Property Tax Bulletin No. 4

St. Paul, Minnesota 55145

The Norway Pine (*Pinus resinosa*) - Minnesota's State Tree

The Norway pine is a native of Minnesota and its range extends throughout the coniferous forest area of the state. It grows to a height of 60 - 140 feet with a diameter reaching four and one-half feet, and an age upwards of 300 years. The quality of the lumber gives it a place of increasing importance in present day forest management.

F O R E W O R D

Property tax is a very important source of revenue for all local governmental units, namely cities, townships, school districts, special districts and county governments. The State government has not levied a property tax since 1966. This bulletin summarizes 1974 assessed and market values, the property taxes levied on that property by governmental unit, the estimated distribution of the actual tax payable in 1975 by use classification by county, and the 1975 payments for the 45% and taconite homestead tax relief credit. A market value table for the exempt property which is assessed every six years is also included in this year's bulletin. In addition to current year property data, this bulletin also contains a review of the Minnesota property tax system, illustrates selective historical property tax data, and a comparison by county of the current year's taxable value, taxes levied, and mill rates to those payable in 1974.

December, 1975

B. Levies and Mill Rates

SECTION I

REVIEW OF THE MINNESOTA PROPERTY TAX SYSTEM TAXES PAYABLE IN 1975

The following narrative section is a general description of the Minnesota property tax system for taxes payable in 1975 and the laws that prevailed at that time. It does not contain any changes made by the 1975 legislature, effective payable 1976.

The general property tax is the major tax imposed by local governmental units and school districts. The State has not imposed a levy on property since 1966. Therefore, the entire property tax base is subject to taxation only by the local taxing districts namely, county governments, cities, townships, school districts, and special taxing districts. The property tax is an ad valorem tax. The amount of tax levied on a parcel of property is based upon the market value of the property, the total assessed value of property in the taxing districts having authority to levy a tax on the parcel of property, and the property tax budget requirements of the taxing districts. (See Fiscal Disparities page 16 for method of taxation in metropolitan counties). All real property and tangible personal property is subject to taxation unless specifically exempted by law.

A. Values

1. Exempt Property:

Exempt real property includes Indian lands, public property, and education religious and charitable institutions. This property is valued every six years; 1974 being an assessment year. The 1974 market value of exempt property categorized by general type is shown on Table 14.

Effective for the 1973 and subsequent assessments, exempt property also includes the value of commercial and industrial tools, implements, machinery and equipment attached to or installed in real property for use in the business or production activity conducted thereon, excepting public utility attached machinery.

Exempt personal property includes farm livestock, farm machinery, furniture, inventories, tools and machinery of service, retail, wholesale and manufacturing businesses, furnishings of rental units if the rental value is subject to the sales tax and containers in the possession of the consumer during consumption if the sale of the commodities is subject to the sales tax. Household goods are also exempt from property taxation.

2. Assessors:

As of January 1, 1968, each county must have a county assessor appointed by the Board of County Commissioners and approved by the State Commissioner of Revenue. The term of county assessor is four years. Assessors in municipalities of 30,000 or more population have the same duties and responsibilities as county assessors. The county assessor, aided by deputy assessors and local assessors, must assess all property except state-assessed property. The State is responsible for the original assessment of electric transmission and distribution systems and pipeline systems distributing water, gas, or petroleum products. All airflight property, i.e., commercial aircraft, is assessed by the State as well as the real property of the Minneapolis-St. Paul International Airport. Minerals and unmined ore are also state-assessed.

3. Valuation of Property:

Real property is assessed every two years on January 2 of odd numbered years, and personal property is assessed annually on January 2. All property is to be valued at its market value, which is the usual selling price of property. (Prior to the 1972 assessment, the practice was to take one-third of market value to arrive at an adjusted market value. The statutory classification rates were applied to the adjusted market value to determine the assessed value. With the discontinuation of adjusted market value, the total assessed values of real and personal property approximately tripled. Since the mill rate is arrived at by dividing the tax levy by the assessed valuation, the mill rate is approximately one-third of what it had been under the previous system. Therefore, a rate of 300 mills would be only 100 mills under the new system.)

4. Classification of Property:

When property is valued, it must be classified according to the legal classification system. The various statutory classification rates are applied to the market value to determine the assessed value of property. The term "assessed" value and "taxable" value are synonymous except in the metropolitan counties. See #10 in this section for explanation due to fiscal disparities. Real and personal property in Minnesota is classified as follows for the 1974 assessment, for determination of taxes payable in 1975.

REAL PROPERTY

<u>Class</u>	<u>Description</u>	<u>Percent of Market Value</u>
1	Unmined Iron Ore	50%
1A	"Low Recovery" Iron Ore	30 to 48 1/2%
1B	Severed Mineral Interests Tax	*

REAL PROPERTY

<u>Class</u>	<u>Description</u>	<u>Percent of Market Value</u>
3	Agricultural Non-Homestead	33 1/3%
3	Seasonal Residential for Recreational Purposes	
	a. Commercial, but not used for more than 200 days per year (Example: resort)	33 1/3%
	b. Non-Commercial (Example: cabin)	33 1/3%
3	Tools, implements, and machinery of an electric generating, transmission or distribution system or a pipeline system transporting or distributing water, gas, or petroleum products which are fixtures to real property	33 1/3%
3B	Agricultural Homestead	
	1st \$12,000 Market Value	20%
	Excess of Market Value over \$12,000	33 1/3%
3C	All Other Homestead **	
	1st \$12,000 Market Value	25%
	Excess of Market Value over \$12,000	40%
3CC	Paraplegic Veterans, Blind, and Permanently and Totally Disabled Persons' Homesteads	
	1st \$24,000 of Market Value	5%
	Excess of Market Value over \$24,000 Agricultural	33 1/3%
	Excess of Market Value over \$24,000 All Other	40%
3D	Non-Homestead Residential	40%
	Examples:	
	a. Non-homestead single family dwellings, duplexes, triplexes, and apartments with 4 or more units that do not qualify as Title II National Housing	
	b. Land of Title II National Housing	
3E	Timber Land	20%

REAL PROPERTY

<u>Class</u>	<u>Description</u>	<u>Percent of Market Value</u>
4	All Other Real Property Examples: a. Commercial, industrial (including petroleum refineries), and public utility land and buildings b. Vacant land, not used for agricultural, commercial, industrial, public utility, recreational or residential purposes	43%
None	Parking Ramp Structures in First Class Cities with 400,000 or Less Population 1973 Assessment 1975 Assessment 1977 and Subsequent Assessments	30% 36% 43%
None	Beginning with the 1975 Assessment, Type I and Type II Apartments Five or more stories (structures only) Four or less stories (structures only)	25% 33 1/3%
None	Housing for Elderly or for Low and Moderate Income Families Financed by Direct Federal Loan or Federally Insured Loan Pursuant to Title II of the National Housing Act or the Minnesota Housing Act Municipalities of 10,000 or over population (structures only) Municipalities under 10,000 population (structures only)	20% 5%

* 25¢ per acre annually (tax effective January 1, 1975) each parcel is subject to minimum annual tax of \$2.00.

** Townhouse property will be classified and valued as all other homestead real estate. Value will be added for each unit's share of the developments common areas.

PERSONAL PROPERTY

2A	Mobile Homes Homestead	
	1st \$24,000 Market Value (3CC)	5%
	1st \$12,000 Market Value (3C)	25%
	Excess of Market Value over \$24,000 (3CC) and \$12,000 (3C)	40%
	Non-Homestead	40%

PERSONAL PROPERTY

<u>Class</u>	<u>Description</u>	<u>Percent of Market Value</u>
3	Structures on Leased Public Lands in Rural Areas	33 1/3%
3	Tools, implements and machinery of an electric generating, transmission or distribution system or a pipeline system transporting or distributing water, gas, or petroleum products which are fixtures	33 1/3%
3	Leased Agricultural Real Estate of Exempt Land (M.S. 272.01, Subd. 2)	33 1/3%
3F	Owner Occupied Residences on Leased Public or Railroad Lands	***
4	Structures on Leased Public Lands in Urban Areas	43%
4	Structures on Railroad operating Rights of Ways	43%
4	Leased All Other (Non-Agricultural) Real Estate of Exempt Land (M. S. 272.01, Subd. 2)	43%
4	Systems of Electric, Gas and Water Utilities	43%
4	Billboards, Advertising Signs and Devices	43%

*** Buildings receive the classification rate as if they were homestead real property within the scope of Class 3b, 3c or 3cc, whichever is applicable.

END OF CLASSIFICATION LAW

There will be no assessment of the former classes of property listed below:

<u>Class</u>	<u>Description</u>
3	Personal - Inventories, stocks of merchandise of sorts, all materials, parts and supplies, furniture and equipment, manufacturer's materials, manufactured articles including the inventories of manufacturers, wholesalers, retailers, and contractors, and the furnishings of a room or apartment in a hotel, rooming house, tourist court, motel or trailer camp, and tools and machinery which, by law, are considered as personal property.

<u>Class</u>	<u>Description</u>
3A	Agricultural products in the hands of the producer.
3J	Petroleum refinery's personal property
3	Real - Machinery which constitutes fixtures to real estate except public utilities under ad valorem taxation.

5. Limited Increase on Specified Types of Property:

Effective with the 1973 assessment, residential property plus agricultural property and real estate devoted to temporary and seasonal residential occupancy for recreational purposes where such property is held by the same owner, by a surviving spouse of deceased owner, or by a surviving joint tenant, for a period of one year prior to any assessment date, the assessor, after determining value of the property shall compare the value with that determined in the preceding assessment. If the increase exceeds 5% of the preceding valuation, the amount of increase entered in the current assessment shall be decreased so as not to exceed 5%. The 1974 Legislature amended this law effective for the 1974 and subsequent assessments by allowing the specified property to be sold and still be eligible for the 5% limitation.

6. Review and Equalization:

The work of the assessor is subject to administrative review and equalization at three levels: the Local Board of Review, the County Board of Equalization, and the State Board of Equalization. It is the duty of these boards to equalize property assessments within each class and within each taxing district.

B. Tax Levies and Mill Rates

1. The Property Tax Budget Levy:

Each local taxing district determines the amount of money needed to fund their various operations in the coming year. The total amount of this money is commonly referred to as a "budget." Finances for the budget originate from a variety of sources including, among others, State and federal aids, parking meters, fines, municipal liquor stores, licenses, permits, local sales taxes, and property taxes. The property tax budget levy is only one constituent of the entire operating budget required by the taxing district.

2. Levy Limitations:

The 1971 Legislature enacted a law (later amended in 1973 and in 1974) which imposed limitations upon the revenue raised by means of property tax levies. There are two basic overall levy limitation laws; one pertains to local governments and the other pertains to school districts. Since these laws are completely independent from one another, each will be discussed separately.

a. Local Government Levy Limitations

All cities of 500 population or more, towns with statutory city powers of 500 population or more, and county governments are subject to an overall local government levy limitation. Basically, it limits the local districts to a 6% increase in the levy limit base per capita over the levy limit base per capita in the previous levy year. Provisions are made in the law which allow the limitations to be increased or adjusted to reflect changes in population, increases or decreases in functions and services, or the will of the voters of the governmental subdivision. This overall levy limitation is in addition to specific charter, special law, and statutory levy limitations. If the overall limitation is more restrictive than the specific limitations, the overall limitation prevails. If the specific limitations are more restrictive than the overall limitation, the specific limitations prevail.

All ad valorem tax levies are subject to the governmental subdivision's overall levy limitation except for "special levies" and other levies authorized by statute or special act to be levied outside the government subdivision's overall levy limitation. The "special levies" authorized outside the overall levy limitations are numerous and detailed, but in brief, they include the following.

(1) Amount of money needed for the increased costs of court judgments and out of court settlements on any action other than an action on an express contract or default on an express contract, including the premium costs of liability insurance (but excluding coverage for Workmen's Compensation claims).

(2) Amount of levy needed for the increased cost of compliance with written lawful orders issued by the State of Minnesota, or the United States, or any agency or subdivision thereof, or with stipulation agreements in lieu of such lawful orders. This special levy also includes the cost of complying with permits for treatment works or disposal systems for pollution abatement in lieu of lawful orders.

(3) Amount needed for compliance with Laws of Minnesota which are mandatory as opposed to permissive, and which specifically and directly result in increased costs to the governmental subdivision.

(4) Amount needed for expanded county court systems, to the extent of the additional cost remaining to the county government over the payable 1971 budget level for the probate court of such county, after the subtraction of the county's anticipated collections of fees, fines and forfeits in the taxes payable year.

(5) Amount of levy needed for increased public pension costs, including increased costs for social security, PERA, the Public Employees Police and Fire Fund of PERA, volunteer firemen's relief associations, retirement associations operating under the Police and Firemen's Relief Association Guidelines Act of 1969 and any retirement association operating under a special law of the Minnesota Legislature. The total increase in the required levy is allowed as a "special levy" without regard to whether or not a portion of such increased costs is attributable to salary increases or expanded manpower levels.

(6) Amount of levy needed for matching fund programs or projects with the State or federal government to the extent of the increase in levy for the required local share over the amount levied for the program or project in levy year 1970, taxes payable in 1971. In determining the special levy, the governmental subdivision may include levies in anticipation of State or federal grants, levies to reimburse expenditures already made for local shares, as well as current levy year requirements.

(7) Amount required for natural disasters, including the cost of preventing, preparing for, or repairing the effects of such disasters.

(8) Amount of levy needed for county welfare administration, including the entire certified levy for the unreimbursed costs of welfare administration, social services and purchase of social services, general assistance and poor relief and the categorical aids.

(9) Amount needed for bonded indebtedness, including the entire levy amount required to make the bond principal and interest payments due in the forthcoming budget year. A municipality may also claim a special levy for the amount needed to reimburse liquor store revenues used to pay the principal and interest due on municipal liquor store bonds in the calendar year immediately preceding the current levy year. Other bond-like payments that qualify as a special levy are the levies to fund the payments made to the Minnesota State Armory Building Commission to the extent that such payments are for the purpose of retiring the principal and interest on armory construction bonds. Similarly, a levy to fund the payments made to another political subdivision of the State of Minnesota is a special levy to the extent that such payments are used to retire the principal and interest on bonds or certificates of indebtedness of the type that qualify as a special levy.

(10) Amount needed to pay the cost of principal and interest on certain types of certificates of indebtedness. These are primarily equipment certificates of indebtedness such as those authorized by Minnesota Statutes, Section 412.301.

(11) Amount of levy required for decreasing non-tax revenues to reimburse a governmental subdivision for the decrease in revenues from municipal liquor stores, public service enterprises (for example, water utilities), licenses, permits, fees, fines and forfeits.

(12) Amount needed for a decreased mobile home tax distribution, to the extent that the governmental subdivision's portion of the ad valorem tax on mobile homes in the current levy year is less than the distribution of the mobile homes tax aid to the governmental subdivision in calendar year 1971.

(13) Amount needed for those governmental subdivisions which experienced a county auditor's error of omission or an error of omission in the levy certified to the county auditor in levy year 1971 or thereafter.

(14) Amount needed for the increased costs of extending services to newly annexed areas or the increased costs of developing services in a newly incorporated municipality. The amount of such increased costs must be the costs as estimated by the Minnesota Municipal Commission and contained in a Municipal Commission order.

(15) Amount required for the increased costs resulting from extending municipal services to a new private industrial and nonresidential commercial developments. This special levy must be calculated separately for each new development project for which a building permit is issued.

(16) Amount needed for the costs of implementing Dutch elm and oak wilt disease eradication and tree removal programs.

Except for these "special levies" and other specified levies authorized by law to be made in excess of the governmental subdivision's overall levy limitation, all levies in excess of a governmental subdivision's overall levy limitation are subject to a 33 percent penalty, which is deductible from the governmental subdivision's Local Government Aid payments.

b. School District Levy Limitations

The most important levy limit on schools covers the levy for all general and special school purposes, or the school maintenance levy. This limit is determined by three different formulas for three different types of districts.

(1) A district that has expenditures equal to the statewide average allowable expenditure has a simple levy limit of 30 mills on the adjusted assessed value of the district. (The adjusted assessed value is the assessed value of the district modified for the prevailing level of assessment in the district.) — 28

(2) A district that is below average in expenditure has a mill rate limitation that is proportionately reduced from 30 mills. The average expenditure allowable for levy year 1974, taxes payable in 1975, is \$875 and the average mill rate is 30 mills. If, therefore, a district is spending at a level of \$817, they would then have a mill rate limit of 28 mills ($\$817/\875×30 mills).

(3) A district that was above average in expenditure in 1970-71 is allowed to levy more than 30 mills to meet its expenditure needs. However, they are restricted in their levying power to limit their spending. The amount these districts are allowed to levy in excess of 30 mills varies according to their maintenance costs in 1970-71.

The difference between the allowable expenditure amount and the allowable levy amount is the State school aid payment. This amount is paid directly to each school district.

* In addition to the maintenance levy, schools are allowed to levy amounts necessary to pay off bonded indebtedness which has been authorized by local voters.

* A basic transportation levy has been prescribed for each district, except for the Minneapolis and St. Paul districts, such that each property taxpayer will pay the same for school transportation regardless of where he lives in the state. The local levy for transportation purposes, beginning with 1973 levy, payable in 1974 and used for the 1974-75 school year, is one mill on the adjusted assessed value of the district. If a school district's transportation needs exceed the amount procured through the one mill levy, state aid pays the balance of the authorized transportation expenditure.

Minneapolis and St. Paul may levy an amount for transportation not to exceed 20% of their authorized transportation costs. State aid pays the remaining 80%.

* A fourth levy is allowed for capital outlay purposes. Generally, a district is limited to an increase of 2 mills above its previous year's capital outlay levy but may not levy more than 10 mills or \$65.00 per pupil unit, whichever is lesser.

* Each district's community school advisory council is authorized to levy \$1 for each person living in the district. This dollar per capita levy shall be used for such things as summer school, non-vocational adult programs, and recreational programs. The law also provides for the establishment of an advisory council for those school districts not having one.

The law provides a penalty against non-complying districts by reducing their state aid by an amount equal to 50% of the levy in excess of the levy limits.

The Commissioner of Education shall authorize the county auditor to reduce the school maintenance levy for taxes payable in 1975 for any errors which resulted in an excess maintenance levy for taxes which were payable in 1974.

If a district's school board does not feel it has enough operating revenues, a referendum may be held to raise the district's levy. If approved, a continuing annual levy is authorized; it may be subsequently repealed by a referendum called for that purpose. This referendum provision was liberalized to allow referendums to be held at any time but no more than once per year in each school district.

Petitions to initiate the referendum must be signed, in most cases, by an excess of 15% of the average number of voters in the two most recent district-wide school elections.

3. Determination of the Property Tax Levy:

The local units of government certify to the county auditor their property tax budget levy, which includes consideration for the limitations and their taxable property values. The auditor adjusts the levies to comply with specific charter and statutory limitations. Generally, however, he makes no adjustments to the overall levy limitations of the taxing districts unless specifically authorized to do so by the Commissioner of Education or the Commissioner of Revenue. In the case of school districts, the county auditor deducts the state funded 8.3 mill rate agricultural school district aid from its budget levy. This last review of the budget levies by the county auditor determines the actual dollar amounts to be levied through ad valorem property taxation.

4. Special Assessments:

Special assessments, which are also paid by property owners, involve the funding of such projects as streets, curbs, sidewalks, ditches, and storm sewers. When any of these improvements are made to a person's property, that person is considered to have benefited directly by them. Improvements of this nature have no relationship to the value of the owner's property; rather, the amount needed for the project is determined on the basis of how much each property benefits. The determination of the mill rate and the individual's taxes due (see no. 5 below) excludes the amounts needed for these types of special assessments. Any amounts for special assessments are added but enumerated separately on the property owner's tax statement. They are not considered to be a tax on property.

5. Determination of the Mill Rate and the Individual Taxes Due:

The final levy requirements of each taxing district, namely counties, cities, townships, school districts and special taxing districts, are spread against the respective taxable values to determine the mill rates required to generate the necessary revenue. Under normal circumstances, this is accomplished by dividing the property tax budget levy amount by the total taxable value. For example, if the county's levy were \$1,000,000 and the total assessed value were \$50,600,000, then the total county mill rate would be calculated as follows:

$$\frac{\$1,000,000}{\$50,600,000} = .01976 = 19.76 \text{ mills}$$

Special attention, however, needs to be given to mill rate calculations which deviate from the customary calculations.

$$\left(\frac{\text{Budget}}{\text{total taxable value}} \right) * 1000 = \text{mill rate}$$

a. Agricultural Mill Rate Differential:

Property taxpayers located in agricultural areas receive the benefit of a taxation rate 8.3 mills less than the mill rate applicable to non-agricultural property. This agricultural mill rate differential is effective within the maintenance fund of school districts.

b. Fire Protection Districts:

Township mill rates are influenced by the presence of special fire protection districts (Minnesota Statutes 1970, Section 368.85). Any organized town may, through a majority vote cast by the electors within the proposed district, establish a territory which will receive fire protection. A fire district consists of compact and contiguous property of which at least 25% of the total assessed value of taxable real property therein is classified as homestead property and other buildings or structures. All cost of the fire protection for this special taxing district is borne by the property taxpayers located within its boundaries. The cost of the fire district is reflected in a higher municipal mill rate for the concerned property. Property outside of the district does not contribute tax dollars towards this protection.

c. Rural-Urban Service Districts:

A factor to be considered in the calculation of city mill rates is the rural-urban service district. A rural service district and an urban service district which are adopted by ordinance constitute "separate taxing districts for the purpose of all municipal property taxes except those levied for the payment of bonds and judgments and interest thereon." (Minnesota Statutes 1971, Section 272.67) Only unplatted lands which are rural in character and which are not developed for commercial, industrial, or urban use can become rural service districts. Such land is not benefited to the same degree as other lands by municipal services financed by general taxation. An urban service district consists of all lands within the boundaries of the municipality and which are not included in the rural service district. Lesser benefits within a rural service district result in lower mill rates for taxpayers within its boundaries than for taxpayers located within the boundaries of the complementary urban service district.

6. Homestead Property Tax Relief Credit:

Effective in 1974, homestead credit is computed on 45 percent of the non-debt plus school debt taxes of owner-occupied (homestead) property to a maximum of \$325.00 per year. The reduction on agricultural homesteads is limited to the 120 acres of land contiguous to the dwelling. (Prior to 1974, homestead credit was 35% of the non-debt taxes with a maximum of \$250 and limited to 80 contiguous acres, in the case of agricultural property.) Homestead mobile homes are also eligible for the homestead credit. The amount of the homestead credit is paid by the State to the county treasurer, who then distributes it to the local taxing districts.

An additional 21% or 27% homestead credit (depending on the iron ore value in an assessment district) up to a maximum reduction of \$150 or \$190, respectively, is extended to homesteads located in certain iron range areas. This credit is paid by the State from a portion of the taconite production tax receipts.

7. Senior Citizen Property Tax Freeze:

The 1973 Legislature enacted a "freeze" on the net ad valorem property taxes at the level paid when a person reaches age 65. Property which qualifies for the credit must be owner-occupied and may be a single-family dwelling, part of a multi-family dwelling, a portion of a multi-purpose structure, or a mobile home together with one acre of surrounding land. The freeze is exclusive of any special assessments that may be made. Property taxes on qualifying property shall be frozen at the dollar amount paid in 1973 or a subsequent year when the person reaches age 65. The year in which a senior citizen's property taxes are frozen is considered his "base" year. The total taxes due on this property are paid to the county treasurer as are all other property taxes. However, the amount of increase between the "base" year tax and the current year tax shall be refunded to the senior citizen on his income tax return. Income tax returns for 1973 filed in 1974 are the first to have refund claims made for this property tax freeze.

8. Mobile Homes:

Mobile home taxation adheres to the traits of more than one type of tax. The term "hybrid" might be a way of describing its characteristics. A mobile home, or trailer house, is not taxed as a motor vehicle even though it has the ability to be easily moved. Although mobile homes are classified as Class 2A personal property, they are able to qualify for property tax relief credits in a manner similar to real property. To become eligible for homestead credit property tax relief, the mobile home must be owner-occupied just as real property must be owner-occupied to receive the credit. Homesteaded mobile homes receive the same assessment ratios as homesteaded real estate, namely, 25% of the first \$12,000 market value and 40% of the excess over \$12,000 market value.

Mobile homes are assessed every year as other personal property but the taxes on Class 2A are due in full on or before August 31 of that same year. The valuation of mobile home property is not included in the calculations which establish the mill rates used to determine taxes on other real and personal property values. The mill rate applicable to mobile home values is the non-agricultural mill rate which was established and was employed on other real and personal property in that same year.

The 1973 and 1974 valuations and resulting taxes associated with mobile homes are shown on Tables 32 and 33.

9. Tax Increment Financing:

The mechanism of tax increment financing provides a growing tax base to finance renewal or renovation projects. There are three main types of tax increment financing allowable under Minnesota law: 1) Housing and Redevelopment Authority projects, 2) Municipal Industrial Development projects, and 3) Development Districts.

Although these three types of tax increment financing have particular distinguishing characteristics, they all function on the same basis. The original value of the project area, before renewal, is used when calculating the mill rate. The tax levies are spread against the full value of the project area. Revenue obtained from the difference between the original and full values of the concerned property is distributed to the appropriate authority to finance the renewal project debt. As the value of the property increases, so will this "tax increment." The increment values and taxes are shown by county on page 37.

For example, a district had an original value of \$500,000. The full value of the property, however, increased to \$750,000. The county auditor uses only the original value of \$500,000, when determining mill rates. The difference between the two values, namely, \$250,000 is the "tax increment value." This \$250,000 value times the total local rate equals the tax increment amount which the county auditor distributes to the affected tax increment district.

10. Fiscal Disparities

The Metropolitan Development Act, more commonly known as "Fiscal Disparities", was first implemented for taxes payable in 1975. It establishes a new property tax system for the seven metropolitan counties; namely, Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington. Although the law is complex, briefly it can be summarized as follows.

Forty percent of the increase in commercial-industrial (including public utility) assessed valuation in each taxing district since 1971 is contributed to an area-wide tax base. Using the factors of population and market value of real property, a per capita distribution index is calculated. This index is employed in determining what proportion of the assessed value in the area-wide tax base shall be distributed back to each taxing district. Hence, the original assessed value less the contribution value plus the distribution value equals the taxable value.

The taxing districts budget levy divided by this taxable value equals the local mill rate. However, it is necessary to divide the levy into two parts. The local mill rate times the assessed value less contribution value is equal to the local portion of each district's property tax budget levy. Whereas, the local mill rate times the distribution value is equal to the area-wide portion. Each metropolitan county auditor certifies to the administrative auditor the area-wide portions of the levy for each district located within his county. The administrative auditor then computes an area-wide mill rate by dividing the total of the area-wide levies by the total area-wide tax base.

Generally, a calculated proportion of the assessed value of commercial-industrial properties receive the area-wide mill rate; the remaining value receives the local mill rate. The remaining property which is not commercial-industrial receives only the local mill rate.

As a result of the aforementioned law, the property tax levy of a taxing district is not the tax amount paid by the taxpayers located within the geographic boundaries of that district. The amount they paid could be more or less than what is actually needed by the district in which they live depending upon whether the area-wide mill rate was larger or smaller than the local mill rate and whether the contribution value was larger or smaller than the distribution value.

11. Payment of the Tax:

The resultant extensions of taxes due are submitted to the county treasurer for collection. Statements containing the assessor's determination of market value and the amount of tax due after homestead credit where applicable are sent to each taxpayer. Property taxes may be paid to the county treasurer in two equal installments. One-half of the personal property tax must be paid by February 28, and the other half by June 30. Payment of one-half of the real estate tax is due by May 31, with the remainder due by October 31. The tax on mobile homes is due in full on August 31.

12. Property Tax Penalties:

A. Personal Property

All unpaid personal property taxes where the amount is \$10 or less shall be deemed delinquent on March 1 in the year they become due, and thereupon a penalty of eight percent shall attach and be charged upon all such taxes. When the amount of such tax exceeds the sum of \$10 the first half shall become delinquent if not paid prior to March 1 and thereupon a penalty of eight percent shall attach on such unpaid first half. The second half of a tax in excess of \$10 shall become delinquent if not paid prior to July 1 and thereupon a penalty of eight percent shall attach on such unpaid second half. This section shall not apply to class 2a mobile home property.

B. Real Estate

On June first, of each year, with respect to property actually occupied and used as a homestead by the owner of the property, a penalty of three percent shall accrue and thereafter be charged upon all unpaid current real estate taxes, and a penalty of seven percent on non-homestead property. Thereafter, for both homestead and non-homestead property, on the first day of each month, up to and including November first following, an additional penalty of one percent for each month shall accrue and be charged on all such unpaid taxes. When the taxes against any tract or lot exceed \$10, one-half thereof may be paid prior to June first; and, if so paid, no penalty shall attach: the remaining one-half shall

be paid at any time prior to November first following, without penalty; but, if not so paid, then a penalty of eight percent shall accrue thereon for homestead property and a penalty of twelve percent on non-homestead property.

If the real estate taxes have not been paid by the first Monday in the following January, an additional 2 percent is charged on the delinquent amount; thereby increasing the total percentage rate of the penalty to 10 percent for homestead property and 14 percent for non-homestead property.

C. Mobile Home

All unpaid taxes on mobile homes shall be deemed delinquent on September 1 in the year of assessment and thereupon a penalty of eight percent shall be imposed.

1976					101.44	

*The statewide average rate of taxation is based on taxes exclusive of special assessments.

**Beginning with taxes payable in 1970 and ending with taxes payable in 1972, the column headings were revised. The revised individual real estate columns are not comparable with the previous years; however, the remaining columns may be compared. A misinterpretation of the definitions of homestead and non-homestead real estate has created discrepancies in the second and third columns of this table. Homestead property values in excess of the amount eligible for homestead credit, in the past, have been incorrectly considered as non-homestead. Therefore, the column headed "Taxable Value of Non-Homestead Real Estate" actually contains values that should be in the column entitled "Taxable Value of Homestead Real Estate Including Excess over \$4,000." Increased educational and instructional programs are currently correcting this reporting error.

***Taxes payable in 1973 were the first levies to come under the market value concept. Due to this change, the real estate column headings were again revised. For further explanation of this concept change, see Section I, Review of the Minnesota Property Tax System, Part A, Values, page 4.

*Prior to payable year 1974, no specific provisions were made for reporting special taxing districts' (specifically watersheds) special assessments. Hence, any special taxing district's special assessments were shown on this table as county special assessments. Effective with payable 1974, a separate column was provided for reporting special taxing districts' special assessments. However, for comparison purposes, the payable 1974 and 1975 amounts of \$90,127 and \$87,195, respectively, were included in the county special assessments column of this table.

**School districts do not have special assessments. However, the entries in this table are basically old school district debts that were treated as special assessments during that year in which the taxes were due. Because of their treatment, these taxes were not included in calculating the average county mill rate, the statewide average mill rate, nor were they given homestead credit for the years in which homestead credit was paid.

TABLE 7

POWER COMPANY LEVIES

PAYABLE YEARS 1960 - 1975

Payable Year	POWER LINES	
	<u>Transmission</u>	<u>Distribution</u>
1960	\$2,036,565.55	\$ 57,567.35

* Source: 1974 Abstract of Assessment of Real and Personal Property. Certain property (namely, property on state leased land) is assessed and entered on the assessment books as real estate due to its long term lease. However, when the county auditor spreads taxes it is deemed to be personal property due to legal implications. Therefore, the real estate value is overstated on this table and the personal property understated as compared on Table 28.

Explanation of Categorical Division of County,
City/Township, School District, And
Special Taxing District Levies By Major Purpose

To obtain uniform reporting from the 87 counties and to comply with the physical limitations of the Abstract of Tax Lists, the numerous authorized levies are divided by major purpose of the levy. The county auditors are provided with instructions which detail the individual levies to be included in each category (column) on the abstract. Some are self-explanatory, whereas, others include a wide variety of levies.

The following list is not a complete digest of all the levies. It is merely a general index to the nature of each category as found on the abstract. Tables 18 through 22 are patterned after the design of the abstract column headings.

COUNTY LEVIES

Column Heading	Items Included Within Column Heading
General Revenue Levy.....	General revenue
Indebtedness Levy.....	General obligation, State loans, debt portion of other levies
Road and Bridge Levy.....	Road and bridge, repair, and maintenance
Welfare Levy.....	Old age assistance, aid to dependent children, aid to blind and disabled persons, medical assistance, administration expense
County Building Levy.....	County or regional jail construction, other county buildings
County and/or Regional Library Levy.....	County library, contracts for library service
Public Employees Retirement Levy.....	Public employees' retirement and social security funds, employees on leave from the State
Health Services Levy.....	Ambulance service, health department and county controlled hospital districts, mental health services, nursing homes, and cattle testing
Community Development Levy.....	Agricultural societies and extension committees, civil defense, fire protection, correction centers, probation services, sheltered work- shops, senior citizen recreation programs, insect and weed control, solid waste programs, parks and monuments, voting machines
Miscellaneous Levy.....	Public examiner's post-audit expense state reassessment costs, judgments
County Special Assessments.....	See (*) after city/township levies

CITY/TOWNSHIP LEVIES

<u>Column Heading</u>	<u>Items Included Within Column Heading</u>
General Revenue Levy.....	Regular and general fund purposes
Indebtedness Levy.....	General obligations, State loans, indebtedness of dissolved villages, hospitals, parking facilities, water, and sewer bonds, and all other debt within any fund
Road and Bridge Levy.....	Road work, road drainage, bridge repairs
Firemen's Relief Levy.....	Relief for paid and volunteer firemen, police relief
Public Employees Retirement Levy.....	Public employees' retirement and social security funds
Community Services and Protection Levy.....	Airports, ambulance and health services, civil defense, aquatic vegetation, water pollution, and insect control, fire and police protection, community correction and activity centers, dump grounds and sewage disposal, commemorative purposes, parks, recreation, musical entertainment, library, cemetery, voting machines
Miscellaneous Levy.....	Advertising, charter commission expense, planning commission, deficiency levy, judgments, public examiner's post-audit expense, public works reserve, special assessment improvements to public property
City/Township Special Assessments.....	See (*) below

* Property taxes categorized as special assessments are not determined through the use of a mill rate as are ad valorem property tax levies. Instead, the dollar amount of a special assessment is paid by the property owner who benefits from the improvement regardless of the cash value of the owner's property. Examples of special assessments are ditches, curbs, gutters, and storm sewers. If public property is improved by a special assessment, however, such as a courthouse sidewalk, every property owner pays a portion of its costs. The improvement is financed through proper funds within the county or municipality's total ad valorem levy.

SCHOOL DISTRICT LEVIES

Each of the following categories relate directly to a levy and/or group of levies reported on Form 278R entitled "School District Levy Limitation Certificate of Compliance, Levy Year 1973, Taxes Payable 1974."

<u>Column Heading</u>	<u>Items Included Within Column Heading</u>
Maintenance Levy.....	Operation and maintenance of the school, including salaries, fuel, rent, food services, books
Operating Non-Bonded Debt Levy.....	An additional maintenance levy for maintenance purposes for districts in financial need.
Transportation Levy.....	Transportation costs, for example, bus service
Community Service Levy.....	Community oriented activities, not limited to any age group
Vocational School.....	All vocational school costs except debt levies
Capital Outlay Levy.....	Building construction, additions, repairs, desks and other equipment
Referendum Levy.....	Amount levied which is approved by voter referendum, for maintenance purposes
Debt Levy.....	Building and operating debt, State loans, vocational school debt
Unemployment Insurance.....	Unemployment insurance costs; for example, unemployment insurance compensation

Intermediate Area Vocational Technical Schools:

- #287 - Suburban Hennepin
- #916 - Ramsey-Washington
- #917 - Dakota

Maintenance Levy.....Operation and maintenance of the vocational school

Debt Levy.....Building and operating debt

SPECIAL TAXING DISTRICTS LEVIES

Although special taxing districts exist with great variance among the counties, general categories are established in this section of the abstract. If special taxing districts exist in a county, the levies are entered separately for revenue and debt. There are ten main categories of special taxing districts as described in Tax Levy Authorizations and Limitations for Cities, Villages, Towns, School Districts, Other Districts and Counties in Minnesota, 1973, as prepared and published by the State Auditor.

- | | |
|--------------------------------------|---|
| 1. Hospital District | 7. Metropolitan Council |
| 2. Watershed District | 8. Metropolitan Transit Commission
(Seven county metro. & St. Cloud) |
| 3. Sanitary Sewer District | 9. Park District |
| 4. Housing & Redevelopment Authority | 10. Port Authority |
| 5. Regional Development | |
| 6. Metropolitan Airport Commission | |

For purposes of the Abstract of Tax Lists, mosquito control districts and tax increment financing districts are also considered to be special taxing districts.

* The tax on the property of electric, light and power companies is divided into two categories. Transmission lines are assessed at 43% of market value and are taxed at the average county mill rate for all purposes. The average county mill rates listed on this table may differ from the rates on Table 16, "Real and Personal Property Taxes Levied by County by Taxing District." Because transmission lines are deemed to be personal property, the first one-half payment is due on February 28. To meet this early payment date, the average county mill rate is sometimes estimated before the tax books are completed. When the final average county mill rate is known, it usually differs only by less than one-half mill.

Distribution lines are assessed at 5% of market value and are taxed at the previous year's statewide average mill rate for all purposes. The statewide rate for taxes payable in 1974 was 99.15 mills.

** Due to rounding of the mill rates, the assessed values times the mill rates as listed may not exactly equal the taxes. However, the taxes listed in this table are the actual levies made.

TABLE 28

ASSESSED VALUES, MILL RATES, TOTAL TAXES LEVIED, HOMESTEAD CREDIT DATA

			\$1,034,143,530	\$11,377,454,398**	9.09	\$32,855,768,434	77.8	\$42,205,222,942	2.45

*A Tax of \$5,648,451 and an Assessed Value of \$45,172,553 and a Market Value of \$93,438,975 for minerals has been excluded.

**The source document for the assessed values by school district is the School Tax Report submitted to the Department of Education. Whereas, the statewide total as shown is from the 1974 Abstract of Assessment of Real and Personal Property submitted to the Department of Revenue. Due to the timing of when the reports were submitted, a \$404,457 discrepancy exists.

(1) Effective tax rate is the net tax payable divided by the assessed value.

(2) Effective tax rate is the net tax payable divided by the indicated market value.
