1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

C.S.A.H. Mileage, Needs and Apportionment - 1958 Through 1982

The information listed below is presented as historical data for the 24 years of County State Aid Apportionments and preliminary data for the 25th year.

Since 1958, the first year of State Aid Apportionment, County State Aid mileage has increased more than 1,000 miles of which over 740 miles can be attributed to the turnback law which was enacted in 1965. Needs have increased since 1958 substantially due to revised design standards, increasing traffic, and ever rising construction costs.

For comparison purposes the apportionment for 1982 has been estimated to be the same as the 1981 apportionment figure. This is purposely done to alleviate any misconceptions which could arise from an overestimate and also to show the apportionment effects of the various needs revisions. The actual apportionment which will be made by the Commissioner in January will reflect any increase in income to the County State Aid Highway Fund.

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

Comparison of the Basic 1980 to the Basic 1981 25-Year C.S.A.H. Construction Needs

The following tabulation indicates the three phases of the 1981 C.S.A.H. needs study update that have been completed and shows the needs effect each phase produced.

Normal Update

- Reflects the needs change due to 1980 construction, system revisions and any other necessary corrections. Under normal conditions, this phase should show a decrease in needs, however, instances do arise where the needs remain the same or actually increase.

1980 Unit Prices

- Shows the needs impact of the unit prices approved at the June 25-26, 1981 meeting. This includes the revisions in the needs costs on some railroad crossings and on all minor drainage structures.

Traffic Update and  
Traffic Factor Update

- Indicates the needs change from the use of the new traffic counts in the 12 counties which were counted in 1980. These figures also reflect the needs change resulting from the use of the new 20-year traffic projection factors computed using the new traffic counts. A map showing the new factors is included in the "Reference Material" section.

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

Restriction of 25-Year Construction Needs Increases

In order to temper any large needs increases, the County Screening Committee adopted the resolution below:

That, for the 1976 C.S.A.H. Apportionment, the increase in basic 25-year C.S.A.H. construction needs of any one county, from the 1974 to the 1975 C.S.A.H. needs studies, shall be restricted to 20 percentage points greater than the statewide average percent increase from the 1974 to the 1975 basic 25-year C.S.A.H. construction needs. For future years' apportionments, the C.S.A.H. needs change in any one county from the previous year's restricted C.S.A.H. needs to the current year's basic 25-year C.S.A.H. construction needs shall be restricted to 20 percentage points greater than the statewide average percent change from the previous year's restricted C.S.A.H. needs to the current year's basic 25-year C.S.A.H. construction needs.

This year the statewide needs increased 18.7%, thereby limiting any individual county's needs increase to 38.7%. The following tabulation indicates the method of computing the restrictions necessary for 1981.

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

FAS Fund Balance Deductions

The following resolution was adopted by the County Screening Committee in 1973 and revised in June, 1980.

That in the event any county's FAS fund balance exceeds either an amount which equals a total of the last five years of their FAS allotments or \$350,000; whichever is greater, the excess over the aforementioned amount shall be deducted from the 25-year County State Aid Highway construction needs in their regular account. This deduction will be based on the FAS fund balance as of June 30 of each year. The needs adjustment resulting from this resolution may be waived if extenuating circumstances are justified to the satisfaction of the State Aid Director and the Screening Committee.

In conforming with this resolution, the following data is presented for the Screening Committee's information.

<u>County</u>	<u>FAS Fund Balance as of June 30, 1981</u>	<u>Maximum Balance</u>	<u>Tentative Deduction From the 1981 25-Year C.S.A.H. Construction Needs</u>
Cook	\$ 566,027	\$397,592	\$ 168,435
Hennepin	1,741,293	515,260	1,226,033
Ramsey	357,048	350,000	7,048
Wright	872,609	743,340	129,269

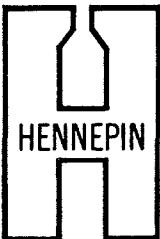

A letter of justification has been received from Hennepin County and follows this write-up. We have not received any written justification from Cook, Ramsey or Wright Counties.

The Screening Committee must review this data and determine which counties, if any, are to receive a deduction in their 1981 25-year C.S.A.H. construction needs.

August 12, 1981

CSAH Screening Committee  
c/o Gordon M. Fay, Director  
Office of State Aid  
Minnesota Department of Transportation  
420 Transportation Building  
St. Paul, Minnesota 55155

Gentlemen:

Re: Excess Federal Aid Secondary (FAS) Account Balance

One year ago, I reported in a letter to the Screening Committee our anticipation of awarding a contract in 1981 for a project on Hennepin County State Aid Highway 144. As it was then designed, the contract award would have reduced our FAS balance to within the Screening Committee's limit.

Late last fall, however, we were denied final approval on that project by the two municipalities involved. Local residents want the road upgraded but object to some federal standards, particularly the 30 foot clear zones, which would require the taking of additional right of way including some buildings.

Since that time, the department has scaled down the project and is resubmitting it as a federal RRR project. We feel the project as redesigned will be acceptable to the two municipalities since it no longer requires a 30 foot clear zone on each side of the roadway. The department submitted a revised final Location and Design Study Report to Mn/DOT on July 22 and we now anticipate a letting in the spring of 1982.

In addition, the department has been advancing plans through federal procedures for a project on CSAH 110 in western Hennepin County. A combined Project Development Report/Environmental Assessment was submitted to Mn/DOT for this project on July 31, 1981, and the department anticipates that the project will be let for contract in 1982.

We estimate the federal share on these projects to be sufficient to bring our federal aid secondary balance within the Screening Committee's limit. Consequently, we request the Committee to waive the penalty to Hennepin County for excess FAS funds for the 1982 CSAH apportionment.

Sincerely,

A. J. Lee, P.E.  
Associate County Administrator  
and County Engineer

HENNEPIN COUNTY

an equal opportunity employer

NOTES & COMMENTS

Rural Design Grading Cost Adjustments

The following explanation is to reacquaint you with how we arrive at the rural design grading cost adjustments.

If, in the six years from 1975 through 1980, a county has constructed 30 percent or more of its rural design grading, then 100 percent of the rural grading cost factor is applied to that county's total rural complete grading cost.

If, in the same period, a county constructed less than 30 percent of its rural design grading, then the rural grading cost factor is proportioned to the percent of rural design grading constructed.

The adjusted rural factor, can range from zero, when less than 1 percent of the system is graded, to 100, when 30 percent or more of the system is graded dependent on the actual and estimated costs in the needs study.

Only State Aid and Federal Aid projects have been used in the grading comparison since these are the only projects for which we have data on file.

Below is an example of Cook County's grading cost adjustment computation:

- During the years 1975-1980, inclusive, 2% of their C.S.A.H. system has been graded.
- 1980 rural grading cost factor is +45%.  
  
(Difference between average construction cost/mile (\$165,869) and average needs cost/mile (\$114,679) divided by the average needs cost/mile).
- Adjusted grading cost factor is 2/30 of 45%, or +3%.
- 3% of \$5,722,204 (complete rural grading cost in the 1981 needs study) = +\$171,666 (the effect on the 25-year construction needs).
- The approximate increase in the 1982 C.S.A.H. Apportionment, due to this adjustment is \$3,583. This is a result of the \$171,666 noted above times \$20.87 (apportionment earnings per \$1,000 of needs).

The next ten pages show the results of this study by individual counties by district. These adjustments (effect on 25-year construction needs) have been used in computing the 1981 annual County State Aid Highway money needs.

Special Resurfacing Projects

Due to the necessity for some counties to resurface certain substandard bituminous County State Aid Highways, the 1967 County Screening Committee adopted the following resolution:

That any county using County State Aid Highway construction funds for special resurfacing projects shall have the cost of such special resurfacing projects annually deducted from its 25-year County State Aid Highway construction needs for a period of ten (10) years.

The following list shows the counties, by district, that awarded special resurfacing projects from 1971 through 1980, the number of projects awarded and the project costs in each account which have been deducted from the 1981 County State Aid Highway Money needs. In 1980 alone, over \$8.7 million of special resurfacing projects were awarded.

	<u>Number of Special Resurfacing Projects 1971-1980</u>	<u>Regular Account Deduction</u>	<u>Municipal Account Deduction</u>	<u>Total Special Resurfacing Cost Deducted from the 1981-25 Yr. Con- struction Needs</u>

OCTOBER, 1981

Bond Account Adjustments

To compensate for unpaid County State Aid Highway Bond obligations that are not reflected in the County State Aid Highway Needs Studies, the County Engineers' Screening Committee passed a resolution which provides that a separate annual adjustment shall be made to the total money needs of a county that has sold and issued bonds pursuant to Minnesota Statutes, Chapter 162.181, for use on State Aid projects. This Bond Account Adjustment, which covers the amortization period, and which annually reflects the net unamortized bonded debt, shall be accomplished by adding the adjustment to the 25-year construction needs of the county.

The Bond Account Adjustment consists of the unamortized bond balance less the unencumbered balance available as of December 31st of the preceding year.

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

County State Aid Construction Fund Balance "Needs" Deductions

The resolution below was adopted by the Screening Committee at its July 8-9, 1976 meeting.

That, for the determination of the 1976 County State Aid Highway needs and all future needs, the amount of the unencumbered construction fund balance as of September 1 of the current year; not including the current year's regular account construction apportionment and not including the last three years of municipal account construction apportionment or \$100,000, whichever is greater; shall be deducted from the 25-year construction needs of each individual county. Also, that for the computation of this deduction, the estimated cost of right of way acquisition which is being actively engaged in shall be considered encumbered funds.

The following listing indicates the balance, the maximum allowable balances, and the "needs" deductions, in the respective accounts, which will be made to the 1981 25-year construction needs pursuant to this resolution.

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

MILL LEVY DEDUCTIONS

Minnesota Statutes, Chapter 162.07, Subdivision 3 and 4 requires that a two-mill levy on each rural county, and a one and two-tenths mill levy on each urban county be computed and subtracted from such county's total estimated construction cost.

The 1971 Legislature amended laws pertaining to taxation and assessment of property valuations. Previously, the term "full and true" (1/3 of market value) was interpreted to mean Taxable Value. The 1971 Legislature deleted the term "full and true" and inserted "market" value where applicable. Also, all adjustments made to market value to arrive at the full and true value were negated. The result of this change in legislation was an increase in Taxable Value by approximately 300%.

To obviate any conflict, the 1971 Legislature enacted the following:

Chapter 273.1102 RATE OF TAXATION, TERMINOLOGY OF LAWS OR CHARTERS. The rate of taxation by any political subdivision or of the public corporation for any purpose for which any law or charter now provides a maximum tax rate expressed in mills times the assessed value or times the full and true value of taxable property (except any value determined by the state equalization aid review committee) shall not exceed 33 1/3 percent of such maximum tax rate until and unless such law or charter is amended to provide a different maximum tax rate. (1971 C 424 S 241)

We have, therefore, reduced the mill rate by the required 33 1/3% to equal a 0.6667 mill levy for rural counties and a 0.4000 mill levy for urban counties.

The following listed figures comply with the above requirements of computation.

**TENTATIVE**

**APPORTIONMENT**

**DATA**

\*\*\*\*\*

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

Development of the Tentative 1982 C.S.A.H. Money Needs Apportionment

(Based on the 1981 Apportionment Sum)

This chart was prepared in order to determine an annual money needs figure for each county. These figures, along with each county's mileage, must be presented to the Commissioner on or before November 1, for his use in apportioning the 1982 County State Aid Highway Fund. This tabulation also indicates a tentative 1982 money needs apportionment figure for each county based on the 1981 apportionment sum.

The Trunk Highway Turnback Adjustment column is the same as was used for the 1981 money needs apportionment determination because more current data was not available at the time the chart was printed. Current data will be used for the final 1982 apportionment.

Minor adjustments must be made for any turnback activity in 1981 and possibly for any FAS fund balance deductions deemed necessary by this Committee.

October 30, 1981

Richard P. Braun, Commissioner  
Minnesota Department of Transportation  
Room 411  
Transportation Building  
St. Paul, Minnesota 55155

In reply refer to: 702

Dear Commissioner Braun:

We, the undersigned, as members of the 1981 County Screening Committee, having reviewed all information available in relation to the mileage and money needs of the County State Aid Highway System, do hereby submit our findings on the attached sheets.

In making this recommendation, we have considered the needs impact resulting from changes in unit costs, construction accomplishments, traffic revisions and new traffic factors. After determining the annual needs, adjustments as required by law and Screening Committee Resolutions were made to arrive at the money needs as listed. Due to turnback activity in 1981, and possible deductions caused by excessive FAS fund balances; adjustments to the mileage and money needs will be necessary before January 1, 1982.

This Committee, therefore, recommends that the mileage and money needs as listed be modified as required and used as the basis for apportioning to the counties the 1982 Apportionment Sum as provided in Minnesota Statutes, Chapter 162.07, Sub-division 5.

Respectfully submitted,

Dennis Carlson, Secretary  
County Screening Committee

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

Total Tentative 1982 C.S.A.H. Apportionment

(Based on 1981 Apportionment Sum)

The following tabulation lists a tentative 1982 Apportionment based on the 1981 allotment sum. The Equalization Apportionment naturally remains the same. The Motor Vehicle Registration Apportionment reflects changes caused by the new registration figures. The Mileage Apportionment was computed using the actual 1981 C.S.A.H. needs study mileage but the 1981 Trunk Highway Turn-back mileage is not included. The Money Needs Apportionment is based on the actual 1981 25-year construction needs, however, these needs will be adjusted by 1981 turnback activity, by deductions caused by excessive FAS fund balances, and possibly by other action taken at this meeting.

We wish to emphasize that the apportionment as shown is tentative and the final apportionment will be determined in January, 1982, by the Commissioner with the assistance of recommendations by your Screening Committee.

Total Tentative 1982 C.S.A.H. Apportionment

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

Comparison of the Actual 1981 to the  
Tentative 1982 C.S.A.H. Apportionment

(Based on the 1981 C.S.A.H Apportionment Sum)

The following two pages show what each county's 1982 County State Aid Apportionment would be if all mileage, needs and adjustments remained as published in this booklet and if the road user fund for 1982 remained the same as 1981. However, as we stated in the previous write-ups, some revised figures will be used to determine the final 1982 Apportionment. This data is being presented simply to show the approximate comparison to last year's apportionment if the Committee approves the mileage and money needs as presented.

1981 COUNTY SCREENING COMMITTEE DATA

Criteria Necessary for County State Aid Highway Designation

In the past, there has been considerable speculation as to which requirements a road must meet in order to qualify for designation as a County State Aid Highway. The following section of the Minnesota Department of Transportation Rules which was updated in January, 1977 definitely sets forth what criteria are necessary.

Portion of Minn. Rule Hwy. 32, (E) (2):

State Aid routes shall be selected on the basis of the following criteria:

a. County state-aid highways which:

- (1) Carry relatively heavier traffic volumes or are functional classified as collector or arterial as identified on the county's functional plans as approved by the county board;
- (2) And connect towns, communities, shipping points, and markets within a county or in adjacent counties;
  - (a) Or provide access to rural churches, schools, community meeting halls, industrial areas, state institutions, and recreational areas;
  - (b) Or serve as principal rural mail routes and school bus routes;
- (3) And occur at reasonable intervals consistent with the density of population;
- (4) And provide an integrated and coordinated highway system, affording within practical limits a State-Aid highway network consistent with traffic demands.

MINNESOTA DEPARTMENT OF TRANSPORTATION  
REQUEST FOR STATE AID SYSTEM REVISIONDATE : 7-30-81

TO : Director, Highway Studies Section

FROM : J.P.J. Isaacson District State Aid EngineerSUBJECT: Request for Approval of a System Revision  
(Municipality) (County) of HORNEMAN

Attached is a request and supporting data for the revision to the State Aid system.

The proposed route meets the following criteria (indicated by an "X") necessary for designation:

C.S.A.H. CRITERIA	
<input checked="" type="checkbox"/>	carries relatively heavier traffic volumes;
	and connects towns, communities, shipping points, and markets within a county or in adjacent counties;
<input checked="" type="checkbox"/>	or provide access to rural churches, schools, community meeting halls, industrial plants, state institutions and recreational areas;
	or serves as a principal rural mail route and school bus route;
<input checked="" type="checkbox"/>	or acts as a collector of traffic from several roads of local interest;
<input checked="" type="checkbox"/>	and occurs at a reasonable interval consistent with the density of population;
<input checked="" type="checkbox"/>	and provides an integrated and coordinated highway system affording within practical limits a State-Aid highway network consistent with local traffic demands.

M.S.A.S. CRITERIA	
	carries relatively heavier traffic volumes;
	and connects the points of major traffic interest within an urban municipality;
	or connects with rural roads or urban routes of community interest and carries major traffic into and through an urban municipality;
	and forms a system of streets which will effectively serve traffic within the urban municipality.

July 14, 1981

Mr. Jack Isaacson, PE  
District State Aid Engineer  
Minnesota Department of Transportation  
Bemidji, MN 56601

RE: Request for addition to Norman County's and the City of Hendrum's  
County State Aid Highway System.

Dear Mr. Isaacson,

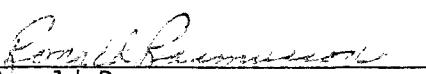

Norman County respectfully requests that the portion of County State Aid Highway No. 46 be extended within the City of Hendrum from U.S. #75 to CSAH #25 as shown on the attached map.

The Norman County Board of Commissioners and the City Council of Hendrum has requested that this section be included in the County State Aid System for the following reasons:

- 1.) The addition of this highway will provide continuity in the CSAH system and a direct link with the west side on Hendrum and U.S. # 75. Increase State Aid System 0.19 mile.
- 2.) This improvement would provide a hard surface road to the west side of Hendrum and to Hendrum Manufacturing, a large employer and the only manufacturing facility for miles around.
- 3.) Provide an adequate outlet for the new Norman County Shop- located adjacent to Hendrum Manufacturing.
- 4.) U.S. #75 is a 10 Ton route and the extension of CSAH #46 would provide for large truck loads off U.S. #75 to Hendrum Manufacturing and from Hendrum Manufacturing to U.S. #75.
- 5.) The existing street does not meet the needs of the area.
- 6.) Traffic studies indicate a traffic forecast of 300+ UPD. Much of it would be large trucks.

Please review this request and if it is in order, transmit it to the State Aid Office for processing through the screening committee.

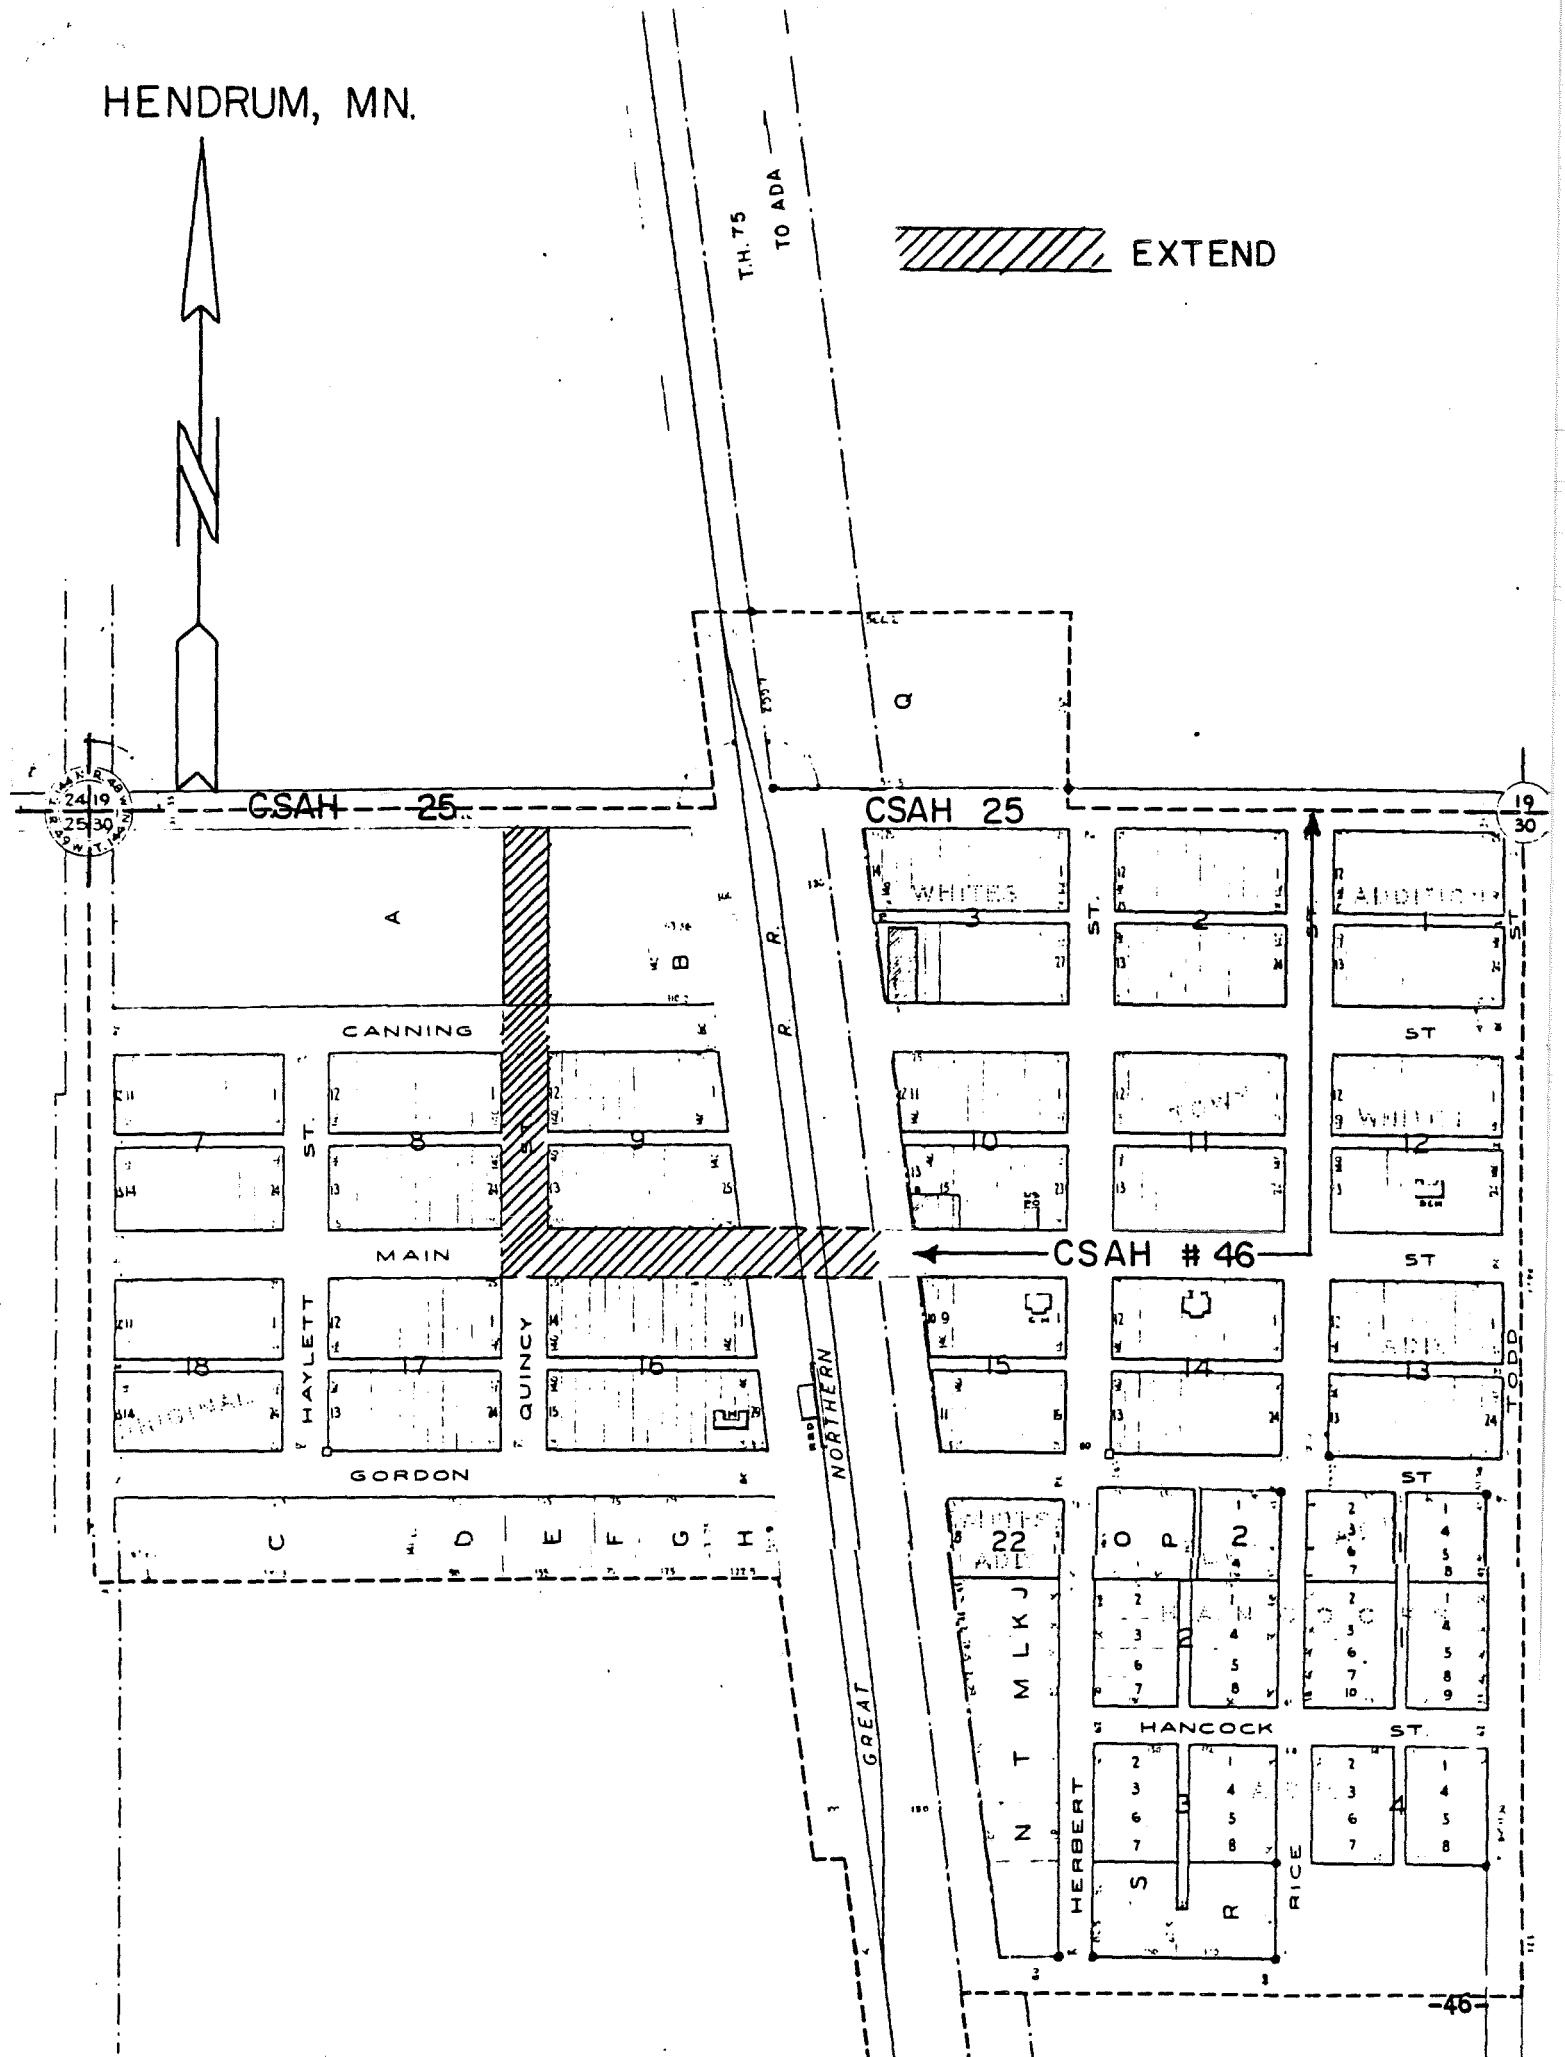

Sincerely,

  
Ronald Rasmussen  
Norman County Engineer

1981 COUNTY SCREENING COMMITTEE DATA  
OCTOBER, 1981

C.S.R.H. 20 YEAR TRAFFIC PROJECTION FACTORS  
(FOR USE IN THE 1981 CSAH NEEDS STUDY)

THOSE COUNTIES WITH THEIR FACTORS CIRCLED WERE COUNTED IN 1980. BOTH OLD AND NEW FACTORS ARE SHOWN FOR THESE COUNTIES.

Minutes of the County Engineers Screening Committee Meeting

June 25 & 26, 1981

The meeting was called to order by chairman Jack Dolan at 1:05 P.M. on June 25, 1981.

The secretary called the roll of the Committee Members:

District 1 .....	Doug Grindall .....	Koochiching County .....	Present
District 2 .....	Roger Diesen .....	Marshall County .....	Present
District 3 .....	Duane Blanck .....	Crow Wing County .....	Present
District 4 .....	Dennis Berend .....	Ottertail County .....	Present
District 5 .....	Art Lee .....	Hennepin County .....	Present
District 6 .....	Jack Dolan .....	Olmsted County .....	Present
District 7 .....	Mike Wagner .....	Nobles County .....	Present
District 8 .....	Marlyn Hanson .....	LacQui Parle County ....	Present
District 9 .....	Ken Weltzin .....	Ramsey County .....	Present

Others present were:

Gordon Fay .....	Director of State Aid
Roy Hanson .....	Office of State Aid
Bill Strand .....	Policy and Planning Unit - Mn/DOT
Ken Hoeschen .....	Policy and Planning Unit - Mn/DOT
David Zech .....	Cook County - Alternate District 1
Ron Rasmussen .....	Norman County for Alternate District 2
Boyd Paulu .....	Kanabec County - Alternate District 3
Galen Narum .....	Wilkin County - Alternate District 4
Don Wisniewski .....	Carver County for Alternate District 5
Earl Welshon .....	Winona County - Alternate District 6
Bob Witty .....	Martin County - Alternate District 7
Dennis Stoeckman .....	Renville County - Alternate District 8
Jim Worcester .....	Cass County - Sub-Committee Spokesman
Dave Reed .....	District III State Aid Engineer
Dennis Carlson .....	Benton County Screening Committee Secretary

Chairman Dolan introduced Mn/DOT personnel.

Chairman Dolan asked for approval of the October, 1980 County Screening Committee Meeting minutes. Ken Weltzin moved their adoption as mailed and Roger Diesen second the motion. Motion passed unanimously.

Chairman Dolan opened the floor for nominations to fill the vacant Vice Chairmans position on the committee. Art Lee nominated Duane Blanck, Doug Grindall second the nomination. Doug Grindall moved to close nominations and cast a white ballot for Duane Blanck, Ken Weltzin second the motion and it carried unanimously thereby electing Duane Blanck as Vice Chairman.

Chairman Dolan then asked Ken Hoeschen to lead the discussion in reviewing the Screening Committee booklet.

Page 1-9

Ken Hoeschen noted that the first 9 pages are historical data and unless there were questions he would begin on page 10.

Page 10 - Rural Design Gravel Base Unit Price Data

Ken Hoeschen mention that because some counties got a good price on gravel base and didn't use gravel sub-base the State average for gravel base ended up cheaper than the state average gravel sub-base. He then reviewed the map legend explaining what each number represented on the statewide map opposite page 10. He also explained how the inflation factors were arrived at by the Sub-Committee.

Ken Hoeschen noted that the counties identified by squares have a base unit price established at \$0.13 less than their five year average sub-base unit price. Doug Grindall said that subtracting \$0.13 from the sub-base price would be doubly hard on counties that already are below their actual cost of base material.

Ken then explained that those counties identified by circles on the map have had the surrounding counties used to establish their gravel base unit prices.

Jim Worcester said it is the opinion of the Sub-Committee that the base and sub-base price should be the same (no differential). The sub-committee could see no logic in having a higher unit price for a lessor quality material.

Gordy mentioned that the average haul was not included in determining the differential of the 2 classes of material. Doug Grindall then read a letter dated June 19, 1981 from Lake County regarding their gravel base unit prices. Rather than repeating the entire letter in the minutes a copy can be obtained from the State Aid Office if anyone is interested. Lake County's individual projects were discussed to see if anything unusual occurred that should be considered in establishing their unit prices. Other cases were discussed such as Dakota County which is only 2,000 ton short of their minimum and end up with an unusually high unit price. Dennis Berend suggested supplementing a county's tonnage from adjacent counties to make a total of 50,000 ton. It was suggested that the number of years be increased to 7 or 10 or whatever is necessary to make 50,000 ton. Gordy noted that mobilization is not included in the unit prices and can affect the cost considerably. Art Lee asked if a minimum size of job could be established rather than tonnage. A 6 mile job may be representative in size but the haul could vary and fluctuate the cost by 50 to 100%. Duane Blanck and Jim Worcester both agreed with Dennis Berend suggestion to use each county's sample first and supplement from adjacent counties only as necessary to make the minimum of 50,000 Ton.

The suggestion was made to use only the counties that have representative samples of both base and sub-base to establish the differential for statewide averages. Dennis Berend then suggested that the first source of data should be base unit prices and supplement with sub-base unit prices, if necessary the third source would be adjacent counties to supplement the first 2 sources to reach the 50,000 ton minimum.

Ken Hoeschen then brought up the problem of fast rising oil prices and the affect on deep strength bituminous base unit prices. The sub-committee recommended the cost of the oil be removed from the computation of base unit prices. Sample computation sheets were distributed and reviewed in detail by Bill Strand. Dennis Berend asked how the cost of concrete compared to deep strength bituminous. The idea of removing a portion of the cost of oil was discussed but what pro-

portion is fair could not be determined.

After a short break Ken Hoeschen read off the revised prices using the base unit price and supplementing with the adjacent counties prices to bring the sample to 50,000 Ton including proportionally weighted amounts. Discussion continued concerning using sub-base prices in conjunction with gravel base prices and further study was requested to be presented at the morning session.

Page 12 and Figure B - CSAH - MSAS Unit Price Comparison

Ken Hoeschen reviewed Figure "B" in detail.

Rural Design

The Subcommittee's recommendation for all items was to determine an increment between the 1980 CSAH average unit price of gravel base and that of each item and to add that increment to each county's previously determined gravel base unit price. The exceptions were sub-base which was recommended to be the same as the gravel base unit price and for 2301 concrete surface for which a 1980 CSAH average price was developed by increasing the average 1980 needs study price of \$12.80 by 10% and then use the increment method as described above.

Urban Design

The grading price is the same as the MSAS recommendation. The other items in this category were arrived at using the increment method from rural design gravel base to the MSAS recommended unit price of the item with the exception of 2351-2361 bituminous surface where the same increment as that for rural design was recommended.

Miscellaneous

The CSAH Subcommittee is recommending the storm sewer prices arrived at by Mn/DOT Hydraulics Section rather than repeat last years as recommended by the MSAS Subcommittee. All the other items were recommended to concur with MSAS Subcommittee recommendation.

Bridges

The CSAH Subcommittee recommended keeping the prices the same as last years Needs Study.

Railroad Protection

The CSAH Subcommittee concurred in the Mn/DOT Railroad Section recommendation to have only 1 signal unit price of \$55,000 and the other items remain the same as last year.

Page 13 - Miscellaneous Structure Unit Prices

This page is merely an update of structure unit prices.

Page 16-24 - Mileage Requests

Aitkin County - Duane Blanck discussed their request and filled in additional details pertaining to need. There was some discussion on the mileage lost thru construction and determined that generally speaking it had no relevance.

Watonwan County - Mike Wagner reviewed details surrounding this request and complexity of actions preceding the request that the County had no control of. Also the need to establish system continuity.

There was considerable discussion on Trunk Highway turnbacks in municipalities, on CSAH designated Trunk Highway designationas well as specific problems with this particular jurisdiction road change in St. James. A clear understanding of activities to date was reached by those present, but a conclusion of how to best resolve the problems could not be reached.

Page 26 and Figure D - 5 Year Average Subbase Unit Prices

These pages were discussed earlier along with Base Unit Prices.

Page 27 - Unit Price Inflation Factors

This explains how the inflation factors were arrived at by the subcommittee.

Page 28 - Traffic Projection Factors

There was a discussion about the practicality of boosting a projection factor to 1.7 so that bituminous needs can be drawn on roadways with existing ADT of 60 VPD. In reality it is unlikely that a majority of these roads will ever be surfaced with bituminous. Dennis Berend said the timing was bad because some of these counties worked hard to get legislation passed to increase funding and now they will lose part of the increase. Ken Weltzin said this is the best time to implement a change of this type because the impact is minimized with new funds coming in. Several members agreed they would probably never surface many of the roads currently receiving bituminous needs. Special requests for bituminous surfacing can be included in the needs with approval of your District S.A. Engineer.

District 2 and 4 opposed the Subcommittee recommendation and District 6 supported the recommendation.

Page 29 - FAS Fund Balance Deductions

Ken Hoeschen checked the balances of the 6 listed counties just before he left for this meeting and they were still correct. No action required.

Construction Accomplishment Needs

Ken Hoeschen said the last resolution regarding the re-entering of newly constructed (grading) roads into the needs study occurred in 1965 and called for a 15 year waiting period. This means that some segments 15 years old are being included in the 1981 needs study. Jim Worcester read the present resolution and then read the Subcommittees recommended revised resolution (copy attached). There was considerable discussion about widening and drawing full needs when the intent is to widen etc. It was decided to have copies of the resolution made so members could study it for further discussion of Friday.

The meeting recessed at 4:50 P.M.

The meeting reconvened at 9:05 A.M. June 26, 1981.

Page 10

Ken Hoeschen redefined the figures on the state map regarding Gravel Base unit prices. He also said that by removing the counties without subbase from the computations the differential would be \$.06 more for Gravel Base than Subbase.

For those counties with circles one method would be to use each county's Gravel Base as the primary data source. The secondary data source would be each county's

subbase and the last data source would be the surrounding counties and use whatever is necessary to make the minimum 50,000 ton sample.

The counties with squares would use the same priorities for data sources. Dennis Berend moved and Duane Blanck second a motion to establish Gravel Base unit prices as follows:

If a County has at least 50,000 tons of gravel base in their five year average unit price study, that five year average unit price, inflated by factors shown in the inflation factor report, will be used.

If a County has less than 50,000 tons of gravel base material in their five year average unit price study, then that county's inflated and adjusted subbase price will be used with base material to bring the total quantity of material to 50,000 tons and then a weighted average unit price for base will be determined, AND,

If a County still has less than 50,000 tons of gravel base and adjusted subbase material in their five year average unit price study, then that County will use surrounding counties that have more than 50,000 tons of gravel base in their five year average unit price study to establish a base price for the quantity of material needed to bring the total quantity to 50,000 tons and then a weighted average unit price for base will be determined.

The ballot vote was 9-0 to approve.

Ken Hoeschen brought up the subject of Deep Strength Bituminous Base and the fact that oil prices are having a substantial impact on the converted base prices.

Mike Wagner moved and Ken Weltzin second a motion to leave the computation as is for now. Art suggested additional study be done during the summer using 1981 prices and reconsider at the fall meeting. Gordy Fay concurred with Art. Dennis Berend suggested only a portion of the oil be removed to get the converted gravel base unit price in line with other gravel base unit prices. Bill Strand read the unit prices that would occur if the bituminous was removed. The question was called and the motion carried 7 to 2.

#### Page 12 and Figure B - CSAH - MSAS Unit Price Comparison

Ken Weltzin moved and Mike Wagner second a motion to accept the recommendation of the Subcommittee as show on Figure B and Page 13. The motion carried 7 to 2.

#### Mileage Requests

Aitkin County - Duane Blanck discussed the data submitted with the request. Dave Reed noted that the proposed designated road is gravel and carries a lot of traffic. In fact the County tried to get this segment designated as a Trunk Highway but the people at Mn/DOT weren't interested. The ballot vote was 6 to approve and 3 to deny the request.

Watonwan County - Mike Wagner discussed the Watonwan County data and request, noting this was a new segment built to current standards and would not receive grading needs. After some discussion of alternatives the ballot vote was taken and there were 8 to approve and 1 to deny.

## Page 28 - Traffic Projection Factors

The Subcommittee recommended the removal of the last half of the current resolution (starting with "In addition, any segment" \_\_\_\_). This means that essentially everybody would use their normal projection factor rather than 1.6 or 1.7 on low vol roads. It would be permissible to have higher factors on certain segments by special request and approval of the District State Aid Engineer. Mike Wagner suggested this action be phased in slowly to reduce impact. Dennis Berend was concerned about the hardship on small counties. Gordy Fay went through the minimum counties to try to determine how many counties would actually be affected. Ken Weltzin moved and Art Lee second a motion to accept the recommendation of the Subcommittee. Motion carried 5 to 4 on a ballot vote.

Art Lee moved that the counties affected be allowed to update their needs study immediately. Also the District State Aid Engineers coordinate the update for consistency. Motion passed 9-0.

Dennis Berend asked if action can be taken at the fall meeting? He was told that yes further action could be taken at that time.

Ken Hoeschen reminded the Screening Committee that the 20% deviation limit from the State average may have some bearing on this action.

## Projected Traffic Resolution

With the advent of the new standards update and the possible revision of the Screening Committee resolution dealing with projection factors, the Subcommittee felt that a clarification of "permissible" needs would be in order.

A simple resolution similar to the following may suffice.

That, in all instances, the needs shall be based solely on projected traffic, regardless of existing surface type or geometrics.

Mike Wagner moved and Art Lee second a motion to approve the proposed resolution. The ballot vote was 6 for and 3 against.

## Construction Accomplishments Resolution

Art Lee asked if it would hurt to delay action until the fall meeting. Ken Hoeschen said there would be segments added to the needs study that were constructed in 1965. Art Lee moved and Marlyn Hanson second a motion to study this further and discuss in each District the years and starting date so that action can be taken at the fall meeting. The motion passed 9-0. A copy of the proposed resolution is attached to these minutes.

## Variances

Art Lee mentioned a hold harmless resolution for Mn/DOT and saw this as a red flag for attorneys.

Gordy Fay noted that 17 variance requests were processed in just under 1 year and 3 were denied. Considering his office has processed 500 projects in 1981 so far, maybe the impact of variances on our standard isn't as significant as it first appears.

Gordy Fay noted that Bernie Lieder is our NACO representative and we should let him know if we have ideas or suggestions for him to implement. With the FHWA discussing the discontinuation of FAS and FAU maybe if we can get a strong support in opposition thru Bernie the NACO organization could have some impact on FHWA.

FHWA has also discussed the use of guard rail be considered on roadways with less than current minimum of 750 ADT.

There was a brief discussion on the revenue increases generated by the 1981 Legislation.

It was noted that we have received 80% of our Federal Apportionment and the remaining 20% may be available on 8-1-81. The State Aid office has 118 bridges ready to be let when money is available.

Gordy Fay commended the group on an excellent meeting.

Dennis Berend asked if the Subcommittee was asked to increase traffic by 1/20th of their projection factor each year. Yes they did look at the possibility but it was cost prohibitive and the idea was dropped.

Dennis Berend said that in District 4 the Legislators have become aware of discussions regarding road jurisdictional changes such as county takeover of Trunk Highway Maintenance or Contract Maintenance to reduce administration costs and duplication of facilities and equipment. This was not Mn/DOT's idea and the consensus seemed to be we didn't want any part of such a change. The Wisconsin system was briefly mentioned. Dennis Berend said we should take an independent position from Mn/DOT for greater emphasis. Possibly a major study of road jurisdiction will have to be completed. Tort liability, responsibility, level of service was discussed and it was agreed that we should let our County Boards know of the jurisdictional discussions by our legislators.

Ken Weltzin moved and Roger Diesen second a motion to adjourn.

Meeting adjourned at 12:05 P.M.

Respectfully Submitted,

Dennis C. Carlson  
Screening Committee Secretary

RECOMMENDED CONSTRUCTION ACCOMPLISHMENT RESOLUTION

That any grading, or bridge construction accomplished in 1965 or later shall be considered as complete construction of the item and shall be excluded from the needs for a minimum of 25 years from the date of project award or force account agreement.

That at the end of the 25 year time period, needs for complete construction of the roadway or bridge, whichever is required, will automatically be inserted in the needs study.

If some improvement is made to a bridge structure within the 25 year time period, the actual cost of the improvement will be added to the needs for a period of 15 years or until the end of the 25 year period, whichever comes first.

Also, that needs for surfacing and if applicable, resurfacing shall be given on all County State Aid Highways, except those eligible for Turnback funds.

Exceptions to the above limitations are eligible for approval only when the request is based on unforeseen developments or other equally valid data that has been adequately justified to the satisfaction of the District State Aid Engineer.

## VARIANCES

\*\*\*\*\*

COUNTY SCREENING COMMITTEE DATA

Variances

Included in the recent adoption of Rules for State Aid Operations is the following section dealing with variances:

M. Variance.

1. Any formal request by a political subdivision for a variance from these rules shall be submitted to the commissioner in writing.
2. Contents of request.
  - a. The specific rule or standard for which the variance is requested.
  - b. The reasons for the request.
  - c. The economic, social, safety and environmental impacts which may result from the requested variance.
  - d. Effectiveness of the project in eliminating an existing and projected deficiency in the transportation system.
  - e. Effect on adjacent lands.
  - f. Number of persons affected.
  - g. Safety considerations as they apply to:
    - (1) Pedestrians.
    - (2) Bicyclists.
    - (3) Motoring public.
    - (4) Fire, police and emergency units.
3. The commissioner shall publish notice of variance request in the State Register and shall request comments from all interested parties be directed to the commissioner within 20 calendar days from date of publication.
4. The commissioner may appoint a committee to serve as required to investigate and determine a recommendation for each variance. No elected or appointed official that represents a political subdivision requesting the variance may serve on the committee.
  - a. The committee shall consist of any five of the following persons:
    - (1) Not more than two county engineers only one of whom may be from a county containing a city of the first class.
    - (2) Not more than two city engineers only one whom may be from a city of the first class.

- (3) Not more than two county officials only one of whom may be from a county containing a city of the first class and
- (4) Not more than two city officials only one of whom may be from a city of the first class.

b. Operating procedure.

- (1) The committee shall meet on call from the commissioner at which time they shall elect a chairperson and establish their own procedure to investigate the requested variance.
- (2) The committee shall consider:
  - (a) The economic, social, safety and environmental impacts which may result from the requested variance in addition to the following criteria:
  - (b) Effectiveness of the project in eliminating an existing and projected deficiency in the transportation system.
  - (c) Effect on adjacent lands.
  - (d) Number of persons affected.
  - (e) Effect on future maintenance.
  - (f) Safety considerations as they apply to:
    - (i) Pedestrians.
    - (ii) Bicyclists.
    - (iii) Motoring public.
    - (iv) Fire, police and emergency units.
  - (g) Effect that the rule and standards may have in imposing an undue burden on a political subdivision.
- (3) The committee after considering all data pertinent to the requested variance shall recommend to the commissioner approval or disapproval of the request.

- 5. The commissioner shall base his decision on the criteria as specified in 14 MCAR 1.5032 M. 4. b. (2), (a)-(g) and shall notify the political subdivision in writing of his decision.
- 6. Any variance objected to in writing or denied by the commissioner is subject to a contested case hearing as required by law.

The next several pages document the variances that have been granted since the last Screening Committee meeting.

1981 COUNTY SCREENING COMMITTEE DATA

County Variance Requests

- Blue Earth                    -- Request for variance of 45 MPH curves to 43 MPH curves at two locations for bituminous overlay work. (APPROVED). 362 ADT
- Cook                         -- Request design speeds of 30 MPH and 20 MPH instead of 45 MPH. 255 ADT (APPROVED 30 MPH) (DENIED 20 MPH).
- Cottonwood                  -- Request design speed of 39 MPH instead of 45 MPH (DENIED). 377 ADT
- Hennepin (Mound)           -- Request for variance from standard of 50 feet in width to 48 feet in width with restricted parking in selected locations (Parallel parking). (APPROVED) 5,900 ADT
- Hennepin (Minneapolis)    -- Request for variance on 32 foot width street with one-way traffic to permit parking other than from 7 to 9 A.M. and 4 to 6 P.M. on the east side only. (APPROVED). 6,700 ADT
- Hennepin (Mound)           -- Request for variance of 30 MPH design speed to 25 MPH design speed for Bridge Replacement over Spring Park Channel of Lake Minnetonka. (APPROVED). 4,550 ADT
- Hennepin (Hanover)        -- Request for variance from 40 foot width to 32 foot width for bridge reconstruction (deck work). (APPROVED) 2,600 ADT Restricted speed 40 MPH.
- Hennepin (Minneapolis)    -- Request street width of 40 feet instead of 72 feet. (APPROVED) 9 - 11,000 ADT

County Variance Request

Hennepin (St. Louis Park) -- Request street width of 66 feet instead of 68 feet. (APPROVED). 20,500 ADT

Jackson -- Request for variance from standard of 44 feet wide bridge deck to 36 feet wide -- for rehabilitation work only with No Parking. (APPROVED). 3,000 ADT

Lake of the Woods -- Request design speed of 42 MPH instead of 45 MPH. (DENIED). 132 ADT

Sibley -- Variance for diagonal parking on 60 feet width street from standard of 66 feet. The work to be completed bituminous overlay. (APPROVED). Should additional improvement in future be required, the street should be constructed to standard 66 feet width or by variance request if not meeting standards.  
(PENDING). Less than 3,000 ADT

Hennepin (Crystal) -- Request street width of 48 feet with restricted parking instead of 52 feet with no parking or 72 feet with parking. (PENDING).

Dodge -- Request 20 MPH design speed instead of 40 MPH design speed. (PENDING).

Faribault (Wells) -- Request 30° diagonal parking on a street width of 60 feet instead of 45° diagonal parking on a street width of 66 feet. (PENDING).

County State Aid Needs Unit *KMH*

SUBJECT: Supplement to the 1981 Fall County  
Screening Committee Report

As we stated in the transmittal memo sent with the Screening Committee Report, the effect of the elimination of the automatic 1.6 and 1.7 traffic projection factors was not available when the books were printed.

The enclosed pages and foldouts indicate the effect of the elimination of these automatic factors. They will take the place of the corresponding pages and foldouts in your Screening Committee Report.

If you have any questions on this transmittal, please contact us.
