Legislative Charge

The legislative charge is to report on district class size ratios as outlined in [Minnesota Statutes 2023, section 126C.12, subdivision 7](#):

A school district must annually report the district's class size ratios by each grade to the commissioner of education in the form and manner specified by the commissioner. The department must annually submit a report beginning December 1, 2024, to the chairs and ranking minority members of the legislative committees with jurisdiction over kindergarten through grade 12 education detailing the statewide ratios by grade starting with the 2023-24 school year.

Executive Summary

Class size ratios are of public interest because research has shown there to be a relationship with student academic achievement. Class size ratios are also indicative of workload on teachers and other educators. This legislative report requires reporting on class size ratios by grade level. However, calculating and reporting on how many students are in a classroom with a teacher (or teachers) at a time is not simple, especially when reporting by grade level. Many classes and teacher assignments actually include multiple grade levels.

This report provides data using three methods: student to teacher ratios using the October 1 student enrollment counts and teacher full time equivalents (FTEs), course enrollment reported to the Minnesota Common Course Catalogue (MCCC) by academic area and instructional method, and a survey sent to all districts for those who did not have complete MCCC data. Both the student to teacher ratio and survey data indicate that the average class size ratio is higher for higher grade levels. When looking at the MCCC data, there are no clear patterns to average class sizes across all schools and reporting districts. Overall, there is variability in class size ratios across districts in Minnesota.

Introduction

The importance of student-teacher ratios in classrooms and its impact on student achievement has been of interest for decades (Glass & Smith, 1979; Cooper, 1989; Finn & Achilles, 1999; Filges, Sonne-Schmidt, & Nielson, 2018). Researchers have indicated that the number of students served by a teacher may also impact teacher retention (Schnorr, 1995; Price & Ernest Jr., 2008). Although there is public interest in the average class size, Minnesota has never had a systematic annual collection and reporting of the information prior to this legislative report.

This report provides several methods to look at class size ratios by grade level or grade level groupings. Determining the actual number of students served at a time by a teacher based on grade level is complicated. Many classes, especially in the middle and high school years, are not taught to students in only one grade level. Some students also do not stay in the same grade level throughout the entire enrollment in a course. Additionally, many teachers may have an assignment that covers multiple grade levels and it is not possible to

be sure what percentage of their time is spent with each grade level. Finally, some academic areas tend to have larger course enrollments than others and a single average class size may hide important differences. Districts also have varying views of which courses and which schools should be included in district-level reporting for average class size ratios.

Overall, the student to teacher ratios method finds that the average class size gets larger as grade level increases. Data provided about average course sizes by school, academic area and course instructional method from the Minnesota Common Course Catalogue (MCCC) show a high variability across schools and districts. The survey data showed slightly higher average class sizes for higher grade levels when comparing elementary, middle and high school grade levels.

Analysis

This legislative report must report on class size ratios by grade level. However, because many schools have multi-grade classrooms these ratios may not represent how many students are actually in a class with a teacher at a time. Therefore, the Minnesota Department of Education (MDE) collected and prepared data for this report using multiple methods in order to increase the utility of this report. The first method was to use the student enrollment data reported to the Minnesota Automated Reporting Student System (MARSS) in combination with the staffing assignment data reported to the Professional Educator Standards and Licensing Board (PELSB) through the Staff Automated Reporting System (STAR) to create student to teacher ratios by grade level. The second method was using data districts report on course enrollments to the Minnesota Common Course Catalogue (MCCC) to determine average class size. Because many schools have multi-grade classrooms and there are different enrollment practices by subject area, the data from MCCC are not reported by grade level, but instead by subject area and grade groupings. For districts, charter schools and other local education agencies (LEAs) who did not have sufficient data reported to MCCC in time for this legislative report, MDE also sent out a survey asking for data on average class size by grade level.

Student to Teacher Ratios

The student counts used for this method were the official October 1, 2023, student counts based on the fall submission of MARSS. By using the October 1 data, we ensure that each student is only counted at one district and consistent logic is used for determining grade level for the student for the year. These data are subject to all validations used for MARSS reporting and specifically the October 1 counts. For some schools or districts, the October 1 counts may not represent the overall number of students served during the year. This is especially true for schools and districts who focus on support services (e.g., special education) or specific types of programming (e.g., alternate learning centers).

The staff full time equivalent (FTE) data are pulled from the fall submission of the STAR staff assignment data reported to PELSB that represent staffing on October 1, 2023. These data are subject to all validations used for STAR reporting. Because the staff assignments are for all licensed professionals, we only used assignment codes which PELSB has identified as representing a teaching assignment and only included those that represented

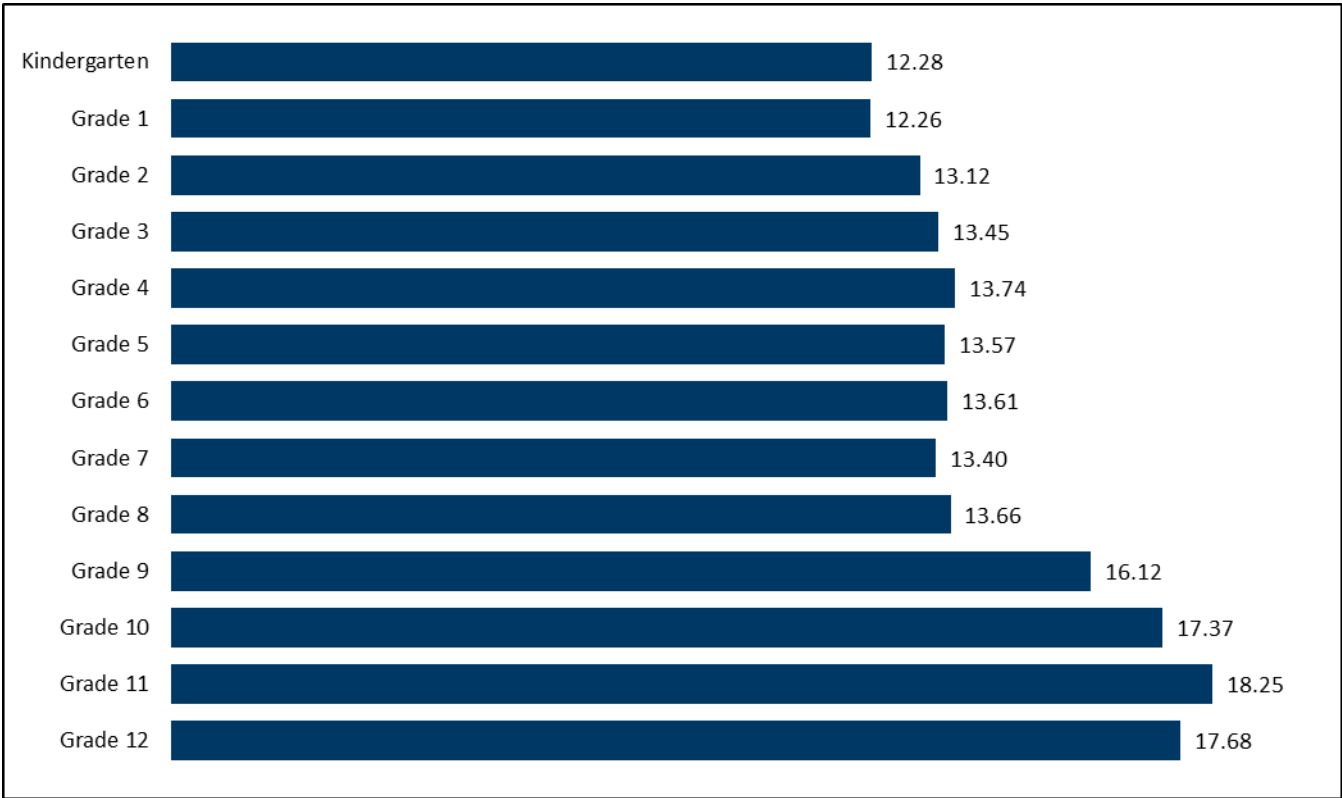

teaching assignments in grades K-12. The assignment codes used were those between 745 and 792, between 10000 and 899999, or 690, 1050 and 9095.

For the staff assignments that only represent one grade level, the FTE of those assignments was put into the total FTE for that grade level. For assignments that represent multiple grade levels, multiple methods were used to determine what fraction of the assignment FTE would be assigned to each grade level. First, we merged the staff data and enrollment data at the school level. Then, we evenly split the FTE for the assignment across the grades that had actual October 1 enrollment in them. If there was no enrollment data at the schools for the grades the assignment represented, we split the FTE equally across all grades the assignment could represent at the district level.

For some districts, charter schools or other LEAs, the data may not make sense in conjunction with the student enrollment data. The most common reasons PELS has identified are that districts and charter schools forgot to report staff assignments, they did not update their staffing data from the previous year’s submission, they reported data to the incorrect school number, and that on October 1 they were using a short call substitute teacher because they were still trying to fill the position.

The average student to teacher ratio by grade level at the statewide level is presented in the graph below. Generally, the average ratios increased by grade level.

Figure 1. Bar graph showing average student to teacher ratio by grade level at the statewide level.

The data are available by district, charter school or other LEA in [Appendix A](#).

Minnesota Common Course Catalogue (MCCC)

The Minnesota Common Course Catalogue (MCCC) is a course classification and data collection system intended to provide uniform information about courses that are taught by Minnesota teachers and completed by Minnesota students. It is a mandatory data submission, though not all districts, charter schools and other local education agencies (LEAs) comply. In order to increase MCCC participation and reduce the reporting burden for schools and districts, MDE has worked to simplify reporting MCCC. Beginning with the 2023-24 school year, MCCC data is collected through [Ed-Fi](#).

To be able to use MCCC data for this report, MDE communicated an accelerated timeline for data submission compared to previous years, requesting that all data be submitted by October 1, 2024. While the use of Ed-Fi did improve overall reporting to MCCC, the change also led to some challenges in reporting. For example, there were delays with some student information system vendors' ability to send the data through Ed-Fi during the first year of implementation. For LEAs who were impacted by these challenges, a survey was sent to collect data for use in the report, as described below.

This report uses the K-12 course information that was reported in the areas specific to academic standards: arts, English language arts, mathematics, physical education and health, science and social studies. To determine average class size, we used the number of students reported in each course, section and term reported to MCCC. Because so many courses are taught across grade levels, we report data at the school level and report which grade ranges are served by each school.

From previous work looking at MCCC data, we know that courses taught online and courses in specific types of arts categories tend to have higher counts of students enrolled. Therefore, we split the arts data into the arts categories for reporting and pulled out online courses to report separately in [Appendix B](#). In all tables in [Appendix B](#) we report the minimum and maximum number of students taking a class in the academic area or arts category as well as the mean and median.

School data is only reported for LEAs who had course enrollment data for at least 80% of the students reported as enrolled through the Minnesota Automated Reporting Student System (MARSS) during the 2023-24 school year. Using this criterion means that not all schools in an LEA had course data provided. The schools which are not included in [Appendix B](#), but are part of LEAs which are included in [Appendix B](#) are listed in [Appendix C](#).

When examining the data provided, some of the course enrollments seemed unlikely to be accurate. For example, online schools who did not report that the course was taught online or LEAs reported large numbers for an average class size. The MCCC Product Manager is actively reaching out to LEAs to ensure they are aware of the possible anomalies for corrections prior to when MCCC data can no longer be updated and in future years. All data included in the report is based on MCCC information submitted by October 20, 2024.

Survey Data

For LEAs who did not have sufficient data reported via MCCC by October 1, 2024, an email was sent to the district, charter school, or other LEA's superintendent or director as well as their Identified Official with Authority (IOWA) with a link to a survey. The survey asked them to provide their average class size by grade level

by October 15, 2024. The initial email was sent on October 2, 2024, and a reminder email was sent on October 8, 2024, for districts, charter schools and other LEAs who had not yet responded to the survey. For charter schools who had not yet responded to the survey by October 10, 2024, their authorizers were contacted and asked to follow up with the districts to ensure the survey was completed by the due date. For districts and other LEAs who had not yet responded to the survey by October 10, 2024, MDE employees called each one on October 10 and October 11, 2024, to ensure they knew about the required survey and the due date. On October 15, 2024, any non-reporting charter schools were also contacted by phone.

When completing the survey, several districts and charter schools appeared to not have correctly understood what data was requested. These responders provided data that appeared to be the total number of students enrolled in a grade level. MDE followed up with the person who had submitted the survey to allow them the opportunity revise their data to represent the class size ratios by grade level by October 18, 2024.

During the survey window, several districts updated the data they reported to MCCC data to a level considered sufficient for use in this legislative report. For these districts, if they submitted a survey that information is also reported in addition to the MCCC data in [Appendix D](#).

While the survey asked the data to be reported to one decimal, many only reported in whole numbers and others reported to more than one decimal. If more than one decimal was reported, the provided data was rounded to reflect only one decimal place. Additionally, the survey asked for not applicable (N/A) to be entered for any grade level not served by the district, charter school or other LEA. Some respondents entered zero in these situations. For this report, all zeroes were updated to be N/A if the district, charter school or other LEA did not serve that grade in the 2023-24 school year. Respondents were also provided the opportunity to include comments about how they determined their average class size. These comments are provided along with the data reported via the survey in [Appendix D](#).

While most districts did respond to the survey as required, there were 20 districts who did not respond despite the multiple attempts to inform them of the requirement. These districts are included in [Appendix D](#), but the data is reported as NP because it was not provided (NP). An additional four charter schools are not reported because they closed prior to the survey list being generated.

Conclusion

Class size ratios are an important indicator of teacher workload and student experience. However, there is not one standard way used to report this information. Overall, it appears that the average class size ratio increases as grade levels increase. However, there is a lot of variability between schools and districts and within academic areas in schools and district.

Appendix A: Student to Teacher Ratios

This appendix contains tables which present each district and the state's total number of students enrolled by each grade on October 1, 2023, the full time equivalent (FTE) of teachers serving that grade on October 1, 2023, and the student-to-teacher ratio of those two data points. If a grade level had no students served or any teachers whose assignments indicated they were teaching that grade, the student count, FTE and ratio columns are all reported as not applicable (N/A). If there were teachers whose assignments indicated they were teaching that grade level, the FTE is reported.

Appendix B: Average Class Size by Subject Area

The tables below show the course data reported to MDE by October 20, 2024, for the 2023-24 school year. The data are provided at the school level because many schools report mixed grade classes. The minimum and maximum grade levels served in K-12 at each school are listed for contextual information. The data presented are for courses addressing current academic standards: arts, English language arts, mathematics, physical education and health, science and social studies. The data in Tables 5 and 6 represent course enrollment that were not reported as being provided online. Table 5 has all academic areas other than arts, which is presented in Table 6. Arts are provided in their own table because of the large variability noticed in class sizes by which type of art course it is. Table 7 provides the average class sizes for courses with online listed as their mode of instruction. All tables in this appendix provide the minimum, maximum, mean and median number of students enrolled in course sections.

Table 5.

The minimum, maximum, average (mean), and median number of students enrolled in course sections at each school for courses not taught online in the academic areas of English language arts, mathematics, physical education and health, science and social studies.

Appendix C: Schools Not Reporting MCCC in Reported Districts

The table below provides all schools and programs that have students reported in the Minnesota Automated Student Reporting System (MARSS) in fiscal year 2024, but did not have any course data reported for districts who had sufficiently complete MCCC data for reporting in [Appendix B](#). The type of school or program is also listed for contextual information.

Table 8.

Schools and programs in districts reported using MCCC data in [Appendix B](#) that had no course data reported to MCCC.

District Name	School Name	School Type
Aitkin Public School District	Aitkin Alternative Learning Program	Secondary Alternative Program (ALP-State approved)
Alexandria Public School District	Alexandria Extended School Year	Special Education Extended School Year (ESY)
Annandale Public School District	Annandale ESY	Special Education Extended School Year (ESY)
Anoka-Hennepin School District	Anoka Elementary Targeted Services	Targeted Services Program, ALC for lower grades (State approved)
Anoka-Hennepin School District	Anoka Extended School Year	Special Education Extended School Year (ESY)
Anoka-Hennepin School District	Anoka Secondary Targeted Services	Targeted Services Program, ALC for lower grades (State approved)
Anoka-Hennepin School District	Anoka-Hennepin Specialty Program	Public Area Learning Center (ALC-State approved)
Anoka-Hennepin School District	Anthony Louis House	Hospital/Medical/Partial Hospitalization Program
Anoka-Hennepin School District	Compass Online	Distance Learning Program (OLL-State approved)

Appendix D: Class Size Survey Data

The tables below represent the average class size by grade level data that districts, charter schools and other LEAs provided themselves. Not applicable (N/A) appears for grade levels not served by the district, charter school or other LEA. For districts who did not respond to the survey, NP (not provided) appears for all grade levels. Districts, charter schools and other LEAs who were contacted because it appeared they reported total grade level enrollment instead of class size ratios who did not update their data are indicated by an * following their organization name. The Franconia school district does not serve any students in Minnesota, but still completed a survey for the average class sizes for the students attending school in Osceola, Wisconsin.

Table 9.

Average class size by grade level as reported via survey.

Table 10.

Comments provided about how districts determined their average class size by grade level. Districts, charter schools and other LEAs only appear in this table if they provided comments. Misspellings and clear typos are the only edits made to what was submitted.

District Name	Comment
Achieve Language Academy	Achieve has 2 sections for each grade level. We took the average for the grade and divided it by 2.
Aim Academy of Science and Technology	When classes reach more than 35 students, they are divided into two sections!
Albany Public School District	Total number of students divided by the total number of core classroom teacher in K-8. 9-12 the total number of students divided by the total number of core sections.
Art and Science Academy	Averaged enrollment data on 10/1/23, 1/1/24, 4/1/24, and end of 23-24 school year.
Athlos Academy of Saint Cloud	I used Average Daily Membership from 9/5/23-5/31/24.
Athlos Leadership Academy	Class size taken from Infinite Campus "Student Enrollment Summary Report" with effective date of 10/1/2023.
Austin Albert Lea Area Special Education Cooperative (AALASEC)	Austin Albert Lea Special Education Cooperative is a Setting IV Special Ed Coop that is serving students with significant special education needs.

District Name	Comment
Avalon School	Avalon School offers a variety of classes, small group classes, and individual projects to support student learning. The above numbers reflect our average in traditional classes, but this does not include small group classes or projects.
Barnum Public School District	Barnum is either a two section or three section school, based upon cohort numbers.
Beacon Academy	Class sizes were determined by the number of students per grade level divided by the number of available class sections.
Belle Plaine Public School District	The total number of classroom full time teachers (FTE) assigned at each grade level.
Birch Grove Community School	We have multi-grade classrooms. Grade level was averaged from the classroom size.
Bird Island-Olivia-Lake Lillian Public School District	Average class size was determined by averaging grade enrollment by month from August to May then dividing by the number of sections. Enrollment numbers per grade are calculated monthly and reported to the board.
Blackduck Public School District	Grades K - 6 were calculated using the Home room class size divided by the number of sections per grade level. Grades 7 - 9 were calculated adding the number of students in the sections and dividing by the number of sections. 9th grade had some very small math sections. Grades 10 - 12 were calculated by adding all the number of students in sections and dividing by the number of sections. All calculations for grades 7 - 12 were made using 4th quarter sections.
BlueSky Charter School	Our EdFi/MCCC data appeared to be correct except for one course that had an error so it's not clear why it couldn't be used. We utilize many mixed grade level courses so in most cases the lower of the two grade levels was used for these courses (electives, special education, etc.). We also have flexible enrollment so it is difficult to determine how many students are actually in a class at any given time. A report was generated that included section enrollments by each quarter. The average number of enrollments was calculated for each course using the enrollment number on the first day of each term. A grade level was assigned to courses and then used to calculate the class sizes. More guidance on what is really needed for this report would be helpful.
Breckenridge Public School District	We calculated average class sizes based on core classes.
Buffalo-Hanover-Montrose Schools	The majority of our High School courses are available for any grade level, which makes calculating a grade level class size average difficult. Because of this, the 9th-12th grade class sizes reported are the average class size for our entire high school. Intervention and Special Education Class numbers are not included in these 9th-12th grade class size averages.
Byron Public School District	Enrollment Totals divided by class sections for K-8.

District Name	Comment
Campbell-Tintah Public School District	I determined average class size for the 23-24 by looking at what class sizes were, they did not change for me throughout the 23-24 year
Career Pathways	To find this data I added the total number of students in each class section and divided by the number of classes there were. Classes are mixed grades so that's why they all have the same average number.
City Academy	Our students are assigned to courses by progress on graduation requirements rather than by grade level. All courses are multi grade level.
Clearbrook-Gonvick School District	10/2/23 student totals.
Cologne Academy	Combined classrooms from brick and mortar and online.
Community School of Excellence	In addition to legislative mandates, CSE has class-size requirements per staff work agreements.
Crosby-Ironton Public School District	It is very difficult to complete average class sizes for secondary grades. The report data was calculated based on three sections for each grade at the secondary level (7-12).
Crosslake Community Charter School	These are the averages per section of each grade level course in the MCCC reportable courses.
Cyber Village Academy	We have an online and in person program. These numbers are our total number of students in each grade. For sure they should be divided in half to get the actual class size for delivery of curriculum. Also the online is asynchronous so it may be a class of one.
Discovery Woods	We have multi-age classrooms but used the average that was in the classroom for each grade level.
Duluth Public Schools Academy	Looking at the last day of school, I averaged using the Gen Ed Core class rosters. For the 6th-8th grade, this is Language Arts, Math, Science, and Social studies. For grade K-5, I used homeroom counts. We also have a school with split grade level classes. For these grade levels, I used the whole class count for both grade levels involved. [Example: Class 1 (5th only) =23. Class 2 (4th&5th) = 19. For 5th grade, I used 23 and 19 to calculate. I also then used that 19 with the 4th grade calculations.]
E.C.H.O. Charter School	Our K-1-2 are combined in a single classroom, as is 3-4, and 5-6.
Eagle Ridge Academy Charter School	Average is based on grade level courses required for each student determined by grade level. Some high school courses may have a smaller class size based on individual student course requests. Grade levels K-5 are based on homeroom class sizes as most courses are taught within the homeroom class.
East Grand Forks Public Schools	Took October 1, 2023 data and divided by the number of sections. High school is not exactly same for each subject, but it was treated consistent in our core areas.
Eastern Carver County Public Schools	Used end of year numbers that only counted students who completed and received a grade. K-5= number of sections of homerooms divided by K-5 student count that received grade across district 6th-8th= focused on Language Arts and Math (student count of those who received grade divided by number of sections for each and then found average of 2 numbers) 9th-12th=focused on Language Arts for the 3 schools (student count who received grade divided by number of sections)

District Name	Comment
EdVisions Off Campus School	They are mixed grade level classrooms ranging in size from 10-16.
Escuela Exitos Charter School	Our goal continues to be to use title monies to reduce class sizes. The reduction in class size in K and 1st carries over to the other grades.
Excell Academy Charter	We added the number of students in each grade level class and divided by the number of classrooms for each particular grade level.
Face to Face Academy	Face to Face Academy is committed to having a class size limit of 12 students per classroom.
Foley Public School District*	We do have district guidelines for class sizes.
Franconia Public School District	Based on Average size classes for Osceola School District
Friendship Academy of the Arts	There were 2 classrooms per grade for most grades with the exception of 7th and 8th grades. For grade levels with two teachers, the number of students per class was determined by averaging the amount of students in both sessions.
Goodhue County Education District	Averaging skews our data because our programs are so different from one another. We have a Setting IV that may have 1 student at a particular grade level, two ALCs that may have between 4 and 20 in each grade level and an online school serving students throughout MN.
Granada Huntley East Chain	We are a one section per grade level school.
Grand Rapids Public School District	At the middle and high school I used English classes as the base number of sections, since they are required classes for all students in grades 6-12.
Greenbush Middle River School District	I took summary of student totals from 2014-2024 from Oct 1st of each year, added and then divided by 11
Harbor City International Charter	Identified core grade level courses, summed total enrollment in those courses and divided by the number of class sections.
High School for Recording Arts	We use the percentage of our students enrolled by the number of teachers and divided that by students enrolled grade.
HOPE Community Academy	Student count divided by classrooms for the grade for Elementary KG-5th grade Student count divided by 2 for HS 9-12th and divided by 3 for MS 6-8th My first submission was incorrect as I gave head count per grade and I emailed the state who told me to resend. This is the corrected survey.
Horizon Science Academy Twin Cities	One section school.
Houston Public School District	In a small district, it is a challenge to maintain consistent class sizes. Our virtual academy brings our average class sizes to a higher number, which does not correlate with our average onsite class sizes. Our average onsite class sizes fall within the range of 20 - 24.

District Name	Comment
Innovation Science and Technology Academy Charter School	The data was based on the number of students in each grade level.
International Spanish Language Academy	As a charter school, we have been working to create an enrollment policy that better reflects our desires for equitable class sizes. We voted to combine sections and to work toward more concrete limits of 25 across grades, which we believe aligns with our mission.
Ivanhoe Public School District	Tiny K-6 district
Jackson County Central School District	The middle school is divided into three sections, while the high school offers a variety of classes and electives. For the high school, I used an average of 3.5 sections to determine class distribution, based on the total number of students in each grade.
Jennings Community School	While we do not do grade level based classes, this is our average class size.
Jordan Public School District	Determining K-4 was total students for each grade divided by number of classrooms. Determining Grades 5-12 (Middle School & High School) Classroom average was determined by average in Core classes - Math, Science, English-Reading, and Social Studies.
Kaleidoscope Charter School	We took the number of enrolled students for each grade and divided it by the number of homeroom teachers at each grade. For HS since we are a one section per grade level, the number reflects the number of students that are in the grade, or would be when in the classroom with the teacher for a particular period (math, science, social studies, English).
Kalon Prep Academy	We calculated the average class size by doing the following. First, we took the number of students that were enrolled between September 5, 2023 and May 31, 2024 for each grade level. Next we calculated the number of days of students that had enrollment periods that were not 174 days. We then averaged their enrollment period and added that to the full year enrollments per grade. We rounded to the nearest decimal.
Kelliher Public School District	We only have one class per grade
KIPP Minnesota Charter School	Numbers based on ADM Served Report from Oct 8th, rounded to the first decimal place
Lake Agassiz Education Cooperative	LAEC runs federal setting IV programming. Class size is dependent on program referrals
Lake Benton Public School District	We only have ONE class per grade level. These were our ending numbers as of May 2024.
Lakes International Language Academy	I used grade level English and math classes to determine average class size to avoid mixed grade classes.

District Name	Comment
Laporte Public School District	We are mostly a single section school. For high school, where the numbers are higher, that is the highest number that is together. Some of the day they are split into electives that are smaller.
LeRoy-Ostrander Public Schools	Monthly head counts and enrollment paperwork.
Level Up Academy	During this school year we only had one class per grade so the numbers did not need to be averaged.
LIFE Prep	We had only one class per grade during the 23-24 school year. Listed is the size of the class on October 1, 2023.
Lynd Public School District	Reviewed the end of year Enrollment spreadsheet that the district has and compared to MARSS District ADM Served Report for accuracy.
Mabel-Canton Public School District	That is our entire student body.
MACCRAY School District	We are a rural school district with about 790 students K-12. Typically we offer 3 sections of each class. Offering 2 sections would be easier to staff, but then our number per class would climb to range of 22-34!
Marine Area Community School	Unusual enrollment pattern due to location moves.
Marshall County Central Schools	All classes grades K-9 are split into 2 sections in our school district. Required for 10th grade are also split in half and I utilized this number. For Electives and 11/12 grade classes, they are often mixed classes with some 11-12 combined, some 10-12 combined. I utilized the average of all courses we offer for grades 11-12 and 10-12 electives to generate the number.
Menahga Public School District	We averaged the sections.
Metro Schools Charter	Because we have two or three sections in each class. TEACHERS WERE DEMANDING SMALL CLASS SIZES; OTHERWISE, THEY NEEDED TO HAVE A SUPPORT STAFF TO SUPPORT THEM. So, WE HAVE CALCULATED IF WE PROVIDE SUPPORT OR LIMIT THE CLASS SIZE WHICH ONE CAN THE SCHOOL AFFORD. WE HAVE DECIDED TO LIMIT THE CLSS SIZE . BECASUE SMALL CLSS ARE MORE PRODUCTIVE ACADEMICALLY
Mid-State Education District	Our class sizes fluctuate often as we are a setting IV with 4 programs located in one building serving our 5 member districts.
Milaca Public School District	Grades 7-12 numbers are volatile due to elective caps, college class caps, and interest in class selections. The class sizes vary more in the high school and the average isn't always the best representation.
Minneapolis Public School District	We included courses in the following secondary subjects: Math, Music, Arts, ELA, Social Studies, Ethnic Studies, Science, PE/Health, IB electives. For elementary, we used the average homeroom class size. We used all courses marked General or Enriched. Multi-grade courses were included (in total) in all represented grades. For Secondary Arts, we have a number of classes were multiple separate levels or courses are taught concurrently by one teacher in the same space; these were counted as one course for averaging purposes. Co-taught classes were counted as one section.

District Name	Comment
Minnesota Department of Corrections	We are a correctional facility, and we cannot have more than 8 students in a classroom.
Minnesota Excellence in Learning Academy	MELA used the attendance summary by grade level- ADM report for the period beginning 8/28/2023 to 5/23/2024, the beginning to the last day of school.
Minnesota Internship Center	Our average class size for Grade 9 is lower as we do not serve many true 9th graders. Our average class size for 12th graders is higher because we do serve many students who are overaged and under credited.
Minnesota River Valley Education District	The average size in our ALC classes is 6-7 students. Enrollment fluctuates between 38 and 50 during the year. There are presently 43 students enrolled.
Minnesota Transitions Charter School	All students were recorded by grade level. I then counted teachers that worked with students at each grade level. I divided the number of students by the number of teachers. Our ratio is high based on the number of students served in our online programs.
New Century Academy	This is how many students we have for each grade with the exception of 6th, 7th and 8th grade as they are in the same classes together.
New Century School	Average class size =number of students in the grade level divided by number of classes per grade level.
Norman County East School District	MARSS District ADM Served Report
Northeast Metro 916	We are an Intermediate district that has ALC credit recovery in a hybrid structure or Multidisciplinary Special Ed where students are in mixed grade classrooms. We are a level 4 special ed with mixed grade class rooms. We also have 3 ALCs.
Northern Lights Community School	This is a small community charter school. Numbers reported are actual 2023 class sizes.
Northland Learning Center	N/A
Northwest Passage High School	Northwest Passage High School sets class and advisory sizes at 16 students.
Notre Ecole Academy	Some of the classes are mixed grade levels so for example the 3/4th grade class is a mixed grade level but since they are in a class together it still was 11 students for the student size of the class.
Owatonna Public School District	Numbers are based on October 2nd, 2023 enrollment. Total class size average was used in grade level calculations for multi-grade courses. Inclusion of Online class sizes lowers the overall average.
PACT Charter School	As a charter we need to cap our class sizes grades K-6 are homerooms, and we staff our secondary (7-12) on a 30:1 student/teacher ratio.
Parnassus Preparatory School	Through 5th grade, students are part of one regular "homeroom" cohort. In 6th grade are beyond, average class size is determined using multiple period classes throughout the day. Classes that serve multiple grade levels were excluded from the calculation.
Partnership Academy, Inc.	We determine our class sizes per school bylaws on cap size for each grade.

District Name	Comment
Paynesville Area Schools	9th and 10th grade - I calculated the class size average based on core courses (English, Science, Social). 11th and 12th grade - was very difficult since the classes are all mixed and there are so many different courses they could be taking, some having large counts and some having small counts. So I went off of the class numbers for all of the English courses for 11th and 12th grades. Also, this means most of our Special Education students are not figured in with the counts for 6-12.
Phoenix Academy Charter School	We do not have grades beyond 6th at this time. We have two multi-aged classrooms for 3rd and 4th and 5th and 6th. Then a self contained 3rd grade and self contained 5th grade.
PIM Arts High School	As a high school, we have quite a few mixed level classes, but I used only the core academic classes (Social Studies, Math, English, Science) in each grade level to find the average.
Prairie Creek Community School	We are a multi-age school with children in K-1, 2-3 and 4-5 bands. I reported 20 per class as that is the total number of students we have in each class (for example, a K-1 class consists of 10 Ks and 1 ones).
Prairie Seeds Academy	Grades 6-12 are calculated based on the average class sizes of core content classes.
Prodeo Academy	Student Set: All students with an active enrollment on the last day of school - June 6, 2024. Student sections move by cohort, so all academic classes for any given student will have the same number of students as that student's "Homeroom." 1) Gave every student enrolled on June 6, 2023 a unique row, naming their grade level and homeroom. 2) Listed each unique homeroom by grade level. 3) Counted the number of students in each homeroom. 4) Averaged the class size within each grade level.
Quantum STEAM Academy Charter School	it is based on the last record we have on our students data portal (JMC)
Region 4-Lakes Country Service Cooperative	We have a regional Setting IV program serving Region 4 school districts on a referral basis. These numbers represent the full year and part year students 23-24 SY. Placement in our program is typically .5-2 school years in length, though dependent upon resident district desire for continued placement.
Richfield Public School District	Special Education and English Language Learner classes were not included in determining average class size.
River Bend Education District	We have 5 different programs (4 level four sped classrooms & the ALC) The ALC and WORK Program are for HS students, and all other programs are K-12.
Robbinsdale Public School District	These numbers include all courses which include music, art, band, orchestra, physical education, media and visual arts, allied classes at middle school and electives at the high school.
Rollingstone Community School	As a small school, we combined the following grades: -1st and 2nd -3rd, 4th, and 5 th . During core math/reading instruction students in 2nd grade were pulled for instruction, and students in grades 4/5 were pulled for instruction.
Rothsay Public School District	Rothsay school is a very small school district. In most grade levels, our total enrollment for a grade level is the average class size.

District Name	Comment
Saint Paul Public Schools	Many factors were considered to provide a thoughtful analysis of the average class size for each grade level, including weighting averages for mixed grade level courses, combined courses, consideration of programs, and more.
Schoolcraft Learning Community Charter	As K-8 with 1 class per grade level, was determined by grade level size. Grade 5 is the anomaly as it has 2 classes within the grade level. Grade 5 was determined by dividing grade size by 2.
Sejong Academy of Minnesota	We only have one class per grade level in many classes.
South St. Paul Public School District	These are class sizes for homerooms in elementary and for core and elective classes at the high school.
South Washington County Schools	K-5 was determined based off of homeroom class. 06-12 was determined based off of our core Language Arts/English classes. Since these are required courses at grade level, this will give a much more accurate picture of average class sizes at secondary.
Southern Minnesota Education Consortium	We are a special education cooperative - the majority of our classes are level 3 and level 4 settings, which brings our total number of students down on average. We arrived at these numbers by dividing our total child count by grade, divided by the number of org sites we report.
Southside Family Charter School	We only have 1 class per grade level, so actual class size for the 23-24SY was provided.
Spring Grove School District	We are a small rural district with 350 students K - 12. Using data, we maximize our resources where they are needed most, resulting in some smaller student-teacher ratios when needed.
St. Anthony-New Brighton Schools	BrightWorks Annual Class Size Study Report SY 23-24 for grades K-5. Enrollment SY 23-24 in core classes for grades 6-12.
St. Paul City School	We are continuing to build out our high school programming so the low class size in those areas is a result of that work.
St. Paul School of Northern Lights	St. Paul School of Northern Lights has multi-grade classes, so class capacities as set by the Board are reported. Depending on the class, there may have been fewer students.
STEAM Academy Charter School	There is one section for each grade level and the calculation was taken from the student information system (SIS).
STEP Academy	Our class sizes for 11th and 12th grade students are low because we were fortunate to have most of our 11th and 12th grade students participate in PSEO
Stewartville Public School District	Total number of students in the grade divided by the number of sections for core classes (ie., math, English, science, social studies).
Success Academy*	Grades K-7 are combined numbers of both our St. Cloud and Bloomington campuses.
TEAM Academy	We only have one classroom of each grade level. I pulled an IC report for the 23-24 school year.
The Journey School	This is the total for each grade, we only had one class per grade.

District Name	Comment
Triton School District	Many of the 6-12 courses that we have enroll multiple grade levels in the course. We used a spreadsheet that listed each course, and the number of students that were in that course for each grade, and then determined the average class size based on the number of students in that grade for each course.
Truman Public School District	We are a 1 section school and these are the ending numbers from the 2023-24 school year.
Ubah Academy	We figured out the number of classes we have-118 and divided that by the number of periods we have 6. Our answer is 19.66 classes per hour. We have 324 students and we divided by the number of classes per hour, our answer is 16.47 students per class.
Ulen-Hitterdal Public School District	We are basically a one section/class grade with the exception of a couple of grades.
Up North Learning Center	These numbers are students that may have been referred in or out of the program throughout the school year.
Venture Academy	Took the GL enrollment number and divided by the number of cohorts within each GL (2 cohorts in 6-7 and 3 cohorts in 8-12)
Waseca Public School District	Pulled the enrollment for the full grade level from our SIS and divided by the number of sections
West Central Education District	West Central Education District is an education district that provides ALC and special education services to 4 member districts. Our class sizes in our setting IV program and our ALC are very small. Calculating an average class size does not work when we have mixed grades in all of our classrooms.
Westbrook-Walnut Grove Schools	I ran the Fall and EOY MARSS District ADM Served report for 23.24 and compared the class sizes from the beginning of the year to the end of the year and found the average size for each grade.
White Bear Lake School District	Methodology: As per some direction from MDE we focused on classes with a subject of Language Arts, Math, Science, Social Studies, Arts, PE, & Health. We also included FACS, Business, and TEC classes as they are structures like the others and might be considered a subcategory of one of the others. I eliminated PSEO and online classes and anything else that was not taught by a WBL teacher. We counted the number of quarters each student was enrolled in the class and then counted the total number of quarter enrollments per section, and divided that by the number of quarters the class covered to get the average enrollment per section. Next we added up the average section enrollments for each student and counted how many classes they took (in order to assign a grade to each class enrollment). Finally we added all the average section enrollments for each student by grade, and divided that by the number of courses they took to get an average class size per grade.
Willow River Public School District	Willow River Area School is a two section school K-12.
World Learner Charter School	We have multi-grade classrooms. Our 1st, 2nd, and 3rd grade classes are combined. Our 4th-6th grade classes are combined, and our 7th and 8th grade is combined.

District Name	Comment
Worthington Public School District	The method we used to obtain this involved taking total number of students per grade level and dividing by number of Advisory courses per each grade level, as each student in our district is assigned to an Advisory section.
Wright Technical Center	The Wright Technical Center, District 966 operates under a Joint Power Agreement offering Advanced Career and Technology classes for Grades 11 & 12 as well as an ALC for Grades 7-12. Students attend from eight member school districts.
