## STATE BOARD OF INVESTMENT

Governor Rudy Perpich  
State Auditor Arne H. Carlson  
Secretary of State Joan Anderson Growe  
State Treasurer Robert W. Mattson  
Attorney General Hubert H. Humphrey III

## INVESTMENT ADVISORY COUNCIL

Mitzi J. Malevich, Chair, Senior Investment Officer, St. Paul Companies, Inc.  
Peter J. Anderson, Senior Vice President, IDS Advisory  
Gordon M. Donhowe, Commissioner of Finance  
Paul L. Groschen, Executive Director, Minnesota State Retirement System  
Kenneth F. Gudorf, Senior Vice President of Finance and Chief Financial Officer, Diversified  
Energies Incorporated  
Richard B. Hume, Vice President and Director, Marquette Capital Management Corporation  
Phyllis G. Jones, Active Employee Representative  
Malcolm W. McDonald, Director and Corporate Secretary, Space Center, Inc.  
C. Mike McLaren, Executive Director, Public Employees Retirement Association  
Judith W. Mares, Director, Benefit Finance, General Mills  
Michael I. Rosen, President, Michael I. Rosen & Associates, Inc.  
Joseph T. Rukavina, Active Employee Representative  
Harvey Schmidt, Executive Director, Teachers Retirement Association  
Joan T. Smith, Assistant Vice President, Norwest National Bank of Minneapolis  
Wesley W. Wadman, Vice President and Senior Portfolio Manager, IDS Advisory  
Raymond B. Vecellio, Retiree Representative

## INVESTMENT DEPARTMENT PERSONNEL

Howard J. Bicker	Executive Director
Jeff Bailey	Assistant Executive Director

## FIXED INCOME

Grant A. Feldman	Fixed Income Manager, Short Term
John T. Kinne	Senior Portfolio Manager, Short Term
N. Robert Barman	Investment Analyst, Senior
Arthur M. Blauzda	Investment Analyst, Senior

## EQUITY

Roger W. Henry	Equity Manager
A. Arthur Kaese	Senior Portfolio Manager
Donald W. Rosche	Senior Portfolio Manager
Mark Edwards	Senior Portfolio Manager
C. Robert Parsons	Investment Analyst, Senior
John Griebenow	Investment Analyst, Senior
Daralyn Peifer	Investment Analyst
Harold L. Syverson	Head Security Trader
Alice P. Chermak	Security Trader

## ADMINISTRATIVE STAFF

L. Michael Schmitt	Administrative Director
Teresa Myers	Assistant to the Executive Director
Mable E. Patrick	Senior Accounting Officer
Thomas L. Delmont	Accounting Officer, Intermediate
Nancy Wold	Accounting Officer
Deborah F. Griebenow	Research Analyst
Harriet Balian	Executive II
Kathy Leisz	Computer Operator
Charlene Olson	Clerk Stenographer, Senior
Lavern Jagg	Clerk Typist I

## **FUNDS MANAGED BY THE STATE BOARD OF INVESTMENT**

**MARKET VALUE**  
**June 30, 1983**

### **BASIC RETIREMENT FUNDS**

**\$3.1 billion**

The Basic Retirement Funds are the pension assets of the currently employed participants in six major statewide retirement funds:

Teachers Retirement Fund	\$1263 million
Public Employees Retirement Fund	\$1007 million
State Employees Retirement Fund	\$ 616 million
Public Employees Police and Fire Fund	\$ 210 million
Highway Patrol Retirement Fund	\$ 48 million
Judges Retirement Fund	\$ 3 million

### **POST RETIREMENT INVESTMENT FUND**

**\$1.8 billion**

The Post Retirement Investment Fund is composed of the reserves for retirement benefits to be paid to currently retired employees by seven funds. Permanent post retirement benefit increases are based on dividends, interest, and net realized capital gains from the sale of equities.

### **MINNESOTA SUPPLEMENTAL RETIREMENT INVESTMENT FUND**

**\$217 million**

The Minnesota Supplemental Retirement Investment Fund includes the assets of the state deferred compensation plan, supplemental benefit arrangements, various retirement programs for local police and firefighters, and the unclassified employees of the state. Participants have a choice among four separate accounts with different investment emphases as authorized by law:

- Income Share Account — a balanced portfolio of stocks and bonds
- Growth Share Account — a portfolio of common stocks
- Fixed Return Account — a portfolio of bond and other debt investments
- Bond Account — a portfolio of longer maturity debt investments

### **MINNESOTA VARIABLE ANNUITY FUND**

**\$107 million**

The Variable Annuity Program is an investment option concentrating on common stocks which was historically offered to members of the Teachers' Retirement Association. It is no longer available to new members.

### **INVESTED TREASURERS CASH FUND**

**\$572 million**

The Treasurers Cash Fund is composed of tax receipts used to pay state obligations. The fund is composed of short term investments maturing within three years.

### **TRANSPORTATION FUNDS**

**\$273 million**

These are funds set aside for highway and airport construction projects.

### **MISCELLANEOUS CASH ACCOUNTS**

**\$478 million**

These accounts include proceeds from bond sales, debt service funds, state agency accounts, and endowment funds and trust accounts held for various educational institutions.

### **PERMANENT SCHOOL FUND**

**\$296 million**

The Permanent School Fund is a trust established for the benefit of Minnesota schools. Criteria governing investments are contained in the Minnesota Constitution.

**MEMBERS OF THE BOARD:**

**GOVERNOR RUDY PERPICH  
STATE AUDITOR ARNE H. CARLSON  
STATE TREASURER ROBERT W. MATTSON  
SECRETARY OF STATE JOAN ANDERSON GROWE  
ATTORNEY GENERAL HUBERT H. HUMPHREY III**

**EXECUTIVE DIRECTOR  
HOWARD J. BICKER**

**STATE OF MINNESOTA  
STATE BOARD OF INVESTMENT**

**Room 105, MEA Building  
55 Sherburne Avenue  
Saint Paul 55155  
296-3328**

The State Board of Investment is pleased to submit its Annual Report for the fiscal year ending June 30, 1983. The State Board of Investment manages approximately \$6.8 billion for various constituents. Of that amount, approximately \$5.2 billion are the retirement funds for Minnesota state employees, teachers, and public employees. The remaining \$1.6 billion are state trust funds and the accounts of numerous state agencies, including the Treasurer's Office, the Department of Finance, and the Department of Transportation.

During the last year, the State Board of Investment, in conjunction with the Investment Advisory Council and the internal professional investment staff, has undertaken a complete review and restructuring of the long-term asset allocation and investment management structure of the Basic Retirement Funds. The Basic Retirement Funds are a \$3.1 billion account containing the pension assets of currently employed participants in six major statewide retirement funds. Although much of the restructuring of the Basic Retirement Funds is still in the implementation phase, the subject is discussed at length in this Annual Report because of its fundamental importance to the future direction of the investment of Minnesota public pension funds.

Decisions regarding the long-run allocation of assets among equities, fixed income securities and alternative investments, such as real estate, venture capital, and resource programs, can have a dramatic impact on investment performance, often overwhelming the impact of individual securities selection in the total portfolio. Based upon the Basic Retirement Funds' benefit structures, funding levels and cash flow projections, as well as historical capital market data and future market assumptions, the State Board of Investment has decided to establish a long-term asset allocation of 60% common stocks, 25% fixed income assets, 10% real estate, and 5% venture capital and resource fund investments. This 60% common stock commitment is a significant departure from the Board's standard 40-50% investment maintained in recent years. The increased allocation reflects the Board's belief that the long-term investment horizon of the Basic Retirement Funds is quite compatible with the long-term higher risk/higher return characteristics of common stocks. The Board believes that common stocks provide the most effective instrument by which to maximize the total real rate of return with acceptable risk constraints. The remainder of the Basic Retirement Funds' assets are to be invested with the objective to dampen total portfolio volatility and hedge against either severe price inflation or deflation.

In addition, the State Board of Investment is in the process of making fundamental changes in the investment management structure of the Basic Retirement Funds. Whereas the fund historically has been managed by the internal professional investment staff, the entire fund will be transferred to external managers. Further, by utilizing both aggressive active stock managers and a substantial core stock portfolio designed to closely track the performance of a broad market index, the Board believes that many of the inherent difficulties involved with actively managing a multi-billion dollar stock portfolio can be overcome.

**AN EQUAL OPPORTUNITY EMPLOYER**

The first phase of the implementation process was completed in March of 1983, when \$550 million of the Basic Retirement Fund assets was transferred to eleven aggressive common stock managers. At the same time, forty million dollars from funds with investment objectives similar to the Basic Retirement Funds was transferred to four additional managers. One manager each invests a portion of the assets of the Minnesota Supplemental Retirement Funds Growth and Income Accounts. Two managers invest a portion of the assets of the Minnesota Variable Annuity Fund. The fifteen managers were selected after an extensive search was conducted by the Board with the assistance of a Board-appointed Manager Search Committee and Evaluation Associates, a nationally recognized investment consulting firm. Each manager is expected to earn substantial total real rates of return over time. A complete description of the manager selection process can be found on page 10. The continued implementation of the new investment management structure for the Basic Retirement Funds is one of the major tasks to be undertaken by the Board in the months ahead.

In conjunction with the addition of the external managers and the resulting need for increased custodial capabilities, the Board recently hired State Street Bank and Trust Company as the Master Custodian for the Basic Retirement Funds. State Street Bank was retained after an extensive search process was conducted by the Manager Search Committee, again with the assistance of Evaluation Associates and the internal investment staff. Custodial services for the remaining funds continue to be provided by First National Bank of St. Paul.

These changes in asset allocation and investment management were made possible by legislation passed in recent years by the Minnesota Legislature. In 1981, the Legislature granted substantial additional investment flexibility to the Board, including an increase in the maximum limit on equity investments, including common stocks, from 50% to 75% of a fund. This legislation also authorized the use of alternative equity investments such as real estate, resource programs, and venture capital. The following year, the Legislature authorized the use of external money managers. During the last session, the Legislature also made significant changes that will have a long-term positive impact on the investment program. These changes include the abolition of the requirement that companies eligible for investment must have earned and paid dividends for the preceding five years. This change will enable the Board to invest in smaller, growth-oriented companies, and provide a more capital gains-oriented common stock program in keeping with the investment goals of the Basic Retirement Funds and other accounts.

In contrast with this growth orientation, the \$1.8 billion Post Retirement Investment Fund is invested primarily to earn current income to pay current benefits and provide annual increases in those benefits for retirees. According to the formula in state law, benefit increases are paid from the excess investment income above the fund's actuarial requirements. The Board seeks to pay benefit increases of at least one-half the rate of inflation as measured by the Consumer Price Index. During FY 1983, the CPI rose at a rate of 2.6%. After deductions to fulfill the actuarial requirements and other obligations in accordance with state law, retirees will receive a lifetime benefit increase of 7.5% in January, 1984.

Also during the past year, the State Board of Investment approved a proposal to participate in the Minnesota Plan, a program sponsored by the Minnesota Small Business Finance Agency. The program is designed to give small businesses the stable debt service payments necessary to implement their long-term investment and operational plans by providing loans for up to 20 years at a fixed rate of interest. The program will be financed by the State Board of Investment's purchase of taxable business loan revenue bonds issued by the Minnesota Small Business Finance Agency. The proceeds from the bond

sale will be used by the Agency to purchase the U.S. Government guaranteed portion of SBA loans issued by banks to Minnesota small businesses. In effect, the bonds purchased by the State Board of Investment are backed by the guarantee of the U.S. Small Business Administration. The Board will earn a rate of return which exceeds the yield from a ten year U.S. Treasury obligation, an investment with demonstrably similar risk characteristics. The Board will also earn a commitment fee. The bonds will be rated at least AA by the Standard and Poor's Corporation, which signals the quality of the instrument and offers liquidity in the event of the anticipated development of a secondary market for these securities. In summary, the investment offers a sound, competitive return to the State Board of Investment.

The total rate of return for the Basic Retirement Funds during FY 1983 was 42.1% with common stocks and bonds generating a 54.1% and 37.4%, respectively. The total rate of return for the Post Retirement Fund was 41.5% with stocks and bonds generating a 54.9% and 34.0%, respectively. (The total rate of return measures income received plus changes in the market value of the securities.) During FY 1983 the yield for the Basic Retirement Funds was 7.9%. The yield for the Post Retirement Fund was 9.7%. The yield for state cash accounts during FY 1983 was 9.8%. Yield measures the income earned from stock dividends and interest from bonds and short-term investments. A comprehensive review of Fiscal Year 1983 investment performance is contained in p. 14 and 15.

During the upcoming months, the State Board of Investment will continue to implement the new asset allocation and investment management structure for the Basic Retirement Funds. This will include the retention of external managers for fixed income investments, commingled real estate funds, venture capital and resource programs. The Board and Investment Advisory Council will also review the performance objectives and evaluation process for the funds. In the future, the Board plans to continue its review and analysis of asset allocation, investment management structure, and performance objectives for each fund under its management. Additional information on the Board's investment objectives, strategy and performance is contained in the following report.

Sincerely,

Howard J. Bicker  
Executive Director

## INVESTMENT POLICY AND OBJECTIVES

### Investment Policy

Minnesota Statutes, Chapter 11A contains a list of the specific investments authorized for the Minnesota State Board of Investment. In addition to this "legal list" prescribed by state law, all investments are governed by the standard of care commonly known as the "prudent person rule." This standard requires the Board to act in good faith and "exercise that degree of judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital as well as the probable income to be derived therefrom." The prudent person standard is derived from common law and codified in Minnesota Statutes.

State law authorizes a range of investments for the funds under SBI management, including stocks, long-term and short-term fixed income securities, real estate, resource funds and venture capital. Specific limitations governing the types and amounts of particular investments are delineated in statute for each asset class.

The State Board of Investment, in conjunction with the Investment Advisory Council and the internal professional investment staff, establishes asset allocation ranges for each fund under management. The allocation of investments among asset classes is based on the goals and needs of each fund, the risk and return characteristics of each asset class, and the potential impact of various economic scenarios on total fund performance.

As outlined in the introduction to this report, the Basic Retirement Funds, composed of the retirement assets of currently active employees, are invested to maximize the long-term total rate of return rather than to earn current income. This goal most likely will be achieved by positioning the portfolio across different asset classes. The percentage of assets committed to any one asset class will change over time depending upon perceived economic conditions and risks. The capital gains orientation of these funds is most effectively achieved through a sizable allocation to common stocks. In a "normal" economic climate, investments in common stocks provide the optimal combination of liquidity and high expected returns. However, to hedge against adverse economic occurrences and to dampen the volatility of total portfolio returns, it is generally desirable to diversify across other asset classes rather than concentrate solely in common stocks.

Investments in high quality, intermediate-to long-term bonds protect the Basic Retirement Funds against the impacts of deflationary forces. On the other hand, investing the remainder of the portfolio in alternative equity investments such as real estate and resource funds offers a hedge against inflation since the real value of these assets should at least be maintained and perhaps appreciate significantly in a high inflation environment.

In contrast, long-term fixed income securities comprise the largest portion of the investment portfolio of the Post Retirement Investment Fund. Because retirees receive annual lifetime benefit increases from excess investment income above the fund's actuarial requirements, earning a high level of current income is the primary investment goal of the Post Retirement Fund. Common stock investments play a secondary role in the fund, with the objective of providing a long-term source of benefit growth.

## **Performance Evaluation and Summary Performance Objectives**

The performance evaluation process is designed to foster a long-run perspective on the part of the fund's administrators and the individual asset managers. Managers are evaluated over a three-to-five year period, approximately corresponding to that of the average historical market cycle. Although quarterly and annual reviews should take place, the objective, over the short-run, is to monitor and determine the reason for extreme downside deviations in performance. In addition, regular reviews are conducted to ensure that the various investment guidelines set for the managers are met.

Based on the recommendations of the Investment Advisory Council in 1980, the Board adopted the following performance objectives. For the major retirement funds, the Board seeks a superior real total rate of return over a three-to-five year market cycle that exceeds indexes of stock and bond market performance (the S&P 500 and Merrill Lynch Master Bond Index). For the Basic Retirement Fund, the Board seeks returns in the top one-third of a universe of other public fund managers. For the Post Retirement Fund, the Board seeks to exceed the median of other public fund managers and to provide an annual benefit increase equal to one-half of the inflation rate as measured by the Consumer Price Index. The minimum performance objective is the preservation of principal and attainment of the required actuarial return. A summary of fund performance relative to these goals can be found on page 14.

The state cash accounts are invested to generate maximum current income. The Board seeks a return that exceeds a blended bond equivalent yield weighted 70% in 90 day Treasury bills and 30% in 6 month directly placed finance company commercial paper. As a part of the current review of fund objectives, asset allocation and management structure, the Investment Advisory Council is expected to review and potentially revise the performance objectives of all the various funds under Board management.

The following graphs illustrate the total rate of return and yield earned by the major retirement funds invested by the Board and the performance of the Merrill Lynch universe of public funds during the last five years. The total rate of return, which is the generally accepted measurement for comparing performance by investment professionals, measures the income earned by the funds as well as the unrealized appreciation or depreciation in the market value of the assets. Yield, which measures realized income from stock dividends and bond short-term interest, is generally used by actuaries to project unfunded liabilities for the retirement funds.

## COMMON STOCK REVIEW

The twelve months ending June 30, 1983 were a period of exceptional performance by the common stock market. The 61.1% S&P 500 total return ranks as one of the largest twelve month returns ever produced by the index. The bull market in stocks began in August 1982. The rise in stock prices was fueled by the dramatic decline in interest rates and the anticipation of a vigorous economic recovery. In a classical fashion, technology and consumer stocks led the stock market rally. Moreover, smaller capitalization stocks within these sectors performed noticeably better than the sector averages. The slower growth and higher yielding sectors, such as utility and energy stocks, significantly underperformed the market.

With the relatively small capitalization, high volatility stocks leading the market, the SBI's equity portfolios' performance lagged behind the S&P 500's return. The SBI's portfolios generally hold larger capitalization, lower volatility stocks which tend to produce more stable returns, and thus did not participate fully in the market's strong performance. In addition, costs associated with the funding of external managers hampered SBI equity performance. Despite these factors, the SBI's equity portfolios produced impressive absolute returns, with the Basic Retirement Funds and the Post Retirement Funds achieving total returns of 54.1% and 54.9% respectively. The graph on page 9 illustrates the total common stock returns for the Basic Retirement Funds, the Post Retirement Fund, and the S&P 500. (For additional details on the SBI's other funds, see page 14.)

On March 1, 1983, the external equity managers retained by the SBI were funded with \$590 million. Their impact on SBI equity portfolio results for the fiscal year was relatively inconsequential due to the short period of time between their funding and the close of the fiscal year. Over these four months, in aggregate, the external managers' total fund results (equities plus cash) trailed the market by approximately one percentage point. The primary cause of the underperformance can be attributed to the managers receiving cash in a rising market. However, presently there is not sufficient data to make valid judgments as to the managers' effectiveness, both individually and as a group. The 1984 annual report will concentrate much more extensively on this aspect of the SBI's investment program.

**COMMON STOCKS**  
**Annualized Time Weighted Total Rate of Return**  
**Fiscal Year Ending June 30**

## RETENTION OF EXTERNAL EQUITY MANAGERS

In early 1983, fifteen external money managers were retained by the State Board of Investment to invest \$590 million of the common stock portfolio. Of this total, eleven managers assigned to the Basic Retirement Funds were allocated \$50 million each. Of the remaining managers, one each were assigned to the Growth and Income Accounts of the Minnesota Supplemental Retirement Fund. Two managers were assigned to the Variable Annuity Fund. Each of these four managers was allocated \$10 million. The following section outlines the process followed by the Board in hiring the external money managers.

In March of 1982, the Minnesota Legislature authorized the State Board of Investment to utilize external money managers. Shortly thereafter, the Board retained Evaluation Associates, a nationally recognized consulting firm, to assist in the selection of external managers. In addition, the Board established a select committee to direct the process and make recommendations to the Board. The committee was chaired by Glenn Kent of Honeywell and composed of representatives of the five Board members as well as the directors of the three retirement systems for which the Board manages pension assets.

Due to a number of considerations, including the large percentage of the Basic Retirement Funds' assets invested in common stocks and the relative difficulty of the stock manager selection process, the committee recommended that the Board limit its first phase of external manager retention to the hiring of common stock managers. Further, based on the needs and investment objectives of the funds which were to utilize external money managers, the committee recommended that the Board hire managers to invest in aggressive, non-diversified portfolios which would complement larger, more conservatively managed existing core portfolios.

The committee further recommended and the Board adopted a set of investment guidelines to govern the selection of external managers. Specifically, each manager is expected to achieve a high single to low double digit real rate of return over a three-to-five year period. "Real" returns are returns above the inflation rate as measured by the Consumer Price Index. In addition, the managers are expected to produce portfolios within specific risk tolerances to ensure that they complement the core equity portfolio by maintaining aggressive, nondiversified postures. The combined core and external manager portfolios are expected to produce a diversification level comparable to that of the broad equity market.

In order to identify managers to fulfill the Board's performance objectives and investment guidelines, the committee established a range of selection criteria including strong historical investment returns over various time periods, a consistently applied investment style, effective decision-making procedures, a superior research effort, effective professional staff, perceived expertise in managing large portfolios, and the capacity to absorb additional assets. Based on these criteria, Evaluation Associates screened approximately 500 potential managers, and recommended forty candidates to the committee. The committee, assisted by Evaluation Associates and the internal investment staff, conducted a rigorous quantitative analysis of model portfolios submitted by each manager and historic rate of return data. The model portfolios and return data were evaluated in terms of their differentiation from the market as well as the correlations among the individual managers.

As a result of these analyses, the committee narrowed the candidate list from forty to twenty-six. The remaining twenty-six managers were interviewed at their place of business by committee members, internal staff members, and a representative of Evaluation Associates. Following these interviews, fifteen candidates were recommended to the State Board of Investment. At its January 14, 1983 meeting, the Board voted to retain the recommended managers:

	<b>AMOUNT (Millions)</b>
<b>BASIC RETIREMENT FUNDS</b>	
Fred Alger	\$50
Alliance Capital, Minneapolis	50
Beutel Goodman, Houston	50
Forstmann, Leff	50
Hellman, Jordan	50
IDS Advisory	50
Investment Advisors, Inc.	50
Loomis Sayles	50
Siebel Capital	50
Herbert Smith	50
Trustee & Investors	50
<b>MINNESOTA VARIABLE ANNUITY FUND</b>	
Lieber & Company	10
Norwest Bank Minneapolis	10
<b>MINNESOTA SUPPLEMENTAL INVESTMENT FUND — INCOME ACCOUNT</b>	
BMI Capital	10
<b>MINNESOTA SUPPLEMENTAL INVESTMENT FUND — GROWTH ACCOUNT</b>	
Wadell & Reed	10

The managers were funded through a transfer of stocks and cash from the Board's portfolio. The combination stock and cash transfer was determined to be the most prudent and cost efficient method of funding the managers. For the stock portion of the transfer, the managers selected stocks from the existing portfolio. The cash portion was generated through a block sale, which attempted to minimize commission and transaction costs while at the same time eliminate the market risk associated with the sale of individual stocks over a limited time period. The actual funding of the managers took place on March 1, 1983.

## FIXED INCOME REVIEW

The first half of Fiscal Year 1983 witnessed a dramatic decline in both long-term and short-term interest rates from record post-war levels. At the end of June, 1982, long-term Treasury bonds were yielding roughly 14.5% while short-term Treasury bills were yielding approximately 15%. By mid-January, long-term rates had declined to near 10.75%, while short-term rates had fallen to 7.5%. The primary cause of this drop in interest rates was an abrupt easing in monetary policy on the part of the Federal Reserve System.

The second half of the fiscal year saw rates climb in April and May, retracing much of the earlier decline. But by the end of the fiscal year, rates had again fallen to finish near 11.2% for long-term Treasury bonds and approximately 9.0% for short-term Treasury bills.

The Fiscal Year 1983 decline in interest rates had a significant positive impact on bond portfolio returns. The Merrill Lynch Master Bond Index produced a total return for the fiscal year of 28.9%. Because of their longer maturities, the SBI's bond portfolios benefited to an even greater degree from the interest rate decline. The Basic Retirement Funds and the Post Retirement Fund posted bond portfolio returns of 37.4% and 34.0%, respectively. The graph on page 13 illustrates the returns produced by the Basic Retirement Funds, the Post Retirement Fund, and the Merrill Lynch Master Bond Index. (For additional data on the returns generated by the other SBI funds, see page 14.)

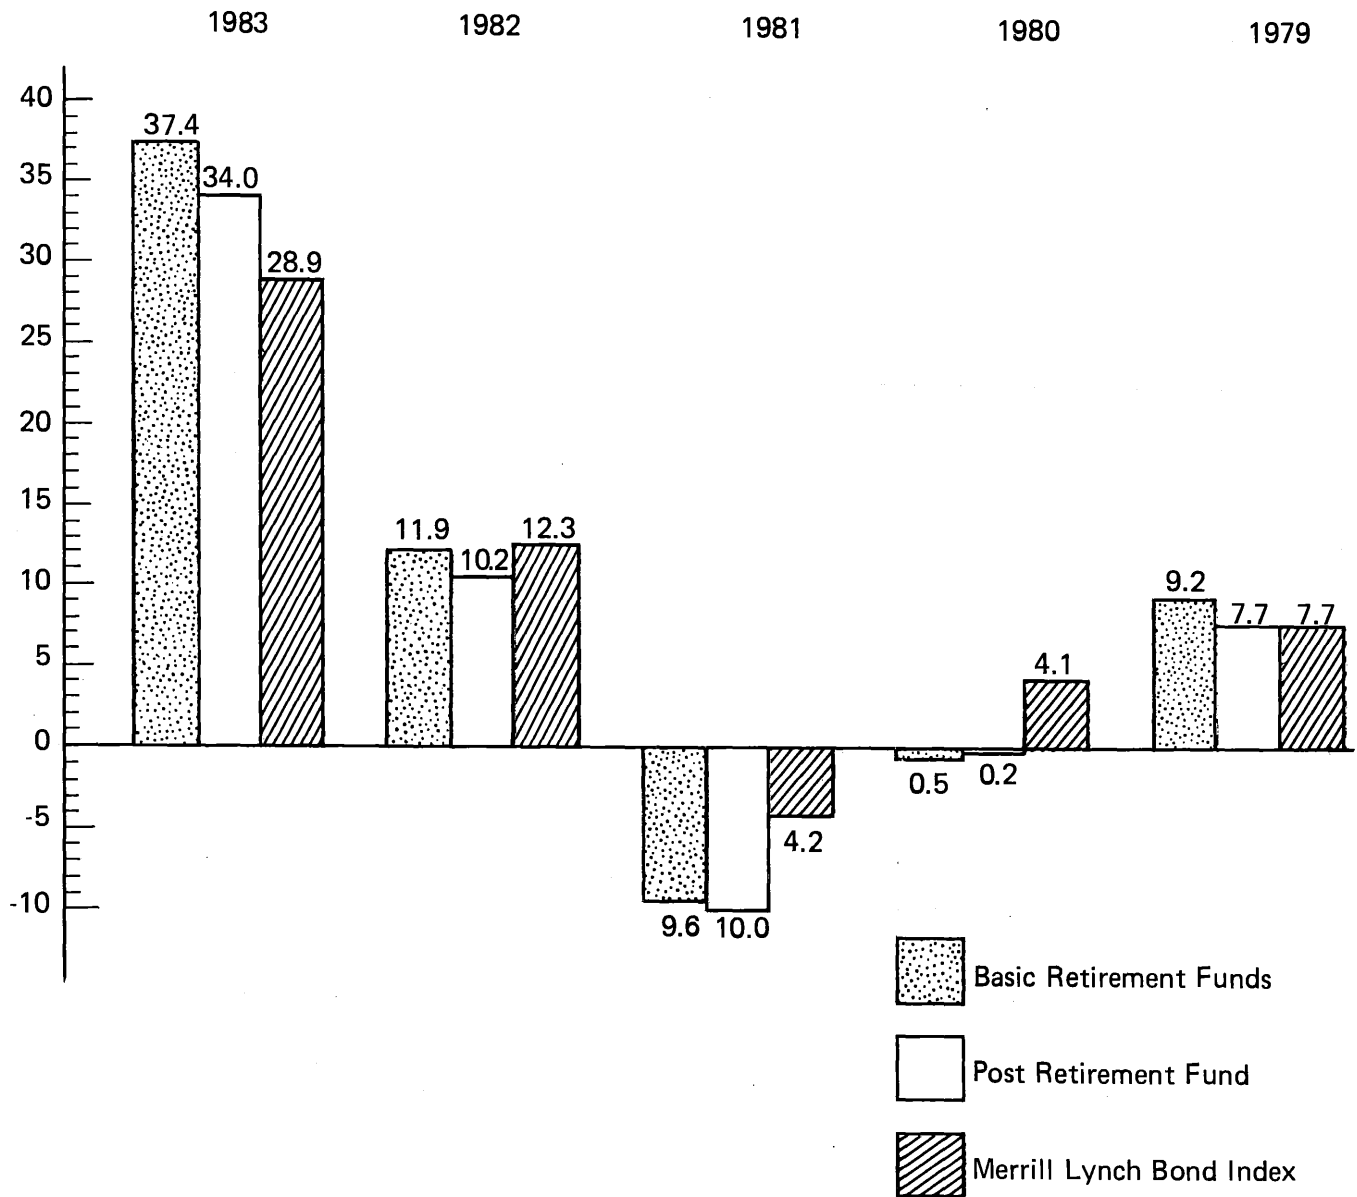

The Board took advantage of the decline in interest rates to accomplish two long-standing objectives. The first goal was to increase the liquidity of the portfolio by decreasing the private placement component of the bond portfolios. During the fiscal year, \$238 million in private placements were sold, reducing the size of the SBI's holdings to \$230 million, from \$468 million on June 30, 1982. The second goal was to lower the average life of the bond portfolios through selective purchases and sales. The average maturity of the Basic Retirement Funds bond portfolio stood at 15.2 years on June 30, 1983, as compared to 18.9 years twelve months earlier. Similar declines in bond portfolio average maturities took place in the Board's other funds.

As part of its management of short-term investments, in 1980 the Board initiated a program to purchase certificates of deposit from Minnesota financial institutions at competitive interest rates. During the last fiscal year, the Board purchased \$158.2 million in certificates of deposit from more than 60 Minnesota banks and savings institutions.

The short-term investment department also manages a Securities Lending Program. U.S. Treasury and Agency securities are lent to brokers on a fully collateralized basis to ensure the safety of the program. The Securities Lending Program generated \$1,456,000 in profits during the recent fiscal year.

## SUMMARY OF INVESTMENT RESULTS

The time weighted total rate of return is the proper measuring tool for comparing investment performance among managers. Returns are calculated using both income and realized and unrealized market appreciation or depreciation. The Board utilizes the formula recommended by the Bank Administration Institute (see page 43). Pursuant to the state law, public pension funds in Minnesota are required to use this formula.

### TOTAL FUND Annualized Time Weighted Total Rate of Return Fiscal Year Ending June 30

In 1980, the Minnesota Legislature enacted a formula to provide lifetime benefit increases to retirees from the investment earnings of the Post Retirement Fund. Retirees receive the benefit increase on January 1 of each year based on the stock dividends, bond and short term interest, and realized stock capital gains earned during the previous fiscal year. After deductions to fulfill the fund's actuarial requirements and other obligations in accordance with state law, benefit increases are paid to retirees.

## **Investment Advisory Council**

The Investment Advisory Council is composed of seventeen members: ten persons appointed directly by the Board, the Commissioner of Finance, the three executive directors of Minnesota's major pension funds, a retiree receiving benefits from the Post Retirement Fund and two active public employees who are members of funds whose assets are managed by the Board. The Council meets at least bimonthly to review and comment on the Board's investment policies and strategy. The Council also reviews proposed statutory changes and internal operating guidelines. The Council does not advise on individual investment transactions.

During the last year the Council has recommended major changes in the asset allocation and investment management structure of the Basic Retirement Funds. The Council will continue its indepth examination of the Basic Retirement Funds in an upcoming report on performance objectives.

The Board welcomes three new members who joined the Council during FY 1983: Gordon Donhowe, Kenneth Gudorf, and Judith Mares. More recently, Governor Perpich appointed two active employees representatives: Phyllis Jones and Joseph Rukavina. The Board appreciates the work contributed by the four Council members who left during the year: Peter Heegaard, Glenn Kent, Donald Koessel, and Allan Rudell.

## **Investment Transactions**

During FY 1983, total commissions to banks and investment firms equaled approximately \$8.4 million. The staff carefully evaluates all brokers to determine those which offer the best value. Key criteria are: general trading capability and commission rates; quality, timeliness, breadth, and depth of company and industry research reports; underwriting position; economic and portfolio strategy services; computer generated analytical reports; selected other investment services; and the firm's financial strength and overall responsiveness. A list of the firms and banks which handled Board transactions during FY 1983 can be found on page 40.

## **Proxy Voting**

The Board voted proxies in 133 companies during FY 1983. The vast majority of the resolutions considered at shareholder's meetings dealt with internal business operations. In voting its proxies, a Board appointed committee closely reviews each issue under consideration. The Board and Committee utilize the services of the Investor Responsibility Research Center, which provides analyses on resolutions relating to corporate social responsibility. The Board cast proxies in favor of 37 shareholder resolutions against the recommendations of corporate management. All other resolutions were voted in accordance with managements' recommendations.

The Board has adopted a statement on investment responsibility which provides guidance on voting proxies and other related issues. A copy of the Board's resolution follows:

**RESOLUTION**  
**REGARDING ADDITIONAL INVESTMENT CRITERIA AND THE VOTING OF PROXIES**

WHEREAS, the Investment Board recognizes that when performing their duty of investing the trust funds (pension and other funds) for which they are custodian, their primary responsibility is the prudent and responsible investment of the assets of the funds for the economic benefit of the beneficiaries of the funds; and

WHEREAS, it has become increasingly apparent that the standards of prudence and responsibility may, in limited circumstances, be considered in light of the social and environmental policies of the corporation in which the State owns or contemplates owning an investment; and

WHEREAS, investing in an enterprise which is flagrantly violating the law or stubbornly ignoring public policy may constitute implicit endorsement of those policies, and the Investment Board is of the opinion that government may abrogate its duties to its citizens by offering such implicit endorsement; and

WHEREAS, it is the Investment Board's opinion that corporations which do not take the welfare of society and its members into consideration may jeopardize their own financial stability and, in today's world, risk depreciation of their investment value.

NOW, THEREFORE, BE IT RESOLVED that the following guideline be adopted: Consistent with prudent and responsible investment policy, the Investment Board shall not knowingly invest or maintain holdings in those corporations which are in flagrant violation of the law or in stubborn disregard of the social welfare of the society, or do not recognize environmental responsibilities in their corporate actions, and are not taking reasonable steps to overcome the situation; and

BE IT FURTHER RESOLVED that, consistent with prudent and responsible investment policy, all or some of the following measures may be instituted when a corporation is found by the Board to be in violation of the aforementioned guideline:

1. The Investment Board will discuss the problem with a representative of the corporation in question for the purpose of:
  - a. expressing the view that, as a shareholder, the State of Minnesota is opposed to such policies.
  - b. being informed as to the progress underway in ameliorating the problem.
2. If voting stock in such corporation is held by trust funds administered by the Investment Board, it may be voted in a manner calculated to ameliorate the existing problem.
  - a. While it is recognized that it is the Investment Board's responsibility to vote all stocks, the Investment Board may solicit recommendations from its staff concerning the manner of voting stock of a corporation in violation of the guidelines set forth above.
  - b. When deemed necessary to protect the State's interest in the fund and in grave cases, the Investment Board may institute procedures for a shareholder's proposal for the purpose of committing the corporation toward correcting the policy in question.
3. In the instance that no recourse mentioned above is available and/or it is shown that the corporation is not taking steps reasonably calculated to ameliorate the problem in question within a reasonable period of time, the Investment Board may sell the State's investment in the corporation, if sale is consistent with sound investment policy for the affected funds.

## Time Weighted Rate of Return Formula

The time-weighted total rate of return measures total return to a fund which includes cash yield as well as realized and unrealized market value changes in assets. In addition, it nets out the influence of contributions and distributions, variables over which the investment manager has no control. Thus it is the best measure of investment management performance. The calculation of a fund's true time-weighted return requires that the fund be valued every time there is a capital flow in or out. Since most funds do not value that frequently, it is necessary to estimate the time-weighted rates by approximately the required valuations.

In 1968, the Bank Administration Institute (BAI) commissioned a study conducted by the University of Chicago, which considered desirable methods of estimating time-weighted returns. The BAI report is considered to be the definitive work in the field of performance measurement because of the academic reputations and thorough scientific efforts of its authors.

When monthly data are available, the BAI study recommends employing a technique called the linked internal rate of return (LIRR). Merrill Lynch, our performance measurement consultant, calculates the LIRR by solving the following equation for R:

$$V_B (1 + R)^{1/2} + C (1 + R)^{1/4} = V_E$$

Where

$V_B$  = Value of the fund at the beginning of the month.

$V_E$  = Value of the fund at the end of the month.

$C$  = Assumed single mid-month net cash flow.

$R$  = Internal rate of return.

The internal rate of return,  $R$ , is a proxy for the true-weighted return over the month. It approximates the interim valuations by assuming a uniform growth throughout the period.

The IRR's calculated for each month can be linked together to estimate the time-weighted return for a longer period. For example, given three consecutive monthly IRR's —  $R_1$ ,  $R_2$ , and  $R_3$ , the quarterly time-weighted return is:

$$TWR_Q = (1 + R_1) (1 + R_2) (1 + R_3) - 1$$

$TWR_Q$  = Quarterly time-weighted rate of return.

STATE OF MINNESOTA  
**OFFICE OF THE LEGISLATIVE AUDITOR**

Veterans Service Building, First Floor  
St. Paul, Minnesota 55155

Legislative Auditor

(612) 296-4708

The State Board of Investment

and

Howard J. Bicker, Executive Director

We have examined the combining and individual fund financial statements, including the portfolio of investments, and the supplementary schedule of participation of the Investment Trust Funds of the Minnesota State Board of Investment as of and for the year ended June 30, 1983 as shown on pages 46 to 76. Our examination was made in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. Securities owned at June 30, 1983 were counted by us when held by the State Treasurer or were confirmed to us when held by other custodians.

Required reserves, which determine participation in the Post Retirement Investment Fund, are presented in accordance with reports certified by the consulting actuaries for the various pension funds participating in the fund.

In our opinion, the aforementioned combining financial statements PRESENT FAIRLY the net assets and participation of the INVESTMENT TRUST FUNDS of the State of Minnesota at June 30, 1983, and the results of their operations and changes in their net assets for the year then ended, in conformity with generally accepted accounting principles.

In our opinion, the aforementioned financial statements PRESENT FAIRLY the net assets and participation of the SUPPLEMENTAL RETIREMENT FUND and its components accounts, INCOME SHARE, GROWTH SHARE, FIXED RETURN, and BOND, and the VARIABLE ANNUITY FUND at June 30, 1983 and the results of their operations and changes in their net assets for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding fiscal year.

In our opinion, relying on the certifications from the consulting actuaries as to reserves required, as discussed previously, the aforementioned financial statements PRESENT FAIRLY the net assets and participation of the POST RETIREMENT INVESTMENT FUND at June 30, 1983 and the results of its operations and changes in its net assets for the year then ended, in conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding fiscal year after giving retroactive effect to the accounting change discussed in Note 7.

In our opinion, the aforementioned financial statements PRESENT FAIRLY the net assets and participation of the OUTSIDE MANAGERS POOLED FUND at June 30, 1983 and the results of its operations and changes in its net assets for the year then ended, in conformity with generally accepted accounting principles.

Sincerely,

James R. Nobles  
Legislative Auditor

John Asmussen, CPA  
Deputy Legislative Auditor

November 17, 1983

## SIGNIFICANT ACCOUNTING POLICIES

The following general notes apply to all financial statements presented herein for the seven funds under management of the State Board. Specific notes can be found immediately after the financial statements.

The Minnesota Post Retirement Investment Fund, Minnesota Variable Annuity Investment Fund, Minnesota Supplemental Retirement Fund and the Minnesota Outside Managers Pooled Fund are managed by the State Board of Investment under authority of Minnesota Statutes 11A. The Supplemental Fund prepares separate financial statements for four investment vehicles which it is comprised of: Income Share, Growth Share, Fixed Return and Bond Accounts.

The financial statements presented for these funds are based on the preferred accounting practices described in the American Institute of Certified Public Accountants audit guide, *Audits of Investment Companies*. These practices and the significant accounting policies which follow are in conformity with generally accepted accounting principles.

The format of the financial statements presented herein has changed from that used in the prior years report. In prior annual reports comparative statements were presented for each fund separately. This year for the first time a combined statement format is used. The four investment accounts that make up the Supplemental Fund are combined to show the total for that fund. The total Supplemental Fund is then combined with the Post Retirement, Variable Annuity and Outside Managers Pooled Fund to present the entire group of funds administered by the State Board on a combined basis. Due to the change in format comparative statements showing Fiscal Years 1982 and 1983 will not be presented. The Fiscal Year 1984 Annual Report will have combined comparative statements.

**Security Valuation:** All securities are valued at market except for U.S. Government short-term securities and commercial paper, which are valued at market less accrued interest. Accrued short-term interest is recognized as income as part of "Short-term Gain". For long-term fixed income securities the State Board uses the Merrill Lynch valuation system. This pricing service is capable of providing prices for both actively traded and privately placed bonds. For equity securities the State Board uses a valuation service provided by Compensation & Capital.

**Recognition of Security Transactions:** Security transactions are accounted for on the date the securities are purchased or sold.

**Income Recognition:** Dividend income is recorded on the ex-dividend date. Interest and dividend income are accrued monthly. Short-term interest is accrued at year end only and is presented as "Accrued Short-term Gain".

**Expenses:** The cost of security transactions is part of the transaction price. Investment research, audit, legal, payroll and other administrative expenses are paid by the State General Fund.

**Loaning Securities:** Certain U.S. Government and Government Agency securities are loaned out to banks and brokers for additional income of .5%. Collateral in the amount of 105% of the market value of the security loaned is required.

**Portfolio Listing:** A listing of all securities held by these funds can be found on pages 54-76 of this report. Bonds are shown at face value and stocks at market value. Securities held as cash equivalents are not listed.

**Tied Funds:** Pages 74-76 are portfolio listings of assets managed by four external managers for the following funds. These assets are managed directly and are not part of any pool of assets. BMI Capital Management for the Income Share Account, Research Management Assoc. for the Growth Share Account, and Northwestern National Bank and Lieber & Co. for the Variable Annuity Fund.

## ADDITIONAL NOTES TO THE FINANCIAL STATEMENTS

- (3) Withdrawals from the fixed return account are paid out pursuant to Minnesota Statutes 11A.17 Subdivision 9, which states in part that: "The value of investment shares in the fixed-return account shall be \$5 per share; provided, however, if the fixed-return investment account shares are redeemed by a public retirement fund where the shares are not attributable to the individual account of any person prior to the expiration of the multi-year period set by the board for the payment of the applicable assumed rate, the value of the investment shares shall be at market value. Terms as to withdrawal schedules will be agreed upon by the public retirement fund and the state board."
- (4) The Minnesota Supplemental Investment Fund Bond Account was created pursuant to Laws 1981 Chapter 208 with activity commencing on July 1, 1981. It is designed for public retirement funds who wish to lock in a guaranteed rate over a multi-year period. These retirement funds have been participating in a similar multi-year guaranteed rate plan in the Fixed Return Account. The guaranteed rate plan is being phased out of the Fixed Return Account. Income earned from prior year pools in the Fixed Return Account is being transferred to the Bond Account on a monthly basis. This income, new contributions and principal from the guaranteed rate pools as it matures, will all be invested in the Bond Account. The first investment pool which commenced July 1, 1981 will pay 14.4% over a seven year period.

Participants withdrawing prior to the expiration of the guarantee period do so at the market value of their proportional share of assets of the fund.

- (5) **Statutory valuations required in Minnesota Variable Annuity Fund:** The Admitted Value Increment at June 30, 1982 and 1983 was \$2,127,102 and \$2,015,181, respectively. This valuation is required by Minnesota Statutes 11A.19 Subdivision 5 and is the amount by which the recognized value of investments is above or below the book value of investments. The admitted value is based on an average ratio of book value to market value of the securities calculated over a two year period. This calculation is used to determine the rate of return and the increase or decrease which shall be credited to the individual member's account balances at the end of the fiscal year.

Laws of Minnesota for 1978, Chapter 781, stated in part "Effective July 1, 1978 no future employee and employer contributions shall be credited to any accounts in the variable annuity division unless the member elects continued participation . . .". Very few members of the Teachers' Retirement Fund elected to continue in the variable annuity division. There have been no contributions in the last three years. Previous contributions for all former and current participants in the variable annuity fund will remain in that fund until the participant retires or withdraws in accordance with the Teachers' Retirement Act (M.S. 354).

### Variable Annuity Fund Participation at June 30, 1983

Net Assets	\$106,782,523
Admitted Value Increment	2,015,181
	<hr/>
	\$108,797,704
Less: Unrealized Market Appreciation (Depreciation)	12,521,072
Total Participation	<hr/>
	96,276,632

- (6) **Minnesota Outside Managers Pooled Fund:** This fund was created on March 1, 1983 pursuant to Minnesota Statutes 11A. It was created to be the holder of those assets of the Basic Retirement Fund's that are invested by external managers.

The initial contributions to this fund by the Basic Retirement Fund's was \$550,000,000 which was used to purchase 550,000 units with an initial value of \$1,000. An income distribution of \$10,815,026 was made on June 30, 1983 with all the retirement funds using their share to purchase additional units. The unit value at June 30, 1983 was \$1,099,110,752.

- (7) Total Participation for the Post Retirement Fund is equal to the actuarially determined required reserves at June 30, 1983. It includes the 5% actuarially assumed income distribution made pursuant to Minnesota Statutes 11A.18 and the mortality gains and losses as determined by the actuaries for the applicable retirement funds. Prior to Fiscal Year 1983 mortality gain or loss adjustments were not available before publication of the SBI's Annual Report. The prior period adjustment is the net amount of Fiscal Year 1982 mortality and benefit adjustments which were not reflected in the 1982 financial statements.
- (8) The annuity stabilization reserve is the difference between the actuarially determined reserves required to support benefits in force and the book value of the assets of the fund. Pursuant to Minnesota Statutes 11A.18 Subdivision 9 Clause 2C, "The book value of assets on any given date shall be the net assets at cost less the excess investment income determined pursuant to Clause (1) (C)." "If the state board determines that the book value of the assets of the fund is less than an amount equal to 100 percent of the current June 30 required reserves, with the book value and required reserves to be determined after the adjustments provided for in Subdivision 11, then the board shall allocate five percent of the excess investment income as an asset of the fund. The remaining 95 percent will be termed available for distribution."

The Deferred Yield Adjustment account at June 30, 1983 was \$23,580,322.81. This account is required by Minnesota Statutes 11A.18 Subdivision 5 and is the unamortized loss on the sale or disposition of debt securities. The account is increased by the loss on the sale of debt securities and decreased by the gain on the sale of such securities. At the end of each year a portion of the balance is offset against investment income for the year.

### 1983

Deferred Yield Adjustment:

Beginning Balance	\$ 6,440,431.79
Net Realized (Gain) Loss	19,454,559.65
Amortization	(2,314,668.63)
Balance at June 30	\$23,580,322.81

- (9) The unrealized market appreciation or (depreciation) is the difference between the cost and market value of investments.
- (10) Pursuant to Minnesota Statutes 11A.18 Subdivision 9 this is the portion of fiscal year 1983 income which is available for distribution as a benefit increase in January 1984. This amount shall be increased by 2.5% from fiscal year 1984 income and shall be stated as a percentage of total required reserves. The amount available shall be certified to each participating pension fund for distribution to eligible individuals. Individuals receiving benefits at June 30, 1982 are eligible to receive the January 1, 1984 increase. Past increases paid to retirees have been January of 1981, 3.209%; January of 1982, 7.436% and January 1983, 6.853%. The benefit increase for January 1984 will be 7.449%.
