**Subject: Triennial Report on the Recovery of Costs for Natural Gas Extension Projects under
Minnesota Statutes, Section, 216B.1638**

Dear Senators and Representatives:

Below please find the report required from the Minnesota Public Utilities Commission by Minn.
Stat. § 216B.1638, subdivision 6 regarding:

- (1) the number of public utilities and projects proposed and approved under that
section, titled the Recovery of Natural Gas Extension Project Costs;
- (2) the total cost of each project;
- (3) rate impacts of the cost recovery mechanism; and
- (4) an assessment of the effectiveness of the cost recovery mechanism in realizing
increased natural gas service to unserved or inadequately served areas from natural gas
extension projects.

Please let me know if you have any questions or if I can provide further assistance.

Sincerely,

A handwritten signature in black ink, appearing to read 'Sasha Bergman', with a long, sweeping horizontal line extending to the right.

Sasha Bergman
Executive Secretary and Chief of Staff

**Triennial Report on the
Recovery of Costs for
Natural Gas Extension Projects under
Minnesota Statutes, Section, 216B.1638**

January 15, 2026

Required General Legislative Report Information

Minnesota Public Utilities Commission
121 7th Place East, Suite 350
Saint Paul, Minnesota 55101-2147
mn.gov/puc

Minnesota Statutes (2025), Section 216B.1638, subdivision 6 requires the Minnesota Public Utilities Commission (Commission) to evaluate and report, beginning January 15, 2017, and every three years thereafter, to the Minnesota Legislature concerning the recovery of costs for projects to extend the provision of natural gas services.

This Report is to fulfill the reporting requirement of this section.

Pursuant to Minnesota Statutes, Section 3.197, the Minnesota Public Utilities Commission estimated costs for preparing this Report are minimal as most of the information is developed in the normal course of business. Special funding was not appropriated for the costs of preparing this report.

To request this document in another format such as large print or audio, call 651.296.0406 (voice). Persons with a hearing or speech impairment may call using their preferred Telecommunications Relay Service or email consumer.puc@state.mn.us for assistance.

Description of 2015 Legislation

Minnesota Statute, Section 216B.1638 was enacted in 2015. This section of law allows a utility to petition the Commission for a rider to recover, outside of a general rate case, the revenue deficiency from a natural gas extension project. The statutory section sets forth the information that must be contained in such a petition and establishes the scope and standards for review of the petition by the Commission. Among other requirements for Commission approval, such a rider must not be allowed to recover more than 33 percent of the costs of the natural gas extension project.

Even if the Commission approves such a petition, the utility is not committed to implement a project so approved. The public utility seeking to provide natural gas service must notify the Commission whether it intends to proceed with the project as approved.

Subdivision 6 of this statutory section requires the Commission, beginning January 15, 2017, and every three years thereafter, to report to the Legislature on the following:

1. the number of public utilities and projects proposed and approved under this section;
2. the total cost of each project;
3. rate impacts of the cost recovery mechanism; and
4. an assessment of the effectiveness of the cost recovery mechanism in realizing increased natural gas service to unserved or inadequately served areas from natural gas extension projects.¹

BACKGROUND: RELATED COMMISSION ACTIVITY ENCOURAGING EXPANDED AVAILABILITY OF NATURAL GAS SERVICE

Commission-Authorized New Area Surcharge (NAS) Projects

In 1990, the Commission initiated an investigation and, in 1991, a study group, that asked, among other questions, whether the Commission should encourage the use of natural gas fuel by facilitating the provision of pipelines to more towns.² The study group explored how to extend gas service to communities that request gas service but cannot be served economically at tariffed rates.

On March 12, 1992, the Minnesota Department of Commerce, Division of Energy Resources (Department) and Commission staff submitted their Report on Issues for New-Area Rates. The report covered financial issues, rate design and various compliance and reporting issues concerning these new rates. Extensions under these New Area Surcharge tariffs would involve

¹ Minnesota Statute Section 216B.1638. subdivision 6.

² ORDER INITIATING STUDY GROUP, *In the Matter of an Inquiry into Competition Between Gas Utilities in Minnesota*, Docket No. G-999/CI-90-563 (June 4, 1991).

significant costs since the extensions would be to entire towns located in remote areas. Because the proposed surcharges would allow customers to pay the full incremental cost over a number of years (rather than one year), utilities could serve more areas without putting existing customers or stockholders at risk.

Subsequently, the Commission received, reviewed, and approved several New Area Rates proposals. Because these New Area Rates proposals were approved, the Commission decided this issue had been adequately addressed given conditions at that time.³

CenterPoint Energy Resources Corp., d/b/a CenterPoint Energy Minnesota Gas (CenterPoint Energy) completed one large scale project in the 1990s under this tariff in the Alexandria Lakes area. Northern States Power Company d/b/a Xcel Energy (Xcel Energy) completed approximately four projects in the 1990s under this tariff. The largest of the four was the Brainerd Lakes area project; however, Xcel Energy completed several other smaller projects, for example, in Taylor Falls.

The following table provides a list of residential New Area Surcharge projects approved more recently by the Commission for various communities in Minnesota where natural gas service was not previously available.

Table 1: Recently Approved New Area Surcharge Projects

Utility	Location	Docket No.
Minnesota Energy Resources Corp.	Detroit Lake – Long Lake	G-011/M-15-441

³ ORDER TERMINATING INVESTIGATION AND CLOSING DOCKET, *In the Matter of an Inquiry into Competition Between Gas Utilities in Minnesota*, Docket No. G-999/CI-90-563 (March 31, 1995).

Recent Commission-Authorized Exempt Small Gas Utilities

In addition to the five large investor-owned local distribution companies and the municipally owned distribution companies that serve customers in Minnesota, there are several small natural gas distribution utilities that are exempt from certain aspects of state rate regulation, pursuant to Minnesota Statute Section 216B.16, subdivision 12.

Small exempt natural gas distribution utilities typically charge higher rates than the larger, state regulated distribution utilities for reasons that are due mainly to their size, but they are providing service to communities that previously did not have access to natural gas.

Over the past several years, the Commission has confirmed, by Order, the exempt status of several of these new, small natural gas utilities that serve customers in previously unserved areas. Several of these projects have required construction of small, intrastate pipelines that provide wholesale natural gas transportation service to the exempt distribution utilities. The rates charged by the intrastate pipelines are set under contracts approved by the Commission, pursuant to Minnesota Statute Section 216B.045, subdivision 4.

COMMISSION ACTIONS UNDER 2015 LEGISLATION

Minnesota Energy Resources Corporation (MERC) proposed four projects (Balaton, Esko, Pengilly, and Rochester) under Minnesota Statutes, Section 216B.1638. For three of the proposed projects (Balaton, Esko, and Pengilly), MERC agreed to recover a large portion of project costs through the NAS Rider from project customers, while the remaining costs were deferred to be recovered through base rates in future rate cases, rather than through the Natural Gas Extension Project (NGEP).⁴ The Rochester proposal was approved by the

⁴ ORDER APPROVING COST RECOVERY FOR NEW AREA SURCHARGE TARIFFS FOR BALATON AND ESKO PROJECTS, *In the Matter of the Petition of Minnesota Energy Resources Corporation for Approval for Recovery of Natural Gas Extension Project Costs through a Rider and for Approval of a New Area Surcharge for the Balaton Project*, Docket No. G-011/M-16-654, and *In the Matter of the Petition of Minnesota Energy Resources Corporation for Approval for Recovery of Natural Gas Extension Project Costs through a Rider and for approval of a New Area Surcharge for the Esko Project*, Docket No. G-011/M-16-655 (February 9, 2017); and ORDER APPROVING NEW-AREA SURCHARGE AND AUTHORIZING DEFERRED ACCOUNTING FOR CERTAIN COSTS, *In the Matter of Minnesota Energy Resources*

Commission as a Natural Gas Extension Project and is discussed below. More recently CenterPoint Energy proposed two projects (Nowthen and Lake Jessie). Similarly, CenterPoint Energy agreed to recover a large portion of project costs through the NAS Rider from project customers, while the remaining costs were deferred to be recovered through base rates in future rate cases.⁵

Rochester Natural Gas Extension Project

Initial Request

MERC requested authorization to recover a portion of its Rochester Natural Gas Expansion Project (the Project) costs under this statute. According to MERC, its natural gas distribution system was at capacity in the Rochester area and needed to be upgraded to meet current needs as well as expected growth in customer demand. The Project included two phases, which involved improvements to MERC's distribution system and acquiring additional interstate pipeline capacity for delivery to its Rochester distribution system.

Phase I of the Project was completed in 2015. Phase I cost approximately \$5.6 million, and involved improvements to MERC's delivery system in the Rochester area. The Commission authorized recovery of the Phase I costs in MERC's 2015 rate case.⁶

Phase II of the Project was completed in 2022. Phase II consisted of changes to MERC's local distribution system, which involved upgrading MERC's town border station (TBS) system and constructing a new 13-mile high-pressure pipeline that tied together the northern and southern portions of the TBS system. MERC requested approval of the Phase II costs, which were estimated to total about \$44 million. MERC sought to recover 33 percent of the Phase II costs from all of MERC's ratepayers using its NGEP rider, and to recover the remaining balance of Phase II costs in future rate cases.

Corporation's Petition for Approval of a New Area Surcharge and Natural Gas Extension Project Rider for the Pengilly Project, Docket No. G-011/M-18-460 (March 29, 2019).

⁵ *In the Matter of the Petition of CenterPoint Energy (CenterPoint) for Approval for Recovery of Natural Gas Extension Project Costs through a Rider or in the Alternative for Regulatory Asset Treatment and for a New Area Surcharge for the Nowthen Project*, Docket No. G-008/M-19-840 (August 4, 2020); *In the Matter of the Petition of CenterPoint Energy for Approval for Recovery of a Natural Gas Extension Project Costs through Rate Base Treatment and for a New Area Surcharge for the Lake Jessie Project*, Docket No. G-008/M-21-383 (September 7, 2021).

⁶ FINDINGS OF FACT, CONCLUSIONS, AND ORDER, *In the Matter of the Application of Minnesota Energy Resources Corporation for Authority to Increase Rates for Natural Gas Service in Minnesota*, Docket No. G-011/GR-15-736 (October 31, 2016).

On May 5, 2017, the Commission issued an Order approving the Project, granting MERC's request for preapproval to recover Phase II costs of up to \$44 million through a combination of the NGEPRider and base rates.⁷

In addition, MERC contracted with its wholesale natural gas supplier, Northern Natural Gas Company (NNG), the interstate natural gas pipeline, to build new interstate pipeline infrastructure that will supply MERC with increased interstate pipeline capacity. MERC requested Commission approval of the NNG costs, which MERC stated would total approximately \$55 million on a net present value (NPV) basis. MERC proposed to recover these NNG costs through MERC's Purchased Gas Adjustment (PGA) mechanism.⁸ On May 5, 2017, the Commission granted MERC's request for preapproval to recover the additional interstate natural gas pipeline capacity (transportation) costs through MERC's PGA mechanism.⁹

In MERC's 2017 rate case, MERC and the Department agreed, and the Commission authorized MERC to include \$19.4 million of Rochester Phase II capital costs in base rates.¹⁰

2023 Rate Case

In its November 1, 2022 rate case filing, MERC agreed to eliminate Project cost recovery in the NGEPRider and roll cost recovery into base rates upon implementation of interim rates effective January 1, 2023.¹¹ The Commission approved MERC's request in an order dated December 30, 2022.¹² Pursuant to a May 11, 2023 Settlement Agreement (Settlement), MERC agreed to a four-year amortization period for the final NGEPRider true-up balance. The balance was based on a \$1,094,238 cumulative net balance through March 31, 2023, and a \$273,560 annual amortization amount. Upon the effective date of a final decision in the rate case, MERC proposed to close the NGEPRider for the Project. The Commission issued its Order accepting the Settlement on November 14, 2023. Final rates became effective on March 1, 2024, at which time the NGEPRider was closed.

⁷ ORDER APPROVING ROCHESTER PROJECT AND GRANTING RIDER RECOVERY WITH CONDITIONS, *In the Matter of a Petition by Minnesota Energy Resources Corporation for Evaluation and Approval of Rider Recovery for its Rochester Natural Gas Extension Project*, Docket No. G-011/M-15-895, at 18 (May 5, 2017).

⁸ Adapted from the Administrative Law Judge's FINDINGS OF FACT, CONCLUSIONS OF LAW AND RECOMMENDATION, *In the Matter of a Petition by Minnesota Energy Resources Corporation for Evaluation and Approval of Rider Recovery for its Rochester Natural Gas Extension Project*, PUC Docket No. G-011/M-15-895, OAH Docket No. 68-2500-33191, at 3-4 (November 30, 2016).
