ST. PAUL, MN 55155

Introduction

This document is a high school summary of the detailed individual reports sent to Minnesota school districts by Minnesota State Colleges and Universities and the University of Minnesota. Those reports provided information to districts on their recent high school graduates who took developmental or remedial courses within two years after graduation. This document provides a high school breakdown of the state-level information reported Getting Prepared: A 2001 Report on Recent High School Graduates who Took Developmental/Remedial Courses: State-Level Summary.

Graduates Reported

The high school summary reports information on 1999 graduates from public high schools in Minnesota who enrolled at Minnesota public colleges or universities during the 1999-00 Academic Year and took developmental/remedial courses. Public colleges and universities include all institutions of Minnesota State Colleges and Universities and all campuses of the University of Minnesota.

Minnesota State Colleges and Universities and the University of Minnesota are prevented from disclosing individually identifiable educational data on students by the Minnesota Government Data Practices Act and the federal Family Education Rights and Privacy Act. MnSCU and the U of M are further precluded by the Rules of the Minnesota Department of Administration from disclosing information "...if it can in any way identify any particular individual." (Minnesota Rules, Section 1205.0200, subpart 4) Finally, the Family Education Rights and Privacy Act prohibits disclosure of information that would make the student's identity easily traceable. (34 C.F.R. Part 99.3.)

In order to comply with these state and federal laws, information is reported separately for each high school that had more than five 1999 graduates who took developmental/remedial courses. High schools with five or fewer graduates taking developmental/remedial courses are reported together as a group. This report does not include information on high schools that had no 1999 graduates enrolled in developmental/remedial courses at a public college or university during 1999-2000 Academic Year.

High School Summary Format and Content

The high school summary in Table A reports the following information:

- **School District** – The school district that operates the high school. (Column A)
- **High School** – The name of the high school. (Column B)
- **Total Graduates** – The total number of 1999 graduates from the high school. (Column C)
- **Graduates Enrolled in Public Systems** – The number of 1999 graduates from this high school that were enrolled at a Minnesota public college or university during the 1999-2000 Academic Year. (Column D)

- **Graduates in Public Systems as a % of Total** – 1999 graduates from this high school that were enrolled at a Minnesota public college or university during the 1999-2000 Academic Year as a percent of total graduates from the high school. (Column E)
- **Graduates with one or more developmental/remedial courses in Public Systems** – The number of 1999 graduates from this high school that were enrolled at a Minnesota public college or university and took one or more developmental/remedial courses during the 1999-2000 Academic Year. (Column F)
- **Graduates with developmental/remedial courses as a percent of Graduates in Public Systems** – 1999 graduates from this high school who took one or more developmental/remedial courses as a percent of graduates from this high school that were enrolled at a Minnesota public college or university. (Column G)
- **Graduates with developmental/remedial courses as a percent of Total Graduates** – 1999 graduates from this high school who took one or more developmental/remedial courses as a percent of total graduates from this high school. (Column H)

Interpretation of the Information for High Schools

Caution should be exercised in interpreting the information in this summary. The college readiness of graduates from a high school who enrolled in public colleges and universities may not be an accurate indicator of the college readiness of all graduates from a high school. The college readiness of graduates from that high school who enrolled in private colleges or universities or at public colleges or universities in other states is not known. It is important to consider the absolute number of graduates from a high school as well as the percentage of graduates enrolled in public colleges or universities (Column E), the percentage of graduates that took developmental/remedial courses (Column G) and the percentage of total graduates that took developmental/remedial courses.

Findings

- There were 385 Minnesota public high schools that had 1999 graduates who enrolled at public colleges or universities and took one or more developmental/remedial courses during the 1999-2000 Academic Year.
- These high schools had 52,790 graduates, or 92.7% of all public high school graduates in Minnesota in 1999 as shown in Table A.
- 42.5% or 22,247 of these 1999 graduates enrolled at Minnesota public colleges or universities during the 1999-2000 academic year.
- The percent of total graduates enrolled at public colleges or universities ranged from a low of 16.8% to a high of 71.4%.
- 32.1% or 7,200 of the 1999 graduates enrolled at a public colleges or universities took one or more developmental/remedial courses.
- The percent of graduates at public colleges or universities enrolled in one or more developmental/remedial courses ranged from a low of 8.3 to a high of 72.7%.
- The 7,200 1999 graduates who enrolled at a public college or university took one or more developmental/remedial courses represent 13.6% of the total graduates from the reported high schools.

- Graduates who took one or more developmental/remedial courses as a percent of total graduates from a high school ranged from a low of 3.4% to a high of 32.1%.

Table A
High School Summary of 1999 Minnesota Public High School Graduates
Enrolled at MnSCU Institutions or University of Minnesota Campuses
Fiscal Year 1999-2000

Caution should be exercised in interpreting this summary. The college readiness of graduates from a high school who enrolled in public colleges or universities may not be a good indicator of the college readiness of all graduates from that high school. Column H indicates the percentage of total graduates from a high school that took developmental/remedial courses at public colleges or universities in Minnesota.

School District (A)	High School (B)	Total Graduates (C)	Graduates Enrolled in Public Systems (D)	Graduates in Public Systems as a % of Total (E)	Graduates with one or more Dev/Rem Courses in Public Systems (F)	Graduates with Dev/Rem Courses as % of Graduates in Public Systems (G)	Graduates with Dev/Rem Courses as % of Total Graduates (H)
