P R E F A C E

The annual report of the State Auditor on revenues, expenditures, and debt of the cities in Minnesota for the fiscal year ended December 31, 1990, includes taxable tax capacities, net tax levies and the financial operations of municipalities. Populations were taken from "1990 Census of Population" from the Bureau of the Census, U.S. Department of Commerce. The data have been collected, published and distributed pursuant to Minnesota Statutes, Sections 6.74 and 6.75.

In this report as in the 1981 through 1989 reports, all enterprise funds are reported separately from the governmental funds, in accordance with current accounting and reporting practices. Caution is necessary when comparing recent reports to those published in years prior to 1981, since separate reporting of enterprise and governmental funds was not uniform until 1981.

The Office of the State Auditor has generated this report using dBASE IV and IBM AT personal computers. Anyone who wishes to analyze the data further should contact this office for assistance.

My staff and I want to express our appreciation to the clerks and municipal finance officers whose helpful cooperation contributed to the preparation of this report.

A handwritten signature in black ink, appearing to read "Mark B. Dayton", is written over the printed name.

MARK B. DAYTON
State Auditor

EXECUTIVE SUMMARY

CITY FINANCES IN 1990

Minnesota cities - facing significant increases in demands for public services, an aging infrastructure, declining support from the federal government, and strong public resistance to property tax increases - spent \$2.8 billion during 1990 for the provision of public services. Included in this total is \$1.4 billion for current governmental expenditures, \$826.4 million for capital improvements, and \$626.3 million for debt service payments. Total current expenditures increased 6.3 percent from 1989 to 1990. Spending for capital improvements increased 14.4 percent from 1989 to 1990, although this relatively large increase is primarily due to significant capital outlays in the City of Minneapolis.

Minnesota cities continued to focus their resources on streets/highways and public safety activities, as evidenced by their spending priorities during the past year. In 1990, city expenditures on streets and highways totaled \$516.9 million, accounting for 21.3 percent of total city expenditures; public safety expenditures totaled \$512.1 million, accounting for 21.1 percent of total city expenditures. The next four largest categories of spending by Minnesota cities were Housing and Economic Development (\$276.7 million), General Government (\$261.2 million), Interest and Fiscal Charges (\$236.3 million), and Parks and Recreation activities (\$216.8 million).

To finance public services and capital improvements, Minnesota cities raised \$3.0 billion in revenues (including all borrowing and excluding all transfers). Cities derived their revenues from a broad range of sources, including \$692.7 million in property taxes, \$680.8 million in state grants and aids, \$247.7 million in other taxes and special assessments, \$156.4 million in charges for services, \$128.4 million in federal grants, \$75.8 million in fees and fines, and \$628.2 million in borrowing.

In addition to the expenditures and revenues highlighted above, Minnesota cities operated a variety of municipal enterprises that provided additional services for Minnesotans. These municipal enterprises - including water, sewer, electric, gas and heat utilities, municipal hospitals and nursing homes, liquor stores, and refuse disposal services - accounted for an additional \$1.26 billion in expenditures and \$1.32 billion in revenues. Municipal enterprises are established by cities for specific services that are intended to be self-sustaining through fees and charges.

Many municipal enterprises operate at a profit, allowing the city

to transfer money from the enterprise funds to support other municipal services. In 1990, Minnesota cities transferred \$121.2 million from their enterprise funds to other municipal funds. (This number includes a \$54.7 million transfer from the Minneapolis Convention Center Fund to the Minneapolis Capital Projects Funds. This transfer was used to help finance the construction of the Convention Center Complex. The City also transferred \$53.2 million from the proceeds of a separate bond issue to the Convention Center Enterprise Fund to replace the majority of the \$54.7 million that was transferred to the capital projects funds.)

STATEWIDE DATA CAN MASK SIGNIFICANT FISCAL TRENDS

While aggregate statewide data is helpful in identifying trends in city finances, it is often necessary to analyze the significant components of the data more carefully to understand the driving forces behind these trends. For example, the cities of Minneapolis, St. Paul and Duluth account for 38.2 percent of total current expenditures for all cities. Therefore, major changes in expenditure and revenue patterns in these cities, when aggregated into the statewide database, often mask significant fiscal trends in the other 851 cities.

In 1990, spending and revenue activities for the City of Minneapolis had a significant impact on two categories of statewide financial data. Situations unique to the City of Minneapolis obscured actual trends in capital outlays, federal revenue, and enterprise fund transfers for the remaining 853 Minnesota cities.

Capital Investments Not Keeping Pace With Expenditure Increases

Between 1989 and 1990, total statewide capital outlay increased from \$722.3 million to \$826.4 million, a net increase of \$104.1 million, or 14.4 percent. However, much of that net increase is directly attributable to a major increase in capital outlay by the City of Minneapolis. Minneapolis spent \$201.7 million in capital outlay in 1990, compared to \$120.1 million in 1989, an increase of \$81.6 million, or 68.0 percent. For all cities other than Minneapolis, capital outlay increased from \$602.2 million in 1989 to \$624.7 million in 1990, a net increase of \$22.5 million, or 3.7 percent.

The relatively small net increase in capital outlay by all cities other than Minneapolis also reduced the percentage of total city expenditures dedicated to capital outlay. In 1990, the percent of total city expenditures (excluding Minneapolis data) dedicated to capital outlay reached a seven year low. Between 1984 and 1988, capital outlay by these 853 cities averaged 31.1 percent of total expenditures; in 1989, the average had fallen to 29.8 percent; in 1990, capital outlay by all cities other than Minneapolis accounted for 28.0 percent of total expenditures.

The relatively low levels of capital outlay by Minnesota cities are approximately equivalent to the capital investment efforts put forth by Minnesota cities in the early 1980s, when interest rates had soared well above 10 percent. While the cyclical nature of capital investments may partially explain the relatively low capital investment efforts put forth in the past two years, city officials should consider taking advantage of current low interest rates to make essential capital improvements. While strained city budgets may tempt city officials to delay or cancel planned capital improvements, the long term economic condition of cities will deteriorate if essential capital improvements are neglected.

Cities Facing Significant Declines In Federal Financial Assistance

While federal grants to Minnesota cities increased from \$108.7 million in 1989 to \$128.4 million in 1990, the entire net increase is due to a \$30.8 million increase in federal grants for the city of Minneapolis. The city of Minneapolis received a significant infusion of federal funds for roadway and parking ramp facilities associated with the Interstate 394 project. For all cities other than Minneapolis, total federal grants actually declined from \$72.3 million in 1989 to \$61.2 million in 1990.

The decline in federal revenue for Minnesota cities continues a trend that began in the early 1980s, and has contributed significantly to the overall fiscal crises facing many cities. The following table demonstrates this alarming decline. While the city of Minneapolis has had a net increase in federal revenue over the past ten years, the remaining 853 cities have had to contend with major reductions in federal assistance. Even Minneapolis has lost significant amounts of federal revenue for programs and services that were historically dependent upon these revenues.

Had federal revenue to Minnesota cities continued to keep pace with all other sources of city revenue between 1981 and 1990, their overall financial situation would be much better. If 1990 federal revenues were at 1981 levels, Minnesota cities (excluding Minneapolis) would have received \$190.9 million from the federal government in 1990, compared to the \$61.2 million Minnesota cities actually received. Essentially, Minnesota cities (excluding Minneapolis) lost \$129.7 million in federal assistance in 1990, compared to what they would have received at 1981 levels of federal grants in aid. To place this loss in the proper perspective, the \$129.7 million loss in federal assistance for 1990 is slightly greater than the total current expenditures (all expenditures excluding capital outlays and debt service) of all 675 Minnesota cities with populations of 2500 people or less.

THE FISCAL SITUATION OF MINNESOTA CITIES IS NOT EXPECTED TO IMPROVE

Minnesota city officials can continue to expect difficulties funding the essential services demanded by their citizens. As the federal government continues to grapple with record breaking federal deficits, the states are caught in perennial budget crises, and local citizens adamantly resist property tax increases, city officials are not going to find new sources of revenue to meet the rising demands for public services. Therefore, it is essential that Minnesota city officials continue to focus on opportunities to improve the efficiency and effectiveness of current service delivery systems. By identifying and implementing innovative solutions to the needs for more and better services, Minnesota cities will be able to assist their citizens in meeting any difficult economic times which may lie ahead.

The financial operations of the 2,060 municipal public service enterprises are presented in Tables 10 through 19. The enterprises furnish many types of services, and operate wholly or in large part with revenue derived from the sale of goods or services. When possible, each enterprise is presented separately on an accrual basis of accounting. In some cities the operations of two or more enterprises are combined. For example, the functions of sanitary sewers, sewage disposal, and the operation of the water utility may be combined. This treatment is not in conformity with preferred governmental accounting and reporting practices, and the combined enterprises are disclosed with appropriate footnotes.

Seven cities failed to submit an annual reporting form and financial statement in time for this publication.

Bock *Courtland Delano *Hilltop Island View Pierz Watson

*Indicates city also failed to report in 1989.

Revenues and expenditures for governmental functions (including expendable trust funds) are summarized by population classes based on the 1980 populations from the Bureau of the Census. The 1990 populations are from the 1990 Census of population, Bureau of the Census. The population classes correspond to the legal definitions of the the 1st, 2nd, 3rd and 4th class cities. The 4th class cities are further divided between those over and under 2,500 in population. The cities under 2,500 are in two categories; those reporting on the modified accrual basis (GAAP) and cash basis of accounting. They are shown in Tables 5 through 8.

GENERAL SUMMARY

TAXABLE TAX CAPACITY

For tax collection years 1988 and prior, taxable valuation was calculated on a formula applied to market value. This resulted in an assessed valuation which was used as a base to spread the annual tax levies.

Beginning with property taxes payable in 1989, the State of Minnesota legislated a change in this formula. The previous system of assessed values has been replaced with a set of tax capacity rates.

Assessed value has been replaced with net tax capacity and tax capacity rates has replaced mill rates. Taxes are determined by multiplying the net tax capacity by the local tax rates, as expressed as a percentage. This takes the place of assessed values multiplied by mill rates. Total taxable tax capacity for all cities in 1990 was \$2.6 billion with a per capita of \$753.05.

GOVERNMENTAL OPERATIONS

REVENUES

Revenue for the Governmental Funds of all cities in 1990 totaled \$2.4 billion which was \$131.1 million or 5.9% higher than in 1989. The total revenue per capita was \$686.29 compared to \$667.60 in 1989. The amount per capita in each population class was as follows:

<u>Population Class</u>	<u>1989 Per Capita</u>	<u>1990 Per Capita</u>
Over 100,000	\$1,036.78	\$1,116.08
20,000 to 100,000	594.07	584.05
10,000 to 20,000	579.94	578.16
2,500 to 10,000	548.18	561.33
Under 2,500	521.19	542.85

The principal sources of revenue for the 854 cities consisted of: 1) property taxes (29.3%); 2) inter-governmental revenues (35.8%) – federal, state, county, local grants and aids; and 3) interest earnings (9.0%).

Revenues from property taxes totaled \$692.7 million. This is a \$49.3 million increase over the \$643.4 million collected in 1989.

Intergovernmental revenue, the largest source, totaled \$845.0 million, which was 35.8% of the total revenue compared with \$799.5 million or 35.9% from that source in 1989. Intergovernmental revenue ranged from 25.6% of total revenue in the 20,000 to 100,000 population class to 49.7% in the cities of the under 2,500 class. Intergovernmental revenues by major class of city are summarized below.

Interest earnings on investments, the third largest revenue source for cities in 1990, increased \$11.2 million from 1989. Interest earnings accounted for 9.0% of total revenue compared with 9.1% in 1989.

Special assessments totaled \$186.1 million and accounted for 7.9% of total revenue compared with \$183.0 million or 8.2% in 1989. The percentage of total revenue from this source varied from 3.0% in the over 100,000 population class to 12.0% in the 10,000 to 20,000 population class.

Charges for services, which totaled \$156.4 million, were \$11.0 million or 7.6% more than in 1989. Charges for services represented 7.8% of total revenue in the over 100,000 population class compared to an average of 6.0% in the other population classes.

Transfers from public service enterprises totaled \$121.2 million. These transfers, which are shown as "Other Financing Sources," are an important financing source for the under 2,500 population class where they account for \$9.7 million.

EXPENDITURES

Expenditures for governmental functions by all cities in 1990 totaled \$2.81 billion. This should not be directly compared to years before 1981 due to the accounting changes mentioned on page 1.

Beginning in 1985, principal payments in debt service funds have been included in expenditures; and, effective in 1987, principal paid on special assessment bonds have also been included to more nearly conform to accounting standards. Total expenditures (including principal) should not be compared to years prior to 1987, or distortions will result.

Expenditures for general government were up \$10.9 million or 4.4% in 1990. Total general government expenditures were \$261.2 million and accounted for 10.8% of the total expenditures compared with \$250.3 million or 11.2% in 1989.

Public safety, the second largest expenditure in 1990, totaled \$512.1 million. Expenditures increased \$25.8 million or 5.3% more than 1989. Approximately \$301.3 million or 58.8% was for police.

Streets and highways were the costliest governmental function for 1990, totaling \$516.9 million or 21.3% of total expenditures. This includes 61.3% or \$317.1 million in expenditures for equipment and construction. Overall spending increased \$36.1 million or 7.5% from 1989.

Interest and fiscal charges, which totaled \$236.3 million, increased \$7.8 million or 3.4% from 1989. These expenditures represent 9.8% of total expenditures in 1990 compared to 10.2% during 1989.

HRA and economic development expenditures totaling \$276.7 million increased 23.5% over the previous year. This accounted for 11.4% of the total expenditures compared with \$224 million or 10.0% in 1989.

Figures 1 and 2 depict the percentage of total revenues or expenditures that each governmental function provides. Figure 3 shows the change in the total amount of governmental revenues and expenditures in the last 10 years.

OPERATION OF PUBLIC SERVICE ENTERPRISES

Municipalities in Minnesota operate many types of public service enterprises. Nine are presented on separate tables and others are combined in one table as "Other Service Enterprises." In this report electric utilities that operate generation and distribution systems are combined with those operating distribution systems only.

When possible, the financial operations of these enterprises are presented on the accrual basis rather than cash basis. The basis of accounting is disclosed in footnotes in Tables 10 through 19.

The following two-year summary of operations by type of public service enterprise is presented for the purpose of comparison.

INDEBTEDNESS

During the year bonds totaling \$728.9 million were issued and \$479.2 million were retired, leaving \$4.3 billion outstanding at the end of 1990. Below is a two-year summary of bonds outstanding classified by type:

	1989	1990
