed. The report card provides one-year and multi-year rates of return calculated for the relief association, as well as a custom benchmark rate of return.

This report can be used by relief association trustees and municipal officials to compare their relief associations to those associations with similar plan types. Comparisons can be made regarding rates of return, net assets, funding ratios, and other reporting information. Regional maps are included to assist relief associations in determining average benefit levels, rates of return, and funding ratios for their specific county.

This report also includes investment performance information for the Bloomington Fire Department Relief Association (Bloomington Fire) for the 2023 calendar year. Legislation passed

¹ As of the release of this report, relief associations are submitting required forms and financial data for 2024 to the OSA. The data contained in this report represents the data collected and finalized for the 2023 calendar year filed with the OSA during 2024.

during the 2020 Legislative Session requires local public pension plans with at least \$50 million in assets to report investment information to the OSA in years when the pension plan is not audited by the OSA. Bloomington Fire met these criteria for 2023 so is included in this report.

Note that the methodology used to calculate rates of return for Bloomington Fire may be different than the methodology used by the OSA to calculate rates of return for the 500 relief associations included in this report. This is because Bloomington Fire is required to calculate and report its own rates of return that are not re-calculated by the OSA. A summary of investment information for Bloomington Fire is provided beginning on page 159.

Data tables included in this report provide financial, membership, benefit, and investment information. Table 1 provides a summary of financial and membership data broken out by plan type. Tables 2-A, 2-B, and 2-C show the key financial and investment indicators for each relief association, including net assets and rates of return. The funding ratios and financial requirement components for each relief association are provided in Tables 3-A, 3-B, and 3-C. Tables 4-A, 4-B, and 4-C show the revenues and expenditures for each relief association. Membership and bylaw information are provided in Tables 5-A, 5-B, and 5-C, while benefit amounts are provided in Tables 6-A, 6-B, and 6-C. Tables 7 and 8 provide investment information for each relief association.

Executive Summary

- Relief associations held \$645.2 million in net assets at the end of 2023, representing accrued benefits for 14,899 firefighters. (Pages 7 and 37)
- In 2023, there were 1,054 benefit disbursements to members and their beneficiaries. These disbursements included lump-sum service pensions, monthly service pensions, survivor benefits, and long-term disability benefits. (Page 7)
- A total of \$31.6 million in service pensions was paid out by 252 different relief associations in 2023. (Page 24)
- Other benefits, such as disability and survivor benefit payments, totaled \$1.2 million in 2023. Other benefit payments were paid to members and their beneficiaries by 27 different relief associations (Page 25)
- Investment gains totaled \$80.2 million in 2023, an increase from the \$101.9 million in investment losses during 2022. (Page 11)
- In 2023, the average funding ratio for lump-sum plans was 145.8 percent, an increase from the 2022 average of 134.4 percent. At the end of 2023, 38 relief associations, or 7.6 percent, had a deficit, compared to 80 relief associations in 2022. (Page 27)
- In 2023, relief associations received \$27.0 million in state aid, a 6.4 percent increase from the \$25.4 million received in 2022. (Page 12)
- In 2023, relief associations received \$5.1 million in municipal contributions, a 1.1 percent increase from the \$5.1 million received in the prior year.² Of the \$5.1 million received, \$481,110, or 9.4 percent, was required by statute to be contributed in 2023, compared to the \$260,817 required to be contributed in 2022. This is the tenth consecutive year that the amount of voluntary municipal contributions exceeded the amount of required municipal contributions. (Page 13)
- In 2023, relief associations had an average rate of return of 14.2 percent, an increase from the negative 14.3 percent average rate of return in 2022. The median rate of return for relief associations in 2023 was 13.0 percent. The average rate of return for relief associations that held at least one-half of their assets with the SBI was 17.3 percent. (Pages 17 and 18)
- The average annual rate of return for relief associations calculated over the past 20 years totaled 5.0 percent, equal to the statutory interest rate assumption of 5.0 percent. Over half, or 51.8 percent, of relief associations in existence for the full 20-year period had average rates of return of at least 5.0 percent over the last 20 years. Thirty-five relief associations had average rates of return that were equal to or greater than the SBI's

²The 2022 municipal contributions totaled \$5,073,627. The 2023 municipal contributions totaled \$5,128,786.

Balanced Fund for the 20-year period. The median rate of return for relief associations over the last 20 years was also 5.0 percent. (Page 21)

- In 2023, the average benefit level for lump-sum plans was \$2,594, a 1.3 percent increase from the 2022 average of \$2,560. During 2023, 25.3 percent of the defined-benefit plans that offered a lump-sum service pension increased their benefit level. Of the 108 plans that increased their benefit levels, only 11 relief associations, or 10.2 percent, were not fully funded at the end of 2023. (Pages 28 and 30)
- In 2023, professional fees totaled \$1.8 million, or 71.0 percent, of all administrative expenses. The average for the 308 relief associations that paid professional fees from the special fund in 2023 was \$5,868. (Page 26)

Recommendations

- Relief associations should revisit their investment policies to be sure they still reflect the intended investment goals and objectives. Investment policies should include specific target asset allocations and accurately disclose the investment strategy of the plan. Relief associations should also periodically review their plans' asset allocations to determine if they are in accordance with statutory requirements, investment goals, specific membership profiles, and risk tolerance.
- In general, relief associations should consider investing in balanced portfolios to avoid major investment losses in a single asset class. The investment policy should be crafted and maintained with a long-term investment perspective in mind. Relief associations must be able to withstand the significant losses that occasionally occur in particular asset classes, and trustees should take a long-term view of the performance of these assets. Moving out of certain investments after their value has declined eliminates the chance of benefiting from eventual market recoveries.
- Relief association trustees should understand their fund managers' investment strategies and hold investment advisors accountable for the performance of the assets being managed. Relief association trustees are not relieved of their fiduciary duties by hiring professional consultants or investment advisors. Trustees and members should regularly compare the investment performance of their advisors with the performance of passively managed index funds and other benchmarks.
- Relief association trustees are encouraged to work cooperatively with municipal officials, and municipal officials who serve as trustees on the association board are encouraged to be thoroughly familiar with the association's finances and investment performance.
- Understanding demographics for the relief association as a whole is important when setting benefit levels, formulating investment strategies, and determining liquidity needs. As populations age, relief associations could see an increase in the number and frequency of retirements. Therefore, recruitment and retention become important considerations for relief associations and their affiliated fire departments.
- Relief associations have consistent, on-going funding sufficiencies. When relief associations have a surplus, deferred and retired members who provided service while the plan was accruing assets might view future increases that benefit newer members as unfair. Maintaining a steady funding ratio of near 100 percent as is practicable over time serves the purpose that all retiring members of the relief association will receive an equitable pension benefit. Trustees of relief associations with large sufficiencies should consider increasing benefit levels to reduce surpluses and distribute assets to their members.

Plan Types

A relief association's plan type is characterized by how the plan is funded. Relief associations can either provide defined-contribution retirement plans or defined-benefit retirement plans. A defined-contribution retirement plan, also known as a "split-the-pie" plan, provides a retirement benefit with predetermined funding. The unknown variable for a defined-contribution retirement plan is what a member's benefit amount will be at retirement. The benefit amount is equal to the member's individual account balance at the time of retirement. Members of defined-contribution plans receive equal shares of state and municipal contributions and prorated shares of investment earnings. Individual member account balances vary from year to year based on investment performance, revenues, and expenses. In a defined-contribution plan, investment losses are borne by the members. The members of a defined-contribution plan receive a one-time lump-sum payment when they retire.

A defined-benefit retirement plan provides a retirement benefit in which the actual amount of the benefit is predetermined based on a formula. The unknown variable for a defined-benefit retirement plan is the amount of funding needed to support the predetermined benefits. Benefits are primarily funded through a combination of fire state aid, municipal contributions, and investment earnings. When revenue from one of these funding sources decreases, pressure may be put on the other funding sources to make up the difference. If a relief association experiences investment losses, for example, a municipality may need to increase its contributions to the association so that benefits are sufficiently funded.

Relief associations electing to administer defined-benefit retirement plans are further characterized by how benefits are payable. Defined-benefit retirement plans may either pay benefits as a one-time lump-sum payment or as a monthly payment made from the time of retirement until the member's death.

The majority of defined-benefit relief associations in Minnesota are lump-sum plans, meaning they pay benefits as a one-time lump-sum payment to members upon their retirement. In lump-sum plans, benefits are paid to members based on an annual benefit level in effect at the time of the member's separation from active service and membership. Lump-sum plans are the most common plan type because they are generally easier to administer and have fewer associated administrative costs.

In 2023, only 19 relief associations paid monthly benefits to retirees. Of these relief associations, 18 provide their members with a choice at retirement of receiving a monthly benefit or a lumpsum benefit. One relief association only provides monthly benefits to its members. Monthly benefits are based on the member's years of service and a monthly benefit amount and are paid from the time of retirement until the member's death. These benefits provide continuous monthly income during the firefighter's retirement and can sometimes be paid as monthly survivor benefits. Monthly benefit plans are the least common type of plan due to their complexity and higher administrative costs. In fact, the majority of the relief associations that offer their members a choice of receiving a monthly or a lump-sum benefit have discontinued the monthly benefit option for members as of a specified date.

Demographics

During 2023, there were 14,899 relief association members who were active, inactive, or deferred. Of the 14,899 relief association members, 11,937 were active members. In 2023, there were 1,054 benefit disbursements made to members or their beneficiaries. These disbursements included lump-sum service pensions, monthly service pensions, survivor benefits, and long-term disability benefits.

Figure 1 below shows the number of active members in the 500 relief associations as of December 31, 2023.

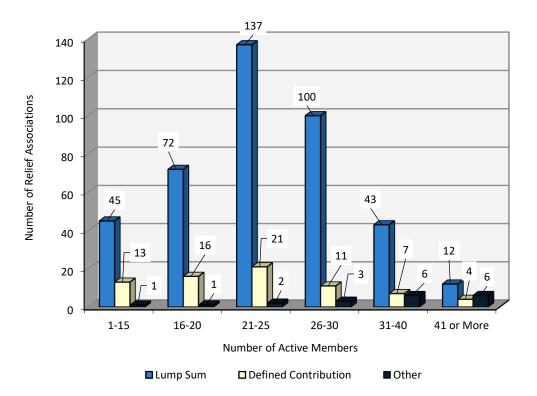

Figure 1: Number of Relief Associations by Active Membership – 2023

In 2023, 28.2 percent of active lump-sum and defined-contribution members had fewer than five years of active service.³ A little over half, or 50.8 percent, of the active members had fewer than ten years of service. For the member data collected from the 464 lump-sum and defined-contribution plans included in this report, 53.7 percent of active members in these plan types would be eligible to receive pension benefits, after the minimum retirement age is met, if they

³ All lump-sum and most defined-contribution plans submit reporting forms to the OSA that contain membership information. Monthly and monthly/lump-sum combination plans are not required to provide the same membership data.

were to retire today.⁴ Slightly less than half, or 46.3 percent, of active members have yet to meet vesting requirements to be eligible to receive a pension benefit.

The active members eligible to receive a service pension may be partially vested or fully vested in their benefits depending on the applicable vesting schedule set forth in each relief association's bylaws. Relief associations may permit full vesting in their bylaws after at least 10 years, but not more than 20 years, of active fire department service. Being fully vested means the member completed the length of service required by the bylaws and will receive the full amount (100 percent) of their earned service pension. Relief associations may also permit in their bylaws partial vesting, which must be at least five years of active fire department service. Partially vested members receive a reduced service pension calculated using the vesting schedule in the relief association's bylaws.

Permitting a shorter vesting requirement is seen by some as a way to help fire departments that are facing challenges in the recruitment and retention of firefighters. The law is permissive, rather than mandatory, and provides relief associations with flexibility to address the needs of their communities.

Figure 2 below shows years of service for the active lump-sum and defined-contribution plan members.

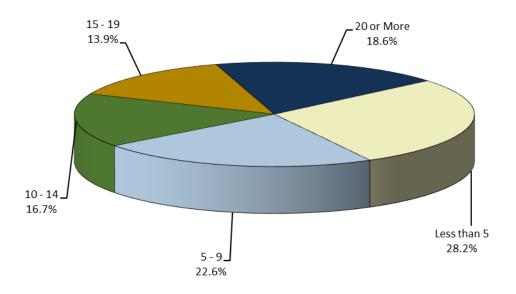

Figure 2: Years of Service for Active Members – 2023

In 2023, the largest age demographic of active firefighters was between 40 and 49, which represented 32.3 percent of all active relief association members. This is a change from the last several reporting years, as the largest age demographic of active firefighters used to be between ages 30 and 39. Approximately 15.3 percent of active members were between 50 and 59, and 6.9 percent were of age 60 or over. Given that the statutory minimum retirement age is 50 years, 22.2 percent of active members have already met this requirement. Understanding

⁴ Seventeen defined-contribution plans are not included in this calculation due to the nature of their reporting.

demographics for the relief association as a whole is important when setting benefit levels and formulating investment strategies. As populations age, relief associations could see an increase in the number and frequency of retirements. Therefore, recruitment and retention become important considerations for relief associations and their affiliated fire departments.

Figure 3 below shows age ranges of the active lump-sum and defined-contribution plan members.

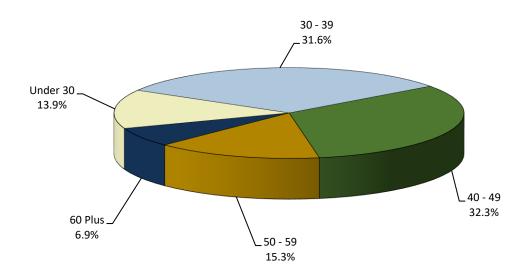

Figure 3: Age of Active Members – 2023

Deferred members are members who have separated from active service and are vested but have not yet met the minimum retirement age to receive a service pension or have not yet requested payment of a service pension. Nearly 44.4 percent of deferred members served for more than ten years of service, but less than fifteen years of service. Of all deferred members, 19.1 percent have served for 20 or more years. Deferred members who are partially vested receive a reduced benefit based upon the relief association's bylaws.

Figure 4 on the next page shows the years of service for deferred lump-sum and defined-contribution plan members.

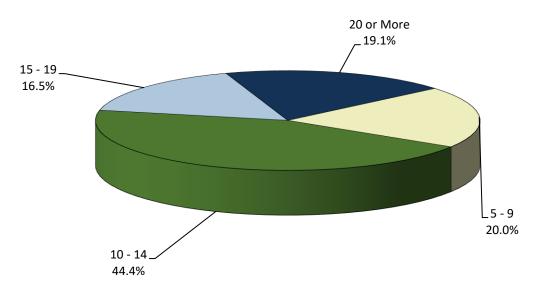

Figure 4: Years of Service for Deferred Members – 2023

For the member data collected from the 464 lump-sum and defined-contribution plans included in this report, 32.8 percent of deferred members in these plans have met the minimum retirement age and would be eligible to receive a pension benefit, if they were to request payment today.⁵ In 2023, the largest demographic of deferred members was between ages 40 and 49, which accounted for 54.2 percent of all deferred members.

Tables 5-A, 5-B, and 5-C on pages 89 through 107 show the minimum retirement age, vesting requirements, and the number of members for each relief association.

⁵ Seventeen defined-contribution plans are not included in this calculation due to the nature of their reporting.

Revenues

For the purposes of this report, relief association revenues are summarized into five categories. The primary sources of revenue for relief associations are state aid, municipal contributions, and investment earnings. Relief associations also receive revenues in the form of reimbursements for supplemental benefits paid and other income, such as donations and transfers.

In 2023, relief association revenues totaled \$113.8 million compared to the negative \$70.2 million in 2022. The significant increase in total revenues was primarily due to the change in investment income, with \$80.2 million in investment gains during 2023, compared to investment losses totaling \$101.9 million in 2022.

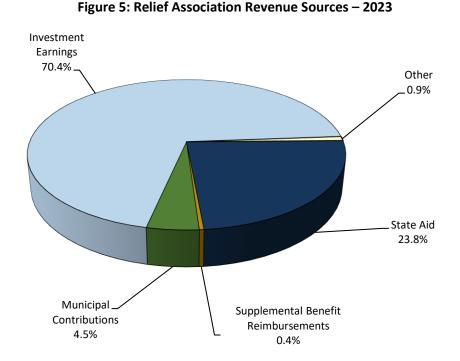

Figure 5 below illustrates the revenue sources for relief associations during 2023.

In 2023, state aid accounted for \$27.0 million of relief association revenue. Municipal contributions totaled \$5.1 million. Relief associations also received \$400,468 from supplemental benefit reimbursements and \$1.1 million from other sources of income.

Figure 6 on the next page illustrates the primary revenue sources for relief associations from 2019 to 2023. Over this five-year period, state aid and municipal contributions remained relatively stable. Investment earnings fluctuated considerably over this time period and had the greatest impact on total relief association revenues.

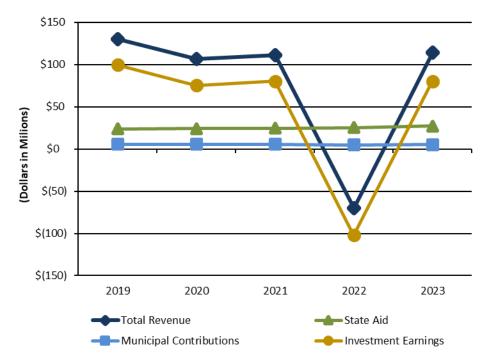

Figure 6: Relief Association Primary Revenue Sources – 2019 to 2023

Tables 2-A, 2-B, and 2-C on pages 41 through 56 show the net asset value for each relief association at the end of 2023 and the ranking by net assets relative to other associations of the same plan type.

State Aid

Fire state aid is derived from a two percent state tax on insurance premiums and is allocated based on the estimated market value of real property in the fire service area and on the population of each fire service area. An additional allocation is given to relief associations with small numbers of active members to maintain a minimum amount of aid. When firefighters are covered by a pension plan, state law generally requires that fire state aid be used for pension purposes.

A supplemental state aid program provides additional funding for fire and police retirement plans. The State of Minnesota appropriates about \$5.5 million annually of this supplemental state aid for relief associations and for firefighters covered by the SVF Plan administered by PERA. The supplemental state aid amount that a relief association receives is equal to the proportionate share that each association receives of fire state aid.

During 2023, relief associations received a total of \$27.0 million in state aid, a 6.4 percent increase from the \$25.4 million received in 2022. On average, an individual relief association received \$54,078 in state aid, representing a 6.4 percent increase from the 2022 average of \$50,847. Only 24.4 percent of relief associations received a state aid amount that was greater than the 2023 average. The average state aid amount for the 409 lump-sum plans included in this report was \$45,005 per plan. The \$18.4 million in state aid received by lump-sum plans made up 68.1 percent of the total state aid disbursed to relief associations. Defined-contribution

plans received a total of \$4.8 million in state aid, with an average of \$66,118 per plan. Monthly and monthly/lump-sum combination plans received \$3.9 million in state aid and averaged \$203,774 per plan. The higher average of state aid for the monthly and monthly/lump-sum combination plans is due to their communities having relatively large populations and relatively high property values, two factors on which the aid allocation is based.

The largest single disbursement of state aid was made to the Maple Grove Fire Relief Association, which received \$622,889. The Plymouth Fire Relief Association received \$613,329. Ten additional relief associations received over \$300,000 in state aid.

State aid amounts varied by region due to variation in property values and the differences in population within the fire service areas. The 59 relief associations in the Metro Area accounted for \$11.8 million, or 43.5 percent, of the total state aid disbursed. The average amount of state aid received by these 59 relief associations was \$199,202 per plan, an increase from the 2022 average of \$177,204. The 94 relief associations in Greater Minnesota affiliated with municipalities having populations over 2,500 received \$8.0 million in state aid. These relief associations received an average of \$84,851 per plan in state aid, an increase from the 2022 average of \$74,402. The 347 relief associations in Greater Minnesota affiliated with municipalities having populations under 2,500 received a total of \$7.3 million in state aid, with an average amount of \$21,067 per plan, an increase from the 2022 average of \$18,790.

Tables 2-A, 2-B, and 2-C on pages 41 through 56 show the 2023 state aid received by each relief association and the ranking by amount of state aid relative to other associations of the same plan type.

Municipal Contributions

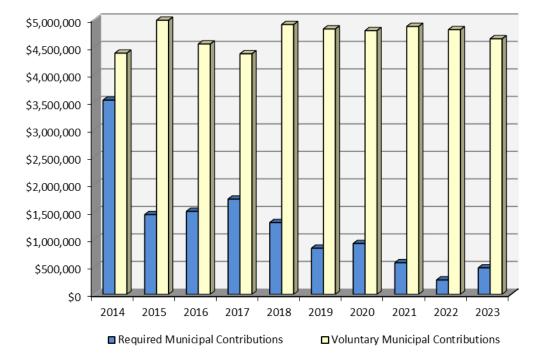

Municipal contributions are contributions to relief associations from cities, towns, and independent nonprofit firefighting corporations. When a municipality approves a relief association's benefit level, the municipality becomes responsible for ensuring that the relief association's Restricted Pension Fund (Special Fund) has sufficient assets to cover the approved benefit level. Contributions may be required by law based, in part, on a relief association's finances, or may be made voluntarily by a local municipality.

In 2023, relief associations received \$5.1 million in municipal contributions, a 1.1 percent increase from the \$5.1 million received in the prior year.⁶ Of the \$5.1 million received, \$481,110, or 9.4 percent, was required by statute to be contributed in 2023, compared to the \$260,817 required to be contributed in 2022. This is the tenth consecutive year that the amount of voluntary municipal contributions exceeded the amount of required municipal contributions.

Figure 7 on the next page shows the total municipal contributions received by relief associations from 2014 to 2023, and illustrates the amounts required by statute to be contributed and the amounts contributed voluntarily.

⁶ The 2022 municipal contributions totaled \$5,073,627. The 2023 municipal contributions totaled \$5,128,786.

The Apple Valley Fire Relief Association received the largest municipal contribution in 2023, at \$348,000. The Maple Grove Fire Relief Association received the next largest municipal contribution, at \$300,813. The average municipal contribution for those relief associations that received one was \$19,726. This is a 1.1 percent increase from the 2022 average of \$19,514.

Municipal contributions as a percentage of a relief association's assets varied significantly. The Ideal Fire Relief Association received a municipal contribution of \$180,000, which made up 9.0 percent of its net assets. The Bruno Fire Relief Association's municipal contribution of \$3,500 made up 8.4 percent of its net assets. In contrast, the municipal contribution that the Apple Valley Fire Relief Association received in the amount of \$348,000, accounted for 2.7 percent of its net assets.

Lump-sum plans received \$3.0 million in municipal contributions, a 0.4 percent decrease from the \$3.0 million received in 2022.⁷ Of the \$3.0 million in municipal contributions made to lumpsum plans, 9.1 percent was required to be contributed. During 2023, 52.1 percent of lump-sum relief associations received a contribution. The Ideal Fire Relief Association received \$180,000, the largest municipal contribution among lump-sum plans. The Elko New Market and Farmington Fire Relief Associations also received a municipal contribution that was at least \$150,000. The average municipal contribution among lump-sum plans that received one was \$13,967 per plan.

Required municipal contributions for monthly and monthly/lump-sum combination plans are calculated by an actuary retained by the relief association, using a statutory formula that is

⁷ The 2022 municipal contributions totaled \$2,986,250. The 2023 municipal contributions totaled \$2,974,955.

different than the statutory formula that is used for lump-sum plans. Monthly and monthly/lump-sum plans received \$973,109 in municipal contributions in 2023. Ten of the 19 monthly and monthly/lump-sum combination plans received a municipal contribution during 2023, averaging \$97,311 per contribution. Typically, monthly and monthly/lump-sum plans have higher municipal contribution amounts as these plans are impacted by the ongoing liabilities of their retired members.

Defined-contribution plans by their nature are fully funded because their liabilities are always equal to their assets. All assets are divided among the plan members, and the value of each member's account rises or falls based on revenues and expenditures to or from the plan. As a result, defined-contribution plans do not require contributions from their affiliated municipality, and any municipal contributions made to a defined-contribution plan are made on a voluntary basis by the municipality.

Total municipal contributions made to defined-contribution plans were \$1.2 million in 2023, a 9.5 percent increase from the \$1.1 million received in 2022. During 2023, 51.4 percent of defined-contribution plans received a municipal contribution, with an average of \$31,911 for those that received one. The average municipal contribution for defined-contribution plans was skewed by the large municipal contributions made to the Maple Grove, Mendota Heights, and West Metro Fire Relief Associations, which were \$300,813, \$209,584, and \$171,506, respectively. The largest municipal contribution of the remaining defined-contribution plans was \$75,000, received by the Longville Fire Relief Association.

Municipal contribution amounts, like state aid amounts, varied by region. Relief associations in the Metro Area received \$2.4 million in municipal contributions, which made up 47.1 percent of the total municipal contributions received. Metro Area relief associations accounted for nearly one-half of all municipal contributions received, even though they make up only 11.8 percent of relief associations included in this report. The average municipal contribution was \$75,418 for Metro Area plans that received one.

Relief associations affiliated with Greater Minnesota municipalities with a population over 2,500 received \$797,897 in municipal contributions, accounting for 15.6 percent of all municipal contributions received. The average municipal contribution for these relief associations was \$14,507.

Relief associations affiliated with Greater Minnesota municipalities with a population under 2,500 received \$1.9 million in municipal contributions, which is 37.4 percent of all municipal contributions received. Of these relief associations, 49.9 percent received a municipal contribution, with the average contribution being \$11,084.

Tables 2-A, 2-B, and 2-C on pages 41 through 56 show the 2023 municipal contribution received by each relief association, and the ranking by amount of municipal contributions received relative to other relief associations of the same plan type.

Investment Allocations, Earnings, and Rates of Return

Relief associations had investment gains of \$80.2 million in 2023, an increase from the \$101.9 million in investment losses in 2022. Lump-sum plans accounted for \$49.1 million, or 61.2 percent, of total investment gains. Investment gains for the 72 defined-contribution plans

totaled \$14.0 million, which made up 17.5 percent of total investment gains. Monthly and monthly/lump-sum combination plans had investment gains of \$17.1 million, accounting for 21.3 percent of total investment gains.

The average asset allocation for relief associations during 2023 was 49.1 percent domestic stock, 7.8 percent international stock, 16.6 percent domestic bonds, 2.4 percent international bonds, 23.4 percent cash, and 0.7 percent other investments. The asset allocation for the SBI Balanced Fund was 60.0 percent domestic stock, 35.0 percent domestic bonds, and 5.0 percent cash. The SVF Plan's asset allocation was 35.0 percent domestic stock, 15.0 percent international stock, 45.0 percent domestic bonds, and 5.0 percent cash.

Figure 8 below shows the 2023 average asset allocation for relief associations compared to the asset allocations held in the SBI Balanced Fund and the SVF Plan. The asset allocations shown in the figure below could result in differences in investment performance.

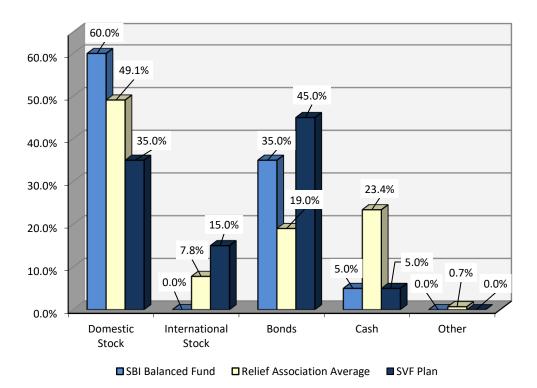

Figure 8: Asset Allocations – 2023

Domestic and international stock were the top-performing asset classes for relief associations in 2023. For the year, domestic stock, as measured by the Russell 3000 Index, returned 26.0 percent. International stock returned 15.6 percent, as measured by the Morgan Stanley Capital International (MSCI) All-Country World Index excluding the United States (ACWI ex. U.S.). Bonds returned 5.5 percent, as measured by the Bloomberg U.S. Aggregate Bond Index. Cash returned 5.0 percent, as measured by the ICE Bank of America U.S. 3-Month Treasury Bill.

Rates of return vary greatly among relief associations. In 2023, relief associations averaged a 14.2 percent rate of return. Investment returns increased significantly from the negative 14.3 percent average rate of return in 2022. The median rate of return for relief associations in 2023 was 13.0 percent. This means that one-half of relief associations had a rate of return exceeding 13.0 percent, while one-half of the plans had rates of return below 13.0 percent. The average rate of return for relief associations in 2023 was 13.7 percent if we exclude those relief associations that were invested solely in cash or cash equivalents.

Figure 9 below shows the 2023 rates of return for the domestic stock, international stock, bond, and cash markets. The 2023 rate of return for the SBI Balanced Fund, the relief association average rate of return, and the 2023 rate of return for the SVF Plan are included for comparison purposes.

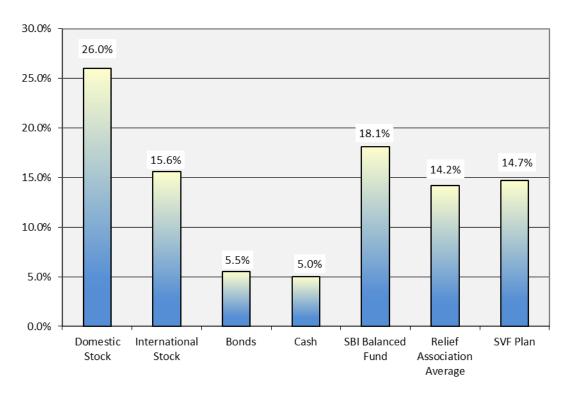

Figure 9: Rates of Return – 2023

The Apple Valley Fire Relief Association had the highest rate of return, at 25.3 percent. The Round Lake Fire Relief Association returned 25.0 percent. An additional 48 relief associations had a one-year rate of return of at least 20.0 percent.

The Balaton Fire Relief Association had the lowest rate of return, at negative 1.6 percent. The Lake Crystal Fire Relief Association returned a negative 0.9 percent, in 2023. Eleven additional relief associations had a rate of return less than 1.0 percent during 2023.

The Apple Valley Fire Relief Association had the highest rate of return among the 59 relief associations in the Metro Area, returning 25.3 percent. The Ramsey and Columbia Heights Fire Relief Associations returned 23.5 and 22.8 percent, respectively. The Miesville Fire Relief

Association returned 6.1 percent for the year, the lowest return of the Metro Area relief associations.

Among the 94 relief associations affiliated with Greater Minnesota municipalities having a population over 2,500, the La Crescent Fire Relief Association had the highest rate of return at 23.3 percent. The Glenwood and Northfield Fire Relief Associations returned 22.2 and 20.0 percent, respectively. The Lake Crystal Fire Relief Association had the lowest rate of return among the relief associations affiliated with Greater Minnesota municipalities having a population over 2,500, returning negative 0.9 percent.

The Round Lake Fire Relief Association had the highest rate of return among the 347 relief associations affiliated with Greater Minnesota municipalities having a population under 2,500, with a return of 25.0 percent. Thirty-nine additional relief associations also had rates of return of at least 20.0 percent. The Balaton Fire Relief Association had the lowest rate of return among the relief associations affiliated with Greater Minnesota municipalities having a population under 2,500, return among the relief associations affiliated with Greater Minnesota municipalities having a population under 2,500, returning negative 1.6 percent.

Twenty-one relief associations transferred their assets to the SVF Plan in December 2023, bringing the total to 238 relief associations that have joined the SVF Plan as of January 1, 2024. Each entity in the SVF Plan has its own separate account, but assets are pooled for investment purposes. The SVF Plan's investments are managed by the SBI and have a long-term expected rate of return of 6.0 percent. The SVF Plan returned 14.7 percent for 2023. Table 7, on page 123, provides the 2023 asset allocation for all relief associations, the SBI Balanced Fund, and the SVF Plan.

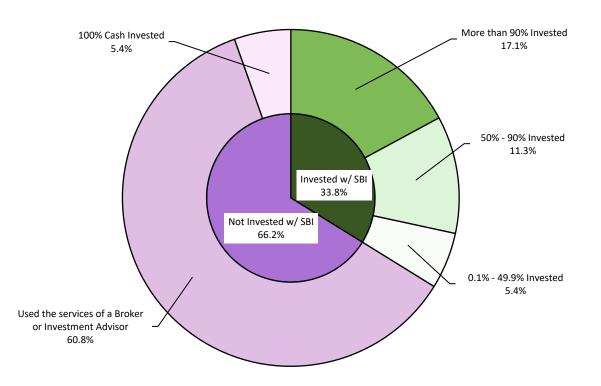

There were 5.4 percent of relief associations solely invested in cash and cash equivalents and not invested with the SBI during 2023 that had an average rate of return of 1.4 percent. These relief associations tend to have lower net asset amounts. Of the 26 relief associations that were invested solely in cash and cash equivalents, 73.1 percent had year-end net asset amounts less than \$275,000.

Over 19.4 percent, or 93 relief associations, met or exceeded the SBI Balanced Fund's rate of return of 18.1 percent during 2023. For these relief associations, the average asset allocation was 68.4 percent domestic stock, 6.3 percent international stock, 15.1 percent domestic bonds, 0.6 percent international bonds, 9.5 percent cash, and 0.1 percent other investments. The average rate of return for these relief associations was 20.4 percent. Of the 93 relief associations that met or outperformed the SBI Balanced Fund's rate of return for 2023, 34.4 percent had year-end net asset amounts of at least \$1,000,000 and 26.9 percent were less than \$500,000.

Of the relief associations included in this report, 28.4 percent held at least one-half of their assets with the SBI. Many relief associations that invest through the SBI also invest with an investment broker or local financial institution for the remainder of their portfolio. The average rate of return for these relief associations was 17.3 percent. The average asset allocations for relief associations that held at least one-half of their assets with the SBI was 59.3 percent domestic stock, 3.8 percent international stock, 18.1 percent domestic bonds, 0.1 percent international bonds, 18.5 percent cash, and 0.2 percent other investments.

How a relief association allocates its assets has a large impact on investment performance and whether the relief association will meet its investment goals. A relief association should periodically review its asset allocation to determine if assets are allocated in accordance with statutory requirements, investment goals, specific membership profile, and risk tolerance.

Figure 10 below shows the percent of relief associations that held investments with and outside of the SBI. The figure further expresses the percentage of relief associations that are solely invested in cash and cash equivalents, use the services of a broker or investment advisor, and have assets invested with the SBI.

Out of all relief associations, 17.1 percent held more than 90.0 percent of its assets with the SBI during 2023. These relief associations had an average asset allocation of 62.0 percent domestic stock, 3.6 percent international stock, 20.5 percent domestic bonds, 0.0 percent international bonds, 13.9 percent cash, and 0.0 percent other investments. The average rate of return for 2023 was 18.3 percent.

Relief associations that held up to 90.0 percent of their assets with the SBI accounted for 16.7 percent of all relief associations. The average asset allocation for these relief associations was 54.8 percent domestic stock, 5.1 percent international stock, 14.7 percent domestic bonds, 0.9 percent international bonds, 23.8 percent cash, and 0.7 percent other investments. These relief associations had an average rate of return of 15.1 percent.

The majority of relief associations, or 60.8 percent, did not hold assets with the SBI and were not solely invested in cash or cash equivalents. The average asset allocation for these relief

associations was 48.3 percent domestic stock, 10.4 percent international stock, 17.5 percent domestic bonds, 3.7 percent international bonds, 19.2 percent cash, and 0.9 percent other investments. These relief associations had an average rate of return of 12.2 percent.

Figure 11 below shows the average asset allocations during 2023 for relief associations that held more than 90.0 percent of its assets with the SBI, relief associations that held up to 90.0 percent of its assets with the SBI, and relief associations that are not invested with the SBI but use the services of a broker or investment advisor.

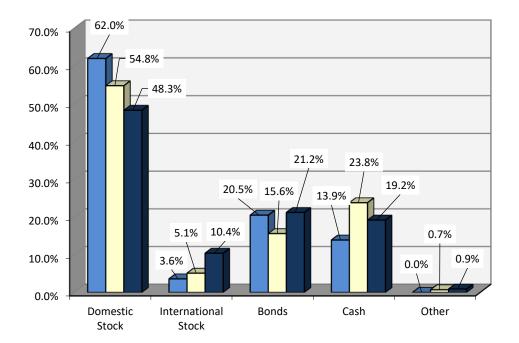

Figure 11: Average Asset Allocations – 2023

Relief associations with more than 90% of assets held with SBI
 Relief associations with up to 90% of assets held with SBI
 Relief associations not invested with SBI nor solely cash

Benchmarks

The OSA calculates a custom benchmark rate of return for each relief association. Benchmarks serve as a standard against which investment performance can be measured. The benchmark return is the return of a hypothetical portfolio of indices invested in similar asset classes, and in the same proportions as the relief association was invested in at the end of 2023. The actual asset allocations at the end of the year were used to calculate the custom benchmark rate of return, as many relief associations do not have target asset allocations in their investment policies. While imperfect, the benchmark return is a good indicator of the returns available to relief associations during the year.

The custom benchmark was calculated by using a standard set of indices for all relief associations. The custom benchmark rate of return may not fully reflect the different investment exposures or diversity of investments held within certain asset classes for many relief associations. Therefore, while a helpful comparison tool, the custom benchmark rate of return may not fully coincide with the calculated rates of return reported for relief associations. The OSA provides an "Investment Report Card," sent by email to each relief association after review of the relief association's financial and investment reporting forms is completed. The report card provides one-year and multi-year rates of return calculated for the relief association, as well as a custom benchmark rate of return.

Table 8, found beginning on page 141 of this report, lists each relief association, its custom benchmark, and its 2023 rate of return. Although the indices used to calculate the benchmarks cannot be invested in directly, investments such as mutual funds and exchange-traded funds that closely track most indices are widely available. These types of investments are a way for relief associations to invest in the markets as a whole.

Asset Class	Benchmark	2023 Return %
Domestic Stock	Russell 3000	26.0
International Stock	MSCI ACWI ex. U.S.	15.6
Bonds	Bloomberg U.S. Aggregate	5.5
Cash	ICE BofA U.S. 3-Month Treasury Bill	5.0
Other	Russell 3000	26.0

The following indices and their respective rates of return are used to calculate the Table 8 benchmarks for each relief association:

Rates of return for 71 relief associations, or 14.8 percent, matched or exceeded their calculated custom benchmark rates of return. For 2023, 73.5 percent of relief associations missed their benchmark by one or more percent. As explained above, the benchmark may not fully reflect the different investment exposures or diversity of investments held within certain asset classes for some relief associations. The benchmark rate of return calculated using the average asset allocation for all relief associations during 2023 was 16.4 percent, which is slightly higher than the average rate of return for 2023 of 14.2 percent.

Long-Term Rates of Return

The 20-year period, from 2004 to 2023, contained 15 years of positive returns for the average relief association. The U.S. stock market, as measured by the Russell 3000 Index, returned 9.7 percent annually, on average, over the 20-year period. The average annual bond market return over the 20-year period was 3.2 percent, as measured by the Bloomberg U.S. Aggregate Index.

The average annual relief association rate of return calculated over the last 20 years was 5.0 percent, equal to the statutory interest rate assumption of 5.0 percent. The median rate of return for relief associations over the last 20 years was also 5.0 percent. Over 51.8 percent of the relief associations in existence for the full 20-year period had a 20-year average annual rate of return of at least 5.0 percent. Over time, failing to keep up with interest rate assumptions may harm the financial health of the relief association and could result in diminished benefit increases or larger required municipal contributions.

The SBI Balanced Fund provides a good example of returns that were available over the 20-year period ending December 31, 2023. This fund had an average annual return of 7.6 percent over the 20-year period. Thirty-five of the 490 relief associations in existence for the full period had a

rate of return that was equal to or greater than the SBI Balanced Fund. The contrasting asset allocations between the average relief association, the SBI Balance Fund and the SVF Plan, shown in Figure 8 on page 16, could result in different investment performances.

The Cherry, Littlefork, and Northrop Fire Relief Associations had the highest average annual rate of return over the 20-year period, at 8.8 percent. Thirty-five additional relief associations had a rate of return of at least 7.5 percent over the same period. The Sedan Fire Relief Association was the lowest-returning relief association over the 20-year period, with an average annual return of 0.3 percent. Fourteen additional relief associations had a rate of return less than 1.5 percent over the same period. No relief association had a negative rate of return for the 20-year period.

Figure 12 below shows the annual relief association weighted average rates of return from 2004 to 2023 and the annual rates of return of the SBI Balanced Fund.

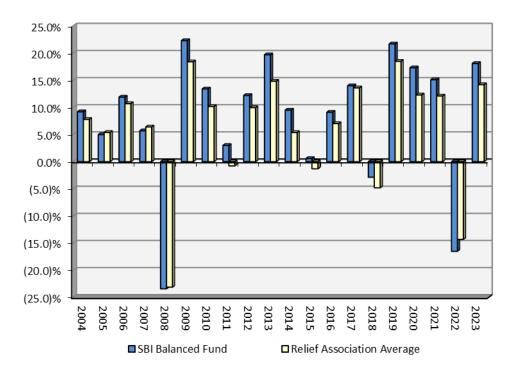

Figure 12: Annual Rates of Return – 2004 to 2023

Table 8, found beginning on page 141, provides the average annual rate of return over the 20year period for each relief association in existence for the full 20-year period and the ranking by rate of return relative to other relief associations.

Investment Management Fees

Financial institutions charge different types of fees for managing investment accounts. It is important for relief associations to understand the fees charged. Fees can reduce earnings and lower account balances over time.

Figure 13 on the next page compares the impact various fee scenarios can have on the performance of a relief association's investment account over time. This is a hypothetical

example for illustrative purposes only and not indicative of any investment plan. The figure assumes an account with a beginning balance of \$200,000, an annual rate of return of 5.0 percent, and no withdrawals. Actual rates of return may vary and will depend on several different factors, including a relief association's choice of investment options. Higher fees can have a significant impact on a relief association's earnings and reduce the value of its account over time.

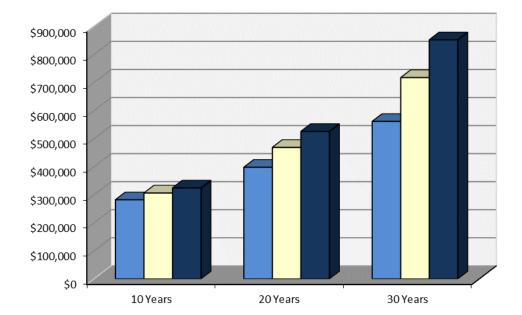

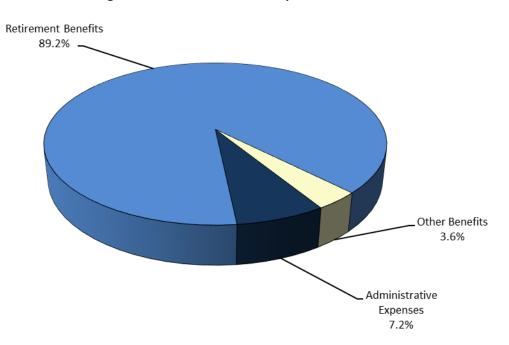

Figure 13: Account Values After Investment Management Fees

Account Balance with a 1.50% Annual Investment Management Fee
 Account Balance with a 0.65% Annual Investment Management Fee
 Account Balance with a 0.05% Annual Investment Management Fee

Expenditures

The primary expenditures for relief associations are service pension (retirement) benefit payments. Other expenditures cover administrative expenses and other benefit payments, which include disability and survivor benefits. Total expenditures for relief associations in 2023 were \$35.4 million.

Figure 14 below illustrates the expenditures for relief associations during 2023.

Benefit Payments

Relief associations exist to pay retirement, survivor, and disability benefits to members and their beneficiaries. These benefits compensate firefighters for their service to the community and assist in the recruitment and retention of volunteers. In 2023, a total of \$31.6 million in service pensions was paid out by 252 different relief associations. The Lakeville Fire Relief Association paid \$2.8 million in service pensions during 2023, the largest amount paid by any one relief association.

A majority, or 81.8 percent, of relief associations are lump-sum plans, meaning that they pay benefits as a one-time lump-sum payment to members upon their retirement. Lump-sum plans paid a total of \$21.2 million in service pensions.

Defined-contribution plans are similar to lump-sum plans in that members receive a one-time lump-sum payment when they retire. The 72 defined-contribution plans paid \$3.5 million in service pensions.

In 2023, only 19, or 3.8 percent, of relief associations offered monthly benefits to retirees. Of these relief associations, 18 provided their members with a choice at retirement of receiving a monthly benefit or a lump-sum benefit. One relief association provided only monthly benefits to its members. The monthly and monthly/lump-sum combination plans paid \$6.9 million in service pensions.

Other benefits, such as disability and survivor benefit payments, totaled \$1.2 million in 2023 and were paid to members and their beneficiaries by 27 different relief associations. Lump-sum plans paid a total of \$418,451 in other benefit payments. Defined-contribution plans paid a total of \$196,694 in other benefit payments, while monthly and monthly/lump-sum combination plans paid a total of \$593,298.

Administrative Expenses

A relief association's Special Fund is a restricted pension fund that receives state aid and municipal contributions and is used to pay for pensions and other benefits. Disbursements from a Special Fund may be made only for purposes expressly authorized by state law. Relief associations are authorized to use Special Fund assets to pay certain administrative expenses. Authorized administrative expenses include audit fees, actuarial and legal fees, office expenses, fidelity bond expenses, officer salaries, and training fees.

In 2023, administrative expenses totaled \$2.5 million, a 3.2 percent increase from the \$2.5 million paid in the prior year.⁸ During 2023, there were 396 relief associations, or 79.2 percent, that used Special Fund assets to pay administrative expenses. The average administrative expense disbursement for these relief associations totaled \$6,426, compared to the 2022 average of \$6,026.

Over 89.8 percent, or 53 relief associations in the Metro Area used Special Fund assets to pay for administrative expenses, with an average disbursement of \$16,658. The median administrative expense disbursement for these relief associations was \$15,504.

Slightly more than 81.9 percent of relief associations affiliated with Greater Minnesota municipalities having a population over 2,500 paid administrative expenses from the Special Fund, with the average disbursement at \$8,464. The median administrative expense disbursement for these relief associations was \$7,847.

Almost 76.7 percent of relief associations affiliated with Greater Minnesota municipalities having a population under 2,500 used Special Fund assets to pay administrative expenses, with an average disbursement of \$3,797. The median administrative expense disbursement for these relief associations was \$2,753.

Professional fees are the primary component of administrative expenses and are made up of audit, actuarial, and legal fees. These fees have grown significantly over the last ten years,

⁸ The 2022 administrative expenses totaled \$2,464,684. The 2023 administrative expenses totaled \$2,544,523.

driven in part by the implementation of new standards prescribed by the Governmental Accounting Standards Board (GASB), by increased operating costs, and by a reduction in the number of firms providing auditing services. The GASB Statement No. 67 went into effect for relief association reports ending December 31, 2014, contributing to the increase in professional fees beginning that year.

Figure 15 below shows the average administrative expenses and professional fees from 2014 to 2023.

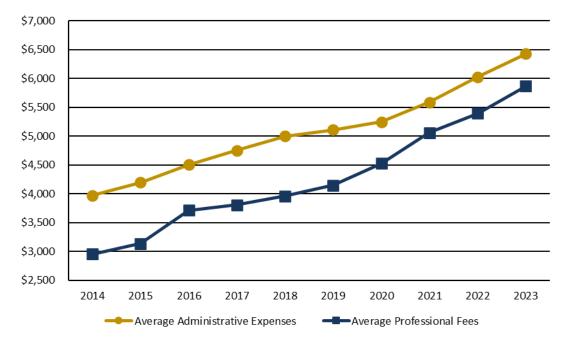

Figure 15: Average Relief Association Administrative Expenses – 2014 to 2023

In 2023, professional fees totaled \$1.8 million, or 71.0 percent, of all administrative expenses. The average for 308 relief associations that paid professional fees from the special fund in 2023 was \$5,868, compared to \$5,398 in 2022.

Relief associations spent \$542,494 on trustee salaries in 2023. Only 205 relief associations, or 41.0 percent, paid trustee salaries from the Special Fund. Nine relief associations reported total salary disbursements from the Special Fund of more than \$10,000.

Tables 4-A, 4-B, and 4-C on pages 70 through 87 show the 2023 benefit and administrative expenses for each relief association.

Health of the Plans

Funding Ratios

Funding ratios are an important measure to consider when assessing the financial health of a relief association. Funding ratios show the relationship between a relief association's assets and its liabilities.

For lump-sum plans in 2023, the average funding ratio was 145.8 percent per plan, an increase from the 2022 average of 134.4 percent. The median presents a more accurate description of the funding for lump-sum plans. The median funding ratio was 130.7 percent per plan, compared to 119.7 percent in 2022. This means that one-half of the lump-sum plans had a funding ratio exceeding 130.7 percent, while one-half of the plans had funding ratios below 130.7 percent. Monthly and monthly/lump-sum combination plans had a 112.6 percent average funding ratio, while their median was 112.4 percent in 2023. Defined-contribution plans are always 100.0 percent funded, as the liabilities are limited to the total plan assets.

Figure 16 below shows the median funding ratio for lump-sum plans from 2014 to 2023.

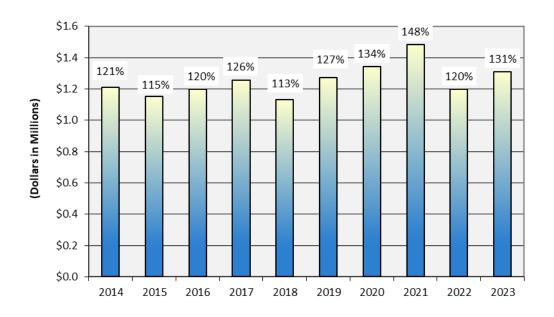

Figure 16: Median Lump-Sum Funding Ratios – 2014 to 2023

During 2023, 381 relief associations, or 76.2 percent, had an increase in their funding ratios from 2022. At the end of 2023, 38 relief associations, or 7.6 percent, had a deficit (a funding ratio below 100 percent), compared to 80 relief associations in 2022. The funding ratios of 47 relief associations decreased from 2022.

Just as low funding ratios can trigger an increase in required municipal contributions, a high funding ratio can pose problems as well. High funding ratios indicate that a relief association's assets are higher than its liabilities. A high funding ratio also suggests that the current benefit level is low compared to the relief association's assets. This is due to the current benefit level having a direct impact on a relief association's accrued liability. In result, relief associations with high funding ratios may be shortchanging current retiring members.

Relief associations may find it hard to maintain high and low funding ratios consistently over time. Continuous required municipal contributions may cause municipalities to become hesitant on approving future benefit increases, for relief associations running a deficit. When relief associations have a surplus, deferred and retired members who provided service while the plan was accruing assets might view future increases that benefit newer members as unfair. Maintaining a steady funding ratio as near to 100 percent as is practicable over time serves the purpose that all retiring members of the relief association will receive an equitable pension benefit.

Figure 17 below shows the benefit level for each lump-sum plan by their funding ratio as of December 31, 2023.

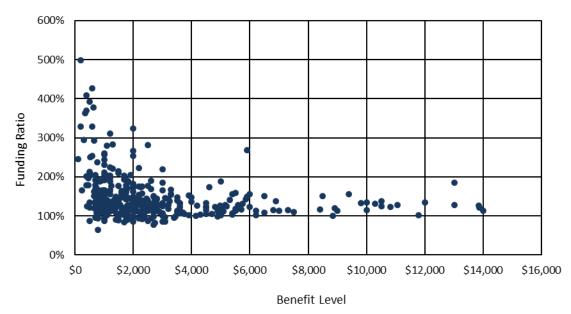

Figure 17: Funding Ratios Versus Benefit Levels – 2023

Tables 3-A, 3-B, and 3-C on pages 58 through 68 show funding ratios for each relief association.

Benefit Levels

Benefit levels vary greatly among relief associations in Minnesota. Typically, relief associations with more assets are able to offer higher benefits to their members. In 2023, the average benefit level for lump-sum plans was \$2,594, a 1.3 percent increase from the 2022 average of \$2,560. Only 32.0 percent of lump-sum plans offered a benefit level higher than the 2023 average of \$2,594. The median benefit level for lump-sum plans was \$1,850 in 2023.

Figure 18 below shows the lump-sum benefit level for the 409 defined-benefit, lump-sum plans at the end of 2023.

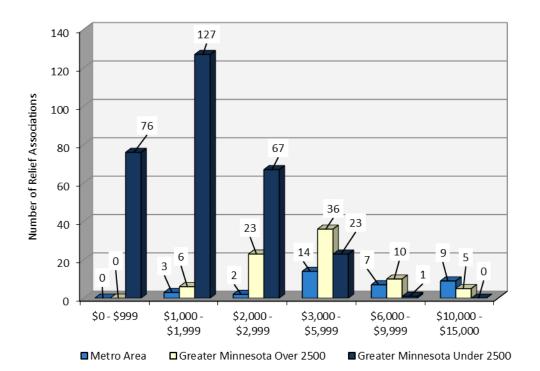

Figure 18: Number of Lump-Sum Relief Associations by Benefit Level – 2023

For lump-sum plans, the Brainerd Fire Relief Association offered the largest benefit level at \$14,000 per year of service. The Inver Grove Heights Fire Relief Association offered a benefit level of \$13,875 per year of service. A member who retired after serving for 20 years with either of these relief associations would receive a \$280,000 and \$277,500 lump-sum benefit, respectively.

The Bruno Fire Relief Association offered a benefit level of \$100 per year of service. The Bigelow and Sedan Fire Relief Associations offered a benefit level of \$200 per year of service. A member who retired after serving for 20 years with these relief associations would receive a \$2,000 and \$4,000 lump-sum benefit, respectively.

For monthly/lump-sum combination plans, the average lump-sum benefit level was \$7,192. The Minnetonka Fire Relief Association offered the largest lump-sum benefit of the combination plans, at \$13,500 per year of service. The Eden Prairie Fire Relief Association offered the next largest lump-sum benefit of the combination plans, at \$12,400 per year of service.

The average monthly benefit level for the 19 monthly and monthly/lump-sum combination plans was \$29 per month, for each year of active service. The Lake Johanna and Eden Prairie Fire Relief Associations offered the highest monthly benefit levels, at \$61 and \$56 per month, respectively, for each year of active service. A 20-year retiring member from either of these relief associations who chooses the monthly option would receive \$1,220 and \$1,120, respectively, every month after retirement for the remainder of the member's life.

During 2023, 25.3 percent of the defined-benefit plans that offered a lump-sum service pension increased their benefit level. The Walker and Brooklyn Center Fire Relief Associations had the largest benefit increases, increasing their benefit levels by \$2,500 and \$2,000, respectively, per year of service. Both relief associations were fully funded after implementing the increase. The Cherry, Minnetonka, Inver Grove Heights, Deer Creek, Waverly, and Hackensack Fire Relief Associations increased their benefit levels by \$1,550, \$1,500, \$1,125, \$1,100, \$1,000 and \$1,000, respectively, per year of service. These relief associations were also fully funded after implementing the increase. Of the 108 plans that increased their benefit levels, only 11 relief associations, or 10.2 percent, were not fully funded at the end of 2023.

The Elmer Fire Relief Association had the largest percentage benefit increase at 300.0 percent, increasing its benefit level from \$250 to \$1,000 per year of service. The Cherry Fire Relief Association had the second largest percentage benefit increase at 129.2 percent, increasing its benefit level from \$1,200 to \$2,750 per year of service. Four additional relief associations also increased their benefit levels by 50.0 percent or more. Of the 108 relief associations that increased their benefit levels, 56.5 percent had an increase of ten percent or less.

During 2023, two relief associations decreased their benefit levels. The Crooked Lake and Argyle Fire Relief Associations reduced their benefit levels by \$500 and \$275, respectively, per year of service.

Tables 2-A, 2-B, and 2-C on pages 41 through 56 show the benefit levels for each relief association.

Regional Analysis

For the reader's convenience, relief association data is summarized by county and analyzed for trends.⁹

Current Trends

Benefit Levels

In 2023, relief associations in Dakota County had the highest average lump-sum benefit level, at \$8,289 per year of service. Relief associations in Hennepin and Scott Counties followed, with average benefit levels of \$8,010 and \$7,429, respectively, per year of service. Relief associations in Aitkin County had the lowest average benefit level, at \$525 per year of service. In 2023, there were 41 counties that had average benefit levels over \$2,000 per year of service, and there were seven counties that had average benefit levels under \$1,000 per year of service.¹⁰ The median average benefit level for all counties was \$1,922.

Funding Ratios

In 2023, relief associations in Aitkin County had the highest average funding ratio, at 286.0 percent. Relief associations in Pipestone and Steele Counties followed with average funding ratios of 202.0 and 199.0 percent, respectively. Relief associations in Carver County had the lowest average funding ratio in 2023, at 92.0 percent. In 2023, the median funding ratio for all counties was 133.0 percent.

Rates of Return

The relief association in Koochiching County had the highest average rate of return, at 22.0 percent. ¹¹ Relief associations in Lake County followed with an average rate of return of 21.0 percent in 2023. Relief associations in Norman County had the lowest average rate of return in 2023 at 4.1 percent. The median rate of return for all counties in 2023 was 13.0 percent.

Long-Term Trends

Relief associations in Koochiching and Lake Counties had the highest 20-year average annual rates of return, at 8.8 and 7.9 percent, respectively. Seventy-five counties had 20-year average rates of return of at least 4.0 percent. The median 20-year average rate of return was 5.0 percent.

Statute defines an assumed rate of 5.0 percent growth for relief associations. Forty-four counties had 20-year average rates of return of at least 5.0 percent. Relief associations in Kittson

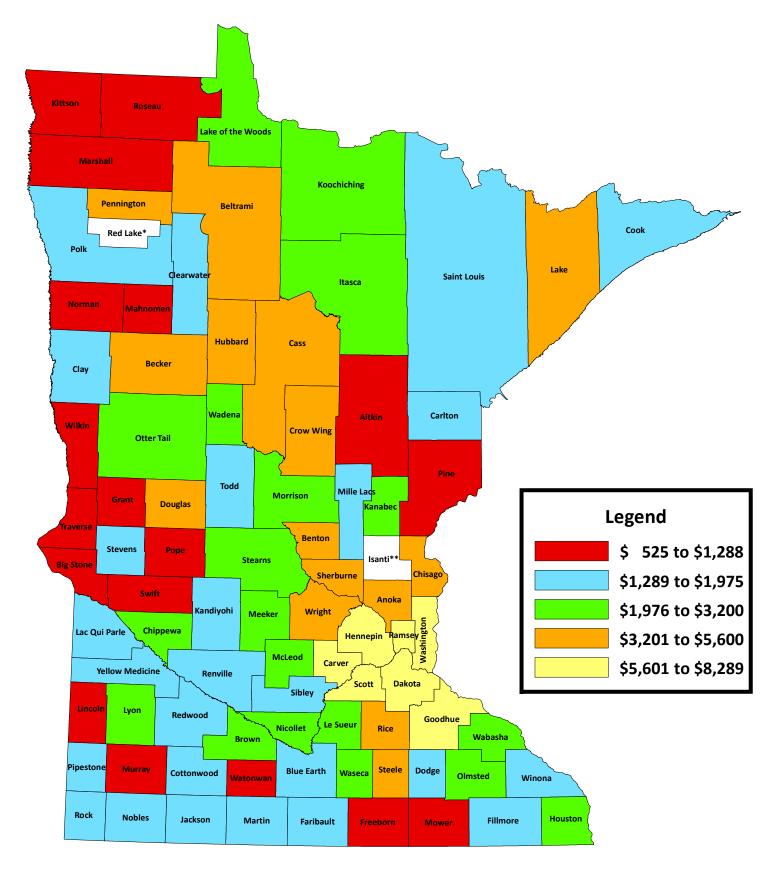

⁹ There are no relief associations in Isanti County. Therefore, there is no data for Isanti County.

¹⁰ There are three relief associations in Red Lake County, and all are defined contribution plans that do not have lumpsum benefit levels. Therefore, there is no average benefit level per year of service for relief associations in Red Lake County.

¹¹ The Littlefork Fire Relief Association is the only relief association in Koochiching County.

County had the lowest average rate of return over the 20-year period at 2.1 percent. Two additional counties had a 20-year average annual rate of return less than 3.0 percent.

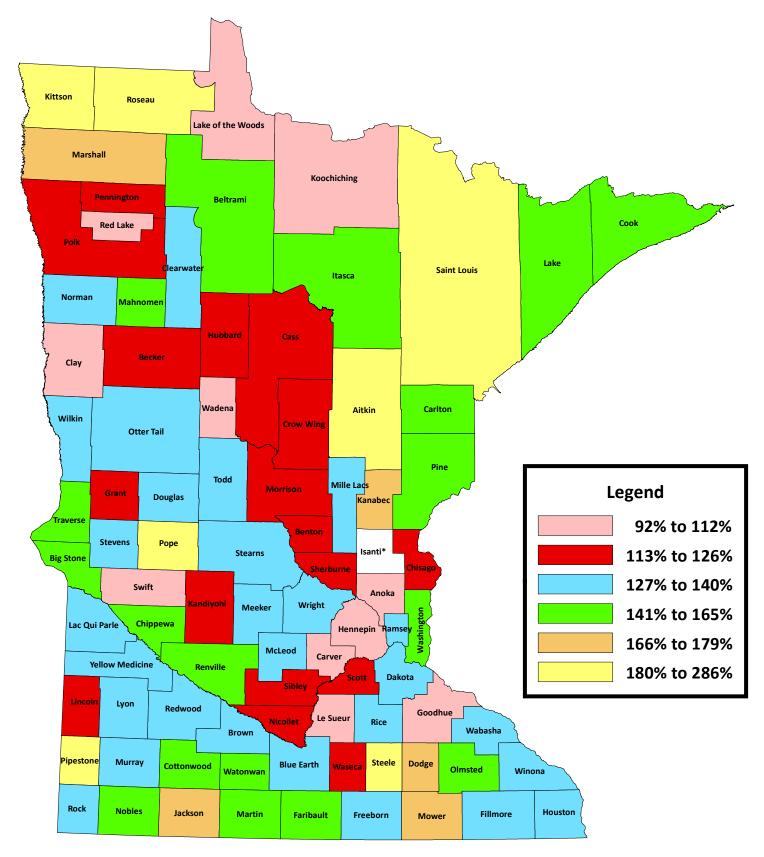

2023 Lump-Sum Benefit Levels Average For Relief Associations by County

*Red Lake County is blank because there only are defined contribution plans in the county.

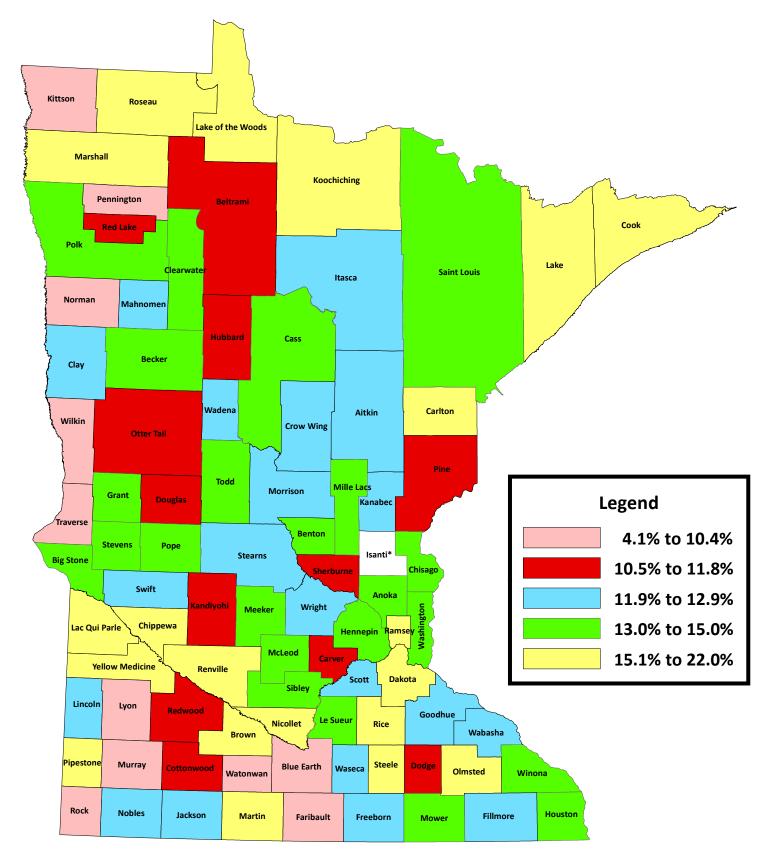

**Isanti County is blank because there are no relief associations in the county.

2023 Funding Ratios Average For Relief Associations by County

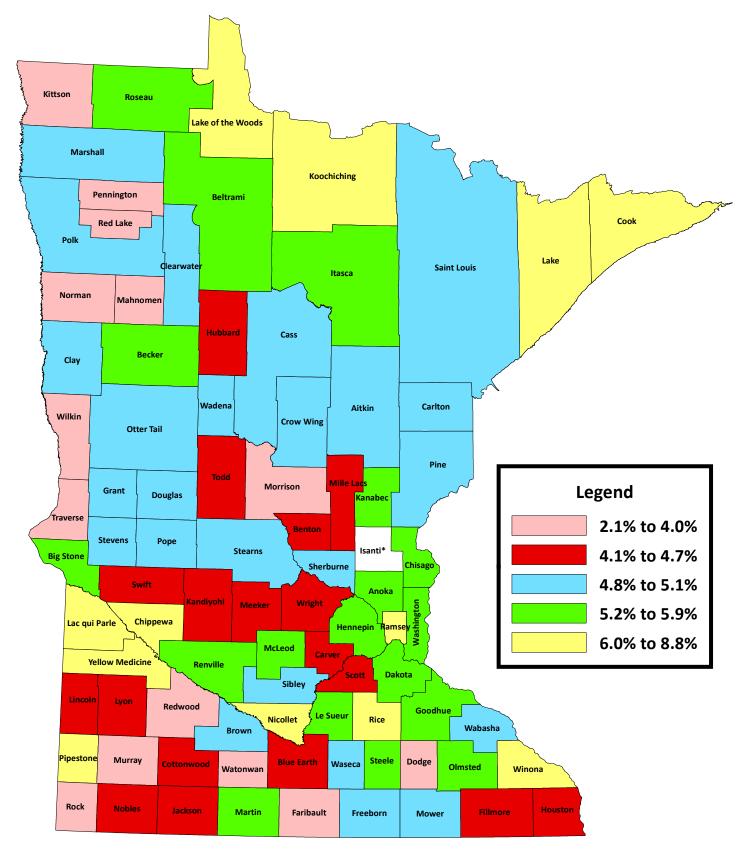

*Isanti County is blank because there are no relief associations in the county.

2023 Rates of Return Average For Relief Associations by County

*Isanti County is blank because there are no relief associations in the county.

2023 Twenty-Year Rates of Return Average For Relief Associations by County

*Isanti County is blank because there are no relief associations in the county.

How to Read Tables 2-A Through 2-C

Tables 2-A, 2-B, and 2-C provide relief association financial and investment data.

Active Members – Active relief association members as of December 31, 2023.

Net Assets – The value of the relief association's Special Fund assets as of the end of 2023. The net assets include any accounts payable or receivable that were outstanding as of December 31, 2023. The net asset value may therefore differ from the market value of the relief association's investments.

Rank (%-ile) – For Net Assets, and for each of the following categories, the relief association is ranked relative to the other associations of the same benefit type. A rank of 0 percent is the lowest, 100 percent the highest. For example, a fire state aid rank of 87 percent means that the relief association received a fire state aid amount higher than 87 percent of the associations of the same benefit type.

State Aid – The amount of fire state aid and supplemental state aid the relief association received during 2023, or payable for 2023 if not yet received.

Municipal Contributions – The amount of city, town, or independent nonprofit firefighting corporation contributions received by the relief association during 2023, or payable for 2023 if not yet received.

Annual Benefit – For lump-sum plans, the amount per year of service in effect at the end of 2023. A retiring firefighter from a lump-sum plan would receive a pension amount equal to the annual benefit multiplied by the completed years of active service. Benefits for members of a defined-contribution plan are equal to the member's account balance. Because the benefits for defined-contribution plan members are not based upon a per-year-of-service amount, there is no applicable pension amount.

Table 2-C provides both annual and monthly benefit amounts. Members for most of the relief associations included in this table have the option of receiving either a lump-sum or a monthly benefit upon retirement. Benefits for members receiving a monthly pension are based on a monthly benefit amount which, when multiplied by the years of service, is the amount a retiring member would receive each month for the rest of his or her life. The annual benefit amount is the amount per year of service in effect at the end of 2023 for members electing to receive their pension in a lump-sum payment.

All pension amounts are subject to reductions if the member had not served the required years of service for full vesting.

ROR 2023 – The rate of return earned on the relief association's investments during 2023.

Funding Ratio – The relief association's December 31, 2023, net assets divided by its accrued liabilities. Over 100 percent means the relief association has more assets than liabilities, while less than 100 percent means it has more projected liabilities than assets.

	Active	Net	Rank	State	Rank	Municipal	Rank	Annual	Rank	ROR	Rank	Funding	Rank

Table 2-C Financial and Investment Data for Other Plan Types For the Year Ended December 31, 2023

A = The total funding ratio is calculated by dividing the total net assets by total accrued liabilities.
 B = The total rate of return is calculated by dividing total investment earnings by beginning of year total investments.
 N/A = Not applicable as this relief association only offers monthly benefits.

How to Read Tables 3-A Through 3-C

Tables 3-A, 3-B, and 3-C provide relief association funding status and contribution requirement information.

Net Assets – The value of the relief association's Special Fund assets as of the end of 2023. The net assets include any accounts payable or receivable that are outstanding as of December 31, 2023. The net asset value may therefore differ from the market value of the relief association's investments.

Accrued Liabilities – An estimate of how much a relief association has accrued in pension benefits payable as of the end of 2023. The estimate is derived using statutory assumptions.

Surplus or (Deficit) – A surplus is the amount of a relief association's net assets in excess of its accrued liabilities. A deficit is the amount of accrued liabilities a relief association had in excess of its assets as of December 31, 2023. A relief association that has a deficit is under-funded, while a relief association that has a surplus is fully-funded.

Funding Ratio – The relief association's assets divided by its accrued liabilities at the end of 2023. Over 100 percent means the relief association had more assets than liabilities, while less than 100 percent means the association had more projected liabilities than assets.

Deficit Amortization Payment – Relief associations that showed a deficit on their 2023 Schedule Form or Actuarial Valuation are required to include this charge when calculating their required contribution. The amortization payment helps bring the relief association closer to being fullyfunded.

Normal Cost – The relief association's cost of existing for one year; in this case, from 2023 to 2024. The normal cost includes the cost of members receiving one additional year of service credit and becoming closer to receiving a fully-vested pension.

Required Contribution – The contribution required from the affiliated municipality or independent nonprofit firefighting corporation during the upcoming calendar year.

					Deficit

* For lump-sum plans, the Deficit Amortization Payment amounts are based on projected amounts as of August 1, 2023, as reported by relief associations on their 2023 Schedule Form.

^ For lump-sum plans, the Required Contribution is obtained from the 2023 Schedule Form and represents amounts to be contributed to the relief association during 2024.

A = The total funding ratio is calculated by dividing the total net assets by total accrued liabilities.

* For monthly and monthly/lump-sum combination plans, the Deficit Amortization Payment amounts are obtained from actuarial valuations or actuarial estimates prepared according to the benefit provisions applicable on December 31, 2023.

^ For monthly and monthly/lump-sum combination plans, the Required Contribution is obtained from actuarial valuation statistics associated with the December 31, 2023, benefit level of the plan, and represents an estimated required contribution for the next budget year. If an estimated required contribution is not provided in the actuarial valuation, it is calculated by reducing the total financial requirements as stated in the valuation by the estimated fire state aid.

A = The total funding ratio is calculated by dividing the total net assets by total accrued liabilities.

How to Read Tables 4-A Through 4-C

Tables 4-A, 4-B, and 4-C provide relief association revenues and expenditures for 2023.

Revenues

State Aid – The amount of fire state aid and supplemental state aid the relief association received during 2023, or the amount payable for 2023 if not yet received.

Supplemental Benefit Reimbursements – The total amount received in reimbursements from the State of Minnesota for the mandatory additional 10 percent (up to \$1,000) payment for lump-sum service pensions and the 20 percent (up to \$2,000) payment for lump-sum survivor benefits. Supplemental benefits are additional benefits that are paid at the time of the pension or benefit disbursement and are meant to help offset state income taxes that must be paid on relief association benefits.

Municipal Contributions – The amount of city, town, or independent nonprofit firefighting corporation contributions received by the relief association during 2023, or payable for 2023 if not yet received.

Investment Earnings – The net interest and realized and unrealized gain (loss) on investments during 2023.

All Other – All other income received by the relief association during 2023, which includes, but is not limited to, donations, transfers from the General Fund, and other income.

Expenditures

Administration – Expenses paid for items such as salaries, training, audit, actuarial and legal fees, and fidelity bonds. It also includes any other uncategorized expenditures.

Service Pensions – The total of all service pension disbursements during 2023, including lumpsum and monthly distributions.

Other Benefits – The total of all non-service pension benefit distributions during 2023, including short- and long-term disability payments and survivor benefits.

Table 4-CRevenues and Expenditures for Other Plan TypesFor the Year Ended December 31, 2023

How to Read Tables 5-A Through 5-C

Tables 5-A, 5-B, and 5-C provide information regarding relief association membership and bylaw provisions in effect at the end of 2023.

Active Members – Active members in the relief association as of December 31, 2023.

Lump-Sum – Retirees who received a lump-sum pension during 2023.

Survivor – Survivor benefits paid during 2023.

Disability – Disability benefits paid during 2023.

Monthly – Retirees or beneficiaries receiving a monthly service pension during 2023 (for Other Plan Types only).

Deferred Members – Members no longer active in the fire department or relief association who are entitled to, but have yet to receive, a service pension.

Minimum Retirement Age – The minimum age at which a member may receive a service pension distribution. State law requires that members be at least age 50 to receive payment of their service pension.

Active Service – The minimum years a member must serve with the affiliated fire department before becoming eligible for a service pension.

Active Membership – The minimum years a person must be a member of the relief association before becoming eligible for a service pension.

Treasurer – The amount of the treasurer's faithful performance bond. By law, it must be ten percent of assets, although the amount of the bond need not exceed \$500,000.

Secretary – The amount of the secretary's faithful performance bond, if applicable. State law does not require that the secretary be bonded.

How to Read Tables 6-A Through 6-C

Tables 6-A, 6-B, and 6-C provide information regarding the benefits offered by each relief association during 2023.

Annual Benefit – The service pension amount payable per year of active service. For defined-contribution plans, the pension amount is based on the member's account balance.

Monthly Benefit – The service pension amount payable per month, for each year of active service.

Long-Term Disability – The amount and type of benefit available for members who separate from service with a long-term disability. "Y/S" means the amount paid per year of active service, while "M/S" means the amount paid monthly for each year of active service.

Short-Term Disability – The amount and type of benefit for members who are temporarily unable to serve because of a short-term disability.

Survivor Benefit – The amount and type of benefit paid on behalf of a deceased member. "Y/S" means the amount paid per year of active service, while "M/S" means the amount paid monthly for each year of active service.

Savage	8,240	44	8,240	Y/S	25	week	8,240	Y/S
Worthington	3,039	18	-	-	-	-	3,039	Y/S

*Due to space limitations, certain benefit bylaw provisions cannot be summarized in this Table. All benefit levels are rounded to the nearest whole dollar.

M/S = Per Month, Per Year of Service

Y/S = Per Year of Service

N/A = Not applicable as this relief association only offers monthly benefits.

How to Read Table 7

Table 7 provides relief association investment information.

Market Value – The value of the relief association's Special Fund investments as of December 31, 2023.

Assets at SBI % – Percentage of the relief association's investments held in the State Board of Investment's Supplemental Fund.

Allocations as of 12/31/2023 – Percentage of the relief association's investments that are held in each asset class. "Other" includes all investments besides cash, stocks, and bonds, including small allocations to this asset class within mutual funds.

A = The general target asset allocations for the SBI Balanced Fund and the SVF Plan are displayed in Table 7 as a reference. The actual asset allocations at year-end may vary slightly from these targets.

B = These relief associations joined the SVF Plan on January 1, 2024. The assets of these relief associations were transferred to the State Board of Investment at the end of 2023, so there were no market values or asset allocations for these associations.

How to Read Table 8

Table 8 provides relief association investment information.

Market Value – The value of the relief association's Special Fund investments as of December 31, 2023.

Assets at SBI % – Percentage of the relief association's investments held in the State Board of Investment's Supplemental Fund.

Rates of Return

2023 – The return on the relief association's investments for calendar year 2023.

2023 Benchmark – The return on a hypothetical portfolio, explained in detail below.

Above (Below) Benchmark – The 2023 Return minus the Benchmark Return. This figure shows how the relief association performed compared to its benchmark.

5-Yr – The relief association's average annual return from 2019-2023.

10-Yr – The relief association's average annual return from 2014-2023.

20-Yr – The relief association's average annual return from 2004-2023.

Rank (%-ile) 20-Yr Return – The relief association's ranking by its 20-year return. The highest 20-year average annual return is ranked at 100 percent, while the lowest 20-year average annual return is ranked at 0 percent. For example, a 75 percent rank means the relief association's average annual return is higher than the return earned by 75 percent of relief associations.

Benchmark Return

The benchmark return is included as a comparison tool for relief associations. The benchmark return shows what the relief association could have earned, had it invested its assets passively for the entire year. Passive investment means using index funds that track a specific index. Index funds are widely available for stocks and bonds. For cash, a relief association could have invested in a proven money market fund or shopped for the highest-returning certificates of deposit.

The benchmark return is calculated for each relief association by multiplying the association's asset class proportions by the rate of return earned on a common benchmark index for each asset class. If a relief association changed investment strategies during the year, the calculated benchmark return will not reflect the changes.

December 31, 2	023,			
Asset Allocatio	on	Benchmark	Return	(a) x (b)
	(a)		(b)	(c)
Domestic Stock	20.9%	Russell 3000	26.0%	5.4%

Benchmark Calculation Example

Common Benchmark Indices

Russell 3000 Index – A measure of the overall U.S. stock market. This index includes the 3,000 largest publicly-traded U.S. companies.

MSCI ACWI ex. U.S. Index – A measure of the performance of international stocks, including developed markets and emerging markets. This index does not include the U.S. stock market's performance.

Bloomberg U.S. Aggregate Bond Index – A measure of the performance of the U.S. investmentgrade bond market, including corporate and government bonds.

ICE BofA U.S. 3-Month Treasury Bill – A measure of short-term cash investments.

A = These relief associations and the SVF Plan did not exist for either the full five-year, ten-year, or twenty-year period during which the rates of return were calculated.

B = These relief associations joined the SVF Plan on January 1, 2024. The assets of these relief associations were transferred to the State Board of Investment at the end of 2023, so there were no market values or asset allocations for these associations.

C = The total rate of return is calculated by dividing total investment earnings by beginning of year total investments.

Bloomington Fire Department Fire Relief Association

The Bloomington Fire Department Relief Association (Bloomington Fire) consists of retired and active firefighters of the City of Bloomington. Bloomington Fire is the administrator of a single-employer defined-benefit pension plan available to firefighters, which was established April 1, 1947. Bloomington Fire is governed by a Board of Trustees made up of six members elected by the members of the plan for three-year terms, one elected City official, one elected or appointed City official, and the Fire Chief, who serve as ex officio voting members of the Board.

Rates of Return

Bloomington Fire returned 14.2 percent in 2023, exceeding its benchmark return of 12.7 percent. The plan's market value increased over \$21.0 million from 2022, ending in 2023 at about \$217.8 million.

The rates of return over the last ten years have remained fairly consistent despite three years of limited or negative growth in 2015, 2018, and 2022. Bloomington Fire had a ten-year return of 7.0 percent, exceeding its actuarial assumed rate of return of 6.0 percent.

Funding Ratio

Funding ratios show the relationship between a plan's assets and its liabilities. Over 100 percent means the plan had more assets than liabilities, while less than 100 percent means the plan had more projected liabilities than assets. A plan's liabilities are calculated by an actuary using statutory assumptions based on historical data. Examining the ratio between assets and liabilities can help determine how well funded the plan is, whether additional contributions to the plan will be needed, and whether future benefit increases would be sustainable. Investment returns, contributions, actuarial assumptions, plan provisions, changes in benefit levels, and historical funding issues are all factors that affect the financial health of the plan.

In 2023, the funding ratio for Bloomington Fire was 116.4 percent. Over the last ten years, the funding ratio for Bloomington Fire has increased 2.7 percent.

How to Read the Bloomington Fire Plan Summary

The plan summary for Bloomington Fire contains various acronyms and investment terms that are defined below.

Rates of Return (ROR)

Plan One-Year ROR - The pension plan's return on its assets as calculated by the plan or its consultant. *Note: The rate of return for Bloomington Fire is provided by the entity and is not recalculated by the OSA.*

Benchmark ROR - The rate of return of a hypothetical portfolio invested in the plan's chosen benchmark components in the percentages dictated by the plan's investment policy. Although not perfect, it is a good measure of what return the plan could have achieved during the year.

Actuarial Assumed ROR - The rate of return required for the plan to meet its actuarial assumptions.

Three-, Five-, and Ten-Year ROR - The average annual returns earned by the plan over the specified time period, as reported by the plan. *Note: The rates of return for Bloomington Fire are provided by the entity and are not re-calculated by the OSA.*

Asset Class

Asset class is a group of similar investments, such as domestic equity, bonds, cash, or alternative investments. Pension plans invest in different asset classes for diversification purposes. When returns for one asset class decline, another may increase, offsetting the loss. In this report, any account or fund that holds investments from more than one asset class is reported as its own asset class.

Benchmark Components and Rates of Return

Benchmark components are the different indices to which the plan compares its investments. Indices track different asset classes, such as domestic equity or bonds. They may also track subsets of an asset class. To evaluate investment performance, it is important to use appropriate indices. The rates of return for each benchmark component are also provided.

Policy Asset Allocation

Policy asset allocation is the percentage allocated to each asset class in the investment policy.

Actual Asset Allocation

Actual asset allocation is the percentage of investments that are held in each asset class as of December 31, 2023.

Beginning Market Value/Ending Market Value

The market value is the price as determined by buyers and sellers in an open market. The dollar amount in the asset class or investment as of the beginning/end of 2023 is the beginning market value/ending market value.

Net Cash Flows

Net cash flows are the net amount of cash (or securities) deposited or withdrawn from the asset class or investment during the year.

Investment Return

Investment return is the net amount of interest, dividends, and appreciation or depreciation the asset class or investment gained or lost during the year.

Rate of Return

Rate of return is the net (after fees) return of the asset class or investment during the year.
