Guide to the Herpetofauna of Southeast Minnesota

Region 5

This preliminary guide has been prepared as a reference to the occurrence and distribution of reptiles and amphibians of Region 5 in Southeast Minnesota. Taxonomy and identification are based on "A Field Guide to Reptiles and Amphibians" by Roger Conant (Second Edition, 1975). Figure 1 is a map of the region.

Counties Included: Dodge, Fillmore, Freeborn, Goodhue, Houston, Mower, Olmsted, Rice, Steele, Wabasha, and Winona.

SPECIES LIST

Turtles

- Common snapping turtle
- *Wood turtle
- *False map turtle
- Map turtle
- Western painted turtle
- *Blanding's turtle
- Smooth softshell
- *Eastern spiny softshell

Lizards

- Northern prairie skink
- *Six-lined racerunner

Snakes

- Red-bellied snake
- Texas brown (DeKay's) snake
- Northern water snake
- Eastern plains garter snake
- Red-sided garter snake } s.s.
- Eastern garter snake }
- Plains western hognose snake
- Eastern hognose snake
- *Prairie ringneck snake
- *Blue racer
- *Western smooth green snake
- Bullsnake
- Western fox snake
- *Black rat snake
- Eastern milk snake
- *Eastern massasauga
- *Timber rattlesnake

Salamanders

- Eastern tiger salamander
- *Four-toed salamander (?)
- Mudpuppy (?)
- *Central (Common) newt (?)

Toads

- American toad

Frogs

- Northern spring peeper
- Gray (common) treefrog
- *Blanchard's cricket frog
- Western chorus frog
- *Pickereel frog
- Northern leopard frog
- Green frog
- Wood frog
- *Bullfrog

s.s. - single species

(?) - hypothetical species - reports needed

* - special interest species - reports needed

Summary

A total of 37 species have been recorded in Region 5. Two subspecies of the common garter snake are present.

Species of special interest in this region include the wood turtle, false map turtle, Blanding's turtle, Eastern spiny softshell, six-lined racerunner, four-toed salamander (if present), central newt, prairie ringneck snake, blue racer, western smooth green snake, black rat snake, eastern massasauga, timber rattlesnake, Blanchard's cricket frog, pickerel frog, and bullfrog.

Any sightings of these species should be documented and sent to the nongame supervisor.

County records for this region are given on the following pages. If you encounter any new county records, the specimen should be captured and either photographed from several angles or preserved in isopropyl alcohol. Record the collector's name and address, date, county, township, range, section number (or distance and direction from nearest town), and the habitat in which the animal was found. The nongame supervisor should be contacted concerning disposition of specimens.

Unless otherwise specified, all county records on the following pages are derived from Reptiles and Amphibians of Minnesota by Walter J. Breckenridge.

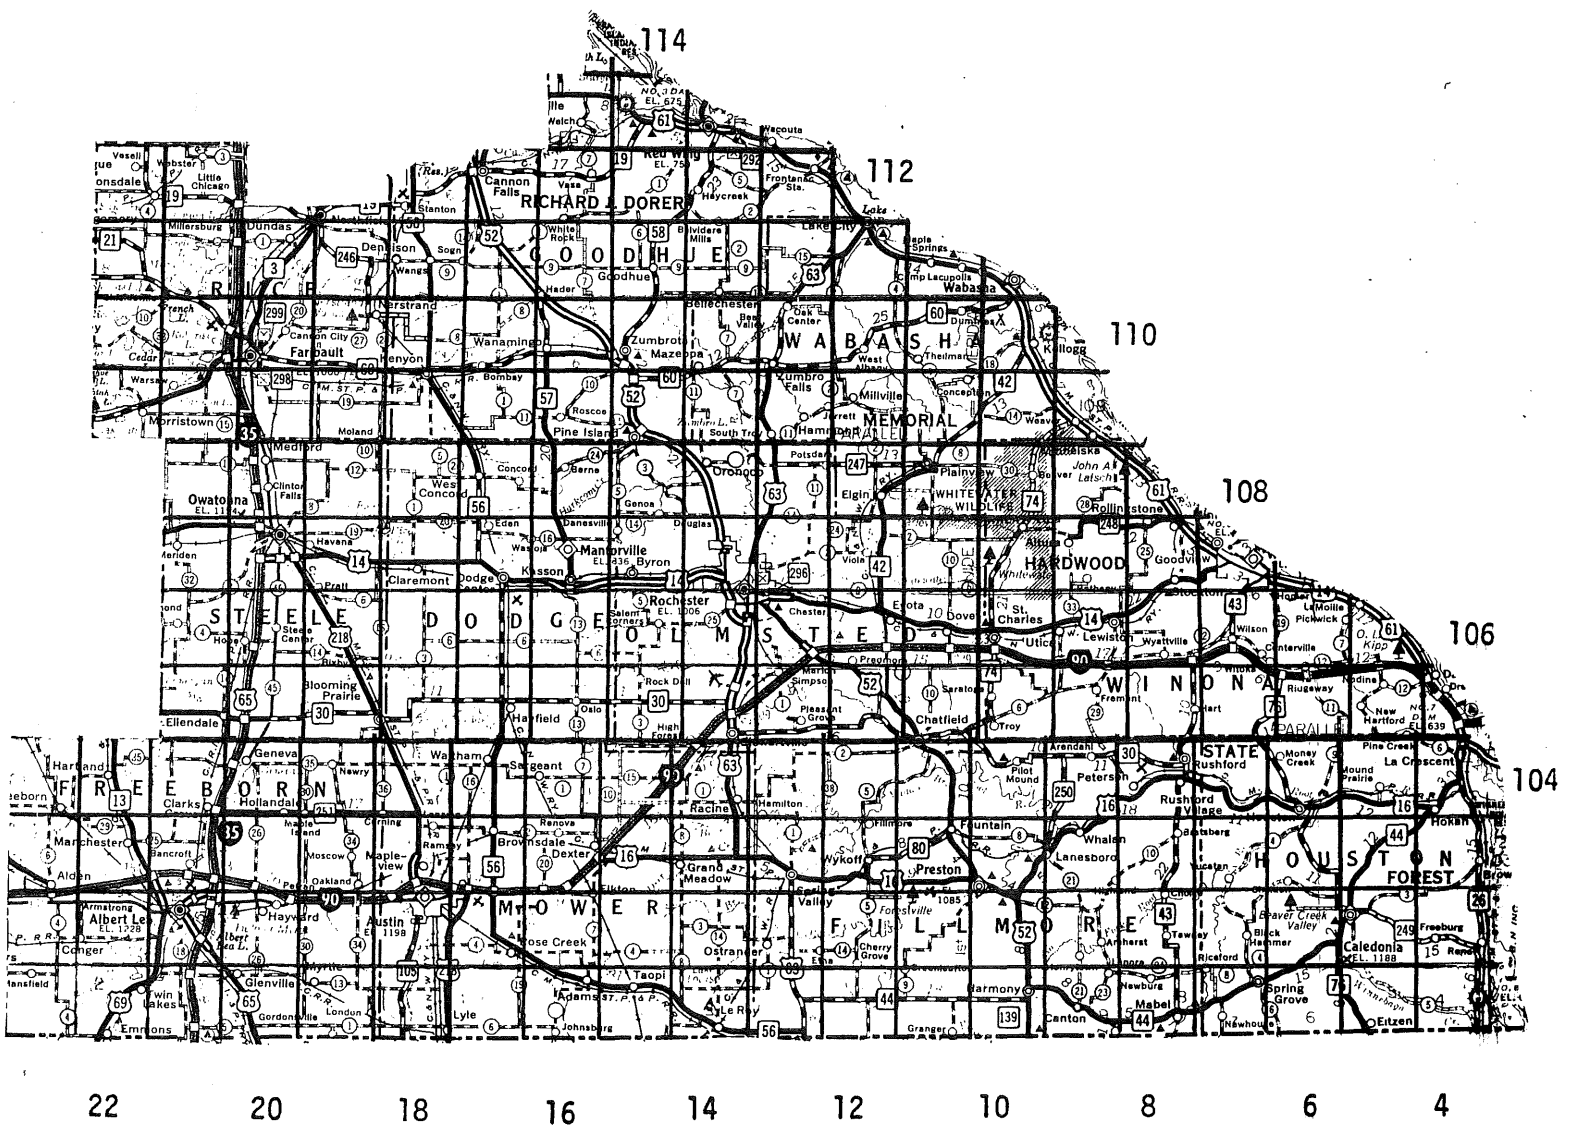

Figure 1. Map of Region 5. Township numbers are shown in the right margin and range numbers are shown at the bottom margin.
