INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Economic Security. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Economic Security. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are eight categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 30. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

THIRD QUARTER 1993 COVERED EMPLOYMENT

SUMMARY

Minnesota third quarter 1993 average employment is 2,171,647. The statewide average weekly wage is \$487. The third quarter economy continues the pattern of recovery from the business recession of prior years. Local conditions caused losses in **Agriculture** and in **Mining**.

COMPARISONS

Comparison to Prior Quarter

Table 1 summarizes the 1993 third quarter employment figures since 1987. Table 2 summarizes the 1993 second quarter employment figures since 1987. Table 3 shows the quarterly employment shifts, second quarter 1993 to third quarter 1993, as percentage changes.

Total Private employment had a seasonal increase of 40,394 jobs, a 2.16 percent gain over second quarter, about the same rate as seen in 1991. Total State employment had a net loss because the seasonal decrease in Government in 1993 was 15.5 percent or 50,874 jobs between second and third quarter. The net loss in employment statewide is a seasonal effect driven by summertime decreases in the education. Universities, colleges, technical schools, elementary schools and secondary schools had a combined decrease of 55,700 jobs. This is the fifth consecutive year in which the third quarter private employment growth did not offset the third quarter seasonal decline in government employment.

Average weekly wage increased between the quarters, from \$483 to \$487, a 1 percent rate, compared to a zero growth rate between second and third quarters last year and a negative growth rate between second and third quarters in 1991.

Comparison to Prior Year

Table 4 shows the 1992 third quarter to 1993 third quarter employment shifts as percentage changes.

Since third quarter last year the statewide quarterly average employment rose 2.48 percent, a net gain of 52,513 jobs. In the same one year period the average weekly wage also increased, from \$470 to \$487, a 3.5 percent growth rate overall.

Both private employment and government employment figures are up at rates only fractionally larger than the previous year. Generally, the year to year figures show

Table 4

continuing economic recovery from the 1990-1991 recessionary low. It is a slow recovery, and rates of change have not reached pre-recession levels, but the growth is present.

Industry Comparisons

MANUFACTURING'S 1.69 percent growth rate between second and third quarter of 1993 represents 6,825 jobs added; that is the smallest seasonal expansion seen in the industry in five years. The third quarter to third quarter annual growth rate is the opposite case. Since the prior year the job growth has been 8,648 jobs, a 2.14 percent increase, its highest level in five years. Durable Goods **MANUFACTURING** saw the largest annual gains, as its components grew by 7,400 jobs from 1993: **Industrial & Commercial Machinery and Computer Equipment** up 2,788 jobs or 3.8 percent, with gains well distributed through all areas of the component except computers; **Lumber and Wood Products** up 927 jobs or 5.2 percent; **Transportation Equipment**, up 916 jobs or 8.3 percent; **Fabricated Metal Products**, up 350 jobs or 1.1 percent; and **Instruments & Related Products**, up 389 jobs or 1.2 percent. The largest gainers in Non-durable Goods **MANUFACTURING** were its components **Rubber & Plastic Products**, up 560 jobs or 3.4 percent; and **Apparel & Related Products**, up 375 jobs or 12.0 percent. **Paper & Allied Products** lost 236 jobs and **Printing & Publishing** lost 230 jobs or 1.5 percent over 1993 levels. **Food & Kindred Products**, as anticipated, stepped back from its second quarter peak; however the step went down an unexpected 200 jobs or 1.0 percent below the third quarter 1992 level.

AGRICULTURE experienced a strong seasonal upsurge in third quarter, with a growth rate of 14.44 percent as nearly 3,000 jobs were added. However, on a year to year basis **AGRICULTURE** experienced its first third quarter to third quarter loss, 321 employees, declining by 1.35 percent. Heavy rain and regional flooding after crops were planted in second quarter contributed to the third quarter decline.

Third quarter seasonal growth in **MINING** was almost absent in 1993, as the industry grew by only half a percent. The second quarter to third quarter growth rate in **MINING** has been decreasing continuously since 1987, indicating less and less seasonal work each year. The third quarter to third quarter annual employment growth in **MINING** also declined, losing 193 jobs, for a 2.4 percent contraction. Both the seasonal and annual rates in **MINING** were affected by a labor dispute in **Metal Mining** that started during the middle of third quarter.

CONSTRUCTION contributed the largest seasonal gains between second and third quarter, adding 11,221 jobs, with all sectors of this industry seeing seasonal growth. The seasonal 14.22 percent growth rate in **CONSTRUCTION** is this industry's best rate in seven years, helped along greatly by a 31.5 percent jump in the **Heavy Construction Other Than Building** component as highway and street construction resumed. In year to year comparison, however, the annual growth rate was a modest 1.09 percent, as the **CONSTRUCTION** industry gained 973 to 90,113 total jobs. **Special Trade Contractors** such as carpenters, roofers, electricians and plumbers showed an annual increase of 1,123

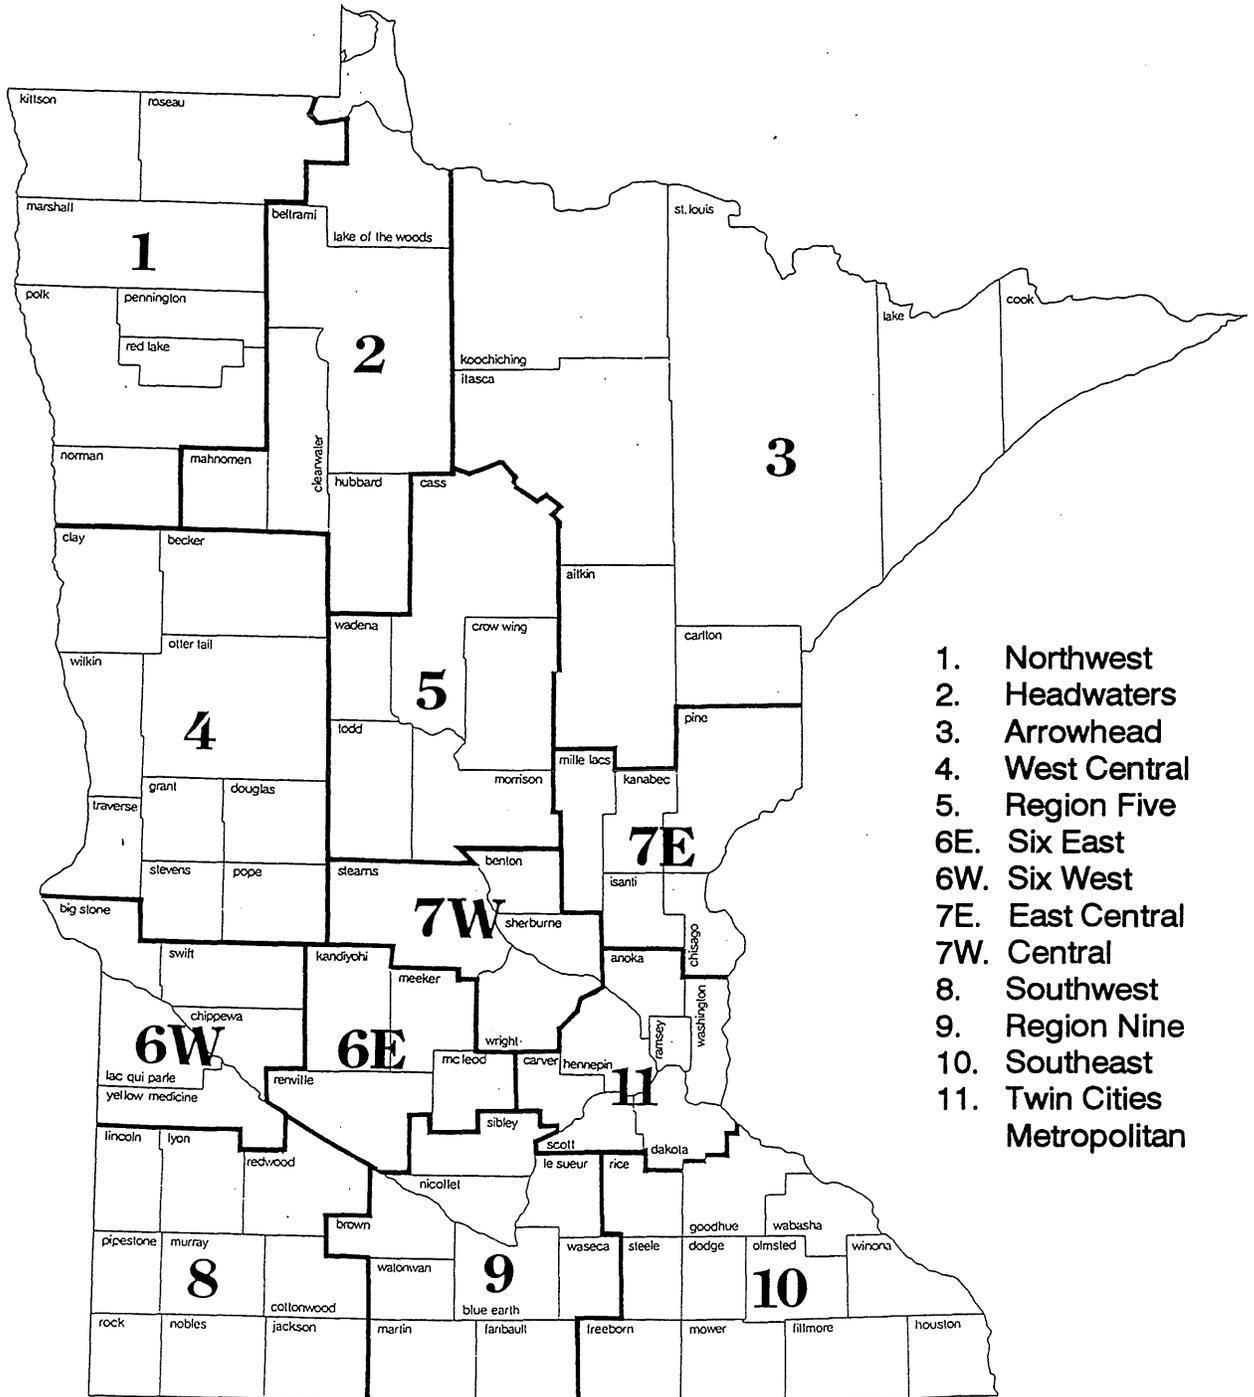

jobs or 2.0 percent. **General Building Contractors** added an additional 281 or 1.4 percent annual growth. Between third quarter 1992 and third quarter 1993, all sectors of this industry did not see annual increases; the **Heavy Construction Other Than Building** component, in spite of its large seasonal gain, actually lost 411 jobs or 2.8 percent between third quarter 1992 and third quarter 1993, as several long term building projects in tunneling and bridging came to an end. The annual figures show **CONSTRUCTION** has not yet returned to the pre-recession level and the five year high seen in 1989.

TRANSPORTATION, COMMUNICATION & PUBLIC UTILITIES employment fell by 786 jobs between second and third quarter, a loss of less than 1 percent. Its component, **Local, Suburban & Highway Passenger Transportation**, contains the category of school bus drivers which experienced a seasonal decline of 2,306 jobs. The offsetting gains for seasonal employment came in: **Motor Freight & Warehousing**, the category that includes moving and storage companies, up 1,370 jobs or 6.5 percent; and **Transportation Services**, up 193 jobs or 5.7 percent. Between third quarter 1992 and third quarter 1993 employment in **TRANSPORTATION** remained virtually unchanged. The most significant yearly changes came in: **Motor Freight & Warehousing**, adding 1,783 jobs, up 6.5 percent; and **Air Transportation** which continued the decline experienced over the last two years, shedding jobs statewide and ending down 7.3 percent. **Water Transportation**, normally seen to increase between second and third quarter, declined in 1993, reflecting continued disruption of barge traffic on the inland waterways from flooding.

TRADE remains as the second largest industry in the State, and showed seasonal growth consistent with its performance over the past several years. The industry grew as a whole by 1.04 percent between second and third quarter, adding 5,570 workers. Better still, between third quarter 1992 and third quarter 1993 **TRADE** showed greater strength, where its annual growth rate of 2.28 percent is the industry's best performance in five years. 12,083 new jobs were reported in **TRADE**, pushing the total up to 542,787 employees. Within **TRADE** it is the **Retail Trade** areas that continue to show strength; seven of nine components had annual growth rates greater than 2.5 percent. **Eating & Drinking Places** continued as the largest **TRADE** activity, adding a net 4,500 jobs for a 3.3 percent annual growth rate. Other significant gains in the **Retail** sector were: **Miscellaneous Retail**, up 3.7 percent with 2,000 employees gained; **Home Furniture, Furnishings & Equipment Stores**, up 6.8 percent, with 1,035 new jobs, continuing its performance from second quarter; **Food Stores**, up 2.8 percent with new 1,563 jobs; and **Automotive Dealers & Gasoline Stations**, up 3.6 percent with new 1,564 jobs.

The **FINANCE, INSURANCE AND REAL ESTATE** industry added 2,060 jobs between second and third quarter, a 1.55 percent gain, in line with seasonal performance between the same quarters in 1992. Between third quarter 1992 and third quarter 1993, however, **F.I.R.E.** grew faster than any other industry, with 5,400 new employees and a rate of 4.15 percent. **Nondepository Credit Institutions** led the growth rate spurt, leaping 21.8 percent over 1993 by adding 2,063 jobs. The largest component, **Insurance Carriers**, contributed 1,581 hires to the gains in **F.I.R.E.**, a 4.4 percent growth rate. The growth in this industry
