School District Profiles

Introduction

This report contains statistical profiles of Minnesota school districts for the 1979–80 school year. It is the eighth annual issue in a series of statistical reports published by the Minnesota Department of Education.

The statistical tables on pages 12 through 31 contain data for each school district, county, and region in the state. The primary purpose of these tables is to provide a convenient source of accurate and comparable school district data for a single school year. These data may be used to compare districts and to assess their similarities and differences.

A secondary purpose is to continue a historical series of comparable data. The content of the tables has been changed very little from year to year, so that valid comparisons among years may be made. However, some modifications have been made almost every year, due to changes in accounting and reporting procedures, legal definitions, or changing interests. There are four major differences between the tables in this report and the tables in last year's report:

- Column 1 of the tables contains a new data item, the average daily membership (ADM) of prekindergarten handicapped students. On last year's report the ADM for these students was included with the kindergarten ADM. A separate figure was added this year chiefly because there has been a sharp increase in the number of prekindergarten handicapped students.
- A change was made in the method of computing ADM for prekindergarten and handicapped kindergarten pupils, beginning with the 1979–80 school year. Because of this change, the ADM counts in this year's report aren't precisely comparable with those in last year's report.
- Column 5 was added, showing the total average daily membership of each district. This number is simply the total of the preceding four columns. It was added to make it easier for readers to compare the total number of students among districts.
- This year's tables contain data for 433 school districts operating elementary and secondary schools, compared to 434 districts in last year's report. The reduction is due to the consolidation of the Blue Earth and Frost school districts on July

1, 1979. (A separate table, on pages 26 and 27, contains data for three elementary-only districts and two nonoperating districts).

In addition to the statistical tables, this report contains a discussion of trends and patterns in the data, on pages 4 through 7; a table of summary statistics on page 32; a list of definitions on pages 8 and 9; a map of Minnesota counties and development regions on page 11, and an alphabetical list of school districts on pages 10 and 11.

If you have questions about the meaning of data in the report or the comparability of data among years, or if you would like copies of reports from previous years, please contact the Education Statistics Section, Minnesota Department of Education, 736 Capitol Square, St. Paul, Minnesota 55101, or telephone (612) 296-2400.

Trends and Patterns

The eight annual issues of *School District Profiles*, which cover the school years 1972–73 through 1979–80, provide evidence of many changes in Minnesota public schools and of major differences among school districts. In the following pages we have highlighted some important trends over these years and some patterns of variation among districts.

Average Daily Membership

The state's 433 elementary-secondary districts had a total resident average daily membership (ADM) of 771,678 students for 1979–80. Districts ranged in size from 107 to 41,031 ADM. The median ADM was 730 students; this means that half of the state's 433 *school districts* had 730 or fewer ADM. But most *students* are enrolled in relatively large districts; the 36 largest districts, each of which had more than 4,500 ADM, accounted for slightly more than half of the state's total ADM.

Percent Minority

As Table 1 illustrates, the percentage of Minnesota students who are from minority groups (students of American Indian, Alaskan, Black, Asian, or Hispanic origin) has risen slightly, from 3.2 percent in 1973–74 to 5.0 percent in 1979–80. While the total state enrollment declined by about 14 percent over this period, enrollment increased in all four of the minority groups listed in Table 1. The largest increase was in students of Asian origin; their enrollment grew from 2,463 to 7,249 students, primarily due to an influx of Southeast Asian immigrants.

Thirteen Minnesota districts, including Minneapolis and St. Paul, had greater than ten percent minority enrollment in 1979–80. By contrast, there were forty districts with no minority students.

Percent Transported

Table 2 shows that the percent of pupils transported to and from school has grown in the last five years, from 67.1 percent in 1975–76 to 74.1 percent in

1979–80. There are many possible explanations for this increase, including the following:

1. Many schools have been closed due to declining enrollments; some students who formerly walked to these schools must now be transported.
2. Some districts have consolidated or established cooperative arrangements with other districts, requiring additional students to be transported.
3. The number of prekindergarten handicapped students has grown; almost all of these students are transported to school.
4. Many districts are experiencing enrollment growth in some geographical areas and decline in other areas. These districts are likely to transport students to schools in the declining areas, rather than building new schools in the growing areas.
5. Busing of students for desegregation in Minneapolis and St. Paul has increased.

Table 2

Percent of Students Transported, Minnesota Public Schools

School Year	%Transported
1975–76	67.1%
1976–77	66.5%
1977–78	67.4%
1978–79	72.6%
1979–80	74.1%

Table 1

Enrollment of Minorities in Minnesota Public Schools

Ethnic Origin	Fall 1973		Fall 1979	
	Enrollment	% of Total	Enrollment	% of Total
American Indian or Alaskan	10,432	1.2%	11,557	1.5%
Black	11,622	1.3%	14,521	1.9%
Asian	2,463	0.3%	7,249	0.9%
Hispanic	4,621	0.5%	5,432	0.7%
Total Minority Enrollment	29,138	3.2%	38,759	5.0%
4 Total Enrollment	900,406	100.0%	775,993	100.0%

Professional Staff

The total number of professional staff in Minnesota public schools decreased from 50,898 in 1976–77 to 49,391 in 1979–80. This is a decrease of 1,507 staff, or three percent. But during the same period, total enrollment declined by about ten percent. The result, as shown in Table 3, is that the pupil-staff ratio for the state fell from 16.9 in 1976–77 to 15.7 in 1979–80.

Table 3

State Totals* of Professional Staff and Pupil-Staff Ratio

School Year	Total Professional Staff	Pupil-Staff Ratio
1976–77	50,898	16.9
1977–78	49,995	16.7
1978–79	49,723	16.2
1979–80	49,391	15.7

* These totals include the staff of all school districts which operate both elementary and secondary schools. They do not include staff of elementary-only districts, cooperative centers, or postsecondary staff. Data for years prior to 1976–77 are not comparable due to a change in definitions.

Tax Rates

School property tax rates have fallen considerably over the past eight years. Table 4 shows that the state total EARC Mill Rate fell from 44.01 mills in 1973 to 32.19 mills in 1980. This does not necessarily mean

Table 4

Minnesota School Tax Rates State Totals, in EARC Mills

Year that Taxes are payable	EARC Mill Rate
1973	44.01
1974	42.97
1975	43.33
1976	40.35
1977	39.71
1978	36.39
1979	34.72
1980	32.19

that most property owners' actual tax bills have gone down. If an individual's tax rate decreased, but his assessed valuation went up, then his actual tax might be the same as before. This example is fairly representative of what has happened in recent years. Property values have risen sharply, and the state legislature has responded with several steps designed to hold down property taxes.

One goal of Minnesota's school finance system is to ensure that tax rates are reasonably equal among districts. Figure 1 shows that *most* districts' 1980 EARC mill rates were within a fairly narrow range. About 57 percent of the mill rates were between 25 and 35 mills, and 88 percent were between 20 and 40 mills. However, there were four districts with mill rates less than 15 and three districts with mill rates greater than 50. These variations existed for several reasons, including: 1) wide variations in property valuation among districts, and 2) preservation of some local control over tax rates, through a "discretionary levy," a voter-controlled "referendum levy," and levies for retirement of bonded debt.

Figure 1

Distribution of EARC Mill Rates for Minnesota School Districts, Taxes Payable in 1980

Current Expenditures

Figure 2 reveals two important points. First, current expenditures per pupil unit have nearly doubled in the last eight years, from \$943 in 1972-73 to \$1,872 in 1979-80. The steepest increase in any single year was in 1979-80, when current expenditures per pupil unit grew by 13.2 percent over the previous year.

Second, instructional expenditures have also increased, but not as sharply as total current expenditures. While current expenditures per pupil unit increased by 99 percent, instructional expenditures increased by 79 percent, from \$648 per pupil unit in 1972-73 to \$1,160 in 1979-80. Instructional expenditures made up 68.7 percent of all current expenditures in 1972-73, and only 62.0 percent in 1979-80. During this eight-year period there was more rapid growth in other categories of expenditures, including expenditures for transportation, fixed charges, food service, tuition, and student activities.

Capital Expenditures

Table 5 shows the recent trends in capital expenditures of Minnesota school districts. Total capital expenditures per pupil unit increased from \$89 in 1972-73 to \$167 in 1974-75, but fell to \$118 in 1976-77. This decrease may have been caused by a reluctance to build new schools at a time when enrollments were projected to decline sharply for several years. Since 1976-77 capital expenditures have increased, reaching a new high of \$183 per pupil unit in 1979-80. The increase appears to be due to increased construction of new buildings, additions, and energy-saving improvements, along with overall inflation of building costs.

Figure 2

State Totals of Instructional Expenditures* and Total Current Expenditures per Pupil Unit

* Instructional expenditures are defined as the sum of expenditures for Instructional Salaries (column 18) and Other Instruction (column 19).

Table 5

State Totals of Capital Expenditures per Pupil Unit, Minnesota School Districts

School Year	Expenditures per Pupil Unit for:		Total Capital Expenditures
	Capital Equipment	Buildings & Sites	
1972-73	NA	NA	\$ 89
1973-74	NA	NA	112
1974-75	NA	NA	167
1975-76	NA	NA	161
1976-77	\$37	\$ 81	118
1977-78	37	94	131
1978-79	44	90	134
1979-80	52	131	183

Operating Funds Balances

Most Minnesota school districts are in good financial condition, as measured by their unappropriated operating funds balance. This figure (column 33) is a measure of current financial condition and of resources available for future years. Figure 3 shows that, as of June 30, 1980, only 28 school districts had negative fund balances. Most districts (322 of 433 districts) had positive fund balances of \$599 per pupil unit or less. There were 83 districts with positive fund balances of \$600 per pupil unit or greater.

The column labelled "change in funds balance" (column 34) shows the difference between each district's operating funds revenues and expenditures for 1979-80. The state total for this figure was \$54. This means that for Minnesota districts as a whole, revenues exceeded expenditures by \$54 per pupil unit in the operating funds.

State and Local Operating Costs

In 1971 Minnesota's legislature and governor enacted major reforms of the state's school finance system. One goal of these reforms was to reduce disparities in spending among districts. Table 6 shows that some progress has been made towards that goal.

Table 6 shows the state totals and the 5th and 95th percentiles of state and local operating costs per pupil unit, for 1970-71 through 1979-80. The state total has more than doubled during this period, from \$702 per pupil unit in 1970-71 to \$1,525 in 1979-80. At the same time the ratio of the 95th percentile to the 5th percentile has fallen, from 1.63 in 1970-71 to 1.44 in 1979-80. This implies that the cost per pupil unit has increased more, in percentage terms, for the lowest spending districts than for the highest spending districts.

Figure 3

Distribution of Unappropriated Operating Funds Balances per Pupil Unit, June 30, 1980, for Minnesota School Districts

Table 6

**State and Local Operating Costs per Pupil Unit,
State Totals and 5th and 95th Percentiles,
1970-71 through 1979-80**

School Year	State Total	5th Percentile	95th Percentile	Ratio of 95th to 5th Percentile
1970-71	\$ 702	\$ 503	\$ 822	1.63
1971-72	746	556	860	1.55
1972-73	804	600	929	1.55

Definitions

The tables on pages 12 through 31 contain 37 separate statistics for each school district, county, and region in the state. Definitions of these 37 statistics are given below. All of the data in the tables are for the 1979-80 school year.¹

1979-80 Average Daily Membership²

Average daily membership (ADM) is the average number of pupils in membership during the school year. Pupils need not be *in attendance* to be counted in ADM, but they must be *in membership* (i.e., currently enrolled in the district). For example, a pupil who is enrolled for the entire school year counts as 1.0 ADM; a pupil who is enrolled for exactly half the school year counts as .5 ADM.

The ADM counts in this report are, more specifically, counts of *total resident ADM*. They include all district residents who were enrolled in their home district, plus residents who were educated in other districts and for whom the home district paid tuition. Resident ADM counts are used in calculating foundation aid payments and property tax levy limitations.

- Prekindergarten Handicapped** — ADM of prekindergarten students enrolled in special education programs.
- Kindergarten** — ADM of students enrolled in kindergarten classes.
- Elementary, Grades 1-6** — ADM of students enrolled in grades 1-6, including students in elementary-level ungraded and special education classes.
- Secondary, Grades 7-12** — ADM of students enrolled in grades 7-12, including students in secondary-level ungraded and special education classes.
- Total** — Total ADM of all district residents, prekindergarten through grade 12; this is the total of columns 1 through 4.

Pupil Data

- Percent Minority** — The percentage of the district's students who are of American Indian, Alaskan, Black, Asian, or Hispanic origin.
- Percent Attendance** — The aggregate number of school days attended by all pupils during the school year, as a percentage of the total days these pupils could have attended.
- Percent Transported** — The number of public school pupils transported to and from school twenty or more days, as a percentage of the district's total average daily membership.³

Professional Staff

These statistics provide information about each district's professional staff. Staff are counted in full time equivalents (FTE). For example, a full time staff member is counted as 1.0 FTE; one employed only half time is counted as 0.5 FTE. Staff counts include only elementary-secondary personnel; AVTI personnel are excluded.

- Total Staff FTE** — The total number of licensed professional

staff employed by the district, measured in full time equivalents (FTE). This count includes administrators, classroom teachers, and all other licensed professional personnel.

- Pupil/Staff Ratio** — The number of pupils served in grades K-12 divided by the number of professional staff.

Tax Rates

These figures show the rates of school district property taxes payable in 1980. Tax rates, which are measured in mills, are computed by dividing the district's tax levies by the total valuation of property, and then multiplying times 1,000.

- Auditor Mills** — The actual tax rate of school districts, as determined by the county auditor. If the auditor tax rate is 50, then a property owner would be taxed \$50 for each \$1,000 of assessed value. Because of differences in local property assessment practices, comparisons of auditor tax rates among districts may be invalid.
- EARC Mills⁴** — The EARC mill rate is computed by multiplying the district's auditor tax rate times the 1979 market sales ratio. The market sales ratio is essentially the estimated average ratio of the market value (as determined by local assessors), to the actual selling price, for taxable property in the school district. Market sales ratios are compiled by the State Department of Revenue, and formally published by the Equalization Aid Review Committee, or EARC. This technique is intended to partially compensate for differences in assessment practices. Thus, when comparing tax rates among districts, it is more valid to use EARC tax rates than auditor tax rates.

Percent Revenues

These columns show the percentage of each district's revenues from federal, state, and local sources. Proceeds from sales of bonds and real property are excluded from the computations.

- Federal** — The percentage of revenues from the federal government.
- State** — The percentage of revenues from the Minnesota state government.
- Local and Other** — The percentage of revenues from local and other sources. This category includes revenues from property

¹ The two tax rate statistics and the 1979 EARC value are not directly applicable to any particular school year. The tax rates are for taxes payable in calendar year 1980 and the EARC value is for calendar year 1979.

² This is the second year that average daily membership counts have been printed in the *School District Profiles* report. Prior to the 1978-79 edition, the first three columns in the report contained counts of October 1 membership. Therefore, these data are not precisely comparable to the pupil counts in prior issues of *School District Profiles*. However, comparable data may be obtained from the Education Statistics Section.

³ Because of migration of pupils among districts, it is possible for the number of pupils transported 20 days or more to exceed a school district's average daily membership. Therefore, in some districts the computation of percent transported results in a figure greater than 100%. For these districts, the tables in this report show 100.0 for percent transported.

⁴ For districts in the Twin Cities area which are members of a special intermediate vocational-technical district (districts 287, 916, and 917), the EARC mill rate shown in column 12 includes a small additional tax rate for the special intermediate district. This additional tax rate is not included in the auditor mill rates, and it is not included in the county, region, and state EARC mill rates.

16. Total Pupil Units 1979-1980	1979-80 Expenditures per Pupil Unit																Other Measures per Pupil Unit				District Number
	17. Administration	18. Instructional Salaries	19. Other Instruction	20. Attendance and Health	21. Transportation	22. Plant Operation	23. Plant Maintenance	24. Fixed Charges	25. Food Service	26. Change in Funds Balance	35. State and Local Operating Costs	36. Bonded Debt	37. 1979 EARC Value

taxes, interest, rent, gifts, tuition and fees, sales of assets, payments from other school districts, and all other sources, except for federal and state government.

Pupil Units

16. Total Pupil Units, 1979-80 — This figure is computed by applying weightings to the district's average daily membership (ADM). Each kindergarten ADM counts as 0.5 pupil units; each prekindergarten, kindergarten handicapped, and elementary ADM counts as 1.0 pupil unit; each secondary ADM counts as 1.4 pupil units. Total pupil units are based on the ADM of all resident students (the figures in the first five columns of this report) plus the ADM of students who reside in other districts but are enrolled in this school district.⁵

1979-80 Expenditures per Pupil Unit

These columns show each district's expenditures in sixteen categories, divided by total pupil units (column 16). Each figure includes total district expenditures for the indicated purpose, minus reimbursement revenues received from other districts for the same purpose.

- 17. Administration** — Expenditures for salaries and other expenses of the school board, the superintendent, and other district-wide administrators.
- 18. Instructional Salaries** — Expenditures for salaries of teachers, principals, consultants, coordinators, librarians, guidance and counseling personnel, psychologists, and other instructional personnel.
- 19. Other Instruction** — Expenditures for salaries of paraprofessionals, aides, secretaries and clerical personnel, and for textbooks, some library costs, audio-visual materials, instructional supplies, and all other expenses of instruction.
- 20. Attendance and Health** — Salaries and other expenditures for attendance and health services, including contracted services.
- 21. Transportation** — Expenditures for transportation of pupils, including salaries, contracted services, insurance, fuel, vehicle maintenance, and other expenses.
- 22. Plant Operation** — Expenditures for salaries, contracted services, fuel, utilities, and other expenses for operating the school district plant.
- 23. Plant Maintenance** — Expenditures for salaries, contracted services, and other expenses for maintaining the school district plant and premises.
- 24. Fixed Charges** — Expenditures for retirement contributions, insurance payments, rental of land and buildings, interest on loans, abatements, unemployment insurance costs, severance pay, and other recurring expenditures that cannot be allocated to any other category.
- 25. Food Service** — Expenditures for food service salaries, food costs, and lunchroom supplies and equipment.
- 26. Student Activities** — Expenditures for all student activities over which the school board has financial control.
- 27. Tuition** — Total payments to other school districts for education of the district's resident pupils. This may include payments to vocational centers, special education cooperatives, or other schools in Minnesota or in other states.
- 28. Total Current Expenditures** — Total current expenditures per

pupil unit. This is a total of the eleven preceding categories of expenditures (columns 17 through 27). It includes all expenditures incurred for the benefit of elementary-secondary education for the 1979-80 school year, except for capital expenditures and debt service.

- 29. Community Services** — Expenditures for recreation, civic activities, adult education, and other community services. In general, these are community oriented programs not directed toward regular elementary-secondary education.
- 30. Capital Equipment** — Expenditures for equipment and all other capital items except for buildings and sites.
- 31. Buildings and Sites** — Expenditures for buildings and sites.
- 32. Debt Service** — Expenditures for retirement of bonds and state loans.

Other Measures per Pupil Unit

These columns contain several indicators useful for understanding differences among school districts

- 33. Unappropriated Operating Funds Balance⁶** — The total of the unappropriated fund balances, excluding statutory operating debt, from the district's four operating funds (General, Food Service, Pupil Transportation, and Community Service Funds) on June 30, 1980, divided by 1979-80 resident pupil units. This figure is a measure of the district's financial condition and of resources available for future years.
- 34. Change in Funds Balance** — The difference between the district's unappropriated operating funds balance on June 30, 1980 and on June 30, 1979, divided by 1979-80 resident pupil units. A negative number indicates that the district's expenditures exceeded revenues in the four operating funds.
- 35. State and Local Operating Costs⁷** — State and local operating costs per pupil unit for 1979-80. This figure, sometimes referred to as adjusted maintenance cost, is used to compare overall costs of education among districts. Federal financing is not included, since most federal funds are provided to meet specific problems rather than to contribute to general education. Also excluded from the computation are expenditures for capital outlay, debt service, transportation and community services, revenues from sales of lunches and materials, and student activity revenues.
- 36. Bonded Debt** — The total bonded debt of the district, including state loans, on June 30, 1980, divided by resident pupil units.
- 37. 1979 EARC Value** — The 1979 adjusted assessed valuation of the district, as published by the Equalization Aid Review Committee (EARC), divided by 1979-80 resident pupil units. This figure is an indicator of the ability of the district to raise money through local property taxes.

⁵ In computing total pupil units, students who are residents of one school district but attend school in another district are counted twice, if the resident district pays tuition to the district attended. These students are counted once in the district where they attend school and once in their resident district. In 1979-80 there were 8,557 students (5,464 pupil units) in this category. Thus the state total of pupil units in column 16 of this report includes some double counting. This measure of pupil units is used because it provides the most valid comparison with expenditures. If these students were counted only in their resident district or only in the district attended, the expenditures per pupil unit would be unrealistically high in the other district.

⁶ Several adjustments are made in the computation of unappropriated operating funds balances, in order to make the figure a more accurate measure of the financial resources available for future years. The effect of the adjustments is to increase the fund balances for all districts which were in statutory operating debt on June 30, 1977, and for all districts which receive taconite payments. For a more complete explanation of these adjustments, contact the School Financial Management Section of the Department of Education.

⁷ In districts which received large amounts of federal revenues for summer school programs, the figure shown for state and local operating costs may be unrealistically low.

Data for Elementary-only and Nonoperating Districts

Unlike the other 434 districts listed in this report, the five districts in the table below do not directly operate both elementary and secondary schools. The first three districts (Nett Lake, in St. Louis County; Pine Point, in Becker County; and Winsted, in McLeod County) operate elementary schools, but their secondary students are transported to other districts. The other two districts (Franconia, in Chisago County; and Prinsburg, in Kandiyohi County) direct-

ly operate no schools, but contract with other districts for the education of their resident students.

Because of their unique structures and functions, it may be misleading to compare these districts to the elementary-secondary districts in this report. Data for these five districts are not included in the Summary Statistics on page 32 or in the county, region, and state totals on pages 28 through 31.

Data for ECSU Regions

The state Legislature has set up nine Education Cooperative Service Units (ECSUs), each serving a region of the state. The figures below are totals for each of the ECSU regions. The boundaries of the ECSU regions are the same as the boundaries of the development regions (see map on page 11), with the following exceptions: ECSU region 1 contains development regions 1 and 2, ECSU region 6 contains development regions 6E, 6W, and 8, and ECSU region 7 contains development regions 7E and 7W.

Data for Counties, Development Regions, and the State

The figures listed below are, for each county, totals for all school districts which have their central offices in the county. Totals are also listed for the state's thirteen development regions. The map on page 11 shows the boundaries of these regions.

Summary Statistics

To aid in interpretation of the data, the highest and lowest values, 5th and 95th percentiles*, the median, and the state totals** are listed below for each data item.

	Lowest Value	5th Percentile	Median (50th Percentile)	95th Percentile	Highest Value	State Totals**
1979-80 Average Daily Membership						
1. Pre-Kindergarten Handicapped	0	0	0	12	392	1,482
2. Kindergarten	5	13	48	362	2,741	49,381
3. Elementary (Gr. 1-6)	49	90	292	2,714	18,906	326,549
4. Secondary (Gr. 7-12)	49	111	379	3,335	19,336	394,266
5. Total (Pre-K through Gr. 12)	107	208	730	6,441	41,031	771,678
Pupil Data						
6. Percent Minority	0	0	1.3	7.0	99.6	5.0
7. Percent Attendance	83.7	92.8	94.7	96.1	96.8	94.1
8. Percent Transported	17.7	48.6	75.4	97.4	100.0	74.1
Professional Staff Data						
9. Total Staff (FTE)	12	17	51	377	2,629	49,391
10. Pupil-Staff Ratio	7.7	11.3	14.5	17.7	26.6	15.7
Tax Rates						
11. Auditor Mills	14.10	38.34	50.69	70.83	103.22	48.04
12. EARC Mills	8.93	20.15	29.67	41.50	58.97	32.19
Revenue Percentages						
13. Federal	2	3	6	12	37	6
14. State	2	28	54	70	82	52
15. Local and Other	1	23	39	64	96	42
16. Total Pupil Units, 1979-80	123	253	869	7,450	47,887	911,440
1979-80 Expenditures per Pupil Unit						
17. Administration	27	42	81	161	269	66
18. Instructional Salaries	630	772	902	1,130	1,861	992
19. Other Instruction	69	95	147	236	516	168
20. Attendance and Health	0	0	6	18	79	16
21. Transportation	38	79	140	224	350	128
22. Plant Operation	76	113	165	255	475	171
23. Plant Maintenance	0	7	23	60	166	30
24. Fixed Charges	56	76	107	178	334	129
25. Food Service	23	75	107	148	282	101
26. Student Activities	0	17	54	112	258	44
27. Tuition	0	5	35	95	367	28
28. Total Current Expenditures	1,421	1,579	1,800	2,243	3,955	1,872
29. Community Services	0	0	21	63	274	40
30. Capital Equipment	3	23	59	140	392	52
31. Buildings and Sites	0	6	46	376	4,436	131
32. Debt Service	0	0	99	272	763	140
Other Measures per Pupil Unit						
33. Unappropriated Operating Funds						
Balance	-368	-39	326	998	1,868	316
34. Change in Funds Balance	-348	-99	57	243	648	54
35. State & Local Operating Costs	1,155	1,261	1,437	1,812	2,549	1,525
36. Bonded Debt	0	0	690	2,732	7,923	1,065
37. 1979 EARC Value	99	12,315	25,389	53,206	120,451	25,861

* The range, defined as the difference between the highest and lowest values of a variable, is a measure of the amount of variability between districts. However, one or more unusually high or low values can significantly increase the size of the range. Because of this problem, the difference between the 95th and 5th percentiles is also frequently used as a measure of variability.

** For data items which are percentages or ratios (i.e., all data items except

average daily membership, total staff FTE, and total pupil units), the state total for the data item is computed as the state total of the numerator divided by the state total of the denominator. For example,

$$\text{State total pupil-staff ratio} = \frac{\text{State total of pupils}}{\text{State total of staff}}$$

For these data items, the state total is a form of a weighted average.
