## Scope of Report

This publication is intended to facilitate the understanding of city financial operations by citizens, local government officials, and other policy makers. The report summarizes, through data tables and charts, the financial operations of Minnesota cities under 2,500 in population for calendar year 1999. These cities are required to annually submit annual financial reports to the Office of the State Auditor (OSA).

The data presented in this report is divided into governmental funds and proprietary funds. The governmental funds consist of the General, Special Revenue, Capital Projects, and Debt Service Funds. The financial operations of these funds are summarized in Tables 1 through 3 of this report. Tables 5 through 7 present the data by individual city. Appendix A discusses factors that affect the revenues and expenditures of cities.

The enterprise or proprietary funds of cities are presented separately from the governmental funds. Minnesota cities operate many types of public service enterprises. The enterprises furnish a variety of services and operate wholly or in large part with revenues derived from the sale of goods or services. Table 4 summarizes the operating revenues, expenses, and income/(loss) for city enterprises. The financial operations of the municipal public service enterprises (excluding municipal liquor stores) are presented in tables 8 through 17. Footnotes used in the analysis of the enterprise operations are described at the end of the enterprise fund section. Table 18 details the financial operations of municipal liquor operations.<sup>1</sup>

Table 19 lists, by individual city, the bonded and other long-term debt outstanding as of December 31, 1999. Other long-term debt refers to liabilities such as long-term lease agreements, installment purchase contracts, and notes.

An analysis of unreserved fund balances is not presented in this report. The majority of cities under 2,500 in population use a cash basis of accounting. The others use a modified accrual basis of accounting. Those cities using a cash basis of accounting report a single cash balance for all governmental funds at the end of the fiscal year. Cities using a modified accrual basis of accounting report separate fund balances for all of their governmental funds and denote the amounts that are reserved and unreserved. Because of the accounting differences among cities under 2,500 in population, a comparative analysis of unreserved fund balances is not appropriate.

In addition to this publication, the Office of the State Auditor maintains an interactive database containing several years of data that can be accessed through the OSA web site. The database allows users to customize the presentation of data to their individual needs. For example, a user can select a group of cities they want to compare, the criteria on which to compare them, and the time frame in which to compare them. The query can then be viewed on screen or saved to a file for downloading. The OSA web site address is [www.osa.state.mn.us](http://www.osa.state.mn.us).

---

<sup>1</sup> A separate and more detailed analysis of municipal liquor operations is available in the Office of the State Auditor's publication, *An Analysis of Minnesota's Municipal Liquor Store Operations in 1999*.

# Overview

## Total Governmental Revenues

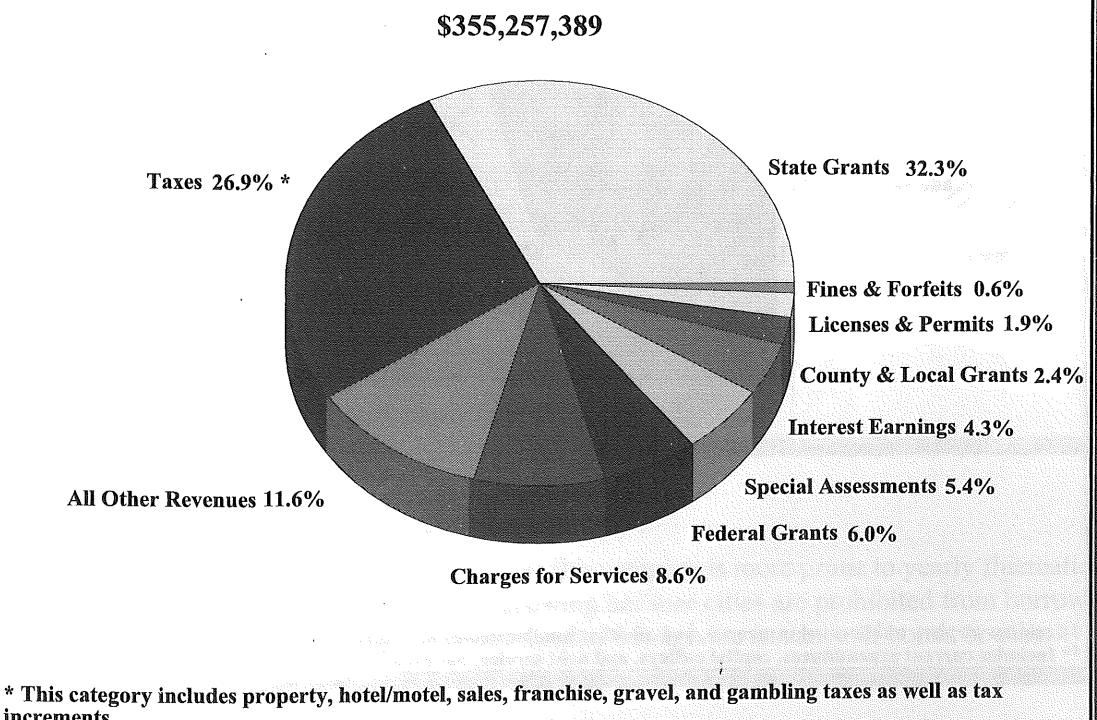

In 1999, cities under 2,500 in population raised total governmental revenues of \$355.3 million to finance city services. This represents an increase of 3.1 percent over the amount raised in 1998.

The shares of total governmental revenues generally vary only slightly from year to year. Over time; however, there have been some shifts in the composition of revenues. The single two largest sources of revenues for cities have remained taxes and state intergovernmental revenues. However, since 1995, state intergovernmental revenues as a share of total revenues have declined. In 1995, state inter-governmental revenues accounted for 34.0 percent of total revenues compared to 32.3 percent in 1999. In contrast, the use of tax revenues has increased. Tax revenues as a percent of total revenues has grown from 26.0 percent in 1995 to 26.9 percent in 1999.

One source of revenue that has shown a steady increase in its share of total revenues is charges for services. This category has grown from 7.9 percent in 1995 to 8.6 percent in 1999. Charges for services related to streets and highways showed the greatest increase at 115.7 percent over the same period. To further examine five-year trends in revenues, refer to Table 1.

Figure 1 shows the relative shares of total governmental revenues by source. The underlying data for this chart is detailed in Table 1.

**Figure 1: Total Governmental Revenues**

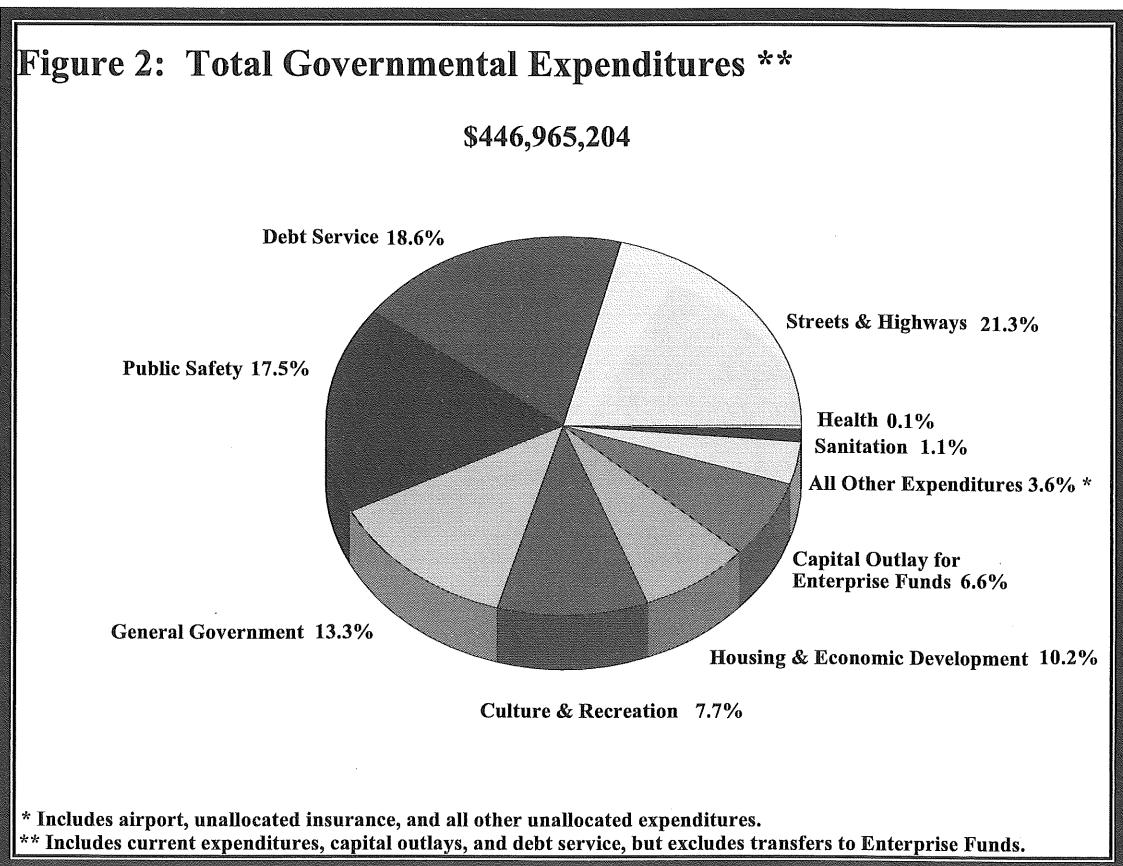

## Total Governmental Expenditures

Cities provide a variety of services to their citizens. Most services are accounted for in governmental funds. The governmental funds are made up of the General, Special Revenue, Capital Projects, and Debt Service funds. In 1999, cities under 2,500 in population expended \$447.0 million from Governmental Funds to provide city services. This represents an increase of 5.2 percent over 1998 total governmental expenditures.

The relative shares of total governmental expenditures change very little from year to year. However, as the priorities of cities change over time, the relative shares of total spending shift to reflect these new priorities. Since 1995, the top three expenditure categories for small cities listed by share of total expenditures have been: streets and highways, debt service, and public safety. These three categories have each gained in their share of total expenditures since 1995. The category of expenditures showing the greatest increase in share of total expenditures over this five-year period was housing and economic development. This category accounted for 8.4 percent of total governmental expenditures in 1995, compared to 10.2 percent in 1999. To examine these and other changes over the five-year period, refer to Table 1.

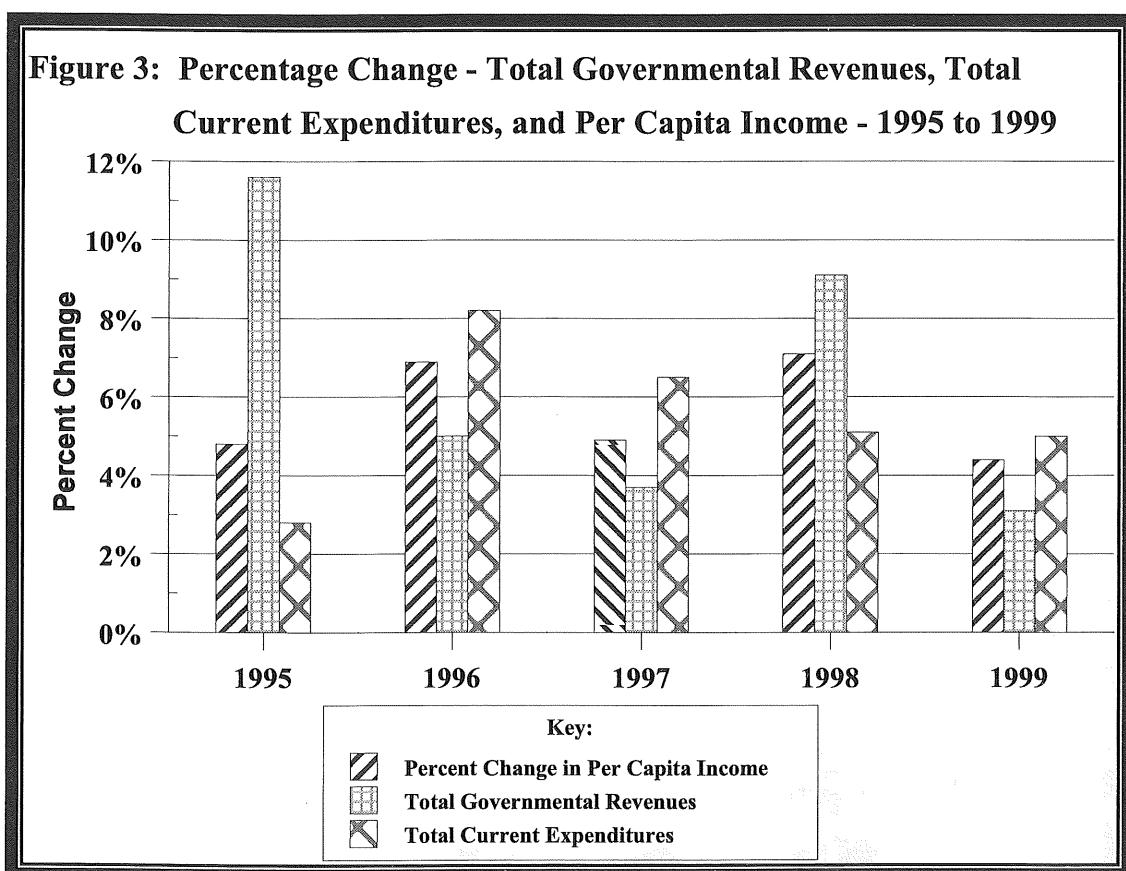

Figure 2 shows the relative shares of total governmental expenditures by function. The underlying data for this chart is detailed in Table 1.

## Growth in Government

During the five-year period of 1995 to 1999, total governmental revenues and total current expenditures increased every year.<sup>1</sup> The rate at which they grew varied from 2.8 percent to 11.6 percent. To place this growth in perspective, Figure 3 below includes a bar showing the growth in per capita personal income for Minnesotans.<sup>2</sup> Per capita income is an indicator of the ability of citizens to pay for governmental spending. When expenditures grow faster than per capita personal income, citizens must spend a greater proportion of their income on governmental services.

Figure 3 compares the growth in total current expenditures and total governmental revenues to the change in Minnesota per capita personal income from 1995 to 1999. During this period, total current expenditures grew faster than per capita income for three of the five years. In contrast, per capita income grew faster than total revenues for three of the five years.

<sup>1</sup> The chart excludes capital outlays as this category is more prone to yearly fluctuations. The chart also excludes revenues derived from borrowing because cities are prohibited from borrowing for current expenditures. Most capital projects are funded through the issuance of bonds or other types of borrowing such as certificates of participation.

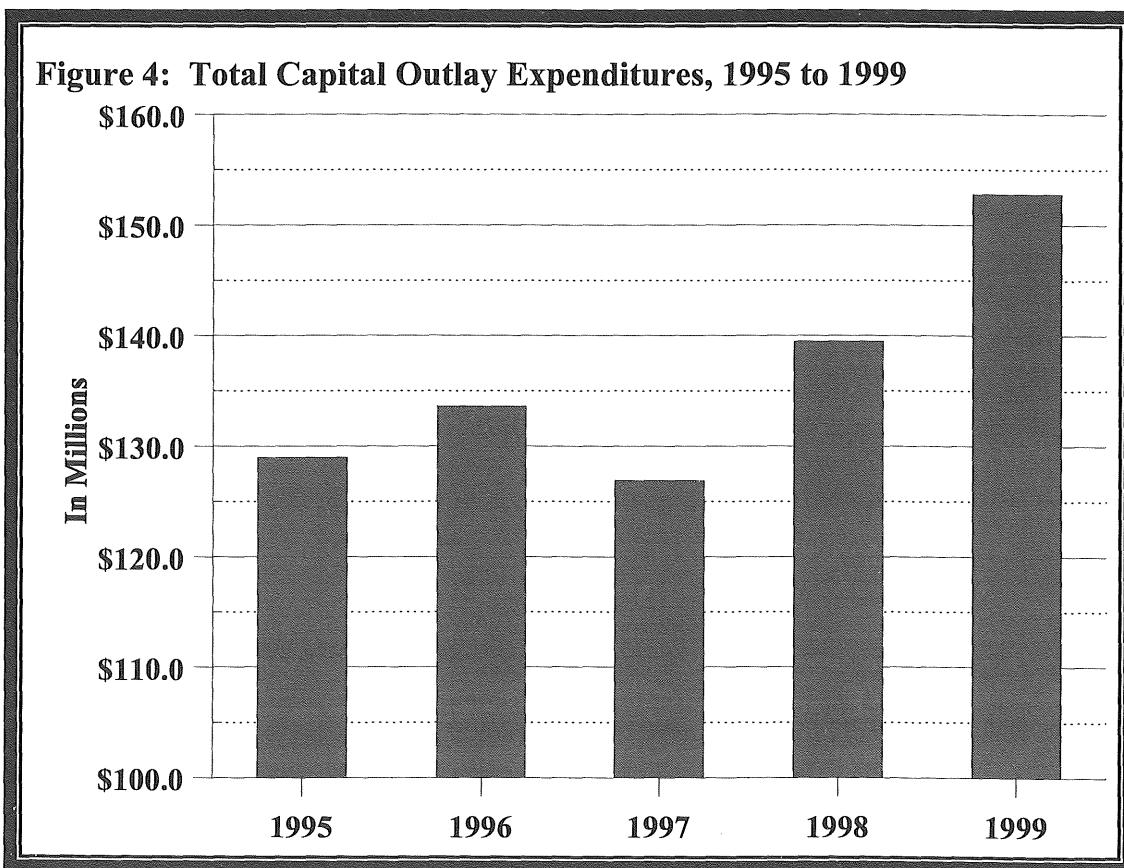

<sup>2</sup> Per capita income is calculated by dividing Minnesota total personal income by its total mid-year population. The figure is calculated by the Bureau of Economic Analysis, which is a part of the U. S. Census Bureau.

## Capital Outlay Expenditures

Cities expended \$152.8 million on capital investments in 1999. This represents an increase of 9.5 percent over the level expended in 1998. The relatively large increase in capital outlays reflects substantial projects in a number of cities. Slightly more cities increased capital spending than decreased capital spending, but the value of the projects in those cities increasing capital outlays was greater than in those decreasing capital outlays. The categories of capital expenditures showing the greatest growth were: culture and recreation, economic development, and streets and highways.

Capital outlays are more likely than current expenditures to vary significantly from one year to the next. The reason for this is that capital projects tend to be large in size but the associated costs are short-term. Some of the factors that influence the level of capital investments include: demands for public meeting places and facilities, the need to replace aging infrastructure, public safety concerns, infrastructure improvements for new developments, and damage to public facilities caused by fire, floods, and storms.

Figure 4 illustrates the trend in capital spending for the years 1995 through 1999. Table 7 provides a detailed analysis of capital outlays for individual cities.

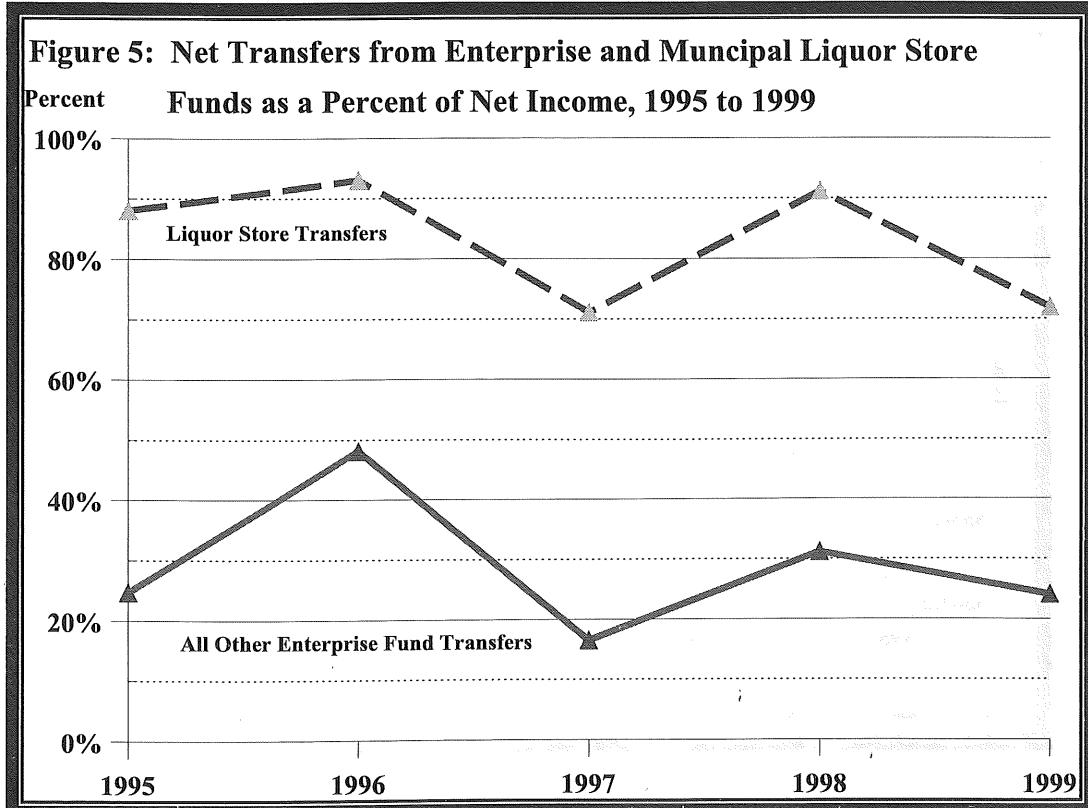

## Municipal Enterprises

In addition to Governmental Funds, many cities establish Enterprise Funds to account for services that are financed and operated in a manner similar to private business enterprises. These enterprises are intended to be self-sustaining through fees and user charges. Although some enterprises may earn a net income, most have the objective of breaking even. Enterprise fund accounting is also used to provide more detailed financial information on operations where there are public policy, accountability, management control, and other concerns. The most common enterprises created by cities are electric, gas, sewer, water, and heat utilities.

The net income of municipal enterprises increased 33.0 percent between 1998 and 1999. However, net transfers (transfers out minus transfers in) from Enterprise Funds increased just 2.7 percent. An example of this type of transfer is when a city transfers excess reserves from its water utility enterprise fund to the city's General Fund.

Municipal liquor stores, which are separated from other municipal enterprises because of accounting differences, showed an increase of 20.1 percent in net income between 1998 and 1999. In contrast, net transfers from municipal liquor operations decreased 5.2 percent from the level transferred in 1998.

Figure 5 examines the five-year trend in net transfers from enterprise and municipal liquor store funds as a percent of net income. The chart helps illustrate that the primary purpose of municipal liquor stores is to provide additional revenues to cities, whereas other types of municipal enterprises primarily exist to provide a particular service for the city and citizens. Tables 8 through 18 provide additional details on municipal enterprises.

## Outstanding Long-Term Indebtedness

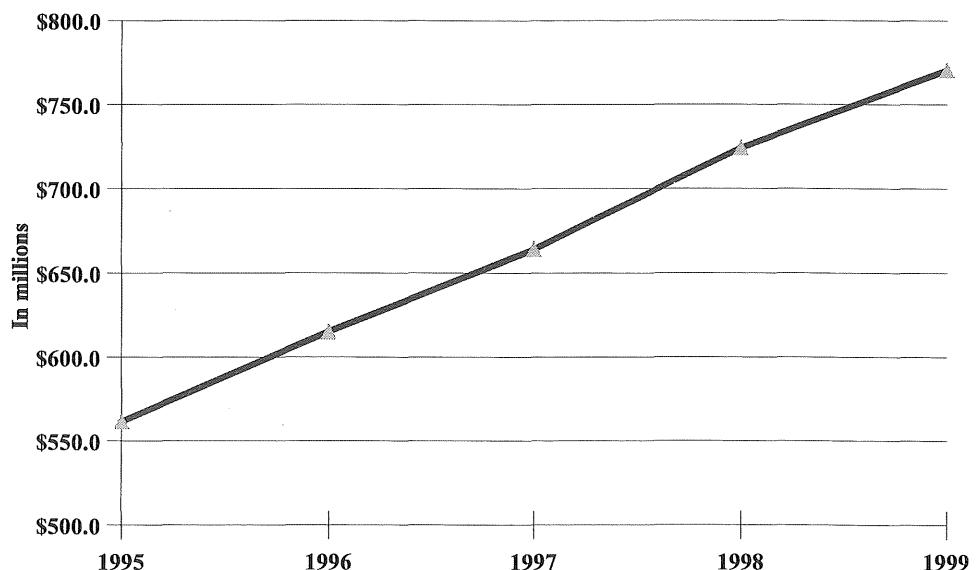

Cities incur long-term debt through the issuance of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Long-term lease agreements are also classified as long-term debt. Cities may only borrow to finance capital projects and purchases. Cities are restricted by law from borrowing for current expenses. The amount of outstanding debt affects a city's current expenditures because cities must make principal and interest payments to service the debt.

Table 1a looks at outstanding bonded indebtedness for 1998 and 1999. Figure 6 shows the five-year trend of outstanding long-term debt for cities under 2,500 in population.

**Table 1a: Two-Year Summary of Outstanding Bonded Indebtedness**

	<b>1999 Amount</b>	<b>1998 Amount</b>
General Obligation	\$ 83,528,658	\$ 89,244,435

## ENTERPRISE FUND FOOTNOTES

- [\*] The accrual basis of accounting is used; however, no depreciation is shown.
- [0] Information is taken from a cash receipts and disbursements statement.
- [1] The water utility operations include the sewer and refuse disposal enterprise fund operations.
- [2] The water utility operations include the refuse disposal enterprise fund operations.
- [3] The water utility operations include the sewer enterprise fund operations.
- [4] The electric utility operations include the water enterprise fund operations.
- [5] Water purchased from the City of St. Paul.
- [6] The electric utility operations include the sewer enterprise fund operations.
- [7] Joint powers agreement.
- [8] The electric utility operations include the heat enterprise fund operations.
- [9] The electric utility operations include the gas enterprise fund operations.
- [10] The breakdown of interest payments and depreciation was unavailable.
- [11] The hospital operations include the nursing home operations.
- [12] The enterprise fund fiscal year end is April 30th.
- [13] The enterprise fund fiscal year end is June 30th.
- [14] The enterprise fund fiscal year end is September 30th.
- [15] The operations were shown in the Special Revenue Funds, an Enterprise Fund treatment is required.
- [16] The municipal liquor store discontinued on-sale operations during the current year.
- [17] The electric utility operations include the refuse disposal enterprise fund operations.
- [18] The sewer utility operations include the refuse disposal enterprise fund operations.
- [19] The debt payments are also shown in the Governmental Funds.
- [20] Under construction during the current year.
- [21] The enterprise fund discontinued operations during the current year.
- [22] Non-operating income includes the gain on the sale of fixed assets.
- [23] The enterprise fund is shown on the modified accrual basis of accounting.
- [24] The operations were shown in the Governmental Funds, an Enterprise Fund treatment is required.
- [25] The operations were transferred to the Governmental Funds.

## **ENTERPRISE FUND FOOTNOTES**

- [26] The hospital operations include the clinic enterprise fund operations.
- [27] The water utility operations include the recycling enterprise fund operations.
- [28] Discretely presented component unit.
- [99] Failed to report in time for this publication.

## **Types of Public Service Enterprises**

- W Water utility enterprise
- S Sewer utility enterprise
- R Refuse collection and disposal enterprise
- L City-owned liquor store enterprise
- E Electric utility enterprise
- H City-owned hospital enterprise
- N City-owned nursing home enterprise
- O Other public service enterprises

## **APPENDIX A**

### **FACTORS INFLUENCING CITY FINANCES**

This page left blank intentionally

## Appendix A

### Factors Influencing City Finances

The finances of cities are affected by many different factors. Some of the variation results from decisions made by city officials. Some is due to factors outside the control of the elected officials, such as a city's size, the economic status of its residents, or the proximity of similar services provided elsewhere. The amount of revenue available may be influenced by rising or falling property values, the use of fee-based services, intergovernmental grants for projects, access to taconite aid, and many other interrelated factors. Expenditures may be affected by the demographic, geographic, historical or political landscape of the city. Large swings in expenditures may reflect demands caused by extraordinary weather events such as floods and tornados, high levels of snowfall, public safety events such as forest or brush fires, or large-scale investigations of high-profile crimes. Some factors have an on-going effect on city finances, while others might be one-time events.

#### A. Demographics

**Age of Housing.** In the metropolitan area, the average age of housing in a city reflects not only the probable condition of the city's infrastructure, but several other conditions as well. The League of Minnesota Cities found the average age of housing to be indicative of a variety of characteristics, including a higher relative rate of poverty, more tax exempt property, more subsidized housing, and a declining population base. Each of these factors tends to contribute to a demand for public services.

**Population.** Cities with larger populations face certain challenges not encountered by smaller cities. Simply dealing with large amounts of traffic is one challenge that can become very costly, depending upon the burden carried by an area's streets and highways. Large populations may also indicate high population densities that in turn are associated with higher poverty and crime rates.

**Population Decline.** A large loss of population can have a very significant effect upon a city's spending. The costs of a city's infrastructure and many of its services do not go down immediately when a number of city residents move away. The city must then make decisions to do without certain services or to raise the property taxes on the remaining citizens to pay for the services.

**Income.** Income is indirectly related to a city's ability to raise revenues. Where incomes are lower, property values may also be depressed, reducing a city's tax capacity. Poverty rates, in turn, will be higher, creating greater demand for public services.

**Crime Rate.** Higher crime rates require a correspondingly high level of public safety services. Cities that host sporting and other entertainment events can draw large crowds of nonresidents and create unusual public safety service demands. In addition, higher levels of poverty are also associated with the crime rate of a city and contribute to an overall greater demand for police protection. In addition to these demands, expenditures can be affected by a number of different factors, which include the number, type and use of personnel, the scope of services, and amount of shared services. In addition, the demographics and mix of facilities within the city may affect expenditures for public safety.

## B. Geographic Location

Different areas of the state often operate within quite different economic environments. Just the presence of one large business or industry can impact an entire region. Declines in industries or companies that dominate local economies may result in a higher demand for public assistance, and at the same time reduce the tax capacity of the area. Trends in agriculture may result in lower property values and a decline in revenues for cities in regions whose economies are primarily based on agriculture. Cities located in these areas may experience difficulty raising revenues at the same time that they face higher demands for public services.

## C. Revenue Sources

**Tax Capacity.** The amount of money any individual or entity spends is directly related to the amount that is available to spend. Likewise, the costs of doing business are directly related to the amounts of revenue that can be generated to meet the costs. The greater the amount and types of revenue available to a city, the more it will spend.

**Taconite Aid.** Many cities located in the "Iron Range" are eligible to receive special funding in the form of taconite aid. For a number of years, revenues in these cities were greater than they might have been without the distribution of taconite aid, especially for cities without taconite processing plants. In addition, the availability of taconite aid enabled these cities to spend without raising property taxes.

**Enterprise Funds.** Services provided through enterprise funds allow cities to pass the costs of services directly onto the users of the services. By using this type of accounting mechanism, cities may be able to keep down the level of general property taxes needed to provide services.

## D. Shared Services, Joint Powers Agreements

A significant practice among cities is the sharing of services and the use of joint powers agreements to provide necessary services. "Joint exercise of powers" is defined in Minnesota Statutes § 471.59 (1999). Such arrangements allow cities to provide services jointly with other cities and thus pool their resources. For example, the metropolitan cities of Circle Pines, Lexington, and Centerville have a joint powers agreement to provide police protection services.

A number of cities share services through the use of contracts. For example, the City of St. Paul contracts with several other cities in Ramsey county for the provision of water. The City of St. Anthony contracts with Falcon Heights and Lauderdale to provide police protection. In Greater Minnesota, the City of Thief River Falls provides fire services to five townships on a contractual basis.

Shared service arrangements are not necessarily formal; some cities provide services to other jurisdictions on an informal basis. By sharing the costs of services, cities can achieve greater economies of scale and avoid duplicating services and capital investments. Cities that provide a service to a number of entities may show higher expenditures for that service, but will have these costs defrayed by revenues provided by the other participating entities.

## **E. Proximity to County, Regional, or State-Run Programs/Facilities**

Cities that are located near county, regional or state-run facilities may decide to have their citizens take advantage of those facilities and services rather than provide them on their own. For example, the city that houses the county library probably won't build their own. Similarly, cities located close to a regional or state park may opt not to develop or expand their own park program. Smaller cities located near larger cities may do the same.

The degree of isolation experienced by a community, whether geographic or technological (e.g., lack of advanced telecommunications capability), can also affect service demands and costs. Cities that are remote from other communities may not have the opportunity to participate in joint powers arrangements or have access to urban amenities, and thus may need to provide a wider range of services out of their own budgets.

## **F. Types of Industry Present and Service Demands**

One factor that can have a significant effect on an individual city's situation is the type of industry present in the city. For example, industries such as paper mills may place particularly heavy burdens on the city's water supply, sewers, fire department, or streets. At the same time, the presence of these industries contributes to the property tax base of the city. Expenditures for these services may be higher than for other cities, but the cost is not necessarily borne by the residents of the city.

## **G. Source of Labor**

The extent to which a city depends upon other than full-time, salaried employees will affect the levels of expenditures. The following types of arrangements can reduce the full-time complement of staff: extensive use of part-time employees; significant reliance on volunteers; and use of contracts for specific projects or general services. Besides lower wages to part-time employees, an important reduction in costs created through these types of arrangements is in the area of fringe benefits, which are not generally paid to either part-time employees, volunteers, or individuals hired on a contract basis.

Some employee arrangements may increase, rather than reduce costs. Some cities' expenditures are affected by the extensive unionization of their work force. Because of the role of the unions, salary costs may be more difficult to control for these cities.

## **H. Other Factors**

The effects of weather and natural disasters can significantly affect the expenditures for certain services over a period of time. Cities affected by floods and tornadoes may have higher public safety, streets and highways, and other infrastructure costs. During winters in which there is an unusually high snow fall, cities may have increased expenditures for snow removal. There are many other incidental factors not included in this list. Explanations of differences in city expenditures should be pursued with city officials.

## GLOSSARY

This page left blank intentionally

## Glossary

**BORROWING** - These revenues reflect the sale of bonds and notes, certificates of indebtedness, and tax anticipation certificates. Cities are restricted by law from borrowing for current expenses.

**CAPITAL OUTLAY** - These expenditures include the purchase, construction, or permanent improvements of buildings, equipment, machinery, and land. Capital outlay varies from year to year based on the needs and resources of the cities.

**CAPITAL OUTLAY FOR ENTERPRISE FUNDS** - The expenditures from governmental funds for improvements to public service enterprises, such as sewer and water mains.

**CAPITAL PROJECTS FUND** - A fund created to account for the financial resources that are used for the acquisition or construction of a fixed asset.

**CASH BASIS OF ACCOUNTING** - Basis of accounting that recognizes transactions or events when related cash amounts are received or disbursed.

**CHARGES FOR SERVICES** - These revenues reflect fees for activities of the governmental funds. These include rent of city hall by individuals or organizations, police and fire contracts, fire calls, recreation fees, park dedication fees, etc.

**DEBT SERVICE EXPENDITURES** - These expenditures reflect the annual costs of servicing the outstanding debt of the local government. These costs include principal, interest, and some fiscal charges.

**DEBT SERVICE FUND** - A fund to account for the collection of resources and payment of principal and interest from long-term debt.

**ENTERPRISE FUND** - A fund established to account for operations financed and operated in a manner similar to private business. Examples include water, sewer, and electric utilities. The expenses of providing services are primarily financed by user charges.

**FINES AND FORFEITS** - These revenues reflect receipts from the payment of penalties for law violations, non-observance of contracts, and forfeited deposits.

**FRANCHISE TAXES** - These revenues reflect proceeds from taxes imposed on public utilities, usually involving elements of a monopoly, (e.g., electric utilities, gas utilities, cable TV) for use of public property.

**GENERAL FUND** - The fund used to account for all financial resources not required to be accounted for in another fund. This fund is the main operating fund.

**GENERAL GOVERNMENT EXPENDITURES** - These expenditures reflect the costs associated with running a local government, such as the mayor, the city council, administration, finance, and elections. Expenditures in this category include salaries, wages, and benefits of legislative, judicial, and administrative personnel, supplies, and city hall maintenance.

**GOVERNMENTAL FUNDS** - The funds through which most governmental activities are financed. The four governmental fund types are: general, special revenue, debt service, and capital projects.

## Glossary

**GRAVEL TAX** - These revenues are derived from taxes imposed by the local government for aggregate material removal.

**HEALTH** - These expenditures are for the maintenance of vital statistics, restaurant inspection, communicable disease control, and various health services and clinics.

**HRA AND ECONOMIC DEVELOPMENT** - These expenditures are for development and redevelopment activities in blighted or otherwise economically disadvantaged areas. Activities may include low interest loans to individuals and businesses, cleanup of hazardous sites, rehabilitation of substandard housing and other physical facilities, and other assistance to those wanting to provide housing and economic opportunity within a disadvantaged area.

**INTEREST ON INVESTMENTS** - These revenues reflect interest earned on checking and savings accounts, CDs, money market funds, and bonds. This category also includes dividends. In addition, the net increase or decrease in the fair value of investments is recorded here.

**LICENSES AND PERMITS** - These revenues reflect receipts from liquor licenses, cigarette licenses, other business licenses, street use permits, buildings permits, and other non-business licenses and permits.

**MISCELLANEOUS EXPENDITURES** - These expenditures reflect the costs of activities that were not allocated to a specific function. Some activities included in this category are pension and insurance costs not allocated to a specific department.

**MISCELLANEOUS REVENUES** - These revenues refer to refunds, reimbursements, donations, and lease payments.

**MODIFIED ACCRUAL BASIS OF ACCOUNTING** - Basis of accounting according to which (a) revenues are recognized in the accounting period in which they become available and measurable and (b) expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest on general long-term debt and certain similar accrued obligations, which should be recognized when due.

**NET TAX LEVY** - The city net property taxes, after state property tax relief aids or grants, required to be paid by the property owners of the city.

**OTHER FINANCING SOURCES** - Long-term debt proceeds, sale of fixed assets, and transfers from other funds.

**OTHER FINANCING USES** - Transfers to other funds, refunding bond proceeds deposited with escrow agent and invested until they are used to pay principal and interest on the old debt at a future time, and remittance to other agencies.

**OUTSTANDING LONG-TERM DEBT** - This category refers to the long-term debt that a local government has incurred to finance its capital projects. Examples of long-term debt include various types of bonds and other obligations such as notes and long-term leases.

## Glossary

**PARKS AND RECREATION** - These expenditures reflect park maintenance, mowing, planting, and removal of trees. Recreation expenditures include festivals, bands, museums, community centers, cable TV, baseball fields, organized recreation activities, etc.

**PUBLIC SAFETY EXPENDITURES** - These expenditures reflect the costs related to the protection of persons and property. This category combines several distinct city departments, including police, fire, ambulance services, and other protection. They are combined here because cities allocate similar responsibilities differently among these departments.

**SANITATION** - These expenditures reflect the costs of refuse collection and disposal, recycling, as well as weed and pest control. Some cities provide sanitation services through enterprise funds.

**SPECIAL ASSESSMENTS** - These revenues refer to levies made against certain properties to defray all or part of the costs of a specific improvement, such as new sewer and water mains, deemed to benefit primarily those properties. The amount includes the penalties and interest paid on the assessments.

**SPECIAL REVENUE FUNDS** - A fund used to account for the proceeds of specific revenue sources that are restricted to expenditures for a specific purpose.

**STREETS AND HIGHWAYS EXPENDITURES** - These expenditures reflect the costs associated with the maintenance and repair of local highways, streets, bridges, and street equipment. Common expenditures include patching, seal coating, and snow removal. Expenditures for road construction are not included in current expenditures but are accounted for as capital outlay.

**TAXABLE TAX CAPACITY** - The tax capacity less the tax increment district value, less the fiscal disparities contribution value, plus the fiscal disparities distribution value.

**TAX CAPACITY** - The value assigned to the property used to calculate the property taxes.

**TAX INCREMENTS** - These revenues refer to the amount of resources cities generate when they establish tax increment financing (TIF) districts. In a TIF district, the increase in property tax revenues in the redeveloped area are used to pay the costs of development and redevelopment in the district rather than the general services of the city, county, and school district.

**TOTAL CURRENT EXPENDITURES** - This category reflects the total of all expenses relating to current operations.

**TOTAL EXPENDITURES** - This category includes current operating expenses, capital outlays, and debt service principal and interest payments.

**TOTAL REVENUES** - This category reflects all sources of revenue that increase the amount of available resources without creating a liability or a future payment. Borrowing and transfers between funds are not included in total revenues.

**TRANSFERS - ENTERPRISE FUNDS** - The transfer of available resources to or from public service enterprises. An example of this transfer is a water utility enterprise fund transferring money to the General Fund.

## Glossary

**TRANSFERS - GOVERNMENTAL FUNDS** - The transfer of money between governmental fund types. The revenues and expenditures for these funds are always shown in the same tables.

**UNALLOCATED INSURANCE** - These expenditures refer to insurance premiums that were not allocated to a specific function of government.

**UNALLOCATED PENSION CONTRIBUTIONS** - These expenditures refer to contributions to pension plans that were not allocated to a specific function of government.
