# **REPORT TO THE LEGISLATURE**

### GRANTS TO COUNTIES FOR ADULTS WITH SERIOUS AND PERSISTENT MENTAL ILLNESS

prepared by the Mental Health Division Minnesota Department of Human Services

HV 3006 .M6 672 1989 CEGISLATIVE REFERENCE LIBRARY 645 State Office Building Saint Paul, Minnesota 55155

Pursuant to Mn Stat 245.73, sd 4

#### STATE OF MINNESOTA DEPARTMENT OF HUMAN SERVICES

Sandra S. Gardebring Commissioner 612/296-2701 Human Services Building 444 Lafayette Road St. Paul, Minnesota 55155-3815

December 30, 1988

The Honorable Jerome Hughes President of the Senate State Capitol St. Paul, Minnesota 55155

The Honorable Robert E. Vanasek Speaker of the House State Capitol St. Paul, Minnesota 55155

Dear Senator Hughes and Representative Vanasek:

I am pleased to submit to you this report, <u>Grants to Counties</u> <u>for Adults with Serious and Persistent Mental Illness</u>, as required by Minnesota Statutes, section 245.73, subdivision 4. Although the report is required only for information on implementation of Minnesota Rules Parts 9520.5500 - 9520.300 (Rule 12), "Grants for Residential Services for Adult Mentally Ill Persons", we have also included information on Minnesota Rules Parts 9520.2500 -9520.0690 (Rule 36) which governs licensure of residential facilities having five or more adults with a mental illness and Minnesota Rules Parts 9535.0100 - 9535.1600 (Rule 14), "Grants for Community Support Services for Chronically Mentally Ill Persons."

The report addresses the social and fiscal policy and planning context for these programs and identifies the implementation issues that have surfaced and the Department's response. In addition, it presents for your consideration information on the effectiveness of the appropriations and the programs as well as the Department's recommendations concerning policy and funding. We are particularly pleased that information from the programs indicates their effectiveness in helping to maintain their clients in the community through reduction in hospitalization and increases in employment of clients. Most importantly Rule 12 funding has made it possible for seventy-six Rule 36 facilities to meet at least minimum program, health and fire safety standards. The Honorable Jerome Hughes The Honorable Robert E. Vanesek Page 2 December 30, 1988

I look forward to continuing to work with you toward achieving our common goal of assisting persons with a serious and persistent mental illness to remain and function in their own communities whenever appropriate. We will continue to work together to ensure a unified, accountable and comprehensive mental health service system for Minnesota.

For further information regarding these programs and this report you should contact either me or the Mental Health Division. In addition as required by Minnesota Statutes, section 245.461, a report will be submitted by February 15, 1989 regarding the Department's progress in achieving a unified, accountable and comprehensive mental health service system. This report will include the Department's three year plan for mental health services.

Sincerely

SANDRA S GARDEBRING Commissioner

#### EXECUTIVE SUMMARY

### REPORT ON GRANTS FOR SERVICES TO ADULTS WITH A SERIOUS AND PERSISTENT MENTAL ILLNESS (DHS RULES 36, 12 AND 14)

This report describes two components of Minnesota's mental health system established and funded by the Minnesota Legislature. Since the last effectiveness report two significant pieces of mental health legislation were passed. This new legislation was the Mental Health Mission Statement and the Comprehensive Mental Health Act.

The Comprehensive Mental Health Act established required mental health serives for all counties. One requirement of the Act is that by July 1, 1988 county boards provide or contract for enough residential treatment services to meet the needs of all persons with mental illness residing in the county. In addition the county boards must provide or contract for sufficient community support services within the county to meet the needs of persons with serious and persistent mental illness residing in the county.

"Community support services program" means services, other than inpatient or residential treatment services, provided or coordinated by an identified program and staff under the clinical supervision of a mental health professional designed to help people with serious and persistent mental illness to function and remain in the community. A community support services program includes:

- (1) client outreach;
- (2) medication management;
- (3) assistance in independent living skills;
- (4) development of employability and supportive work opportunities;
- (5) crisis assistance;
- (6) psychosocial rehabilitation;
- (7) help in applying for government benefits; and
- (8) the development, identification, and monitoring of living arrangements.

The community support services program must be coordinated with the case management activities.

"Residential treatment" means a 24-hour-a-day program under the clinical supervision of a mental health professional, in a community residential setting other than an acute care hospital or regional treatment center, that must be licensed as a residential treatment facility for persons with mental illness under Rule 36 (Minnesota Rules, parts 9520.0500 to 9520.0690).

The Department of Human Services Rule 36 establishes the licensing standards for community residential treatment programs. Rule 12 is the funding mechanism for grants to counties to help pay for the services required by Rule 36. Rule 14 establishes standards and serves as the funding mechanism for grants to counties to fund community support services program.

As of October 1988, 80 facilities were licensed under the Department of Human Services Rule 36 in contrast with seven in October, 1981. Seventy-six of those are currently receiving Rule 12 grants. The licensed facilities, located in 33 counties throughout the state, provide 1,767 beds. For F.Y. 1989, the total average daily cost per licensed bed is estimated at \$53.14. The Rule 12 grant can be used only for direct services which are required by licensing standards and cannot be covered by alternative sources of funding. The state appropriation for Rule 36 programs for F.Y. 1988-1989 was \$20,827,644 for two years. This was matched by local funds of an estimated \$7,736,027. With regard to Rule 14 programs, 86 counties were funded during F.Y. 1989. A local match of 10% is required for Rule 14 grants. In F.Y. 1988 a new funding allocation formula was established which established a base level of \$1.00 per capita of the counties total population with a minimum of \$25,000. This allocation formula determines what grant amount for which the counties can apply.

The major focus of both Rule 12 and Rule 14 programs is to assist clients to remain and function in their own communities. The data on reduced hospital admissions for F.Y. 1988 submitted by counties indicates the success of the programs in meeting this objective. Both programs also show an increase in employment and employment related activities.

Although these data suggest a successful effort, it is important to note that the combination of the Rule 14 and 36/12 grant programs serve only a portion of persons with a serious and persistent mental illness in Minnesota. National studies indicate that approximately 1% of the adult population has serious and

persistent mental illness. In Minnesota this would mean approximately 29,000 people have a serious and persistent mental illness.

#### RECOMMENDATIONS

The Department's mental health initiative will be fully presented and explained to the Legislature during January and February of this session. The Department recommends:

#### Recommendation 1

Same level continuation funding for Adult Residential grants (Rule 12) for F.Y. 1990 and F.Y. 1991. Since current law provides no automatic increase to cover the cost of inflation. Same level for these programs actually means a decline in real dollars. These funds are used primarily for staff salaries. Since no additional funding is being requested for Rule 12 programs, it is expected that the number of funded beds will gradually decline.

#### Recommendation 2

New Rule 14 funding of \$1,043,000 for F.Y. 1990 and \$2,743,000 for F.Y. 1991. This request is part of the department's mental health initiative.

#### Specifically, funding is requested to:

a. fully develop community support programs in all 87 counties;b. continue housing support service pilot projects now funded by one time state special funds.

Although community support services were provided, in some form, in 46 counties prior to the passage of the Mental Health Act, counties were never required to provide all of these services nor were they required to provide these services as part of a system. Two basic situations have developed:

- a. counties who have previously provided community support services have needed to add or enhance their services to meet the new legislative mandates; and
- b. counties who have never provided community support services prior to July 1, 1988 have developed new programming but have been unable to fully develop all of the required components due to limited first time funding.

Beginning with April 1, 1990, each county's Rule 14 allocation should be increased from the current minimum of \$25,000 per county or \$1 per capita to at least \$50,000 per county or \$1.80 per capita, based on the county's total population. Experience with programs now operating in 86 counties indicates that these are the minimum state Rule 14 funding levels needed to provide all the community support service components required by law.

Eleven housing support service pilot projects have been initiated in ten counties in F.Y. 1989 in coordination with the community support programs. These projects are funded through one time

state special project funds which the 1988 Legislature transferred from F.Y. 1988 to F.Y. 1989. Funding is needed under Rule 14 to continue these projects through the next biennium to provide adequate time to evaluate their effectiveness. The Mental Health Division plans to present an evaluation of thes project to the 1991 Legislature.

#### Recommendation 3

Support for legislation which will amend M.S. 245.73 Subd. 4 to include the legislative report on Rule 12 grant programs with the annual legislative report required under the Mental Health Systems Act.

#### INTRODUCTION

The Mental Health Division of the Department of Human Services was established by the Laws of Minnesota, 1987 Chapter 342, Section I. It has management responsibility for the programs and funding mechanisms of DHS Rule 9520.0500-9520.6090 -"Licensing of Residential Facilities for Adult Mentally Ill Persons" (commonly known as Rule 36); DHS Rule 9535.2000-955535.3000 -"Grants for Services to Mentally Ill Persons in Residential Care Facilities" (Rule 12); and Rule 9535.0100-9535.1600 -- "Grants for Community Support Services for Chronically Mentally Ill Persons" (Rule 14).

The legislation for all mental health services is known as the Minnesota Comprehensive Mental Health Act. The mission statement established by the Act is:

"The commissioner shall create and ensure a unified, accountable, comprehensive mental health service system that:

- (1) recognizes the right of people with mental illness to control their own lives as fully as possible;
- (2) promotes the independence and safety of people with mental illness;
- (3) reduces chronicity of mental illness;
- (4) reduces abuse of people with mental illness;
- (5) provides services designed to:
  - (i) increase the level of functioning of people with mental illness or restore them to a previously held higher level of functioning;
  - (ii) stabilize individuals with mental illness;
  - (iii) prevent the development and deepening of mental illness;
  - (iv) support and assist individuals in resolving emotional problems that impede their functioning;
    - (v) promote higher and more satisfying levels of emotional functioning; and
  - (vi) promote sound mental health; and
- (6) provides a quality of service that is effective, efficient, appropriate, and consistent with contemporary professional standards in the field of mental health."

The legislation governing Rule 12 is Minnesota Statutes, Chapter 245.73. Rule 36 is governed by the Licensing Act Minnesota Statutes, Chapter 245.A. Rule 14 was established by Minnesota Statutes, Chapter 256E.12.

This is a combined report covering the activities and effectiveness of the Rule 36/12 and Rule 14 programs. In each section, Rules 36/12 will be covered first followed by Rule 14.

The report will discuss:

- a) History and background;
- b) Program goals;
- c) Characteristics of persons served;
- d) Effectiveness indicators.

The reports have been joined and the sections combined both in the interests of brevity and to emphasize that the people served and their needs are similar.

#### RULE 12

#### DEVELOPMENT OF RULE 36 FACILITIES

The authorizing legislation for "Grants for Residential Services for Adult Mentally Ill Persons" (Minnesota Statutes, section 245.73) was signed in June 1981. The Legislature appropriated \$4.9 million for the first two years of the grant program and included the following requirement: The commissioner shall require collection of data for compliance, monitoring and evaluation purposes and shall require periodic reports to demonstrate the effectiveness of the services in helping adult mentally ill persons remain and function in their own communities. The commissioner shall report to the Legislature no later than December 31 of each even-numbered year as to the effectiveness of this program and recommendations regarding continued funding. (Minnesota Statutes, section 245.73, subdivision 4).

The need in Minnesota for licensure of facilities for persons with mental illness relates directly to a national movement to rely less on large institutions and more on community programs to provide care and treatment for adults with mental illness. This movement, often called "deinstitutionalization", has created a need for an expanded and coordinated system of outpatient services, residential programs, and community support services program.

The Human Services Licensing Act (Minnesota Statutes, Chapter 245.A) grants authority to the Commissioner of Human Services to establish rules governing licensure of all residential facilities housing five or more persons with mental illness. Although Rule 36 was first promulgated in September, 1974, and implementation began in January, 1976, only 7 of approximately 100 existing facilities were licensed as of October, 1981. This figure posed a sharp contrast to the 72 licensed residential programs for persons with chemical dependency and 258 licensed programs for the contrast was the lack of an adequate funding mechanism.

#### **REVISION OF RULE 36**

In May of 1980, concerns about the existing Rule 36 resulted in the decision to revise the Rule. A task force was established under the direction of the Department of Human Services' Mental Health Program Division. This statewide task force included representatives from numerous agencies, organizations, consumer groups and professionals. The task force developed a revised Rule 36 and a Public Hearing was held in October, 1981. The Rule was then promulgated and became effective February 8, 1982.

Revised Rule 36 applies to all residential facilities serving five or more persons with mental illness, including regional treatment centers, licensed boarding care and certified intermediate care facilities, but excluding nursing homes (general hospitals with psychiatric units are excluded by statute); establishes two levels of programming and staff ratios; places special emphasis on individualized treatment plans; requires sound administrative policies and procedures; has a strong Resident Rights section; and requires that a facility document compliance with applicable health, fire safety and zoning standards and the Vulnerable Adults Act before a Rule 36 license can be issued. The Department has just begun another revision of Rule 36 to be effective July 1, 1990. This revision is needed to bring the rule into compliance with the Comprehensive Mental Health Act and current standards in the field of residential treatment.

The 1987 Minnesota Comprehensive Mental Health Act, set service

standards for residential treatment services. They are as

follows:

"Residential treatment services include both intensive and structured residential treatment with length of stay based on client residential treatment need. Services must be as close to the county as possible. Residential treatment must be designed to:

- prevent placement in settings that are more intensive, costly, or restrictive than necessary and appropriate to meet client needs;
- (2) help clients achieve the highest level of independent living;
- (3) help clients gain the necessary skills to be referred to a community support services program or outpatient services; and
- (4) stabilize crisis admissions." (M.S. 245.472, Subd. 1.)

In 1981, most facilities subject to Rule 36 licensure were located in Hennepin, Ramsey and St. Louis Counties. When Rule 12 funding became available, these counties upgraded the majority, but not all, of their existing facilities to Rule 36 standards. These counties decided that the remaining facilities were either not needed or did not warrant expensive physical renovation. This freed up significant Rule 12 funds for the other counties to develop new facilities. Table 1 is a history of Rule 12 grant funding and it is at the end of this section of the report followed by a map showing Rule 12 funded counties through F.Y. 1989.

Since 1983, 33 new facilities have been developed, averaging 13 beds each including 24 new facilities outside of Hennepin and Ramsey Counties. Some of these new facilities have specialized services for persons who have mental illness and hearing impairments, mental illness and chemical dependency, or mental illness and aggressive behaviors. At the same time, a few of the older, larger facilities have closed. This shift to smaller facilities located closer to the client's own community has resulted in improved service but with a reduction in statewide beds at a somewhat higher cost per person. See Appendix A for the location of mental health residential programs and their funding and licensure status.

The joint effort of the Legislature, private sector, Department, and counties to bring Rule 36 facilities up to licensure standards has been successful. Eighty were licensed as of October, 1988 as opposed to seven in October, 1981. Each facility meets fire safety and health standards. The initial distribution of Rule 12 funds was 72% Hennepin and Ramsey Counties and 28% other counties; it is now 51% and 49% respectively. The map at the end of this section shows the location of Rule 12 funded programs.

#### RULE 12 GRANTS

Rule 12 grants were established by the Legislature in 1981 to ensure that all community residential facilities for adults with mental illness can meet and maintain compliance with program licensing standards. The program licensing standards are contained in Rule 36; the funding criteria and procedures are contained in Rule 12.

The Rule 12 standards address individual program plans, resident rights and staffing requirements. Rule 36 also mandates

compliance with health and fire safety standards and the Vulnerable Adults Act. Major objectives of Rule 36 are to reduce hospitalization and assist persons with mental illness in achieving a higher level of independent living. Through Rule 12, the state pays for up to 75% of program costs. Rule 12 requires these funds to be used for direct service costs only, not for room and board or capital expenditures. On the average, 94% of state Rule 12 funds are used for salary costs of direct service staff. County boards apply for Rule 12 funds on behalf of Rule 36 facilities by providing the Commissioner of Human Services with a budget and program plan. Awards are based on compliance with the statute and Rule 12, reasonableness of costs and availability of funds. The appropriation for Rule 12 grants for F.Y. 1989 is \$10.844 million and for F.Y. 1988 was \$10.4 million.

The Governor's budget, as approved by the Legislature, included three major objectives for Rule 12 for the 1988-89 biennium:

- 1. Continue funding for 76 previously funded facilities;
- 2. Add staff and services at existing facilities to better meet the needs of dual-disorder adults; and
- 3. Develop three new facilities in unserved areas of the state.

All three of these objectives were accomplished.

The Mental Health Division with input from various advisory groups has awarded continuation grants to 33 counties to pay for ongoing

direct service costs at 76 facilities. These grants included cost of living increases averaging 3% for F.Y. 1989 and 4% for F.Y. 1988. These increases were particularly important since facilities had received only 1% cost of living increases during the previous two years.

In addition, the division awarded service expansion grants totaling \$385,604 in F.Y. 1989 and \$466,542 in F.Y. 1988. These grants enabled the addition of staff and services at 31 facilities in F.Y. 1989 and 26 facilities in F.Y. 1988, to better meet the needs of residents who suffer from both mental illness and other disorders, including chemical dependency, behavioral aggressiveness, low intellectual functioning and physical disabilities.

In the spring of 1989 the Legislature passed a measure allowing for Rule 12 F.Y. 1988 unspent funds to be transferred into F.Y. 1989 Rule 12 appropriation. This transfer of funds coupled together with various facilities underspending their Rule 12 F.Y. 1988 grant resulted in the availability of \$98,000 Rule 12 dollars. Since training of Rule 36 staff had been identified by providers and division staff as a need, a special request for proposal process was initiated for the funds to be used for the development and implementation of a statewide training campaign to direct service staff in Rule 36/12 facilities.

The review team, which consisted of individuals from the Mental Health Division, State Council, and various advocacy groups,

awarded the grant to Minnesota Association of Mental Health Residential Facilities. The project will instruct Rule 36 direct service staff between January 1, 1989 to May 1989 in the following areas:

- 1. People with mental illness who have other special needs.
- 2. Treatment planning.
- 3. AIDS.
- 4. Legal issues and residential rights.
- 5. Managing staff stress and preventing staff burnout.

Counties, providers and division staff identified these training areas as most needed by Rule 36 direct care staff. The instructional materials will be developed into an ongoing usable training tool for new and current direct care staff.

The third major objective for Rule 12 for the 1988-89 biennium was accomplished in F.Y. 1988 when the division approved awards and oversaw the opening of three new facilities in Bemidji, Marshall, and Moorhead. The division analyzed quality of applications, potential utilization rates and distance from existing facilities in deciding which areas to fund.

Opening a new residential treatment facility requires a great deal of planning and preparation. The three new facilities opened, on average, about nine months after the legislative appropriation; this compares to twelve to twenty four months required for most new facilities in previous years. Intensive work and cooperation by and among the state, the counties, private vendors, advocacy groups and others has enabled residential services in these areas of the state to become available sooner than expected. The attached map shows the current location of Rule 12 funded facilities. Facilities in rural areas typically serve more than one county. For example, the applications for the three newer facilities described above were each supported by four to seven neighboring counties.

#### INSTITUTIONS FOR MENTAL DISEASE (IMD)

The federal government recently clarified laws and rules relating to Institutions for Mental Diseases (IMDs). Since Minnesota has been notified that it will be audited by the Federal Office of the Inspector General sometime in 1989, the State declared that on January 1, 1989 that all Rule 36 facilities with more than 16 beds will have to follow the Federal IMD requirements. Federal Medicaid law prohibits federal reimbursement for individuals ages 22-64 who reside in an IMD. This makes all residents of IMDs under age 65 ineligible for all Medical Assistance (MA) services, including doctor's visits, dental care, and drugs. This may require revision of the Rule 12 and Rule 36 programs.

Until recently, the IMD prohibition was applied to hospitals and nursing facilities, which otherwise met the definition of an IMD. Beginning in November 1987, federal Health Care Finance Administration (HCFA) began applying the IMD prohibition to any organized community residential program of four or more beds which provides any health related services.

The Medicare Catastrophic legislation signed into law on July 1, 1988, redefined the term "institution for mental diseases" to mean a hospital nursing facility, or other institution of more than 16 beds, that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including medical

attention, nursing care, and related services. Thus, community residences of 16 or fewer beds can <u>not</u> be classified by HCFA as IMDs.

As an example, Andrew Care Home has been declared an IMD. The MA recipients residing at Andrew who are between the ages of 21 and 65 are not eligible for MA. After the Department further investigated this issue, other Rule 36 facilities have met the definition of an IMD. Because many residents no longer eligible for MA are MSA recipients, there is a definite population with a demonstrated need for continued medical coverage. Eligibility for GAMC would prevent severe disruption of medical treatment for these vulnerable individuals.

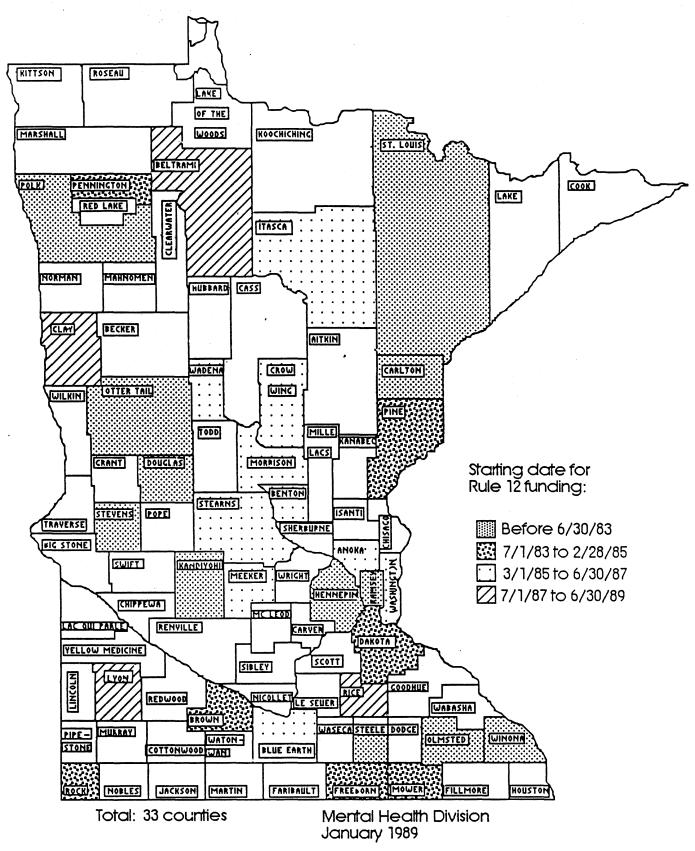

GAMC now covers outpatient and day treatment services provided by county contract providers and physician costs. During 1988, the Legislature authorized, from January 1, 1989 through June 30, 1989, GAMC eligibility for services plus case management services for individuals who reside in an IMD. GAMC, however, contains rate reductions for mental health service.

MA eligibility for individuals who reside in IMDs is not allowed: therefore state funding for the health care needs of these individuals is required. Case management services are a key part of the mental health service system for persons with serious and persistent mental illness. Persons who reside in residential facilities are particularly in need of this service to assure movement to less restrictive settings. If these persons should

become ineligible for MA solely due to their placement in a treatment facility, it is essential that state funds be available through GAMC to continue case management services otherwise available through MA.

The Mental Health Division is working with individual facilities to reduce their size to 16 beds or less per facility. This change will not only ensure continued MA eligibility for residents of the downsized facilities, but should also have a positive impact on the facilities' program. However, the downsizing process takes time and is not feasible for many Rule 36 facilities. Therefore, the Department's budget request for the next biennium includes a request for GAMC funds to continue case management and medical services for persons who will be ineligible for MA due to their residence in an IMD.

RULE 12 FUNDED COUNTIES -- FY 1981 - FY 1989

#### RULE 12 GRANT AWARDS

Mental Health Division 612/296-4497

#### RULE 14

#### BACKGROUND

The Rule 14 Community Support Program was initiated in 1980 as an experimental program to demonstrate the need and value of a new system of services designed especially for persons with serious and persistent mental illness. At that time, the legislature provided \$2 million for grants to counties to establish, operate or contract for community support services. The basic goal of the new program was to help persons with serious and persistent mental illness remain and function in their home communities.

The community support program is administered under provisions of Rule 14, now identified as D.H.S. 9535.0100 - 9535.1600. Rule 14 is now being revised to assure compliance with the new program standards established by the Comprehensive Mental Health Act, as amended in 1988. The revised rule is expected to be in effect by July 1, 1989. The revised Rule 14 includes definitions of serious and persistent mental illness and describes and defines the services eligible for state funding; sets priorities for grant allocations; outlines the minimum standards required for grant applications and budget materials; limits the use of grant funds to program and direct service expenditures, excluding use of state funding for capital expenditures or rent; limits the amount of administrative expenses which can be paid with state funds; requires applicants to maintain appropriate program and financial records and specifies that programs provide the Mental Health Division with an annual program evaluation report.

From the time when the first program grants were made to counties in 1980 and until 1986, funding was not sufficient to allow the Department to expand the number of counties receiving grant funds. Table 2a provides a history of Rule 14 grant awards.

For the 1986-87 biennium, the Legislature provided additional funds for program expansion and the following new program priorities were established: 1. work and employment related services; 2. a variety of housing related services to aid clients to live more independently; 3. services to underserved populations; and 4. short term crisis services. Ten additional counties also received program funding during this biennium.

For the 1988 - 1989 biennial period, the Legislature provided sufficient funding to allow the Department to begin statewide implementation of the Community Support Service Program (CSP) requirements of the new Comprehensive Mental Health Act. Beginning with F.Y. 1988, the Mental Health Division also initiated a grant funding formula, to assure equitable distribution of state funds to all counties. The formula provided grants based on \$1.00 per capita of a county's total population, with a minimum grant of \$25,000 for each county. Table 2b provides the funding formula allocation for F.Y. 1989. As of June 30, 1987, 47 counties were receiving state Rule 14 funds for CSP program services. To allow all the remaining counties adequate time to plan and develop sound, approvable program applications, grants were offered in three separate cycles of: July 1, 1987; October 1, 1987 and January 1, 1988.

Following this plan, 39 new counties received state grants by the end of F.Y. 1988. During F.Y. 1989, 86 county programs were receiving state funding support, with only one county, electing to operate it's CSP program without state Rule 14 grant funds.

The present funding formula, providing a minimum grant of \$25,000, has helped make it possible for all counties to meet the minimum statutory requirement to make available the basic CSP program services by July 1, 1988. Experience during this past year, however, has indicated the need for the state to provide counties with an increased level of funding support. Based on an analysis of the existing programs, it was determined that the present formula needed to be increased to provide counties with minimum grants of \$50,000. Under the existing level of funding, many counties are not able to provide all needed services within their own county, which necessitates sending individuals away from their home county to be served. To correct this situation, the Department has recommended increasing the per capita provision to \$1.80, with minimum grants of \$50,000.

In F.Y. 1988 and 1989, the funding priorities were for a comprehensive community support services' program in each county of the State. The goal of these programs are:

The community support services program must be designed to improve the ability of persons with serious and persistent mental illness to:

- (1) work in a regular or supported work environment;
- (2) handle basic activities of daily living;
- (3) participate in leisure time activities;
- (4) set goals and plans;
- (5) obtain and maintain appropriate living arrangements; and
- (6) reduce the use of more intensive, costly, or restrictive placements both in number of admissions and lengths of stay as determined by client need.

The type and range of services provided by projects appear to be as broad as the needs of the persons served. The table below lists types of service and funding.

RULE 14 SERVICES PROVIDED IN F.Y. 1988

SERVICE TYPE*	PERCENT
Other Direct*	14.4%
Case Management	14.4%

#### STEWART B. MCKINNEY HOMELESS ASSISTANCE ACT GRANT PROGRAM

In 1988, The Department received a \$572,234 federal Homeless Assistance grant for services to Homeless persons with mental illness. To qualify for this grant, the Department dedicated \$350,000 of Rule 14 funds to meet the federal matching requirements of a 25% local match.

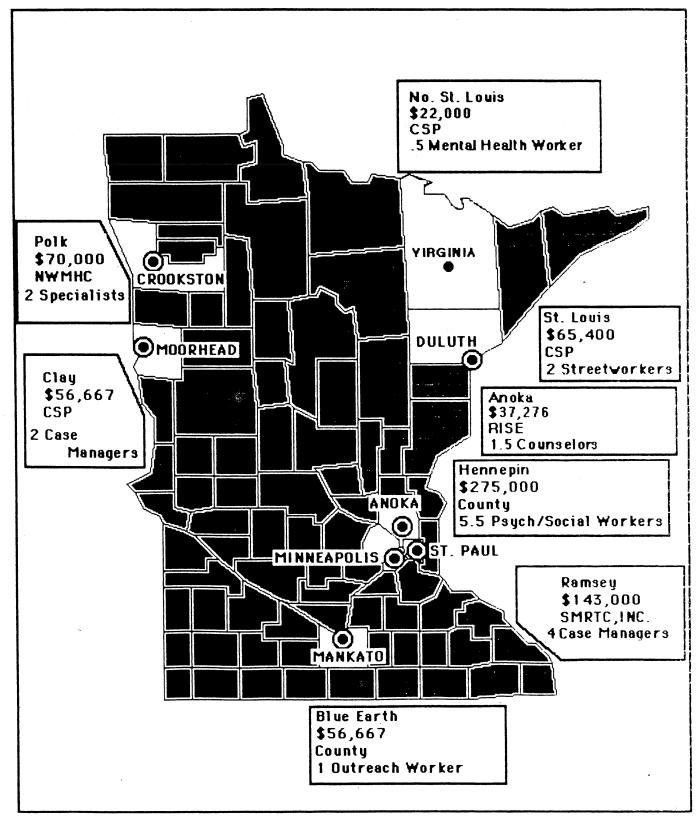

County needs for funding assistance to serve this population group was determined on an analysis of Department of Jobs and Training survey of shelters. During F.Y. 1988 grants were made to four counties. For F.Y. 1989 seven counties received grants for support of eight separate projects. A map at the end of this section shows the grant recipients. The services provided by these projects include: (1) outreach services; (2) emergency services; (3) assistance in obtaining benefits and services to which they are entitled, and (4) referral for mental health care and treatment.

Congress extended The McKinney Homeless Assistance Act for a three year period, effective October 1, 1988, but will provide only about half of the funds previously available to the state. The Department and the Mental Health Division are committed to providing services to these individuals, and have requested additional state funds to continue this program during the next biennial period.

December 1988

#### DESCRIPTION OF CLIENTS

#### DEFINITIONS OF THE POPULATION

The Minnesota Comprehensive Mental Health Act has the following definition of the population who are the primary clients for Rule 14 and and Rule 36 programs.

"For purposes of case management and community support services, a person with serious and persistent mental illness" means a person who has a mental illness and meets at least one of the following criteria:

- (1) the person has undergone two or more episodes of inpatient care for a mental illness within the preceding 24 months;
- (2) the person has experienced a continuous psychiatric hospitalization or residential treatment exceeding six months' duration within the preceding 12 months;
- (3) the person:
  - (i) has a diagnosis of schizophrenia, bipolar disorder, major depression, or borderline personality disorder;
  - (ii) indicates a significant impairment in functioning; and
  - (iii) has a written opinion from a mental health professional stating that the person is reasonably likely to have future episodes requiring inpatient or residential treatment, of a frequency described in clause (1) or (2), unless an ongoing community support services program is provided; or
- (4) the person has been committed by a court as a mentally ill person under chapter 253B, or the person's commitment has been stayed or continued." (M.S. 245.462, Subd. 20C.)

#### DEMOGRAPHICS

This section contains information on 79 programs licensed under Rule 36, (75 of which were funded under Rule 12) and 63 programs funded under Rule 14 in F.Y. 1988.

The 79 Rule 36 programs included 35 Category I facilities which offer more intensive treatment and 44 Category II facilities which emphasize the use of services outside the facility. During the last year (F.Y. 1988) over 3,788 clients were served statewide for a total of 586,667 client days of service. Of these clients 2,456 were admitted for the first time. There were 642 clients in the programs who had been in the program previously. The programs reported having an average of 81% of their beds occupied during F.Y. 1988.

During F.Y. 1988, the Rule 14 programs served 5,175 clients. Of these, over 2,830 were new to the programs. There were 688 clients readmitted by the program during F.Y. 1988.

Distribution Across State: The programs report the number of clients served from each county. During F.Y. 1988 the Rule 12 programs reported that clients from 85 counties were served. The Rule 14 programs reported that clients from 83 counties were served. Several of the Rule 14 programs were just beginning in F.Y. 1988 and so client numbers were low. Tables 3 and 4, which can be found at the end of the report with the remaining tables, lists the use of Rule 36 and Rule 14 programs during F.Y. 1988 by the client's county. These tables also provide a list of the county use per 10,000 county population of both Rule 36 and Rule 14 programs. Since the Rule 14 funding just became available statewide during this biennium, the use of CSP services by each county should continue to increase over the next few years after the new projects become more established.

<u>Age</u>: The demographic (e.g., age, sex, race, etc.) characteristics of project clients are described below and are also contained in

Table 5. While the entire adult age range is served by both programs, a disproportionate number of young adults are being served. Sixty-six percent of Rule 36 clients and 51% of the Rule 14 clients served during Fiscal Year 1988 were 35 years old or younger. This greater focus on the younger client is consistent with the mental health literature which indicates that the younger client with mental illnessoften needs more intensive mental health treatment. These younger clients often have chemical dependency problems as well as mental illness.

<u>Sex</u>: Consistent with previous data Rule 36 programs serve more men (56%), while Rule 14 programs serve a larger proportion of women (53%).

It appears in general that more men are served in residential or inpatient settings, while more women are served in outpatient settings.

Race: In F.Y. 1988 5.3% of clients in Rule 36 programs were minorities. For Rule 14 programs also 5.3% of thier clients were minorities. With greater stress faced by the S.E. Asian Immigrants we might examine more closely the need for more programs which could meet their needs, if appropriate. For the last three years the Division has received a grant from the National Institute of Mental Health to examine the mental health needs of refugees. This grant has conducted a mental health needs assessment and produced training materials and workshops.

Source of Income and Employment Status: For both programs a majority of their clients were on some type of public assistance when entering the program. For Rule 36 clients 76% received some form of assistance payment with 20% on General Assistance, 37% on SSI and 19% on SSDI. For Rule 14 clients 62% received some form of assistance payment with 15% on General Assistance, 31% on SSI and 16% on SSDI. Table 6 contains findings on source of income, living arrangements, employment status and referral sources. Less than 8% of Rule 36 clients and less than 13% ofRule 14 clients had competitive full or part time employment when entering the program.

Living Arrangement and Source of Referral: One of the indicators of the severity of the illness of the clients served by the facilities is their living arrangement before entering the facility. Only 20% of Rule 36 clients were reported to be either living with their family or independently. On the other hand 21% were in regional treatment centers and 23% were in inpatient psychiatric units of a general hospital prior to admission to a community Rule 36 facility.

However, 58% of Rule 14 clients were either living independently or with family or friends when entering the program. Only 13% of the Rule 14 clients entered the program while residing in a Rule 36 facility. This figure indicates a lack of overlap between the two programs.

While Rule 14 had a variety of referral sources, Rule 36 clients were referred mainly from a county social service agency (29%), community hospital (24%), or a Regional Treatment Center (16%).

#### FURTHER CLIENT DESCRIPTORS:

The F.Y. 1988 data from Rule 36 and Rule 14 providers contain some descriptors useful in providing a broader picture of the persons served. The details of these descriptors are listed in Table 7.

<u>Diagnosis</u>: Schizophrenia was the most prevalent diagnosis, 49% of Rule 36 clients and 44% of Rule 14 clients were so described. Affective disorders were the second highest with 30% for Rule 36 clients and 21% for Rule 14 clients. The third most prevalent diagnostic category was personality disorders. Rule 36 programs had 11% and Rule 14 programs had 12% of their participants diagnosed in this classification.

<u>Medications</u>: Of the 70% of Rule 36 participants who were on psychotropic medication regimens most had their medications either directly administered or supervised by staff. Over half of the 3,364 Rule 14 clients who were on psychotropic medications regimens self-administered their medications.

Other Disabilities: Over one quarter of the participants in both programs have the additional problem of chemical dependency. Although this is arelatively high percentage, the percentage is lower than the 36% reported for F.Y. 1986. The problem of the MI/CD dual disability is being addressed by several of the Rule 36 programs. Both Rule 36 and 14 programs have indicated a need for more special programs specifically oriented towards this group of clients.

Roughly 11% of Rule 36 program clients and 9% of the Rule 14 clients were described as having a developmental disability. Additionally, special programming to meet the needs of persons with personality disorders should be explored.

#### EFFECTIVENESS

The preceding sections furnished descriptions of who were served in the Rule 14 and Rule 36 programs. The effectiveness section focusses on what happens to the people served. What effect do the programs have on the lives of the participants and the community at large?

The best measures available answer the following questions:

- a) How long do people participate in the program(s)?
- b) What happens to participants when they leave a program?
- c) What happens to the hospitalization frequency?
- d) How are participants supported? Are they on assistance? Do they have a job?
- e) How do participants live? Are they dependent, semi-independent or independent?

Lastly, the effect on the community at large can be seen by reviewing the answers to the above questions and comparing them to what we know about inpatient psychiatric costs. This is covered in the section titled Cost Effectiveness.

LENGTH OF STAY: Rule 36 programs reported that 2,749 clients left their programs during F.Y. 1988 after an average stay of 10.9 months. There were also 682 clients who had been in the program at least one year and were still in the program on June 30, 1988. Rule 14 programs reported fewer case closings (2,534) during the year. Approximately half of these case closings were from three crisis intervention programs which serve persons on a short term basis. There were also more Rule 14 clients (1,675) who had been in the program at least one year and were still in the program on June 30, 1988 than on June 30, 1986 (949). It should be emphasized that long term program support is an expectation for participants. The distribution of the cases open one year or longer can be found in Table 5.

DISPOSITION OF DISCHARGED CLIENTS: Fifty percent of the discharged Rule 36 clients were seen as completing the program before leaving. Twelve percent of the clients discontinued without approval of the program staff. Another sixteen percent transferred to inpatient psychiatric treatment. The table below lists the other reasons for clients leaving the program. A further discussion of changes in client living arrangements is contained later in the report.

Because of the large number of discharges in Rule 14 programs from the 3 crisis programs, the disposition of discharged clients was analyzed between crisis and non-crisis programs. For the crisis programs almost all (96%) were considered to have completed the program due to its short nature.

DISPOSITION AT DISCHARGE	RULE 36	CRISIS RULE 14	NON-CRISIS RULE 14
		KODE 14	
Completed Program	49.6%	97.5%	33.2%
Left without Staff Approval	12.3%	0.9%	18.3%
Left due to problem behavior	7.9%	0.2%	4.9%
Joint client/staff decision	7.38	0.9%	11.4%
Acute Episode- Hospitalized	15.6%	2.2%	7.7%
Inappropriate for program	1.7%	0.0%	4.2%
Lost Financial Support	0.4%	0.0%	0.4%
Died	0.4%	0.0%	2.9%
Other	5.0%	0.2%	16.6%
TOTAL	100.0%	100.0%	100.0%
Total Number of Clients	2,722	1,162	1,226

HOSPITALIZATION: The hospitalization rates for both Rule 36 and 14 participants are substantially reduced when compared to the year immediately preceding their admission. While in Rule 36 programs, the rate drops from 64% to 15%. While in Rule 14 programs, client rates drop from 41% to 15%. Both of these rates are based on data at discharge from the Rule 36 or 14 programs.

For clients who were still in the program at the end of the year and who were in at least one year, there were also large reductions in the percent of clients hospitalized. For clients in Rule 36 programs the drop was from 62% the year before admission to 18% their last year in the program. For Rule 14 clients the drop was from 52% the year before admission to 21% their last year in the program. Table 8 lists the hospitalization percentages for both programs and also separates out hospitalizations in regional treatment centers and community inpatient hospitals.

Table 8 also shows figures on the hospitalization of clients who were discharged from the program in either F.Y. 1987 or early F.Y. 1988 and followed up during F.Y. 1988. As can be seen in Table 8 the percent of clients hospitalized begins to rise after discharge. For the 780 Rule 36 clients with follow-up information for the 6 months after discharge, 34% had some type of hospitalization. Of the 717 clients from Rule 14 programs who were followed up after leaving, 21% had been hospitalized during the 4.7 month period, on average, after leaving the program. The hospitalization rates from discharge to the follow-up are still lower compared to the year before clients entered the programs.

It should be noted that many of the clients followed up were not discharged during F.Y. 1988 and therefore may not have the same hospitalization history as those listed in Table 8.

This information demonstrates that the use of Rule 36 programs and community support programs is effective in reducing hospitalization. Hospitalization is reduced to a much greater degree while the clients are in the programs. The information on hospitalization after clients leave is much less complete. The available information indicates that hospitalization starts to increase after leaving the programs. Part of this increase might be due to the fact that many of the clients left the program before completing it. It is possible that clients who left the program before they were ready, might then be more vulnerable to hospitalization. In addition, the continued reduction of hospitalization depends on appropriate services after or in conjunction with a Rule 14.

While these data indicate that the programs were effective in reducing the number of clients hospitalized, there are three points which should be noted. First, some of the data about hospitalization prior to being in the program may not be accurate because they are sometimes based on client recollections and estimates made by the staff. Also, the data for hospitalization during the program are probably the most accurate since the programs have more first hand information for that period compared

to before and after the program. Finally the unduplicated hospital figures might be slightly inflated due to some possible duplicated counts by some programs.

A concern with both Rule 14 and Rule 36 programs is what happens to clients when they leave the program. The available hospital data indicate that there is an increase in hospital use. There has been some concern about gaps in services when clients leave a treatment program. However, beginning in January 1989, counties will offer case management services to all of persons who have a serious and persistent mental illness. Case managers must coordinate treatment plans and services with Rule 36 and Rule 14 providers. With the additional case management services being offered it is expected that there will be greater continuity of care when clients leave a Rule 36 or Rule 14 program. The additional case management services should help to reduce the hospital use of those clients who leave the programs.

CHANGES IN PRIMARY SOURCE OF INCOME: Table 9 displays the changes in primary source of income for clients who were discharged during the year and for clients who had been in the program at least one year as of June 30, 1988. The table lists the changes separately for Rule 36 and Rule 14 clients. This table shows the largest change for Rule 36 clients is an increase in the use of SSI and SSDI with MSA. There was a 24% increase in the percent of clients with a job as their primary source of income increasing from 157 clients before the program to 195 either after or at end of year if they were in a year or more. Table 9 also reveals that Rule 14 clients display an even larger shift to the client's job as the primary source of income. The number of clients with jobs as primary income rose from 159 before program to 312 after discharge or at end of year if they were in a year or more. This increase in jobs as the primary source of income is probably due to the vocational focus of several of the Rule 14 programs.

CHANGES IN EMPLOYMENT STATUS: Table 10 presents the changes in employment status for clients who were discharged during the year and for clients who had been in the program at least one year as of June 30, 1988. The table lists the changes separately for Rule 36 and Rule 14 clients. The pattern which is apparent for these figures is the increases in all of the employment related categories. The shifts in the table for discharged clients are the increases of the percent of clients in some type of competitive or supported competitive employment. For Rule 36 clients this shift was from 10.1% at admission to 15% at discharge, while for Rule 14 clients the shift was from 8.9% at admission to 17.4% at discharge. While the percentages seem small, they represent a significant achievement for persons with serious and persistent mental illness.

The largest shifts for those clients in the program at least one year, as of June 30, 1988, were increases in the percent of clients in sheltered or pre-vocational work and in competitive or supported competitive employment. For competitive or supported competitive employment, Rule 36 clients showed a significant change in percent, from 3.6% at admission to 9.2% on June 30, 1988, while Rule 14 clients doubled from 9.5% at admission to 19.3% on June 30, 1988. For sheltered or pre-vocational work Rule 36 clients tripled from admission (9.4%) to June 30, 1988 (35.7%), while Rule 14 clients doubled from admission (12.3%) to June 30, 1988 (20.9%).

<u>CHANGES IN LIVING ARRANGEMENT</u>: Table 11 presents the changes in living arrangement for Rule 36 and Rule 14 clients who were discharged during the year and for Rule 14 clients who had been in the program at least one year as of June 30, 1988. Change in living arrangement for clients still in Rule 36 programs was not examined since they would still be in a Rule 36 facility.

For Rule 36 clients, the major change was the doubling of clients in independent living arrangements (Independent Living and Supported Independent Living - SILS) from admission (15.7%) to discharge (33%). The other major shift was the decrease from 54.1% of the clients in some type of inpatient setting at admission to 18% at discharge. For discharged Rule 36 clients who were followed up during F.Y. 1988, the percent of those in independent living was about the same as at time of discharge. At the six month follow-up the percent of those in regional treatment centers increased from discharge (8.6%) to follow-up (13.4%). However, the percent in community inpatient settings dropped from 9.4% to 2.5% at follow-up. It should be noted that the clients followed up during the year were not necessarily the same clients listed in the discharge information. The discharge information was only on those discharged in F.Y. 1988, while the follow-up data covered clients followed-up in F.Y. 1988 even if they were discharged in F.Y. 1987.

For Rule 14 clients the major change was the increase in the percent of clients in independent living situations. For discharged clients there was an increase from 37.5% at admission to 46.9% at discharge (43.4%), while for clients in the program the increase was from 41.9% at admission to 59.5% on June 30, 1988 (48.9%). Another major change for Rule 14 participants still in the program was that while 16.6% resided in Rule 36 facilities at admission, there were only 10.1% in those facilities on June 30, 1988. For Rule 14 clients discharged during the year 20.6% were in Rule 36 programs at admission, while 12% were there at discharge.

<u>COST EFFECTIVENESS</u>: There are some difficult considerations regarding the cost effectiveness of these programs. There are a variety of programs funded throughout the state. The types of services vary widely depending on the needs of each county. For example, some programs provide day treatment which is a more expensive and staff intensive type of service, while other programs provide a less costly service such as socialization/ recreation services. The clients may be receiving several services in their community treatment, one or more of which is not funded through Rule 12. The estimated cost of maintaining an adult with a serious and persistent mental illness in a community residential facility is described for F.Y. 1989 below:

S	ER	V	IC	ES

CUSTS		C	O	S	T	S
-------	--	---	---	---	---	---

Room and Board costs Program provided by Rule 36 facility Subtotal provided by Rule 36 facility	\$22.49 <u>\$30.65</u> \$53.14
Services from other providers	\$23.89
TOTAL	\$77.03

The figure for services from other providers is a very rough estimate of the services provided by other sources, e.g., medical services, county caseworker services, etc.

The F.Y. 1989 per diem for mental illness state regional treatment center care is \$159.80. In F.Y. 1987 the average community inpatient psychiatric charge per day to Medical Assistance for clients diagnosed as having schizophrenia or an affective disorder was \$410.76. Of this total per diem \$366.26 was for hospital charges and \$44.60 was for physician/psychiatrist charges.

For F.Y. 1987 DHS Reimbursement Division estimated that the average length of stay in a regional treatment center is 165 days. Stays in community hospitals were approximately 14 days for Medicaid clients with a diagnosis of schizophrenia or an affective disorder. The average length of stay for clients discharged from a Rule 36 facility is 10.7 months. The figures presented earlier in this report showing reduced hospitalization for Rule 14 and Rule 36 clients deal with a reduction in hospitalization, not the elimination of psychiatric hospital use. Many clients may still need occasional hospitalization although less frequently.

#### **LEGISLATIVE AUDITOR STUDY:**

At the request of the 1988 Legislature the Program Evaluation Division of the Office of the Legislative Auditor is in the process of evaluating Rule 36 programs. The Mental Health Division is actively working with the Legislative Auditor's staff in its study of Rule 36 programs. This project is in its early stages, but the Mental Health Division will use its findings and data when the study is completed.

### MENTAL HEALTH REPORTING SYSTEMS:

At the request of the Legislature (M.S. 245.721) the Mental Health Division is implementing a Mental Illness Information Management System. As part of this new reporting system for all publicly funded mental health services, individual client service information will be collected. In the future this should allow better information on service use patterns by clients in Rule 36 and Rule 14 programs. By obtaining individual client service information duplicate counting of clients who receive service from more than one provider will be reduced.

#### DISCUSSION

The preceding section on effectiveness highlights the impact of Rule 14 and Rule 36 programs on the lives of adults with a serious and persistent mental illness. The programs help to reduce use of inpatient psychiatric care both in regional treatment centers and community inpatient facilities. In addition, clients are aided in moving to more independent living situations and developing employment skills.

While both programs are effective in assisting clients while they are in the program, clients often face other barriers after discharge. For the large percentage of clients who leave before completion of the Rule 36 programs it is difficult to arrange admission to the right type of alternative program. In addition the hospitalization data on the clients who are discharged indicate that aftercare or community support programs must be available or it is more likely they will return to a hospital setting.

The Rule 14 programs have fewer case closings, unless they are crisis intervention programs. These Community Support Services are intended as longer term programs to help maintain clients in their own community. Due to the outpatient nature of these programs, there is less of a problem in maintaining clients in the program. If clients can be maintained with these supportive

services, there appears to be greater success in reducing hospitalization and increasing employment opportunities and independent living.

#### UNMET NEEDS

While these programs seem to be effective, there are still other unmet needs of clients reported by the programs. As in previous years both Rule 14 and Rule 36 programs report that the top unmet needs are vocational services and supportive housing programs. Without employment programs, it is difficult to maintain the client in an independent living situation or allow them to a move into one. Further, clients in their quest to achieve full independence need additional supportive housing services and access to affordable housing.

Table 12 lists the ranking for Rule 36 programs by combining all three rankings to list the major unmet needs. For Rule 36 programs both employability services and housing were the most mentioned needs. The housing needs would be for those clients leaving the program. Other needs reported included included transportation services, day treatment and special treatment for clients who also have a chemical dependency problems.

For Rule 14 providers the top unmet need overall was employability services. The number two need is transportation services for their clients, while housing and housing support services were listed third. Also listed as needs were client outreach services,

crisis assistance and psycho-social rehabilitation. The rest of the needs are listed in Table 13.

In response to the housing needs frequently expressed by the programs the Department started special housing support grants. These projects which were started in F.Y. 1989 are just getting underway. The Department wants to continue these special housing grants during the next biennium with Rule 14 funding. The Department is also working closely with the Department of Jobs and Training to develop more employment and training opportunities.

Other client needs reported by the programs are: transportation services, day treatment and other services for clients who also have chemical dependency problems, plus case management and aftercare services.

#### RECOMMENDATIONS

The Department's mental health initiative will be fully presented and explained to the Legislature during January and February of this session. Specific to Rules 12 and 14 the Department recommends:

<u>Recommendation 1</u> Same level continuation funding for Adult Residential grants (Rule 12) for F.Y. 1990 and F.Y. 1991. Since current law provides no automatic increase to cover the cost of inflation. Same level for these programs actually means a decline in real dollars. These funds are used primarily for staff

salaries. Since no additional funding is being requested for Rule 12 programs, it is expected that the number of funded beds will gradually decline.

### Recommendation 2

New Rule 14 funding of \$1,043,000 for F.Y. 1990 and \$2,743,000 for F.Y. 1991. Specifically, funding is requested to: a. fully develop community support programs in all 87 counties; b. continue housing support service pilot projects now funded by one time state special funds.

This request is part of the department's mental health initiative.

Although community support services were provided, in some form, in 47 counties prior to the passage of the Mental Health Act, counties were never required to provide all of these services nor were they required to provide these services in an organized way. Two basic situations have developed:

- a. counties who have previously provided community support services have needed to add or enhance their services to meet the new legislative mandates; and
- b. counties who have never provided community support services prior to July 1, 1988 have developed new programming but have been unable to fully develop all of the required components due to limited first time funding.

Beginning with April 1, 1990, each county's Rule 14 allocation

should be increased from the current minimum of \$25,000 per county or \$1 per capita to at least \$50,000 per county or \$1.80 per capita, based on the county's total population. Experience with programs now operating indicates that these are the minimum state Rule 14 funding levels needed to provide all the community support service components required by law.

Eleven support service pilot projects have intitiated in 10 counties in F.Y. 1989 in coordination with the community support programs. These projects are funded through one time state special project funds which the 1988 Legislature transferred from F.Y. 1988 to F.Y. 1989. Funding is needed under Rule 14 to continue these projects through the next biennium to provide adequate time to evaluate their effectiveness. The Mental Health Division plans to present an evaluation of these projects to the 1991 Legislature.

## Recommendation 3

Support for legislation which will amend M.S. 245.73 Subd. 4 to include the legislative report on Rule 12 grant programs with the annual legislative report required under the Mental Health Act.
