## To 1978 Metropolitan Council Annual Report To the Minnesota State Legislature

January 1979

HT  
394  
.T9  
M47a  
1978  
appendix

## About this Appendix

This Appendix contains a complete listing of all plans and projects received for review under its referral process from November 1, 1977 to October 31, 1978.

The referral process is a system of review and evaluation carried out by the Council under responsibilities assigned to it by state and federal law. The purpose of the review is to ensure coordination of project proposals and local planning with regional planning.

The types of "referrals," or projects, that undergo regional review vary widely, as the listing suggests. Federal regulations and state statutes involve the Council in reviewing applications submitted by local governmental units and private agencies for federal financial assistance. The Council follows the "A-95" review process, established by federal regulation, in reviewing such requests.

In the referral process, the Council can, in general, take two kinds of actions, depending on the type of referral. It can (1) *recommend* a certain course of action to another, approving agency, or (2) it can *approve* or *disapprove* a referral with no further consideration by another governmental unit. Projects proposed under the "A-95" process, plus those proposed under certain state provisions, fall into the *recommend* category; a limited number of proposals, which include those of metropolitan agencies, come under the *approve* or *disapprove* category.

Some referrals are reviewed for more than one purpose or more than one time. Referrals are listed only as submitted for the initial or primary review.
