INTRODUCTION

This publication is a complement to the 1977 Minnesota General and Hospital and Nursing Home Salary Survey ^{1/}. Included within the scope of the original survey were 1,971 private firms, 190 public school districts, 210 governmental units, 142 hospitals, and 139 nursing homes.

As in the original report, all wage rates are monthly and are based on a 40 hour work week. The range between the first quartile and the third quartile represents rates paid to the middle 50 percent of all workers in the job reported. The first quartile is the rate below which one-fourth of the reported cases occur. The median is the rate below which one-half of the reported cases fall. The third quartile is the rate below which three-fourths of the reported cases occur. By reporting the range between the first quartile and third quartile, extreme rates are avoided.

The survey results are presented in two sections:

- A. Wage Data by County and Occupation.
- B. Wage Data by Occupation and County.

Only those occupations in which more than 20 employees were reported by two or more employers for individual counties are included. Salaries in the cities of Minneapolis, St. Paul and Duluth are listed separately and are not included in their appropriate county.

It also should be noted that some counties will show more workers than actually work in that particular county. This occurs because some firms which have several plant locations prefer to complete only one questionnaire, lumping together all their workers without differentiating their geographic location. The completed questionnaire is then area coded according to the largest plant or office. This occurs most often with large firms in the Metropolitan Area, whose workers are listed under the city of Minneapolis but may or may not be working in the city.

Job descriptions are listed in the Appendix and were included on the questionnaire to insure a mutual understanding of the nature of the jobs surveyed. Besides this publication, publications are also available showing wage data arranged by Areas, by Industry and Size of Firm, and for Hospitals and Nursing Homes. Any or all of the survey publications may be obtained without charge by writing to the Research and Planning Branch, Minnesota Department of Employment Services, 390 North Robert Street, St. Paul, Minnesota 55101.

^{1/} These were published in July and are available on request.
