About this Appendix

This Appendix contains budgetary and referral information required by Minnesota Statutes Chapter 473. It contains detailed financial information on the Council's 1980 and 1981 revenues and expenditures. The report lists all plans and projects received for review under its referral process from November 1, 1979 to October 31, 1980. In addition, the appendix contains a list of all publications produced by the Council in 1980 and a list of people who served on major advisory committees during the year.

The referral process is a system of review and evaluation carried out by the Council under responsibilities assigned to it by state and federal law. The purpose of the review is to ensure coordination of project proposals and local planning with regional planning.

The types of "referrals," or projects, that undergo regional review vary widely, as the listing suggests. Federal regulations and state statutes involve the Council in reviewing applications submitted by local governmental units and private agencies for federal financial assistance. The Council follows the "A-95" review process, established by federal regulation, in reviewing such requests.

In the referral process, the Council can, in general, take two kinds of actions depending on the type of referral. It can (1) *recommend* a certain course of action to another, approving agency, or it can (2) *approve* or *disapprove* a referral with no further consideration by another governmental unit. Projects proposed under the "A-95" process, plus those proposed under certain state provisions, fall into the *recommend* category; a limited number of proposals, which include those of metropolitan agencies, come under the *approve* or *disapprove* category.
