INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Economic Security. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Economic Security. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are eight categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing **total wages** paid by **average employment** and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 31. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

SECOND QUARTER 1994 COVERED EMPLOYMENT

The State of Minnesota continued to benefit from an expanding economy during the second quarter of 1994. The average monthly employment for the quarter was 2,253,034, which represents a gain of 4.3 percent or 81,629 jobs over the first quarter's average employment of 2,171,405. When compared with the second quarter of 1993, the quarterly average employment rose by 3.3 percent or 70,998 jobs. The average weekly wage in the second quarter of 1994 was \$494, which represents an increase of 2.3 percent over the second quarter of 1993.

Normal seasonal increases fueled the increase in employment from the first quarter. **MINING** employment increased by 1,048, a seasonal increase of 15.9 percent from the first quarter, but was down 209 or 2.7 percent from the same quarter a year ago. Recovery from the flood of 1993 was the major contributor to employment gains posted in **AGRICULTURE, FORESTRY, and FISHERIES**. Employment in this industry was up 1,364 or 6.7 percent from the same quarter a year ago. This also represents a seasonal increase of 45.4 percent from the first quarter. **CONSTRUCTION** employment in the second quarter increased by 17,853 jobs, up 27.8 percent from the first quarter, and up 4.0 percent from the previous year. **Special Trade Contractors**, the largest segment of **CONSTRUCTION**, provided most of the job growth with a seasonal increase of 8,459 jobs, a 19.6 percent increase over the first quarter. This also represents an increase of 3.0 percent over last year.

MANUFACTURING employment grew by 2.0 percent, or 8,172 jobs between the first and second quarters. Since the second quarter of 1993, it has grown by 7,752 jobs, a 1.9 percent increase. The average weekly wage over the same period increased from \$623 to \$639, an increase of 2.6 percent. Employment in the durable goods sector, led by **Transportation Equipment**, and **Lumber and Wood Products**, with employment gains of 1,316 and 1,371 over the second quarter of 1993, was up 2.3 percent from the first quarter.

Nondurable **MANUFACTURING** increased by 2,737 jobs or 1.6 percent from the first quarter of 1994. This is an increase of 3,161 jobs over the same period in 1993, and represents a 1.8 percent increase. Within nondurable **MANUFACTURING**, **Printing and Publishing** showed a 1.9 percent increase from first quarter 1994, adding 1,027 jobs. This was also an increase of 2.3 percent over the same quarter last year.

Employment in **TRANSPORTATION, COMMUNICATION and PUBLIC UTILITIES** during the second quarter was 106,729, which is 2,284 more than the previous quarter. This total is 4,203 more than the second quarter of 1993, which is an increase of 4.1 percent. Within Transportation, **Motor Freight and Warehousing**, and **Transportation Services** led the gainers, posting 10.2 and 10.0 percent growth over 1993, respectively.

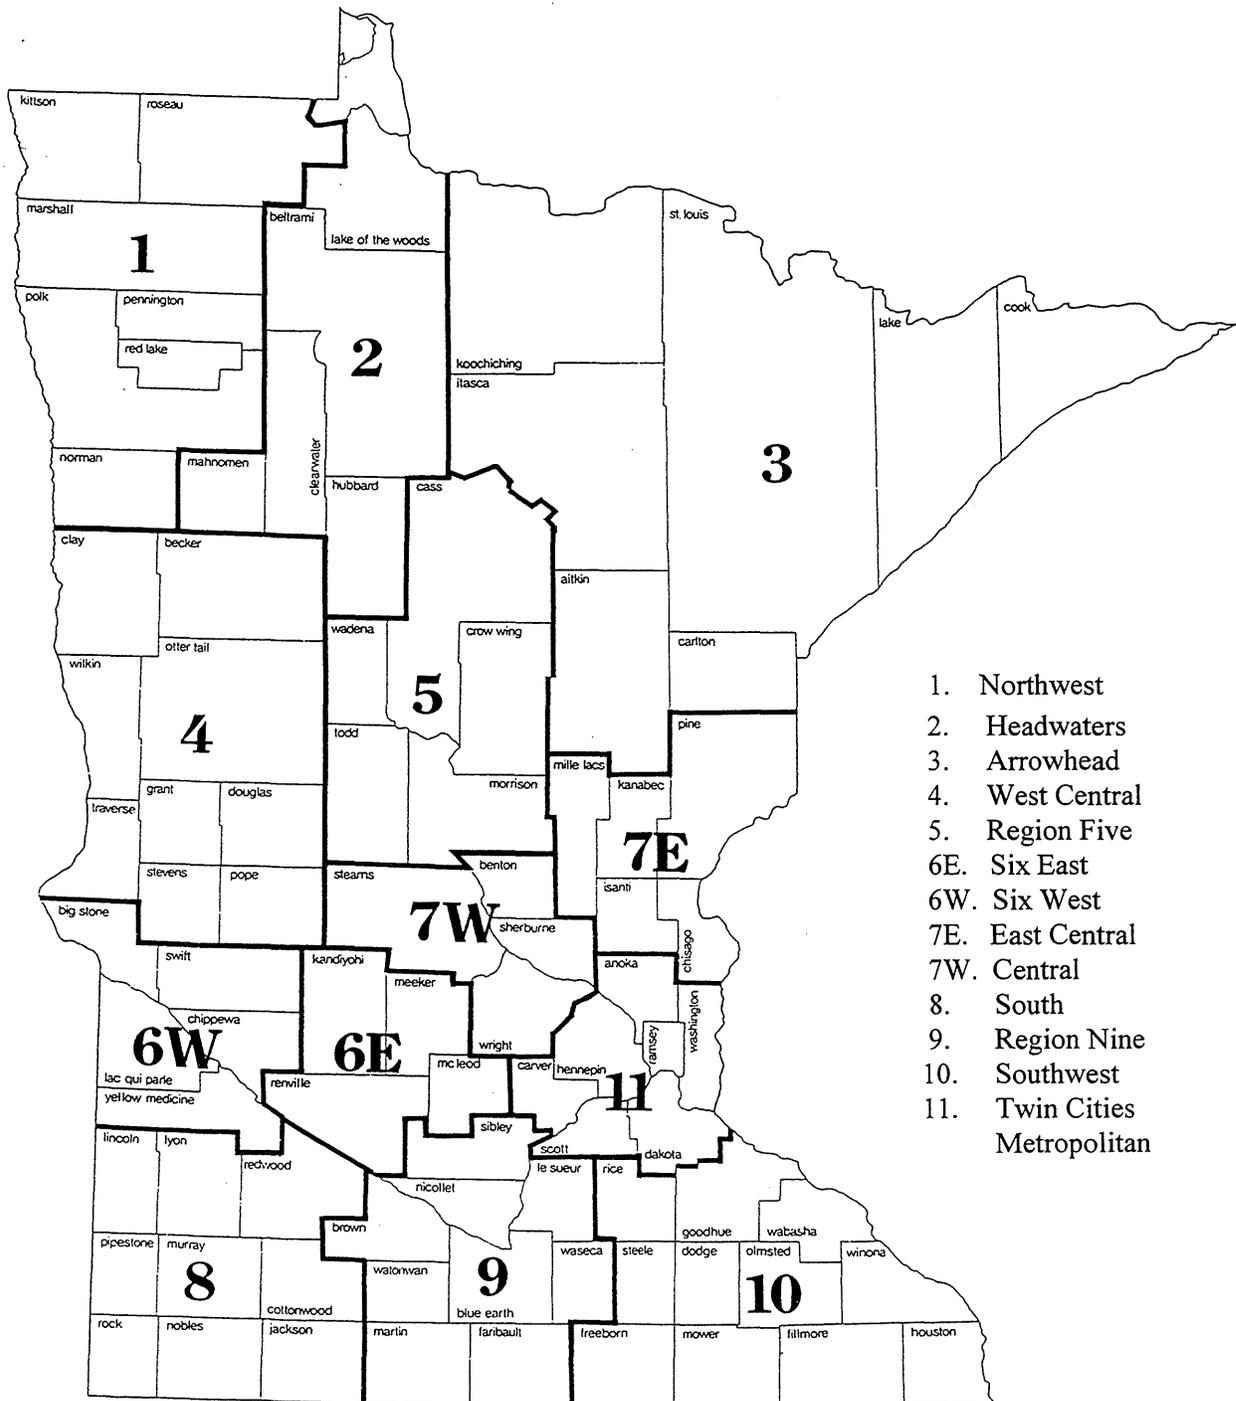

TRADE remains the second largest industry in Minnesota. The **Retail Trade** sector had quarterly average employment of 422,050, which is 4.0 percent more than both the previous quarter and the second quarter last year. The gains in **Retail Trade** can be largely attributed to substantial gains in **Eating and Drinking Establishments; Furniture, Home Furnishings, and Equipment Stores;** and in **Automotive Dealers and Gasoline Stations.**

Furniture, Home Furnishings, and Equipment Stores again had the highest growth rate, with an increase of 18.7 percent over the second quarter of 1993. The largest increase came in **Radio, Television, and Consumer Electronics**, with an increase of 2,203 jobs. Employment in **Automotive Dealers and Gasoline Stations** increased 5.6 percent over the second quarter of 1993, and **Eating and Drinking Establishments** posted an increase of 5.5 percent over last year. The increase of 13,000 jobs in Region 11 accounted for nearly 60 percent of the total increase in the State for **TRADE**. **Retail Trade** posted an average weekly wage of \$251, a \$7 or 2.9 percent increase since the second quarter of 1993. **TRADE's** net increase of 21,850 jobs was the largest increase from the second quarter of 1993, and represents 33 percent of private industry job growth statewide.

Employment in **FINANCE, INSURANCE and REAL ESTATE** grew by 1.3 percent, up 1,815 from first quarter's 137,478. Led by **Security and Commodity Brokers** with a 16.9 percent increase, Minnesota's fourth largest industrial division showed an increase of 6,102 jobs, up 4.6 percent from the same period last year, the largest percentage increase of any division for the year.

SERVICES grew 3.8 percent as compared to the second quarter of 1993. With an increase in employment of 11,807 over 1993, **Business Services**, which is partially comprised of **Advertising, Credit Reporting and Collection, Employment Agencies, and Computer and Data Processing Services**, again paced Minnesota's largest industrial division to a net increase of 21,461 jobs. Other large growth areas were **Amusement and Recreation Services, Social Services, Engineering and Management Services, and Health Services.**
