Region Nine Development Commission

Annual Report FY '83

831428

Pursuant to Mn Stat 462.393

region nine development commission

This will be my last opportunity to write to you as Chairman of the Region Nine Development Commission. The past four years have been rewarding ones. I have seen the Commission and its staff make steady progress in their efforts toward promoting intergovernmental cooperation and in providing assistance to those local units of government we represent. Of course not all problems have been solved, but I think we have come a long way and our time has been well spent.

Serving as chairman has been an interesting experience. I look forward now to using these experiences to be a more effective commissioner. As chairman I have had the opportunity to meet and work with people from all over the state of Minnesota. Region Nine is but part of the much larger whole, just as the cities, counties, townships and other groups serve as component parts to make up Region Nine.

Regional problems require regional solutions. Providing services to existing units of government makes it possible for those governments to be more effective at less cost. Providing an open forum where regional problems can be discussed eliminates costly duplication of effort and makes it possible for local governments to be more efficient.

It appears that economic recovery will be a slow process and continued efforts at cooperation will be required for some time to come. An active and interested Commission will serve as an important link in those efforts.

Kenneth Albrecht
Chairman
Region Nine Development
Commission

region nine development commission

The last year for the Commission is much the same as those years that have gone before. The one factor that is always present is change.

Change is healthy. It is an indication that the Commission remains responsive to the local units of government. More and more of our staff time goes each year to directly assisting those local units.

We see our economic development efforts starting to pay off as we submit applications for the SBA "503" loan program for regional businesses.

Grant administration is another task that we are now performing for local grantees.

We continue to provide Human Service assistance to the counties through the programs that we are involved in. The Commission is again involved in Emergency Medical Service planning, but this time as a contractee for the counties who have a joint powers board to make the policy decisions.

The purpose of the Commission is to serve the units of government and their communities. If you have suggestions or comments please call.

Terence Stone
Executive Director
Region Nine Development
Commission

INTRODUCTION TO REGION NINE AND THE REGION NINE DEVELOPMENT COMMISSION

In 1972 the Region Nine Development Commission (RNDC) was organized by local elected officials as authorized by the Regional Development Act of 1969. Its purpose according to the legislation is "to facilitate intergovernmental cooperation and to insure the orderly and harmonious coordination of state, federal and local comprehensive planning and development programs for the solution of economic, social, physical and governmental problems of the state and its citizens." (Minnesota Statutes, Section 462.383; Subdivision 2.)

The nine counties that make up the Region Nine area, specifically Blue Earth, Brown, Faribault, LeSueur, Martin, Nicollet, Sibley, Waseca and Watonwan have a population of 204,010 of the state's 4,075,970 persons according to the 1980 census. The area is stable and prosperous with a strong economy, good facilities and services and has three major cities over 10,000 population, Mankato, New Ulm and Fairmont.

Serving on the RNDC are elected officials who represent 9 counties, 72 cities, 147 townships, 45 school districts, 9 soil and water conservation districts and the Minnesota Valley Council of Governments. They are joined by a representative of business and industry in the region.

The 35 member RNDC meets monthly to respond to the need for counties, cities, townships, school districts and other groups to work together on a regional basis to address economic, social, physical and environmental problems. About 300 citizens of Region Nine are actively involved in regional planning as advisory council, committee and subcommission members. Each year since 1972 has noted an increase in citizen and elected official participation as more people discover how they can best assist with the planning programs and be served by the RNDC.

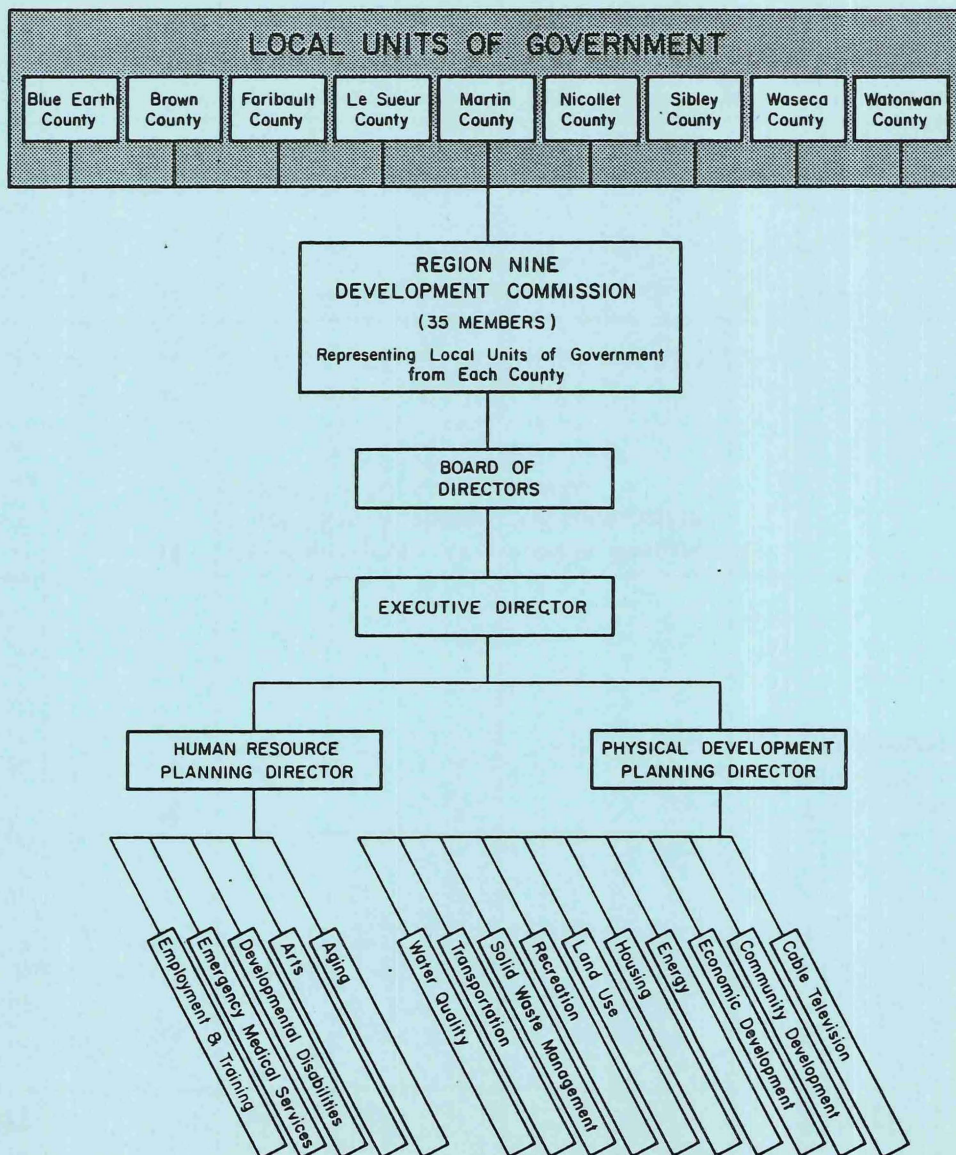

With its many planning functions, the RNDC has a professional planning staff to assist itself, subcommissions and committees in carrying out the activities they have defined. The staff consists of the executive director and specialists in the fields of recreation, land use, community/economic development, housing, transportation, water quality, energy, solid/hazardous waste, cable television, aging, arts and developmental disabilities. They are assisted by an accountant, a public information coordinator, a bookkeeper, secretaries, a graphics coordinator and interns.

Human Resource Planning

HUMAN RESOURCE SUBCOMMISSION

The Human Resource Subcommittee is advisory to the RNDC in planning and policy development related to human resources. In this capacity, the Subcommittee reviews plans and policies recommended by the advisory councils on aging, arts, developmental disabilities, emergency medical services and employment and training. Membership consists of 12 citizens, one from each county and one from each city over 10,000, who are appointed by the RNDC.

The HRS has been assigned responsibility for coordination of planning efforts in human resources. As part of this responsibility, HRS members regularly attend meetings of the aforementioned advisory councils, as well as the meetings of organizations providing human services in the region, such as Human Service Boards and mental health boards. Specific activities conducted in FY1982 under this coordinative role included: review of all plans and recommendations developed by RNDC advisory councils in human resources; other grant reviews, i.e., Community Health Service Plans, Community Action Agency grants, etc.; recommendations on appointments to advisory councils.

Technical assistance will be provided to local units as requested. Federally funded programs may be subject to change, dependent on actions taken at the state and federal levels, and staff will continue to monitor those actions for the possible effect on programs.

Human Resource Subcommittee Members

JIM ADAMSKI, LeSueur County
PEGGY DAUPHINAIS, Nicollet County
MARCELLA GLAMM, Blue Earth County
ROBERT GUNTHER, Fairmont
JANE JACOBSEN, Martin County
BETTY MARTINKA, New Ulm
BERNARD MCLAIN, Sibley County
LORNA MONTZKA, Faribault County
CAROLYN SHREWSBURY, Mankato
ROY TRULLINGER, JR., Watonwan County
MYRTLE TURBES, Brown County
MARGARET ZIMMERMAN, Waseca County

DEVELOPMENTAL DISABILITIES

The Developmental Disabilities Program is funded under a grant from the Governor's Council on Developmental Disabilities. The Region Nine DD Program has been in existence for ten years. Developmental Disabilities are severely handicapping conditions that begin early in life and substantially limit the ability of persons to develop normally and perform normal activities.

The Developmental Disabilities Council is comprised of developmentally disabled persons or their parents, service providers and members of consumer groups. The Council reviews proposals for new residential facilities and programs, provides training and information and promotes the provision of services in the least restrictive environment.

During the past year the Council's activities have included training, information and referral, technical assistance, grant writing and information on such topics as Welsch vs. Levine and the treatment of DD persons involved in the criminal justice system.

Training in behavior management has been provided in cooperation with the Minnesota Valley Social Adaptation Center, PACER and the Government Training Service. Technical assistance has been provided to residential developers for two planned facilities to serve very dependent persons leaving state hospitals, and to DAC programs developing new work projects and services. The DD program also responded to numerous requests for information from service providers and consumer groups, and is represented on task forces serving hearing impaired persons and other disability groups.

Major legislation affecting the delivery of services to mentally retarded persons was passed by the legislature this year. Popularly known as the MA Waiver Bill, the legislation will have a far reaching effect on counties and services. The DD Council is planning a forum for the Region to provide information and assess the impact of this important legislation. Another policy issue under study by the DD Council is the provision of services to children up to five years of age.

The DD Council and the Minnesota Valley Social Adaptation Center received a McKnight grant for developing behavior management services in the region. A new behavioral specialist has been hired at MVSAC and the new system of services and training should be under way in the new fiscal year.

AREA AGENCY ON AGING

The Region Nine Development Commission has been designated as the Area Agency on Aging (AAA) for the nine counties of south-central Minnesota since 1976. The Area Agency receives its funding from the federal Administration on Aging under the Older Americans Act as administered through the Minnesota Board on Aging.

The Area Agency on Aging is expected to fulfill the many responsibilities outlined in the Older Americans Act:

- to serve as a focal point on aging
- to disseminate information on aging in the nine county area
- to coordinate and co-locate services to older people
- to seek private financial and human resources
- to provide training to the aging network
- to advocate on behalf of older people
- to plan for services by identifying needs and matching resources to those needs
- to make grants for new expanded services
- to ensure the maintenance of priority services in region

1981-83 Area Plan

The Region Nine Area Agency on Aging is required under the Older Americans Act and by the Minnesota Board on Aging to regularly assess the needs of older persons in the region. The assessment of these needs and the plan for action that addresses them is known as the Area Plan on Aging. The Plan acts as a guideline for the Area Agency's activities.

Under the priorities of the 1981-83 Area Plan on Aging (amended annually), the following grants were awarded by the Region Nine Development Commission.

FY 1983 Grant Awards

<u>Grantee</u>	<u>Service</u>	<u>Amount</u>
Brown County	Bus Transportation	\$14,609
Brown County	Senior Aides	\$15,847
	Organization Advocacy	
LeSueur County	Chore	\$10,050
Blue Earth County	Wellness/Health Assessment	\$ 6,723

Waseca Area Senior Center, Inc.	Senior Center	\$ 6,601

Title III-C-1 Older Americans Act

Minnesota Valley Action Council	Congregate Meals	\$418,503
---------------------------------	------------------	-----------

Title III-C-2 Older Americans Act

Minnesota Valley Action Council	Home Delivered Meals	\$51,136
---------------------------------	----------------------	----------

McKnight Foundation

(private foundation monies for rural senior clubs/centers)

Walters	Senior Center	\$ 2,500
Comfrey	Senior Center	\$ 1,500
Henderson	Senior Center	\$ 1,000

The Area Agency on Aging and its Advisory Council will continue to plan, award grants and advocate on behalf of the older persons of Region Nine. The 1981-83 Area Plan on Aging identifies increased service coordination, program evaluation, completion of a regional needs assessment and the development of the 1984-86 Area Plan on Aging as major work activities.

ARTS

The Region Nine Arts Council is a volunteer group of citizens representing a broad base of regional arts interests from each county and from each city over 10,000 in the region. The Council reviews grant applications submitted by arts organizations within the region and forms arts policies, goals and priorities in the region. The Council members also provide technical assistance to those local arts organizations and serve as advocates for local and regional arts development.

The regranting of funds allocated by the Minnesota State Legislature was again the major activity of the Arts Council in FY1983. Two grant review rounds were held combining the reviews for sponsorship, production and McKnight applications. The criteria for the sponsorship and production grants are: artistic merit of the project, the ability of the organization to successfully complete it, and the need for the project within the designated area. The applicant is required to provide at least 50% match for the project.

Production Project Assistance Grants - provide funds for local/regional arts development and enhancement of artists or arts resources within a community or region.

<u>Applicant</u>	<u>County</u>	<u>Amount</u>
Community Education, Arlington	Sibley	\$ 150
Fairmont Opera House	Martin	760
Cherry Creek	Blue Earth	4,000
St. Peter Community Choir	Nicollet	300
Minnesota Valley Chorale	Blue Earth	2,000
Visual Arts Information Service		600
Strawhat Players	Watowan	525
St. James Summer Community Theatre	Watowan	700
Stage Masters	Martin	500
Winthrop Community Theatre	Sibley	875
Waseca Chorale	Waseca	1,390
Leisure Ed. For Exceptional People	Blue Earth	400

Sponsor Assistance Grants - provide funds to schools and community non-profit tax exempt organizations which present art activities to the general public for their enrichment, education and enjoyment.

<u>Applicant</u>	<u>County</u>	<u>Amount</u>
Friends of MN Valley Regional Library	Blue Earth	\$ 750
Mankato Symphony Orchestra	Blue Earth	3,000
So. Minnesota Poets Society	Blue Earth	500
George Marti Performing Arts Center	Brown	1,000

McKnight Arts Development Grants - The Arts Council again received funds from the McKnight Foundation for regranting to local arts organizations in the region.

Organizations applying for these funds must meet the following criteria: employ paid staff, present at least three programs a year on an on-going basis, show innovation and quality in programming and show evidence of community support. Projects to be funded may include programs which maintain or enhance the

professional capabilities of groups, purchase of equipment or minor renovation of buildings and limited duration projects of high quality.

<u>Applicant</u>	<u>County</u>	<u>Amount</u>
Mankato Symphony Orchestra	Blue Earth	\$4,000
Mankato Area Arts Council	Blue Earth	1,500
Watowan County Library	Watowan	500

CENSUS - DATA CENTER AFFILIATE

In October, 1982, the Region Nine Development Commission was designated an affiliate of the Minnesota State Data Center, as part of a national Census Bureau program to increase access by the public to census information.

As an affiliate, Region Nine receives printed census documents upon release by the Census Bureau, and makes this information available to anyone needing information from the 1980 or past censuses.

Since the program started, we have answered well over 100 request for information, ranging from simple requests for the population of a city to detailed community profiles. Requests come from banks, realtors, county and city planners, school superintendents, the clergy, senior citizens' groups, township officers, county commissioners, city council members nursing homes, librarians, students, college faculty, chambers of commerce, and numerous others.

Region Nine will continue to provide census data, assistance in using census documents, and prepare community profiles. Staff will be available for training or speaking engagements, and continue to prepare analyses of census data. The new business and agriculture censuses will be available sometime in 1984, and we anticipate a great demand for this information by counties, cities and the business community.

Physical Development Planning

PHYSICAL DEVELOPMENT SUBCOMMISSION

The Physical Development Subcommittee is advisory to the Region Nine Development Commission in establishing Physical Development policies and priorities for the region. In this capacity, the Subcommittee reviews plans, policies and activities in a variety of program areas including land use, housing, community development, economic development, transportation, recreation, water resources and energy. Membership consists of 14 persons including one representative from each of the nine counties, one representative from each of the cities of Fairmont, Mankato and New Ulm, one representative from the Soil and Water Conservation Districts of Region Nine.

Many diverse physical planning activities were addressed by the Physical Development Subcommittee last year: analysis of zoning laws for mobile and earth sheltered homes; review and ranking of the Small City Development Grant Program applications; review of the Governor's Council on Rural Development grants; discussion of the hazardous waste siting program; the conduct of all required reviews; and the review of all of the physical development programs and initiatives.

During FY1984, the Physical Development Subcommittee will continue its efforts as outlined. It is expected that new concerns, including business and rural development, will be addressed as they arise.

Physical Development Subcommittee Members

JIM ADAMSKI, LeSueur County
DALE DARROW, Mankato
JACK FITZSIMMONS, Waseca County
PETE JOHNSON, Watonwan County
BOB MALLIET, Fairmont
ROY NELSON, DNR
FRANK A. RODRIGUEZ, Rural Environmental
Education Council
DAVE SCHNOBRICH, New Ulm
ERHART STANKE, Blue Earth County
HARRY TIMM, Nicollet County
DON TOPPIN, Faribault County
HAROLD WIEST, Sibley County
STEVE ZOELLER, Martin County

COMPREHENSIVE PLAN

The Regional Development Act mandated that regional commissions "shall prepare and adopt, after appropriate study and such public hearings as may be necessary, a comprehensive development plan for the Region." Region Nine formally commenced its effort in July of 1978 and has completed long term goals and policies for the Commission. The annual Overall Program Design serves as the work program.

Last year, the staff used the goals and policies to complete the review of the State's small city block grants. Local jurisdictions were awarded extra points if they could prove that their proposals coincided with Region Nine's goals and policies.

Also, as part of this program area, Region Nine completed the annual salary survey which was then forwarded to interested local units of government.

CABLE TELEVISION

The Region Nine Cable Program was developed as a result of the fact that Regional Development Commissions have the responsibility to review cable territory requests in their respective geographic areas. A cable policy document has been formulated for use when territory requests come before the Region for consideration.

The major effort last year was oriented toward lobbying against national legislation that would have completely eliminated local control of cable franchising. Staff provided assistance to the City of Madelia in developing its first cable ordinance for its new system.

During the coming year, Region Nine will continue to monitor the federal legislation. Also, staff will be available to assist small communities in the development of their cable ordinances and services.

ENERGY

The Energy Program continues to focus on methods for achieving efficient use of energy in all sectors of our society.

Attention will be given to legislative issues affecting the development of wind, solar and alcohol as sources of energy, and the role these forms of energy will play in our future.

Increased attention will also be given to the importance energy plays in the overall operation of all units of government, and the methods by which greater efficiency can be attained.

COMMUNITY/ECONOMIC DEVELOPMENT

Over the past year the Region Nine Development Commission has greatly expanded its involvement in community/economic development programs. The present staff offers comprehensive, professional expertise to communities and individual businesses seeking to accomplish development projects. A sample of the programs and skills which are available include:

- Development and implementation of tax increment finance plans
- Research for and writing of Small Cities Development Block Grants and Urban Development Action Grants
- Financial analysis and application for Small Business Administration loans
- Preparation of community development plans and implementation of corresponding commercial rehabilitation bond programs

A partial list of the accomplishments in past year include;

- Writing and implementing the tax increment plan for Mapleton's Downtown Redevelopment project
- Establishment of the Region Nine Development Corporation, which is certified by the Small Business Administration to package and process business loans
- Submission of two successful loan applications to the Small Business Administration
- Development and submission of four applications for the Small Cities Development Block Grant Program
- Conducting community meetings to determine priorities and explain available financing options in over twenty-five communities.

SOLID/HAZARDOUS WASTE

As in the previous year, Region Nine's major effort was concentrated in helping Sibley County resist the proposed hazardous waste site. Staff prepared substantial oral and written testimony that was presented to the hearing examiner and Pollution Control Agency. Subsequently, the Pollution Control Agency ruled that Sibley County was not suitable for the site and thus eliminated the County from further consideration.

The other major initiative that took place last year was the submission and approval of a P.C.A. grant for Nicollet County to complete a major solid waste plan. Additionally, Region Nine strongly supported Blue Earth County's grant application to address the hazardous waste problem in LeHillier by providing it the highest possible rating during the regional review.

The staff will spend a significant portion of the coming year completing Nicollet County's plan. Also, the Region will monitor the local impact of the modifications in the Waste Management Act.

LAND USE

The primary emphasis of the Land Use program has been in providing technical assistance to local units of government. The staff has assisted communities with a variety of land use matters ranging from minimum tillage concerns to capital improvement considerations.

Technical Assistance

Last year, Region Nine assisted a number of communities in developing new maps to depict zoning modifications.

A major project that will extend into next year is the formulation of an assessments policy manual and a capital improvements program for the City of Madelia.

Environmental Review

Over the past two years Region Nine was concerned that the new environmental review rules would place unreasonable requirements on local governments. The staff appealed the rules to the appropriate legislative oversight committee and the committee decided to require the E.Q.B. to prepare reports depicting the rules' impact on local government.

Minimum Tillage

In order to facilitate soil conservation practices, the staff prepared and submitted a grant to the Governor's Council on Rural Development which was subsequently approved. Nicollet, LeSueur and Blue Earth county are participants in the project which will provide conservation tillage equipment to interested parties and will also result in a review of the effectiveness of conservation practices on the planned test plots.

HOUSING

The regional housing program in FY1983 primarily focused on activities oriented toward effective implementation of the Region Nine Housing Plan, and on the provision of technical assistance to local units of government and the general public. Greater emphasis has been placed on the availability and utilization of local, state and federal housing assistance programs as a result of escalating housing costs and interest rates.

RNDC staff are continuing to work closely with representatives from Housing and Urban Development (HUD), Minnesota Housing Finance Agency (MHFA), Farmers Home Administration (FmHA) and local housing and redevelopment officials in attempting to satisfy the housing needs of area residents.

RECREATION

The primary thrust of the Region Nine Recreation program in fiscal year 1983 has been to develop and promote the area's outdoor recreation resources. Development has been achieved through grant programs such as the LAWCON/LCMR program which provides matching grant monies to local jurisdictions for parks and open space. Promotion of the area's outdoor recreational facilities has been carried out through a tourism brochure, a recreation resource center, and soon a recreation atlas.

Recreation Grants

The Office of Local Government offered matching grant money in the form of LCMR (state) grants. Some of this money was withdrawn during state budget cuts last winter but was replaced by LAWCON (federal) grant money which is normally part of this program. RNDC staff provided technical assistance to many of the grant applicants and produced 3 applications for the cities of Lake Crystal and Henderson and for Nicollet County.

Local ranking criteria which have been developed by the Region Nine Development Commission were used to promote the area's recreation needs. This ranking is used on a 50/50 basis with a ranking done at the state level to determine sites to be programmed for funding. This process has proved successful in promoting the outdoor recreation needs of the Region Nine area. The total amount of programmed costs for local and regional parks in Region Nine was \$200,214.

Another grant program, spawned by the Federal Emergency Jobs bill, became available this spring. It is the Small Business Administration's Parks and Recreational Area Development Program. RNDC staff provided assistance to 27 units of government requesting information on the program.

Recreation Promotion

A tourism brochure for the City of Elysian and its surrounding lake region was produced with the assistance of RNDC staff. This colorful brochure was distributed throughout the Region Nine area and northern Iowa and was printed at minimal cost using local advertising.

A recreation resource center at the Region Nine office has provided information to many people on the location of parks and their facilities in the Region Nine area.

Information for the production of a recreation atlas or brochure has been fully compiled and it will be printed either as an independent product or as part of an existing publication such as the items produced by Pioneerland.

High transportation costs coupled with increasing pressure on our existing outdoor recreation base is a recreation problem of regional significance. Region Nine will continue to promote the addition of facilities in this area through grant programs such as LAWCON/LCMR while promoting our local parks through a recreation atlas and tourism publications. This will not only reduce pressure on heavily used areas by alerting people to little used facilities, but will decrease the amount of travel out of the Region for recreational activities which duplicate similar activities existing within the Region Nine area.

Communication with such agencies as the State Planning Agency and the Department of Natural Resources (DNR) will continue and technical assistance will be provided where needed or requested.

PAUL BREMER, Department of Natural Resources
JIM JACK, Mankato State University
JOHN ZIMMERMAN, LeSueur County Office
of Planning and Zoning

TRANSPORTATION

The Transportation Committee concentrated its attention on the movement of agricultural and commercial products, on improving the mobility of its citizens and on other concerns of the region.

At the Transportation Committee meetings a variety of transportation experts gave presentations. Some of the issues discussed were:

- 1) Impact of the proposed corn wet-milling plant on the highways and railroads in the area.
- 2) How MN/DOT addressed Region Nine priorities that were made three years ago.
- 3) Proposed constitutional amendments concerning roads and railroads.
- 4) 5-cent a gallon gas tax.
- 5) MN/DOT transit budget
- 6) Future of Chicago North Western Railroad in Minnesota.
- 7) Great Lakes and River Transportation Systems and how they relate to agriculture.
- 8) Inter-city bus lines and their future.

Five resolutions were recommended by the Transportation Committee to the Full Commission.

- 1) Urge District MN/DOT office to identify Highway 14 East of Courtland as a priority improvement project.
- 2) Support constitutional amendments II and IV in the November election.
- 3) Support passage of legislation regarding 5-cent per gallon gas tax.
- 4) Support legislation that will allow municipalities to form a rail authority.
- 5) Support present system of interstate rate making for intercity bus lines.

The Transportation Committee developed new transportation issues:

- 1) Support of MN/DOT's effort to create a 10-ton route system.

(Transportation continued)

- 2) Request to local road authorities to determine if some roads should be legally abandoned.
- 3) Support for commercial transportation within 10 miles of each person in Region Nine.

The Transportation Committee also reaffirmed issues that were adopted 3 years ago.

Staff conducted a survey of county engineers and city administrators in Region Nine to determine what public works projects are planned for the next 5 years. Surveys were compiled in a report which is available from the transportation planner.

During FY 1984 the Committee will update the Regional Transportation Plan and will continue to carry out its responsibilities in the areas noted above. These activities will be expanded to include any emerging issues or areas of concern which the Committee sees as significant to the Region.

WATER RESOURCES

The major effort in this program area was concentrated in providing technical assistance to small communities in addressing their water and sewer concerns. The staff assisted a number of cities through the packaging of Farmer's Home Loan applications and in the formulation of block grants and other applicable grants to meet the needs as identified by the communities. The staff continued to review the activities of the Water Planning Board and their impact on local jurisdictions.

As communities continue to have difficulty meeting their water demands, the staff will increase its work effort in the development of loans and grants. As in the past, staff will continue to review the work of the Water Planning Board.

Studies / Documents

Salary survey - looks at salaries of benchmark positions considered important by managers throughout the region and reviews benefit packages of local units of government.

Public Works Study - a five year projection of major public works being considered in the region.

Region Nine Arts Council Biennial Plan - describes goals and activities for the Arts Council for FY 1984-1985.

Region Nine Report - monthly newsletter which informs local elected officials and the interested public of the Region's programs and activities.

Region Nine Annual Report - yearly summary of grants, programs and activities, includes staff, commission and advisory committee members.

Workshops / Seminars

"Effective Communications For Arts Organizations" - A panel of media representatives offered practical advice on how to use radio, TV and newspapers to the best advantage of all concerned.

"Workshop For Newly Elected Officials" - Newly elected city, county and township officials learned about their new responsibilities from colleagues who also hold those offices.

"Workshop For Census Data Users" - Explanations of various types of census data and their applications were provided to over forty participants.

"Financing Tools For Community Development" - Developers and units of government were provided with information vital to their development plans.

"Senior Center Grant Program Workshop" - Prospective applicants for funding from the Area Agency on Aging were given practical pointers on application timelines and procedures.

"Positive Living" - Third annual conference on aging offered sessions on a variety of subjects to senior citizens and people who work with them.

Legislative Concerns

- Opposed proposal to change bus line cost allocation procedures.
- Supported three points related to natural gas legislation: (1) Immediate renegotiation of take or pay contracts. (2) If decontrol occurs, ceilings on price increases should remain in effect until 1987. (3) Any modifications in the pricing formula should allow prices to drop as the market economy dictates.
- Opposed cable bill as introduced by Senator Goldwater.
- Urged voters to support proposed amendments to the Minnesota State Constitution which provided for removal of interest rate restrictions on trunk highway bonds and for state authority to bond for railroad improvement.
- Supported legislative modifications to address the earth sheltered housing concerns.
