GENERAL STATEMENT

This report contains a series of tables showing CETA program activities for the first half of fiscal year 1980. There are three tables for each CETA program - program expenditures, performance of CETA services, and characteristics of the clients served by the ten (10) prime sponsors.

All data in this report was derived from copies of the Department of Labor (DOL) reports submitted by CETA prime sponsors for the period of October 1, 1979 through March 31, 1980. Data is reported on a cumulative basis.

Some of the characteristics of CETA participants represent a combination of items reported on the DOL form, "Quarterly Summary of Participant Characteristics".

There are a few caveats for those reading this report. First, all data is cumulative, unless otherwise specified. Second, caution should be exercised in drawing specific conclusions based on information in this report. Additional demographic labor market, and program design information should be considered in evaluating the effectiveness of all or any part of the program. Specific concerns and questions should be directed to the individual CETA prime sponsor (see Appendix A).

MINNESOTA SUMMARY

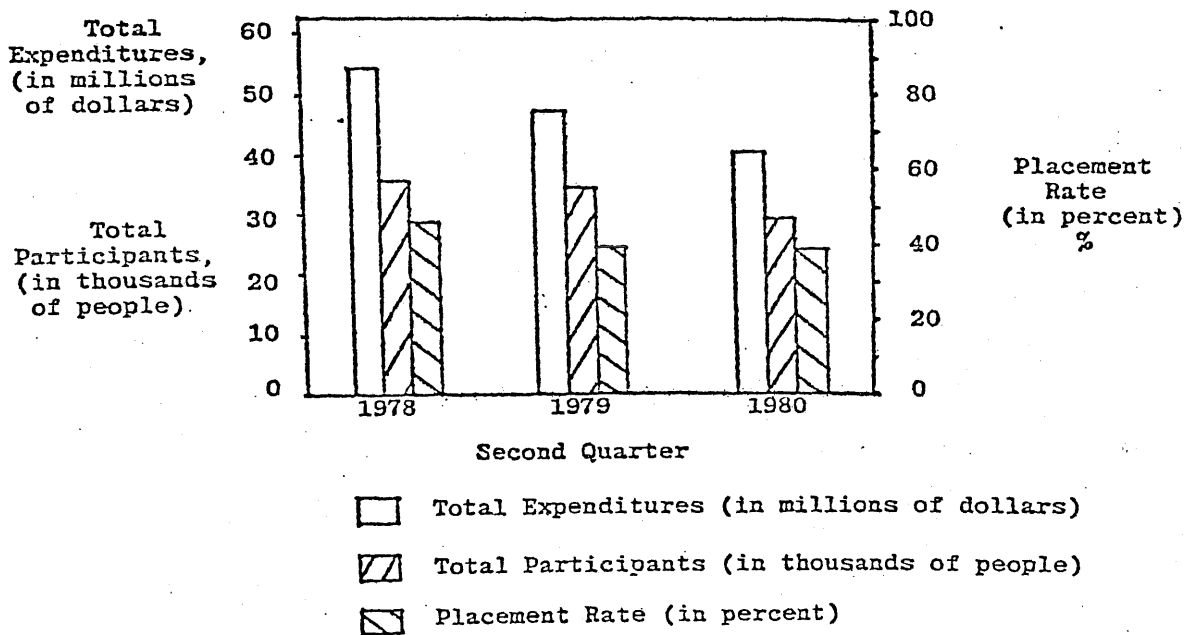

General

For the first half of Fiscal Year (FY) 1980, services were provided to 29,213 total participants¹ in Minnesota. Of these participants, 15,008 were carried over from the previous fiscal year, 1979. Total expenditures for all CETA programs for these two quarters were \$40,899,496. This is an average of \$1,400 per participant served.

Fewer Minnesotans used CETA services in the first half of FY'80 than in the same period of previous two fiscal years. This is shown in Chart #1 below. The 29,213 total participants in FY'80 were down by 17.2 percent from FY'78 and 16.3 percent from FY'79. The reasons for the decline in total participants are twofold--the eligibility criteria for public service employment were tightened and less money was available in FY'80.

CHART 1

Total Expenditures, Total Participants, and Placement Rate During the First Half of FY' 1978, 1979, and 1980

¹The total participant figure overstates the actual number of people in all programs. CETA clients can transfer from one program to another within the same prime sponsor. Therefore, some individuals are counted two or more times as participants. In order to arrive at a more "unique" count of individuals in CETA, the number of transfers from other subparts (2,390), a category of total participants, is subtracted out. Hence, an estimated 26,823 (29,213 - 2,390) individuals received CETA services in the State.

With fewer people using CETA services in FY 1980, less money was spent on services in the State. Total expenditures for all prime sponsors decreased by 25.4 percent and by 13.7 percent the second quarter of FY 1980 from the same quarters in FY 1978 and FY 1979, respectively.

Chart #2 shows the changes in individual programs for the first two quarters of FY'79 and FY'80. Note the drop in participants and expenditures for Title VI in FY'80 where most public service employment occurs.

CHART 2

Participants and Expenditures by Title

	FY 1979 (First Six Months)				FY 1980 (First Six Months)			
	Participants	Percent	Expenditures	Percent	Participants	Percent	Expenditures	Percent

Title VII					Title VII	216	\$ 241,993	0.6
TOTAL	34,909		\$47,399,841		TOTAL	29,213	\$40,899,496	

FY 1980 Allocations

Prime sponsors not only spent less on programs, but also had less available money from which to spend. The FY 1980 allocation for the State was \$73.9 million. This was 34.6 percent lower than the allocation in FY 1979. Reduction in funds for Title II-D and Title VI programs were responsible for the large cut in revenues. These two programs fund public service employment projects and are especially sensitive to the rate of unemployment in the State.

At the time when 1980 allocations were first decided, the State's unemployment rate was relatively low in comparison with that of the nation. The base period for determining 1980 allocations was February 1978 to February 1979. Unemployment in Minnesota ranged from 2.9 percent to 4.8 percent in this period. In comparison, the rate for the nation fluctuated between 5.7 percent and 6.2 percent unemployment.

Minnesota's unemployment rate was low when FY 1980 appropriations were made. Therefore, less money was allocated. However, in the period of October 1979 through March 1980, more people, increasingly, became unemployed. The rate of unemployment grew from a low of 3.6 percent in October 1979 to a high of 6.1 percent in March 1980.

Minnesota - U. S. Comparison

In most programs, Minnesota CETA participants tended to be more educated than their national counterparts in the first half of FY 1980 (see pages 4-5). Also, the handicapped appear to be more representative in most programs in the State than those for the nation. Furthermore, Titles II-B,C; II-D; and VI in Minnesota had a higher rate of placement than those programs nationwide.

²Title I did not exist in the first half of FY 1979. Instead, total expenditures for each CETA Title included its respective administrative costs. However, we subtracted out these costs and transferred them to Title I in order to compare them with FY 80 expenditures.

PROGRAM INTRODUCTION

The following report shows the activities of each CETA prime sponsor over the first half of fiscal year 1980. There are four tables for each program: program status, financial activity, financial status, and characteristics of participants.

Tables 1 through 4 contain summaries of cumulative State totals for the ten (10) CETA prime sponsors only (Minnesota Migrant Council, Native American Prime Sponsors, and Special Grants are not included in this report). These tables show the statewide level of CETA services and expenditures for the first half of the FY'80 program. All data exhibited in these tables compare the number of participants enrolled in statewide programs and indicate the expenditures of all titles combined. The components of all programs are shown in percentages. The components in the Quarterly Summary of Participant Characteristics table do not add across or down because a participant can be enrolled in more than one table.

Table 5 displays the administrative cost pool under Title I. The staff salaries and other administrative expenses of all programs are consolidated into one statement for each prime sponsor.

Title II-B,C program data are contained in Tables 6 through 9. Title II-B,C programs are used for a variety of employment and training programs or services. These services include recruitment, orientation, counseling, testing, placement, classroom instruction, institution and on-the-job training in the private sector, allowances for persons in training and supportive services.

Tables 10 through 13 detail individual prime sponsor's enrollment and expenditures for their Title II-D programs. Title II-D provides for transitional public service employment programs in areas with an unemployment rate of 6.5 percent or higher for three (3) consecutive months. These programs may be used to create jobs in state, county, or city governmental agencies or with non-profit organizations.

Tables 14 through 25 reflect Title III programs conducted by prime sponsors to serve special target groups. These programs include the Skills Training Improvement Program (STIP), both basic and upgrade, and Help Through Industry Retraining and Employment (HIRE), which are funded under the Special National Programs.

Title IV Youth Programs are found in Tables 26 through 37. The Title IV programs consist of the Youth Employment and Training Programs (YETP), both regular and exemplary, and Youth Community Conservation Improvement Programs, funded under the Youth Employment Demonstration Projects Act. The Summer Youth Employment Programs (SYEP), another Title IV program, is not included in this report in view of its seasonal nature.

Tables 38 through 41 are the participants and expenditures for Title VI. Similar to Title II-D, it is locally administered and provides for emergency public employment programs in areas of high unemployment. The primary differences between Title II-D and Title VI are that some jobs under Title VI are in projects which last for only one year and do not require an employing agency to provide permanent unsubsidized employment.

The Title VII program is shown in Tables 42 through 45. Title VII is the Private Sector Initiative Program for the economically disadvantaged.

APPENDIX B

SECTION I

The new law focuses CETA resources more sharply on those most in need, increases emphasis on training and private sector involvement, and strengthens prevention of fraud and abuse. Following is a brief summary of CETA as reauthorized.

Title I, Administrative Provisions -- Organizational and general provisions applicable to the entire act, including the eligibility criteria for state and local prime sponsors, the planning and approval process, and the authorization of appropriations for fiscal years 1979 through 1982.

Title II, Comprehensive Employment and Training Services -- Comprehensive work and training activities contained previously in Title I: institutional, on-the-job training, work experience, job search assistance, and supportive services. Except for the new upgrading and retraining components, prime sponsors' work and training programs must now be limited to economically disadvantaged persons who are unemployed, underemployed, or in school. This Title also contains a separate counterstructural public service employment program, with new jobholders limited to those unemployed 15 or more weeks or on welfare and who have family income at or below 70 percent of the BLS lower living standard budget. PSE participants may remain in jobs no more than 78 weeks (up to 12 months waiver for areas with 7 percent or higher unemployment) in any five-year period.

Title III, Special National Programs and Activities -- Special target group programs are administered from national office for Indians and other Native Americans, migrant and seasonal farmworkers, ex-offenders, older workers, displaced homemakers, women, and handicapped. Welfare reform demonstration projects are included. Continues programs or research and development, technical assistance, and labor market information.

Title IV, Youth Programs -- Continues the Job Corps, the summer youth employment and Demonstration Projects Act of 1977. The new programs are authorized only through Fiscal Year 1980 because of demonstration aspects.

Title V, National Commission for Employment Policy -- Continues the national commissioner with a change in name and membership, reducing Cabinet participation.

Title VI Public Service Employment Program -- Provides for a countercyclical PSE program and authorized funding of jobs sufficient to employ 20 percent of the number of unemployed in excess of 4 percent; when national unemployment rate reaches 7 percent, jobs are authorized for 25 percent of the number in excess of 4 percent. New PSE jobholders must be unemployed for 10 of last 12 weeks, have family income at or below the BLS lower living standard budget, and are subject to the same participation limits as in Title II PSE.

Title VII Private Sector Initiative Program (PSIP) -- This program is supplementary to Title II programs. It develops greater involvement of the private sector and establishes Private Industry Councils (PIC's) with representatives from industry, business, organized labor, community-based organizations, and educational institutions. These groups will participate with prime sponsors in the development of on-the-job training arrangements and other initiatives.

Title VIII, Youth Adult Conservation Corps -- Continues through fiscal year 1982 without substantial change. The year-round corps is open to both disadvantaged and nondisadvantaged youth, 16 to 23 years of age for conservation work in national parks and forests.

SECTION II

- A) Title II - Parts A,B,C: 85% of the available funds are allocated as follows:

50% - Based on the FY'78 Title I allocations;
37.5% - Based on relative number of unemployed in the prime sponsor jurisdiction as compared to the nation;
12.5% - Based on the relative number of adults living below low-income level in the prime sponsor jurisdiction as compared to the nation.

- B) Title II - Part D: 85% of the available funds are allocated as follows:

25% - Based on the relative number of unemployed persons in the prime sponsor jurisdiction compared to the total number of unemployed in the nation;

25% - Based on the relative excess number of unemployed persons (number over 4.5%) in the prime sponsor jurisdiction compared to the total such unemployed in the nation;

25% - Based on the number of unemployed persons living in areas of substantial unemployment (number over 6.5%) in the prime sponsor jurisdiction compared to the number of unemployed persons in such areas in the nation;

25% - Based on the relative number of low-income adults in the prime sponsor jurisdiction compared with the total of the low income adults in the nation.

- C) Title IV - Youth Community Conservation and Improvement Projects (YCCIP):

75% of available funds is allocated among prime sponsor jurisdictions on the basis of the relative number of unemployed persons in each prime sponsor jurisdiction as compared to the nation.

- D) Title IV - Youth Employment and Training Program (YETP):

75% of available funds is allocated to prime sponsors as follows:

37.5% - Based on the relative number of unemployed persons in each prime sponsor jurisdiction compared to the total number of unemployed in the nation;

37.5% - Based on the relative number of unemployed living in areas of substantial unemployment in each prime sponsor jurisdiction compared to the total of such persons in the nation;

25.0% - Based on the relative number of persons living below low-income level in each prime sponsor jurisdiction compared to the number in the nation.

E) Title VI: - 85% of the available funds are allocated as follows:

50% - Based on the relative number of unemployed persons in the prime sponsor jurisdiction compared to the total number of unemployed in the nation;

25% - Based on the number of unemployed persons living in areas of substantial unemployment (number of 6.5%) in the prime sponsor jurisdiction compared to the number of unemployed persons in such areas in the nation;

25% - Based on the relative excess number of unemployed persons (number over 4.5%) in the prime sponsor jurisdiction compared to the total such unemployed in the nation.

F) Title VII: 95% of the available funds are allocated as follows:

50% - Based on the FY'78 Title I allocations;

37.5% - Based on relative number of unemployed in the prime sponsor jurisdiction as compared to the nation;

12.5% - Based on the relative number of adults living below low-income level in the prime sponsor jurisdiction as compared to the nation.
