RESIDENTIAL BUILDING PERMITS ISSUED IN THE TWIN CITIES AREA JANUARY-DECEMBER 2001

Mid-year, building permits for new housing were 13 percent behind their year-ago level. Construction levels regained some ground the second half of the year, despite economic difficulties and the events of September 11. Housing remained something of a bright spot in the nation's economy as low mortgage interest rates sustained demand. In the Minneapolis-St. Paul area, the housing growth rate ranked better than average among large U.S. metropolitan areas: 9th among the 25 largest metros, when adjusted for population size.

Multifamily construction just topped its year 2000 level, with 4,537 new units authorized. This is the highest annual total reported since 1989, though not large compared to levels seen in the 1980s.

Single-family permits slipped 3 percent, numbering 11,572.

With 16,109 units in total, the region was down only 2 percent.

A surge in multifamily construction in Minneapolis drove it to the #2 spot in total housing permits, second only to Shakopee. Other top permit issuers ringed Minneapolis although the west and south were dominant.

Highest in multifamily permits:

Minneapolis	519 units
Plymouth	397 units
Apple Valley	376 units
Oakdale	278 units
Eden Prairie	251 units

Highest in single-family permits:

Shakopee	676
Blaine	667
Lakeville	513
Maple Grove	481
Woodbury	403

Construction costs continued to rise, as indicated by average building permit valuations. Single-family value, at \$180,700 per unit, was up 7.6 percent over the year. The multifamily average rose by a moderate 2.5 percent, to \$87,400 per unit (figures do not include all costs, most notably land costs).

Six other counties neighboring the Twin Cities region are also included in the federally-designated Metropolitan Statistical Area (MSA) for Minneapolis-St. Paul, based on population size and density, and commuting patterns. The pace of housing construction in these counties continued to pick up, and permits rose to account for 1 out of 4 of the 13-county total.

**Twin Cities Metropolitan Area
Residential Permits, January-December, 1980-2001**

ABOUT THIS REPORT

This report provides an update of new residential building authorized by cities in the Minneapolis-St. Paul area during January through December 2001. It includes information on the number and location of single-family and multifamily building permits issued, and building permit valuations. The data used in this report was collected by the U.S. Department of Commerce, Bureau of the Census, from local governmental units. Housing permit data for individual cities appear in a table at the end of the report. *Monthly totals shown in the Census Bureau data may not add to the year-to-date figures, since the Census Bureau makes corrections and additions to the data as the year progresses.*

Questions about this information may be directed to Regan Carlson in the Metropolitan Council's Research Office, at (651) 602-1407 or regan.carlson@metc.state.mn.us.

The Metropolitan Council collects additional housing construction data through an annual survey of cities and townships in the Metropolitan Area, which is compared to the reports from the Commerce Department and used to prepare final data. The annual survey also asks for separate reporting of townhouse units, which is not available from the Commerce Department reports.

The Council also produces regular reports on construction activity other than housing. Questions about these and other reports can be directed to Metropolitan Council's Data Center at (651) 602-1140.

DEFINITIONS

Residential activity in this report is measured in terms of ***residential units*** (housing units). A residential unit is defined as a house or apartment unit intended for occupancy as separate living quarters, having either a kitchen or cooking facilities for the exclusive use of the occupant(s) and direct access from the outside or through a common hall. Residential units do not include group quarters such as institutions, dormitories, hotels, and motels. **Townhouse units are included in the single-family category.**

The Twin Cities ***Metropolitan Area***, or Region, includes seven counties under the jurisdiction of the Metropolitan Council: Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington Counties. The Minneapolis-St. Paul ***Metropolitan Statistical Area (MSA)*** includes the seven metropolitan area counties, plus the adjacent counties of Chisago, Isanti, Sherburne, and Wright Counties in Minnesota and Pierce and St. Croix Counties in Wisconsin. Metropolitan statistical areas are defined by the federal government for the purpose of standardized data collection and analysis.

Building cost refers to the valuation assigned to a building permit at the time the permit is issued. Generally, the building permit valuation is determined by the local governmental official on the basis of average square footage costs for various types of construction, according to Minnesota Administration Department guidelines. Consideration is also given to other factors. It is intended to measure the cost of construction, and in the majority of cases is lower than actual sales price. For instance, **the cost of the lot is typically not included.**
