

# COMMUNITY WASTEWATER COSTS: 2024 REPORT

February 2025

# The Council's mission is to foster efficient and economic growth for a prosperous metropolitan region

---

## Metropolitan Council Members

Charlie Zelle	Chair	Diego Morales	District 9
Judy Johnson	District 1	Peter Lindstrom	District 10
Reva Chamblis	District 2	Gail Cederberg	District 11
Tyronne Carter	District 3	Susan Vento	District 12
Deb Barber	District 4	Chai Lee	District 13
John Pacheco Jr.	District 5	Toni Carter	District 14
Robert Lilligren	District 6	Tenzin Dolkar	District 15
Yassin Osman	District 7	Wendy Wulff	District 16
Anjuli Cameron	District 8		

The Metropolitan Council is the regional planning organization for the seven-county Twin Cities area. The Council operates the regional bus and rail system, collects and treats wastewater, coordinates regional water resources, plans and helps fund regional parks, and administers federal funds that provide housing opportunities for low- and moderate-income individuals and families. The 17-member Council board is appointed by and serves at the pleasure of the governor.

On request, this publication will be made available in alternative formats to people with disabilities. Call metropolitan council information at 651-602-1140 or tty 651-291-0904.

## About Metropolitan Council Environmental Services

Environmental Services is one of four operating divisions of the Metropolitan Council. Met Council operates and maintains the Metropolitan Disposal System (MDS), a vast system of underground sewer pipes and treatment facilities that collect, convey, treat, and dispose of wastewater from residential units, businesses, and industries in the Twin Cities metropolitan area.

Met Council serves 2.9 million people across 111 customer communities and partners with approximately 900 industrial permit holders and over 90 liquid waste haulers. In total, the MDS collects and treats an average of 250 million gallons of wastewater daily. The regional wastewater collection and treatment system includes:

- 660 miles of large interceptor sewer pipes, ranging from 7 inches to 14 feet in diameter which collect wastewater from about 5,000 miles of local sewer.
- 61 lift stations that pump wastewater from a lower to a higher elevation so gravity can move flow to treatment sites.
- 226 metering stations that help determine the volume of wastewater treated for each community.
- 9 water resource recovery facilities where wastewater is treated before returning clean water to the environment.

The cost of operating and maintaining wastewater treatment systems is covered entirely by user fees. The Environmental Services division consistently achieves near-perfect compliance with federal and state wastewater treatment standards while holding rates about 35% below the national average. Met Council is committed to sustainable operations through energy efficiency, use of renewable energy resources, use of technology, and reducing air pollutant emissions and resource recovery. Learn more about the operations of the Environmental Services division at: <https://metro council.org/Wastewater-Water.aspx>

**Sewer utility cost for 111 customer communities connected to the Metropolitan Disposal System (MDS):**

	2024	2023	Percentage Change
Median Monthly Cost	\$31.26	\$30.67	1.93%
Weighted Average Monthly Cost*	\$33.76	\$32.65	3.37%

**Sewer utility cost for communities not connected to the MDS, most of which rely on subsurface sewage treatment systems:**

	2024	2023	Percentage Change
Median Monthly Cost	\$52.64	\$50.14	4.99%
Weighted Average Monthly Cost*	\$60.65	\$57.58	5.33%

\*Average weighted based on the number of single-family households served by the MDS within each community.

**Sewer Rate types used by the 111 customer communities connected to the MDS:**

Flat	17
Uniform	6
Increasing Block	1
Base/Uniform	67
Base/Increasing Block	19
Communities that do not charge sewer rates	1

**2024 Monthly sewer utility costs for one and two single-family residences are based on an average usage of 60,000 gallons of water:**

**Customer Cities ranked alphabetically**

<b>Weighted Average *</b>	<b>\$60.65</b>		

\* Weighted for the number of households connected to community-operated sewer systems (na means all residents in the community use private septic systems).

Septic systems typically cost between \$15,500 and \$32,000 to install, with an average price of about \$24,000 according to data gathered from Carver, Dakota, and Scott County Environmental Services.

Septic systems last about 20-30 years and require cleaning and inspection every 2-3 years, which costs about \$400-\$500.
