PAGES	TITLE
1 - 20	SUPPLEMENT 1 SUMMARY BY RACE (Separate report - order from address on cover) Includes complete breakdown, (e.g. age by 1 year intervals) for data summarized in this report). Also includes percents, black, indian, and white/other/unknown race for each variable.
1 - 20	SUPPLEMENT 2 SUMMARY BY MENTAL RETARDATION STATUS (Separate Report - order from address on cover) Includes complete breakdown, (e.g. age by 1 year intervals) for data summarized in this report). Also includes percents retarded and non retarded for each variable.
1 - 13	EXECUTIVE SUMMARY (Separate report - order from address on cover>) Includes four year trends in county detail for children in care at the end of the report period by SEX. Also includes same trend data as this report. Highlights include comparison to national data.

INTRODUCTION

Minnesota requests an annual inventory of county social service agencies' substitute and adoptive care caseloads to obtain counts of children at a point in time (usually December 31) and unduplicated counts of children served during the report period (usually the calendar year). This information is used to fulfill both federal and state reporting requirements.

This report and the corresponding executive summary were prepared to meet the state reporting requirements under Minnesota Statutes 257.071 and 257.355 for calendar year 1986. The federal report requested by Public Law 96-272, section 427 was prepared and submitted to the American Public Welfare Association (APWA) as Minnesota's substitute & adoptive care portion of the Voluntary and Cooperative Information System (VCIS) in September 1987.

DEFINITIONS

ADOPTIVE CARE: Adoptive care includes finalized adoptions, children in non-final adoptive homes, adoption placements, adoption disruptions and adoption subsidies. Of these finalized adoptions and children in non-final adoptive homes are subsets of substitute care children leaving care and in care at the report period end respectively.

FOSTER CARE: Foster care is the subset of substitute care children with the living arrangement of foster family home.

REPORT PERIOD: The report period for this report is calendar year 1986.

SUBSTITUTE CARE: Substitute care includes children entering 24 hour care, children leaving 24 hour care and children in 24 hour care at the end of the report period.

SPECIAL NEEDS: Include older age child, minority heritage child and sibling groups to be placed together as well as child disability.

SUBSTITUTE CARE CASELOAD: Either the sum of children carried over from the prior year plus children entering care during the year OR the sum of children in care at the end of the year plus children leaving care during the year. Any difference in these two sums indicates an error in data.

WAITING CHILDREN: Substitute care children free for adoption, with a goal of adoption who have not yet been placed in an adoptive home.

WHITE/OTHER: When the race breakdown includes White/Other this count has been generated by subtracting children reported on the separate Black and Indian inventories from children reported on the total inventory. This includes children with race unknown as well as Asian and Hispanic children who are not Black. Otherwise "White" is Caucasian non Hispanic children and "Other race" is other non white children.

SUBSTITUTE AND ADOPTIVE CARE CASELOADS - 1986

Indian children in care were distributed through out more of Minnesota than Black children. Of the 85 counties that submitted inventories 59 had one or more Indian children in care at some time during the year compared to 30 with one or more Black children. More than 9 out of 10 black children in care (92.4%) were in the seven metro counties compared to less than half the Indian children (46.9%).

Only 13% of retarded children in care at sometime during the year entered care during the year, while over half of other children entered care during the year. Only 22% of retarded children in care at sometime during the year left care during the year while 49% to 55% of other children left care during the year.

The median age for the 1986 substitute care year end caseload was 14+ years. Median ages for selected subgroups are listed below from oldest to youngest without regard to race or disability.

14 years, 6 months	- total children in care 12/31/86
14 years, 3 months	- total children leaving care in 1986
13 years, 4 months	- total children entering care in 1986
11 years, 5 months	- total waiting children on 12/31/86
7 years, 6 months	- total in non final adoptive homes 12/31/86
2 years, 1 months	- total finalized adoptions

Black or Indian children were almost always younger than white/other* children. Among all the groups for which median age was calculated Black children with finalized adoptions were the youngest at just 9 months. Among all the groups for which median age was calculate MR children leaving care during 1986 were the oldest at 18 years 3 months. Retarded children were usually older than NON retarded children. * (See definition page v.)

Days in care per child increased with age regardless of race or disability. Among children with age known the highest number of days in care per child occurred among retarded children age 12 and older. At each age the highest days in care per child was reported for retarded children for both children in care 12/31/86 and children leaving care in 1986. At every age level and even for age unknown Black children averaged the least days per child leaving care in 1986. Among children in care 12/31/86 the least days in care per child varied by race and disability.

	AVERAGE TIME IN CARE PER CHILD			
	CHILDREN LEAVING CARE		CHILDREN IN CARE AT END

1986 SUBSTITUTE & ADOPTIVE CARE - STATE REPORT

CHILDREN ENTERING SUBSTITUTE CARE DURING - 1986

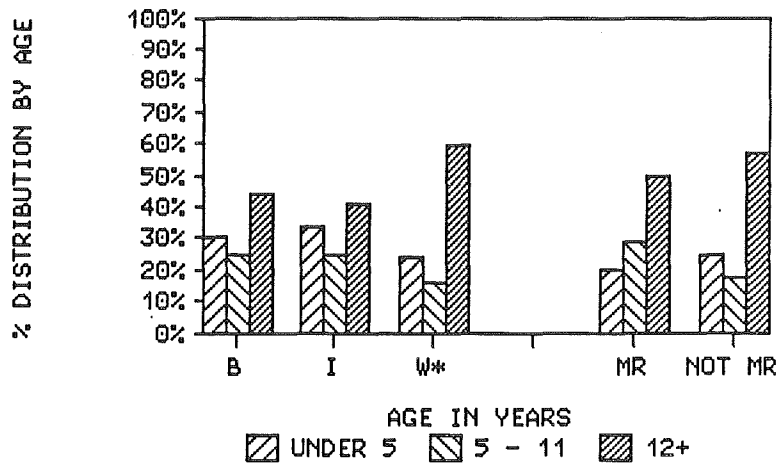

Black and Indian children were younger than other children when they entered care.

PERCENT UNDER AGE 12

Indian	59%
Black	56%
White/other	40%

B	BLACK
I	AMERICAN INDIAN or ESKIMO
W*	WHITE/OTHER (not B or I)
MR	MENTALLY RETARDED
NOT MR	NOT MENTALLY RETARDED

BLACK & INDIAN CHILDREN YOUNGER WHEN ENTER CARE IN 1986

The most frequently reported reason for entering care in 1986 for retarded children was child conduct/condition at 65%. Protection was next most frequent at 23%.

The most frequently reported reason for entering care in 1986 varied by race as follows:

Black	44%	parent/caretaker conduct/condition
Indian	67%	protection
White/other	43%	child conduct/condition

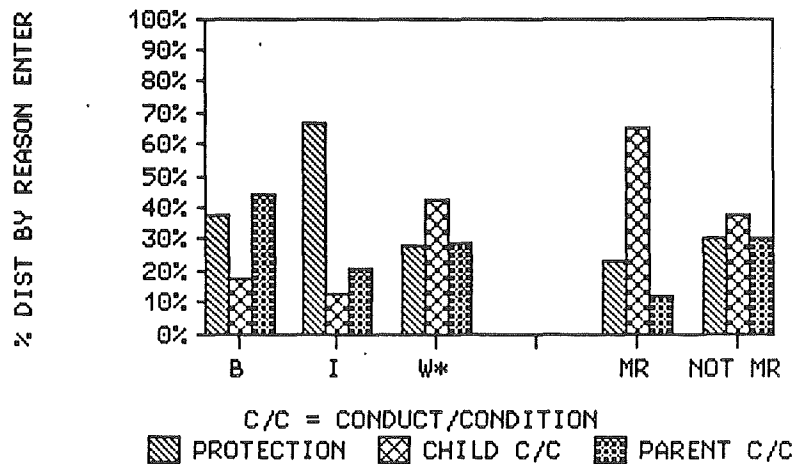

The value of comparisons regarding reason entered care for children entering care during 1986 is limited because, reason entered care was reported for less than 15% of these children. For example the actual proportions of children entering care with reason entered care of child conduct/condition were:

% CHILD CONDUCT/CONDITION

MR	22.0%
All children	5.7%
Black	2.2%
Indian	0.9%

B	BLACK
I	AMERICAN INDIAN or ESKIMO
W*	WHITE/OTHER (not B or I)
MR	MENTALLY RETARDED
NOT MR	NOT MENTALLY RETARDED

1986 SUBSTITUTE & ADOPTIVE CARE - STATE REPORT

CHILDREN LEAVING SUBSTITUTE CARE DURING 1986

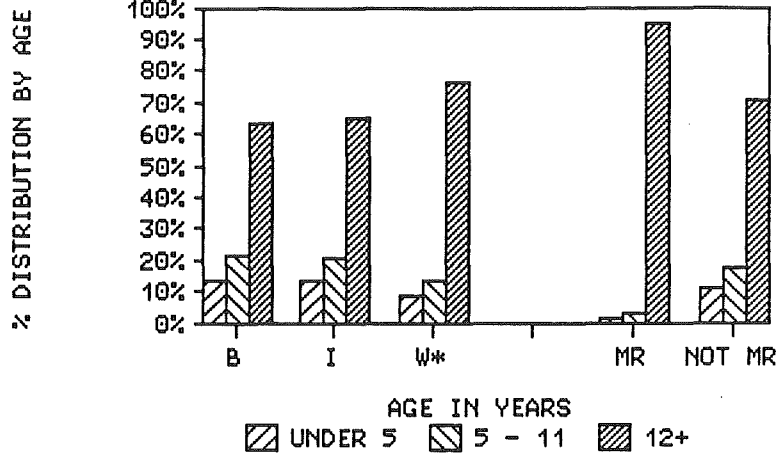

Black and Indian children were younger than other children when they left care.

Indian under age 12	55%
Black under age 12	53%
White/other under age 12	35%

Mentally retarded children were older when they left care than other children.

MR over age 12	79%
NOT MR over age 12	61%
MR under age 5	8%
NOT MR under age 5	22%

BLACK & INDIAN CHILDREN YOUNGER RETARDED OLDER WHEN LEAVE CARE IN 1986

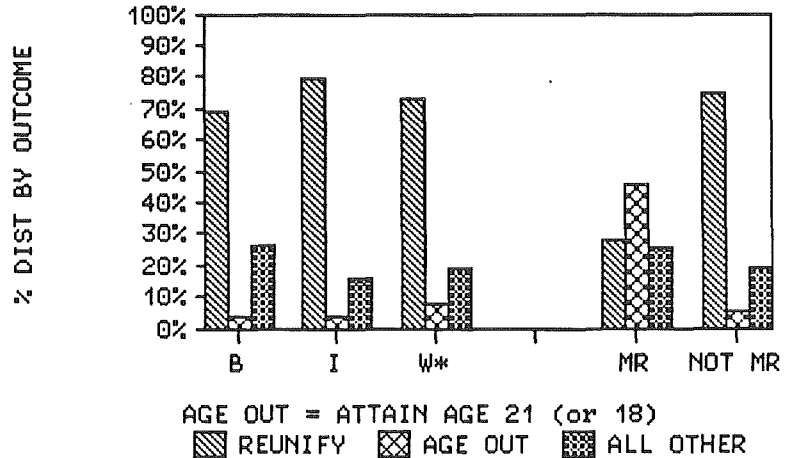

B BLACK
 I AMERICAN INDIAN or ESKIMO
 W* WHITE/OTHER (not B or I)
 MR MENTALLY RETARDED
 NOT MR NOT MENTALLY RETARDED

More MR children aged out (46%) than left care for any other reason. Reunification was the primary reason other children left care. Only 28% of retarded children were reunified. Indian children leaving substitute care in 1986 were most likely to be reunified while retarded children were least likely to be reunified.

PERCENT REUNIFIED

Indian	78.3%
All children	71.1%
Black	68.8%
MR	26.2%

46% OF MR CHILDREN AGED OUT 1986 OTHERWISE REUNIFY USUALL OUTCOME

B BLACK
 I AMERICAN INDIAN or ESKIMO
 W* WHITE/OTHER (not B or I)
 MR MENTALLY RETARDED
 NOT MR NOT MENTALLY RETARDED

ADOPTIONS FINALIZED DURING 1986

All Black and Indian children with adoptions finalized reported for 1986 were under age 12 while 12% of the White/other children with adoption finalizations reported were age 12 or older. Black children with adoption finalizations reported for 1986 were even younger than Indian children with adoption finalizations reported for 1986. Children awaiting adoption placement were older than children with adoptions finalized.

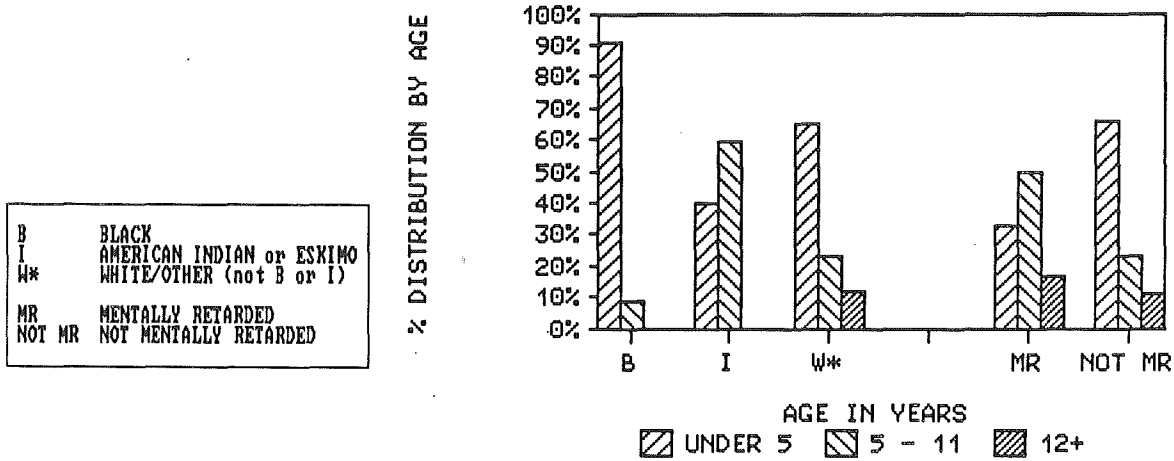

Black under age 5 . . . finalized - 91% . . . waiting - 17%
 Indian under age 5 . . . finalized - 40% . . . waiting - 15%

MR children with adoption finalizations reported in 1986 were older than NON MR children

MR over age 12 63%
 NOT MR over age 12 44%

None of the Black and Indian children with adoption finalizations reported for 1986 had 1 or more special needs compared to over half the White/other children (53%).

INDIAN CHILDREN YOUNGEST WHEN ADOPTIONS FINAL IN 1986

CHILDREN IN SUBSTITUTE CARE 12/31/86

Reunification was the goal for only 19% of MR children in care 12/31/86 compared to more than 6 out of 10 other children. Reunification was the goal for more than 7 out of 10 Indian children in care 12/31/86 compared to 55% of Black children and 54% of White/other children.

Long term care was the goal for over half of retarded children compared to about 2 out of 10 other children.

PERCENT WITH GOAL OF LONG TERM CARE

MR children	57.4%
Black children	24.4%
Indian children	24.4%
All children	21.9%

While three fourths of Indian children in care 12/31/86 were under court order only 65% or 64% of Black and White/other children were under court order. Only 3 out of 10 MR children in care 12/31/86 were there by court order compared to 7 out of 10 children who were not MR.

Court ordered placement is the most frequent legal status except for mentally retarded children.

PERCENT WITH COURT ORDER

Indian children	75.3%
All children	65.3%
Black children	65.0%
MR children	30.5%

Proportionately fewer Indian children in care 12/31/86 had 1 or more disabilities than Black or White/other children.

PERCENT WITH 1+ DISABILITIES

Indian children	23%
Black children	38%
White/other children	39%

Proportionately fewer Black and Indian children with 1 or more disabilities in care 12/31/86 were reported to be retarded than White/other children.

PERCENT OF CHILDREN WITH ONE OR MORE DISABILITIES WHO WERE MENTALLY RETARDED

Indian children	25%
Black children	22%
White/other children	39%

Males were even more predominate among MR children in care than other children in care.

PERCENT MALE

MR children	61%
NOT MR children	54%
INDIAN children	52%
BLACK children	55%
WHITE/OTHER children	56%

1986 SUBSTITUTE & ADOPTIVE CARE - STATE REPORT

CHILDREN IN SUBSTITUTE CARE 12/31/86 continued

While only 46% of retarded children in substitute care 12/31/86 were placed in foster family homes, 56% to 57% of Total, Black and Indian children were placed in foster family homes.

Indian in foster family home	57.1%
Black in foster family home	56.7%
All children in foster family home . . .	56.0%
MR in foster family home	46.0%

Looking at percents of children for whom living arrangement was known on these inventories differences in percents in foster family homes begin to appear. Looking at percents of days in care these differences become clearer. Black and Indian children in care 12/31/86 had a larger share of days of care in foster family homes than White/other children. MR children accounted for less than half of days of care in foster family homes while Non MR children accounted for two thirds.

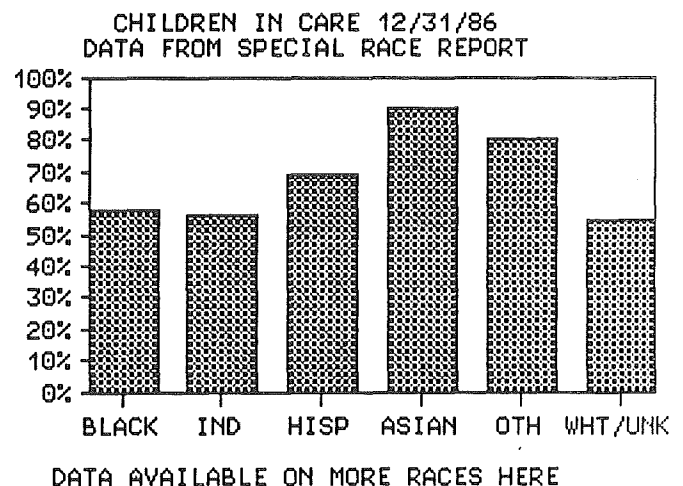

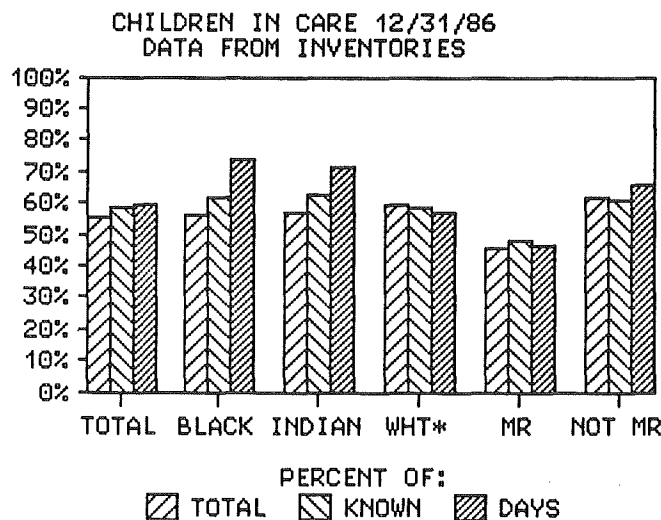

Black in foster family home	CHILDREN 62%	. . .	DAYS 74%
Indian in foster family home	CHILDREN 63%	. . .	DAYS 72%
NON MR in foster family home	CHILDREN 61%	. . .	DAYS 66%
White/other in foster family home . . .	CHILDREN 59%	. . .	DAYS 57%
MR in foster family home	CHILDREN 48%	. . .	DAYS 47%

Using data from the special report regarding race and relationships of children and foster parents for 12/31/86 more detailed differences become apparent. The data on this report does not always match the data from the inventory e.g. total in care 12/31/86 on this report is 5,334 rather than 5,616.

In the left chart below WHT* includes Asian, Hispanic, and Other Minority race children as well as White and unknown race children.
Bars in the right chart should be compared to the center bars in the left chart.

Asian in foster family home	90.5%
Other Non White in foster family home . .	81.0%
Hispanic in foster family home	69.3%
All Non White in foster family home . . .	65.3%
Black in foster family home	58.0%
All races in foster family home	57.7%
Indian in foster family home	56.5%
White/unknown in foster family home . . .	54.8%

% IN FOSTER FAMILY HOMES

CHILDREN IN SUBSTITUTE CARE 12/31/86 continued

For all living arrangements retarded children had the highest days in care per child. Black children averaged the least days in care per child in non-final adoptive homes, group homes and emergency shelters. NON retarded children averaged the least days in care per child in foster family homes and unknown living arrangements. Indian children averaged the least days in care per child in child care facilities (institutions) and other living arrangements. White/other children never averaged the highest or lowest days in care per child.

Among children in care 12/31/86 child conduct/condition was the reason for substitute care placement for almost twice as large a proportion of retarded children as total children. Child conduct/condition was the reason for placement for comparatively few Black and Indian children. This data is quite complete with reason for placement not reported for less than two percent of children in care 12/31/86.

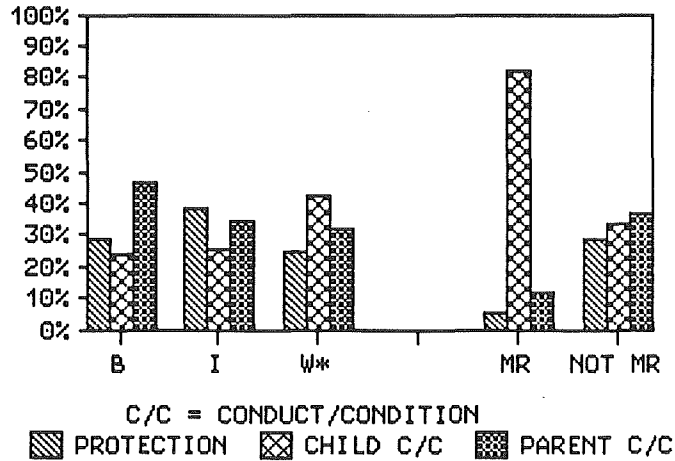

% CHILD CONDUCT/CONDITION

MR	77.6%
All children	39.1%
Indian	24.4%
Black	21.9%

B	BLACK
I	AMERICAN INDIAN or ESKIMO

MR	MENTALLY RETARDED
NOT MR	NOT MENTALLY RETARDED

% DIST BY REASON ENTER

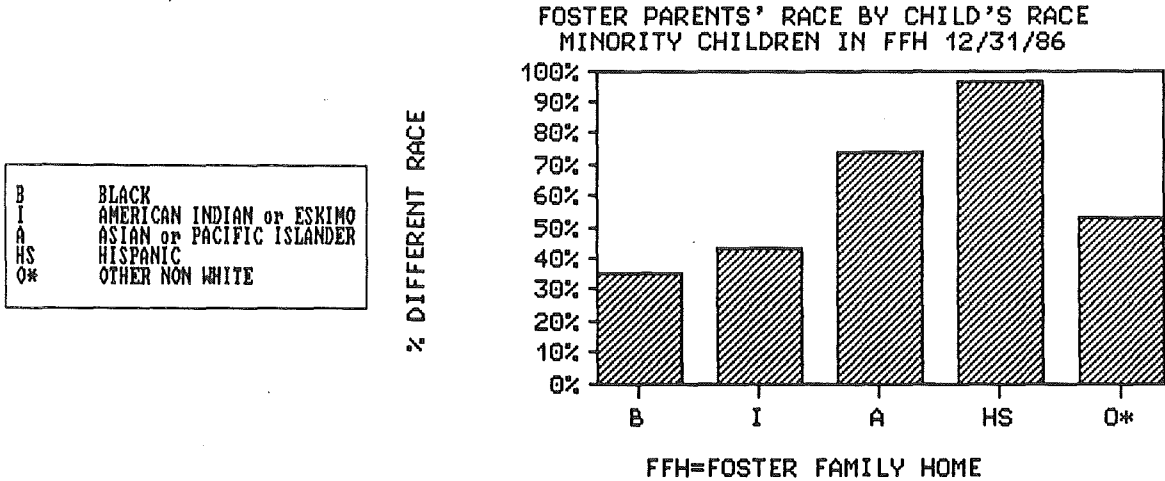

MOST FREQUENT REASON VARIES FOR CHILDREN IN CARE 12/31/86

CHILDREN IN FOSTER FAMILY HOMES 12/31/86

The possibility that a minority race child resided with foster parents on 12/31/86 who did NOT share his/her minority heritage was highest for Hispanic children and lowest for Black children.

Hispanic - different race FP	96.7%
Asian - different race FP	74.1%
Other Non White - different race FP	52.9%
Indian - different race FP	43.7%
Black - different race FP	35.4%

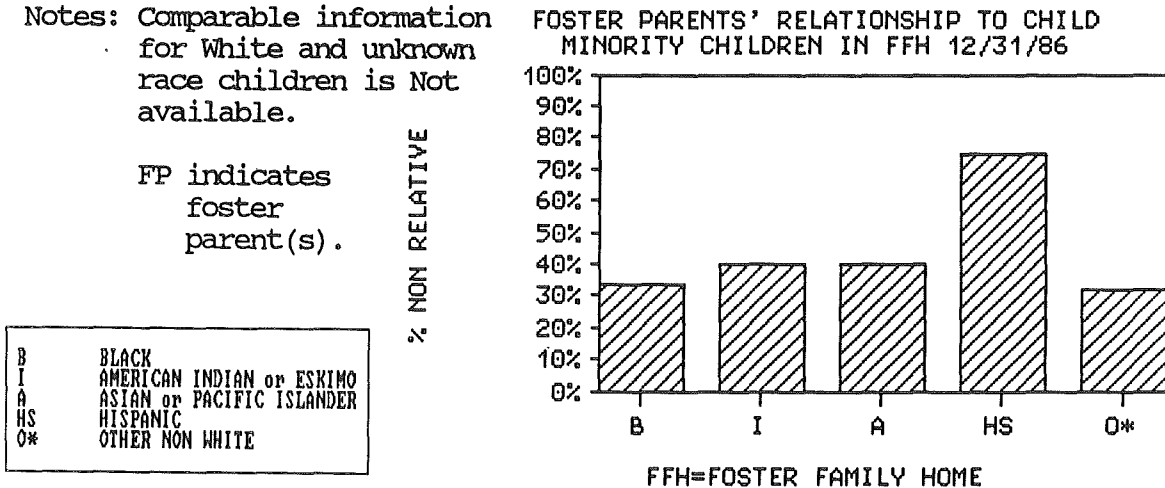

The possibility that a minority race child resided with foster parents on 12/31/86 who were NON relatives was highest for Hispanic children and lowest for Other Non White children, considering only children for whom foster parents' relationship to the child was known. However, children for whom foster parents relationship was unknown always outnumbered children with Relative foster parents and often outnumbered children with NON relative foster parents.

Hispanic - NON relative FP	75.4%
Asian - NON relative FP	40.6%
Indian - NON relative FP	40.1%
Black - NON relative FP	33.9%
Other Non White - NON relative FP	32.4%

Notes: Comparable information for White and unknown race children is Not available.

FP indicates foster parent(s).

NOTE: FOR 1986, 85 OF 87 COUNTIES REPORTED TOTAL CHILDREN
 NOTE: FOR 1986, 52 OF 87 COUNTIES REPORTED INDIAN CHILDREN
 NOTE: FOR 1986, 30 OF 87 COUNTIES REPORTED BLACK CHILDREN
 NOTE: FOR 1986, 55 OF 87 COUNTIES REPORTED RETARDED CHILDREN

! Part of difference from year to year is due to which counties did and did not report. E.g., For 1986 Mahnomen reported but Douglas and Fillmore Counties did not, compared to 1985 when Mahnomen was the only county that did not report.

N.A. Indicates data is not available.

NEW ADOPTION SUBSIDIES DURING 1987

TOTAL	131	NA	NA	NA	NA	NA
IV-E ONLY	111	NA	NA	NA	NA	NA

Note: The difference between the county data (total 206) and the state data (650 or 720 total) for subsidized adoptions results from the following:

- (1) Not all counties report this information on the annual substitute and adoptive care report.
- (2) On the annual substitute and adoptive care report each county is to report only the subsidized adoptions who were previously in their own substitute care caseload; therefore children whose adoptive placement is in different county are omitted.
- (3) Fiscal year data is slightly different from calendar year data.
- (4) Instructions for the annual substitute and adoptive care report for non-CSIS counties need clarification.
- (5) A few subsidized adoptions may have had no prior substitute care.
- (6) A very few private agency children may be included in state counts.

TECHNICAL NOTES - MINNESOTA 1986
SUBSTITUTE AND ADOPTIVE CARE STATE REPORT

GENERAL COMMENTS

1. Two counties (Douglas & Fillmore did not submit any inventories for 1986.
2. Fillmore, however submitted the report Minority Children in Foster Family Homes only by Race of the Foster Parent(s). Several counties with minority children in their caseloads submitted inventories, but did not submit the separate report Minority Children in Foster Family Homes only by Race of the Foster Parent(s).
3. Race and/or disability data in the total inventory does not always exactly match corresponding information in one or more of the separate inventories (Black, Indian, or Retarded). Some counties with children in one or more of these categories on the total inventory did not submit the required separate inventories. Rarely, but sometimes, counties may submit a separate inventory even though they have no children in the corresponding category on the total inventory.
4. Some information is not reported by all counties. The computer system (CSIS) that serves most of Minnesota's 87 counties has not yet been programmed to retrieve this information, although the data is collected at each county. Such items were reported by at most only the 19 Minnesota counties not using CSIS.
5. Special needs include older age child, minority race child, and sibling group to be placed together as well as child disability, however at the CSIS counties and possibly some non-CSIS counties as well as special needs status is a separate "Yes/No" question. This results in some children with one or more disabilities having no special needs.

GENERAL COMMENTS REGARDING SUBSTITUTE CARE DATA IN THE ANNUAL
SUBSTITUTE AND ADOPTIVE CARE REPORT

1. Only county data is included although some licensed private child caring/child placing agencies and some Indian agencies provide comparable services in Minnesota.

TECHNICAL NOTES - 1986 STATE REPORT (cont.)

GENERAL COMMENTS REGARDING ADOPTION DATA IN THE ANNUAL SUBSTITUTE AND ADOPTIVE CARE REPORT

1. While only county data is included in this report other State reports and the State Agency adoption subsystem include adoption information from the licensed private child caring/child placing agencies which provide adoption services in Minnesota. This results in substantially lower counts, especially for adoptions of foreign born children.
2. Adoption data in this report excludes stepparent adoptions
Note: Stepparent adoptions represent a large portion of total adoptions in Minnesota.
3. Adoption data in this report excludes any other adoptions taking place without prior substitute care at the reporting county. Note: Because adoptive home non-finalized is a reported substitute care living arrangement this difference may be minimal. Because the instruction to count only adoptions of prior substitute care children may be interpreted as "omit children in non-final adoptive homes if there was no prior substitute care", it is most likely that relative adoptions are undercounted in this report.
4. Because data for this report is generated from the sum of aggregate data from the counties rather than a child specific state wide information system for substitute care, both under and over counts are possible:
 - * Over counting when children move from substitute or adoptive care in one county to another.
 - * Under counting, especially for adoptions when substitute care is in a different county from final adoption.
 - * Under counting for adoptions when substitute care results in a private agency adoption placement.
5. County specific data in this report may also differ from the adoption subsystem data because the State adoption subsystem identifies several agencies involved with each adoption while the substitute and adoptive care reporting subsystem identifies only one.
6. Racial data (i.e. counts by race and separate inventories for Black and Indian children) may differ from the adoption subsystem data because the State adoption subsystem identifies up to four races per child while the substitute and adoptive care reporting subsystem identifies only one.
7. Because data from this report and the new State adoption subsystem data have not been compared systematically, the magnitude and in some instances the direction of these differences is unknown. Other major or minor differences are also possible.

TECHNICAL NOTES - MINNESOTA 1986 (cont.)

SPECIFIC COMMENTS

SECTION A STATISTICAL FLOW INFORMATION:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>										
7	A2	<p>Most counties reported slight or no differences between the total entering and the total with no prior placements. Five counties reported no children with no prior placements. This results in a probable under count of new placements and a corresponding over count of children with one or more prior placements.</p> <p>The 5 counties reporting no children with no prior placements and their totals entering were:</p> <table border="1"> <tr> <td>St. Louis</td> <td>646</td> </tr> <tr> <td>Washington</td> <td>178</td> </tr> <tr> <td>Olmsted</td> <td>42</td> </tr> <tr> <td>LeSueur</td> <td>40</td> </tr> <tr> <td>Blue Earth</td> <td>7</td> </tr> </table>	St. Louis	646	Washington	178	Olmsted	42	LeSueur	40	Blue Earth	7

SECTION B CHILDREN IN FOSTER FAMILY HOMES AT THE END OF THE YEAR BY RACE:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
9-14	B2-B7	<p>Only the counties with one or more children of the indicated race/ethnicity on the separate report <u>Children in Foster Family Homes by Race of Foster Parent(s)</u> are listed in these tables. These counties may not agree with counties having children of the corresponding race/ethnicity on the total inventory or the separate Black and Indian inventories. See also General Comment #2 on the prior page.</p>

SECTION C CHILDREN WHO ENTERED CARE DURING THE YEAR:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
15	C1	<p>Two counties Washington with 178 & Scott with 38 reported the majority of children entering with age unknown. Three other counties has 1 to 5 children with age unknown enter care.</p>
15	C2.	<p>Reason entered care was an optional item reported by less than half of the 19 non-CSIS counties and Kandiyohi County which reported both by disk and paper. Ramsey County reported the only children (65) with "other reasons entered care" but did not explain what they were.</p>

TECHNICAL NOTES - MINNESOTA 1986 (cont.)

SPECIFIC COMMENTS (cont.)

SECTION C (cont.)

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
15	C3	Three counties Hennepin with 430, Washington with 175 and Ramsey with 54 reported the majority of children entering with race unknown. Eight other counties had 1 to 5 children with race unknown enter care.
16	C4	Special needs/disability status was an optional item reported by less than half of the 10 non-CSIS counties.
16	C5	These 317 problems were reported for the 189 children with one or more disabilities in Table C4.

SECTION D CHILDREN WHO LEFT CARE DURING THE YEAR:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
21	D1	Four counties (Dakota, Hennepin, St. Louis and Scott) reported all the children leaving care with age unknown.
21	D3	Only 13 counties reported anything other than time in care unknown for children leaving care.
22	D4	Only 9 counties reported anything other than special needs/disability status unknown for children leaving care.
22	D5	These 280 problems were reported for the 189 children with one or more disabilities in Item 4e.
23	D6	Only 13 counties reported 1 or more children leaving care with reason left care (outcome) unknown including St. Louis with 122.
23	D7	Three counties (Hennepin with 424, Ramsey with 80, and Washington with 42) count for most of the children leaving care with race unknown. Four other counties had 1 or 2 children leave care with race unknown.

TECHNICAL NOTES - MINNESOTA 1986 (cont.)

SPECIFIC COMMENTS (cont.)

SECTION E CHILDREN IN SUBSTITUTE CARE AT THE END OF THE YEAR:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
28	E1	Ramsey County reported 80 children in care 12/31/86 with reason entered care unknown. Eleven other counties had 1 to 4 children in care 12/31/86 with reason entered care unknown. Reason entered care is apparently omitted from the Federal report as of April, 1986. Minnesota continues to collect this information.
28	E2	Four counties (Carver, Hennepin, Steele and Wadena) reported children in care 12/31/86 with sex unknown.
28	E3	Ramsey (with 30) and Hennepin (with 11) had the most children in care 12/31/86 with race unknown. Seven other counties had 1 to 6 children in care 12/31/86 with race unknown.
29	E4	Three counties (Hennepin, St. Louis and Scott) reported children in care 12/31/86 with age unknown.
29	E6	Mahnomen (with 23) and Red Lake (with 2) were the only counties reporting time in care unknown for children in care 12/31/86.
30	E7	Hennepin County reported all 180 children in care 12/31/86 with number of placements unknown.
30	E8	Although it is not an optional item well over three-fourths of the counties reported one or more children in care 12/31/86 with goal unknown including Ramsey with 106.
30	E9	Eighteen counties reported 1 to 7 children in care 12/31/86 with legal status unknown. Some counties were able to report legal status in more detail than other counties. Parental rights relinquished were reported only by one county (Brown).
31	E10	Although it is not an optional item well over half the counties reported one or more children in care 12/31/86 with living arrangement unknown including Olmsted with 61.
32	E12	Hennepin County reported 741 children in care 12/31/86 with disability status unknown. Seven other counties had 1 to 4 children in care 12/31/86 with disability status unknown.
32	E14	County of financial responsibility is not required for the Federal report but was required for Minnesota's State report.

TECHNICAL NOTES - MINNESOTA 1986 (cont.)

SPECIFIC COMMENTS (cont.)

SECTION F ADOPTIONS FINALIZED DURING THE YEAR:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
23 and 43-46	D6 F1-F6	Table D6 indicates 222 children left care due to finalized adoption rather than 204. The difference of 18 is more serious than it appears because the CSIS counties differ by +44 while the non-CSIS counties differ by -26. Thirty-four of the 85 counties reporting have some difference between these two counts. Twenty-five of the 26 CSIS counties with an error have the count from the breakdown by reason closed higher than the count from Section F. Half of the non-CSIS counties with an error have the count from the breakdown by reason closed higher than the count from Section F.
43	F1	Koochiching County reported the only finalized adoption with race unknown.
43	F2	St. Louis County reported 8 finalized adoptions with special needs status unknown. Seventeen other counties reported 1 to 5 finalized adoptions with special needs status unknown.
43	F3	These 30 problems were reported for the 17 children with one or more disabilities in Item 20.

SECTION G SUBSTITUTE CARE CHILDREN AWAITING ADOPTIVE PLACEMENT AT THE END OF THE YEAR:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
47	G1	Scott County reported the only child free for adoption not yet in an adoptive home with age unknown.
47	G2	Three counties (Blue Earth with 12, Hennepin with 8, and Brown with 1) reported all the children free for adoption not yet in an adoptive home with time awaiting placement unknown.
47	G3	Hennepin County reported the only child free for adoption not yet in an adoptive home with race unknown.
48	G4	Hennepin County reported the 27 children free for adoption not yet in an adoptive home with special needs status unknown. Fourteen other counties reported 1 to 3 children awaiting adoption placement with special needs status unknown.
48	G5	These 220 problems were reported for the 97 children with one or more special needs in Table G4.

TECHNICAL NOTES - MINNESOTA 1986 (cont.)

SPECIFIC COMMENTS (cont.)

SECTION H SUBSTITUTE CARE CHILDREN IN NON-FINAL ADOPTIVE PLACEMENTS AT THE END OF THE YEAR:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
31 and 53-56	E11 H1-H5	This optional information is reported by very few counties. Based on the breakdown by living arrangement for total children in care 12/31/86 this count should be 122 rather than 137. These two counts however are the same at all CSIS counties and at most non-CSIS counties. The five counties with errors are: Ramsey (-17), Red Lake (-9), Brown (+1), Olmsted (+7) and Washington (+3).
53	H1	Only six counties (Anoka, Blue Earth, Lake of the Woods, Ramsey, St. Louis, and Scott) reported anything other than unknown ages for children in non-final adoptive homes 12/31/86.
53	H2	Only six counties (Anoka, Blue Earth, Lake of the Woods, Ramsey, St. Louis, and Scott) reported anything other than unknown races for children in non-final adoptive homes 12/31/86.
54	H3	Only four counties (Blue Earth, Ramsey, St. Louis, and Scott) reported anything other than unknown special needs status for children in non-final adoptive homes 12/31/86.
54	H4	These 17 problems were reported for the 12 children with one or more special needs in Item 30.

SECTION I ADDITIONAL ADOPTION INFORMATION:

<u>PAGE</u>	<u>TABLE</u>	<u>COMMENTS</u>
57-59	I1-I3	It is expected that these adoption counts differ from new State adoption system counts. Even where total counts agree other breakdowns may not.
	e.g.	The new adoption system identifies multiple races and agencies for children while the substitute and adoptive care system does not.
	e.g.	The magnitude of differences in year end counts between the State Subsidized Adoption Report and this report may or may not indicate the magnitude of differences in adoption counts between this report and other data from the new State adoption system.
		Children receiving an <u>Adoption Subsidy</u> on:
		6/30/86 = 650 from Subsidized Adoption Report
		12/31/86 = 206 from this report
		6/30/87 = 720 from Subsidized Adoption Report

1986 SUBSTITUTE & ADOPTIVE CARE - STATE REPORT
TECHNICAL NOTES - MINNESOTA 1986 (con't)

METHODOLOGY

DATA FOR THIS REPORT CAME PRIMARILY FROM TWO SOURCES:

CSIS counties submitted data diskettes with the required aggregate data to Computer Systems Support. These diskettes were combined by Computer Systems Support into four inventory files which were transmitted to Minnesota Department of Administration InterTech Division. Data in the resulting mainframe files was copied to tape, edited, sorted and combined into SAS data sets via TSO (time sharing option) by DHS Social Service Division, Research and Planning staff.

Non-CSIS counties submitted up to four 20 page paper reports. Data from these reports was entered on key disk tapes for submission to the main frame at Department of Administration InterTech Division. Data was copied to tape, edited, and manipulated for combination with CSIS data via TSO by DHS Social Service Division, Research and Planning staff.

The merged data was stored in SAS data sets and used to create several reports including county specific data kept on file in DHS Social Service Division, Research and Planning. The mainframe data was downloaded to DHS personal computers creating LOTUS print and work files to create this and related reports.

All 87 counties were requested to submit two additional paper reports. Both reports were loaded into Dbase files on Social Service Research and Planning personal computers.

1. SPECIAL RACE REPORT: Race and Relationship data is summarized in this report. Race data is much more complete than relationship data. Throughout this report and the Executive Summary, 1986 inventory data and the special report data especially regarding race are compare.
2. COST REPORT: County costs to produce the Annual Report and to maintain the data (whether automated or manual) used to produce these annual reports was reported by many counties. The cost data was used in preparing estimates of costs to enhance the substitute and adoptive care reporting system, and in preparing some fiscal notes for the Legislature. This cost data does not appear in the Executive Summary or the Annual State Report.

1986 SUBSTITUTE & ADOPTIVE CARE - STATE REPORT
TECHNICAL NOTES - MINNESOTA 1986 (con't)

LACK OF CONSISTENCY IN RACE IS ILLUSTRATED BY THE FOLLOWING:

Negative counts for White/other are enclosed in () where ever they occur. For these few counts the sum of children from the Black and Indian inventories exceeds the number of children on the total inventory.

Any county data in the county by race tables where the count from the Black inventory differs from the count for Black children from the total inventory.

Any county data in the county by race tables where the count from the Indian inventory differs from the count for Indian children from the total inventory.

LACK OF CONSISTENCY IN DISABILITY IS ILLUSTRATED BY THE FOLLOWING:

Negative counts for not retarded are enclosed in () where ever they occur. For these few counts the count of children from the inventory of retarded children reported to be retarded exceeds the number of children reported to be retarded on the total inventory.

All counts where less than 100% of children on the inventory of retarded children are shown have the disability of mental retardation.

All other counts where the number of children reported to have the disability of mental retardation differs from the corresponding count of children from the inventory of retarded children. Note: More counts differ than match.

ADOPTION COUNTS INCONSISTENCY IS ILLUSTRATED BY THE FOLLOWING:

Counts of children leaving care due to adoption finalization do not match separate counts of adoption finalizations.

Counts of children in care 12/31/86 with a living arrangement of Non-final adoptive home do not match separate counts of children in Non-final adoptive homes 12/31/86. These do agree more often the finalization counts above.

Adoption subsidy counts are much lower than those kept in the State Office. Other adoptive care counts also do not match state adoption counts. Adoption counts in this report are based on county of financial responsibility and are reported only by the 87 Minnesota counties. The adoption subsystem counts are reported by private agencies as well as public and even include non-agency placements and petitions. Until the Substitute and Adoptive Care Report includes at least one of the agencies (placing agency, supervising agency, county of location) reported in the adoption subsystem or until the adoption subsystem includes county of financial responsibility the differences cannot be fully explained.
