DEFINITIONS

This report is a statistical supplement to VOCATIONAL EDUCATION: PROGRAM & STAFF, the first in a series of reports evaluating sex equity in the Minnesota vocational education system. Like the original report, this supplement was prepared and published by the Council on the Economic Status of Women under contract with the Minnesota Board of Education.

The purpose of this supplement is to provide more detailed information on programs within each Area Vocational-Technical Institute. Statewide totals and averages were presented in the original report, and the following information is presented here for each AVTI:

- OE CODE. The occupational code for each program offered.
- PROGRAM. The name of each instructional program offered. If neither students nor budgets were reported for 1977-78, the program has been omitted.
- 1977-78 HEADCOUNT, by sex of student, and percent of students in the program who are female. The annual headcount includes every student enrolled in a program during the year, and does not control for the amount of time a student is enrolled.
- TYPE OF COURSE. Programs are considered "segregated" if over 80 percent of their enrollments are of one sex. Segregated programs which are composed of more than 80 percent male students are defined as "male" programs, and those with more than 80 percent female students are defined as "female" programs. All other programs are considered "integrated."

- NET BUDGET, by sex of students. The budget data refer to expenditures for an instructional program which include all salaries, fringes, supplies and materials, purchased services, and other expenses connected with the program, but does not include general administration and general support services in that AVTI. Program revenues have been subtracted. A "male" budget is calculated by apportioning the net budget for a program in the same ratio as there are male students. For example, a net budget of \$100,000 in a program with 75 percent male enrollments would have a male budget of \$75,000. A "female" budget is calculated in the same way. The female budget in this example would be \$25,000.

- ADM/LICNSTAF, the student/staff ratio for each program, is based on average daily membership for students and full-time equivalents for licensed staff.

All information presented here is from the Vocational Program Budget / Financial Report of the Office of Program Planning and Development, Division of Vocational-Technical Education, Minnesota Department of Education. Data are for the period July 1, 1977 to June 30, 1978.
