## INTRODUCTION

There was a significant change in vocational education as a result of the 1976 Vocational Education Amendments. This law, called Title II, complemented the basic non-discrimination requirements of another federal law, Title IX.

The vocational law required that vocational programs work to actively overcome sex bias, stereotyping and discrimination. As a result of Title II there have been substantial changes in traditional practices, policies, procedures and attitudes. This has resulted in greater participation of women and girls in vocational education.

The new Carl D. Perkins Vocational Education Act of 1984 is a landmark statute for women and girls. It contains the largest set-aside of vocational training dollars targetted to female populations in U.S. history. In addition, the law provides encouragement to states to support programs and strategies dealing with sex equity issues. The new law has the potential to provide greatly increased opportunities for women and girls.

Women and girls have a far greater range of interests, abilities and economic needs than their enrollment and employment patterns would suggest. The economic condition of women and female-headed families shows that women need to be trained for jobs that provide a living wage.

This report is the ninth is a series presenting data on the status of men and women in Minnesota's AVTI system. The format is like that of publications of the past several years. The body of the report provides current and trend data statewide for student enrollment and follow-up and for staff patterns. A detailed appendix provides information for individual AVTIs, a course-by-course statewide listing and definitions.

It should be noted that 1983-84 student data are from a different data base than those of previous reports. The information from prior years are from budget data, which are no longer available by sex. The 1983-84 data are from the post-secondary follow-up system. The data from previous years are included, despite being from a different data base, in order to provide some comparison.

In addition, a small number of students were not included because gender was not indicated. However, this was only one or two students in a handfull of classes and their exclusion is not statistically significant.

Both statewide and individual school data are presented in this report. Statistical information is no substitute for active sex equity efforts. However, the statistics can be used to indicate areas needing special efforts and to measure progress.

## AVTI ENROLLMENTS, 1983-84

In the fall of 1983, AVTIs had higher enrollments than any of the public higher education systems except the University of Minnesota. Male students account for the majority of AVTI enrollments. In 1983-84 the total statewide enrollment of 50,618 consisted of 20,086 female students and 30,532 male students.

The AVTI system has a lower percentage of female students than all other public post-secondary systems in Minnesota -- the Community college system (58 percent female), the State University System (53 percent female) and the University of Minnesota system (45 percent female).

Women are the majority of students at two AVTIs: East Grand Forks and Rochester. At eight additional AVTIs, women represent less than one-third of students. Women account for one-third to one-half of students at the remaining 23 AVTIs. (See Table 1.)

AVTI HEADCOUNT, 1983-84

50,618 students

Except where otherwise noted, all enrollment data in this report refer to an actual student headcount of all students enrolled at a particular time during the school year. Average daily membership, the usual measure of enrollment, is not reported by sex.

## AVTI ENROLLMENT TRENDS

Enrollment figures for 1983-84 show a greater number of students than 1982-83. The percentage of AVTI students who are women is slightly lower.

Over the years, female enrollments have remained fairly constant. Since 1977-78 there has been an increase in both female and male enrollments - 16\% for women and $20 \%$ for men.

## STUDENT HEADCOUNT ENROLLMENTS

## PROGRAM TYPES, 1983-84

A total of 861 programs are offered at individual AVTIs in the state, with an average of 26 programs per school.

Nearly three-fourths of AVTI programs are "segregated". This term is not meant to imply that segregation is intentional. In this report, a segregated program is defined as one in which more than 80 percent of the students are of one sex.

Segregated programs in which more than 80 percent of student are men are defined as "male" programs, and those in which more than 80 percent of the students are women are defined as "female" programs. All other programs are considered "integrated".

For example, Automotive Specialist is usually a segregated "male" course and Practical Nursing is usually a segregated "female" course, while Real Estate Sales is usually an integrated course. A course may be segregated at one AVTI and integrated at another.

## AVTI PROGRAMS, 1983-84

861 PROGRAMS

Of the 861 programs offered at individual AVTIs, 413 are segregated "male" programs and 227 are segregated "female" programs. In fact, nearly three in ten programs are either all-male or all-female. (See Tables 2 and 4.)

## PROGRAM TYPES - TRENDS

The number of AVTI programs which are integrated has increased steadily over the years.

The total number of programs offered at individual AVTIs is nearly 11 percent greater than the past year, while the number of integrated programs is 12 percent greater. Over the past several years integrated programs have accounted for one-quarter of all AVTI programs.

PROGRAM TYPE

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| \# of SEGREGATED Programs | 592 | 592 | 579 | 581 | 590 | 570 | 640 |
| 非 of INTEGRATED Programs | 165 | 181 | 196 | 198 | 190 | 198 | 221 |
| TOTAL Programs | 757 | 773 | 775 | 779 | 780 | 768 | 861 |

## PROGRAM TYPES - TRENDS, continued

Segregated programs are not evenly divided into "male" and "female" courses. Since 1977-78 segregated "male" courses have outnumbered segregated "female" courses by a substantial margin.

Data for the current year show nearly the same percentage of "male" and "female" programs as last year.

SEGREGATED PROGRAMS

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| 非 of "MALE" Programs | 377 | 368 | 353 | 356 | 373 | 369 | 413 |
| 非 of "FEMALE" Programs | 215 | 224 | 226 | 225 | 217 | 201 | 227 |
| TOTAL Segregated Programs | 592 | 592 | 579 | 581 | 590 | 570 | 640 |

## ENROLLMENTS BY PROGRAM TYPE, 1983-84

The number of students enrolled in a program varies widely from less than 10 at several schools to several hundred at others. For this reason, it is helpful to compare the numbers of students as well as the numbers of programs, to determine enrollment patterns by sex.

A "traditional" student is one enrolled in a segregated program dominated by students of the same sex -- men in "male" courses and women in "female" courses. A "non-traditional" student is one enrolled in a course in which more than 80 percent of students are of the other sex.

As shown in the chart below, the large majority of AVTI students are enrolled in traditional programs, while about 1 in 30 students are enrolled in programs which are non-traditional for their sex. More than one-quarter of all AVTI students are enrolled in integrated programs.

AVTI ENROLLMENT BY PROGRAM TYPE, 1983-84

integrated
non-traditional \#\#\# traditional
50,618 students

At nine AVTIs -- Albert Lea, Mankato, Minneapolis, Moorhead, 916, Pipestone, Red Wing, St. Cloud and Staples -- integrated programs account for more than one-third of all students.

Hibbing and East Grand Forks continue to have the largest proportion of students enrolled in non-traditional programs, accounting for seven and six percent respectively. In addition, three schools -- Duluth, Minneapolis and Rochester -- have non-traditional enrollments of at least five percent.

## ENROLLMENTS BY PROGRAM TYPE, continued

Both male and female students are likely to be enrolled in programs which are traditional for their sex, and unlikely to be enrolled in non-traditional programs. However, there are differences in the enrollment patterns of men and women attending AVTIs.

Female students are more likely than male students to be enrolled in integrated programs -- one-third of women compared to one-fourth of men. Female students are over two times as likely as male students to be enrolled in non-traditional programs -- about 1 in 18 female students compared with about 1 in 44 male students. (See Tables 6 and 7.)

AVTI ENROLLMENT BY PROGRAM TYPE, 1983-84

Statewide, almost one in six AVTI students are enrolled in programs which are either all-male or all-female. (Note: There were ten programs in which there was only one-sex in which gender was not specified.) There are 5,450 male students in programs with no women and 3,001 female students in courses with no men. (See Tables 3 and 4.)

In addition, many courses have only one female student or only one male student. These pioneering students are in courses with an average of 41 students of the other sex. Eighty-eight women are "the only woman" in courses such as Cable Television Technician. Thirty-seven men are "the only man" in courses such as Optometric Assistant. (Note: There was only one course in which there was only one person of any sex in which gender was not specified.)

## ENROLLMENTS BY PROGRAM TYPE - TRENDS

Little change has occurred over the past five years in enrollment patterns for traditional, non-traditional and integrated programs. 1983-84 data show a slight increase in both traditional and non-traditional enrollments. Integrated enrollments decreased slightly.

The proportion of students enrolled in integrated programs has remained at more than one-quarter, up from one-fifth five years ago. Non-traditional students account for about 1 in 28 students, and there has been relatively little change since 1978-79.

STUDENT ENROLLMENT BY PPROGRAM TYPE

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |

| TOTAL Students | 42,623 | 41,425 | 45,387 | 48,050 | 49,885 | 49,386 | 50,618 |

## ENROLLMENTS BY PROGRAM TYPE - TRENDS, con't.

FEMALE ENROLLMENTS BY PROGRAM TYPE

Over the years there has been more change in female enrollment patterns than in male enrollment patterns.

Female integrated enrollments have increased from fewer than 1 in 4 to 1 in 3. Female non-traditional enrollments showed a slight gain in 1983-84.

MALE ENROLLMENT BY PROGRAM TYPE

Since 1977-78 there has been positive change in male enrollment patterns. However, this change has been at a slower rate than that of female enrollments.

Male enroliments in integrated programs remained at about 1 in 4 , up from 1 in 5 in late 1970's.

## ENROLLMENT BY CURRICULUM AREA, 1983-84

The graph below shows the distribution of male and female students in the seven AVTI curriculum areas.

Almost two-thirds of female students are enrolled in health or businessoffice programs, while nearly three-fourths of male students are enrolled in technical or trade-industrial programs. (See Table 8.)

AVTI HEADCOUNT BY CURRICULUM AREA, 1983-84

MALES
FEMALES

There is also segregation within program areas. For example, over half of male office students are enrolled in just 2 of the 17 courses offered: Accounting and Computer Programming.

Just over half of female students in the trade-industrial area are enrolled in just 2 of the 58 courses: Commercial Arts and Offset Printing. (See Table 11.)

## ENROLLMENT BY CURRICULUM AREA - TRENDS

There have been few changes in male and female enrollment patterns by program since 1977-78. Agriculture, technical and trade-industrial courses continue to be "male" courses; business and office is nearly 80 percent female. Home economics and distribution are more balanced areas.

The charts below and on the following pages show changes in enrollment patterns by curriculum area. For more information on enrollment in specific courses in 1983-84, see Table 11 in the appendix to this report.

## HEADCOUNT ENROLLMENT BY CURRICULUM AREA - AGRICULTURE

Women continue to represent about 1 in 7 agriculture students.

Female enrollments in this area have been below that of 1977 for the past several years.

Of the 14 agriculture courses offered statewide, 8 are "male" courses, one is a "female" course and 5 are integrated courses. The "male" courses account for over threefifths of agriculture students. Just over one-third of the students are enrolled in integrated courses.

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Number of MALES | 1,718 | 1,629 | 1,729 | 1,809 | 1,991 | 1,808 | 1,815 |
| Number of FEMALES | 337 | 352 | 445 | 376 | 342 | 310 | 312 |
| TOTAL | 2,055 | 1,981 | 2,174 | 2,185 | 2,333 | 2,118 | 2,127 |

## CURRICULUM AREA - TRENDS, con't.

HEADCOUNT ENROLLMENT BY CURRICULUM AREA - DISTRIBUTION

Distribution has historically been the most balanced by sex of the curriculum areas.

Of the 24 distribution programs offered statewide, 12 are integrated while 6 are "male" courses and 6 are "female" courses. Over three-fifths of students are enrolled in the integrated courses.

|  | $71-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of MALES | 1,545 | 1,540 | 1,463 | 1,459 | 1,665 | 1,414 | 1,607 |
| Number of FEMALES | 1,756 | 1,832 | 1,874 | 1,984 | 2,084 | 2,130 | 2,190 |
| TOTAL | 3,301 | 3,372 | 3,337 | 3,443 | 3,749 | 3,544 | 3,797 |

## HEADCOUNT ENROLLMENT BY CURRICULUM AREA - HEALTH

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Number of MALES | 377 | 390 | 425 | 574 | 607 | 708 | 766 |
| Number of FEMALES | 4,795 | 4,350 | 5,014 | 5,028 | 5,077 | 4,625 | 4,712 |
| TOTAL | 5,172 | 4,740 | 5,439 | 5,602 | 5,684 | 5,333 | 5,478 |

Men now represent nearly 1 in 7 health students. Their enrollment has increased by over 100 percent since 1977-78 compared to a 2 percent decrease in female enrollments.

Beginning in 1982-83 several courses previously assigned to Trade \& Industrial were assigned to Health.

Of the 22 health courses offered statewide, 11 are "female" courses, 4 are "male" courses, and 7 are integrated courses. Over four-fifths of health students are enrolled in a "female" class.

## CURRICULUM AREA - TRENDS, con't.

There has been more change in the home economics area than in any other. Men now represent over two-fifths of students.

Of the 22 home economics courses offered statewide 7 are "female", 12 are integrated and 3 are "male". Over half of students are enrolled in integrated courses.

HEADCOUNT ENROLLMENT BY CURRICULUM AREA - HOME ECONOMICS

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of MALES | 153 | 140 | 134 | 204 | 503 | 1,721 | 1,821 |
| Number of FEMALES | 602 | 540 | 723 | 815 | 1,127 | 2,445 | 2,378 |
| TOTAL | 755 | 680 | 857 | 1,019 | 1,630 | 4,166 | 4,199 |

HEADCOUNT ENROLLMENT BY CURRICULUM AREA - BUSINESS \& OFFICE

|  | $71-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of MALES | 1,534 | 1,474 | 1,663 | 1,755 | 2,069 | 2,198 | 2,236 |
| NUmber of FEMALES | 6,987 | 6,777 | 7,494 | 7,891 | 8,268 | 8,419 | 8,220 |
| TOTAL | 8,521 | 8,251 | 9,157 | 9,646 | 10,337 | 10,617 | 10,456 |

iMen continue to represent 1 in 5 business-office students. There has been little change in this area since 1977-78.

Of the 17 courses offered statewide, 10 are "female" courses, and 7 are integrated courses. There are no "male" courses. Just over three-fifths of the students are enrolled in the integrated courses.

## CURRICULUM AREA - TRENDS, con't.

HEADCOUNT ENROLLMENT BY CURRICULUM AREA - TECHNICAL

Women account for about 1 in 9 technical students. Although their representation has decreased over the last several years, it remains above the level of 1977-78.

Of the 35 technical courses offered statewide, 30 are "male" course and 5 are integrated courses. There are no "female" courses. The male courses account for nearly nine-tenths of the students.

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Number of MALES | 3,254 | 3,136 | 3,593 | 3,714 | 4,278 | 5,600 | 5,935 |
| Number of FEMALES | 314 | 405 | 550 | 538 | 603 | 775 | 780 |
| TOTAL | 3,568 | 3,541 | 4,143 | 4,252 | 4,881 | 6,375 | 6,715 |

HEADCOUNT ENROLLMENT BY CURRICULUM AREA - TRADE \& INDUSTRIAL

|  | $77-78$ | $78-79$ | $79-80$ | $80-81$ | $81-82$ | $82-83$ | $83-84$ |
| :--- | ---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number of MALES | 16,806 | 16,036 | 17,034 | 18,427 | 18,260 | 15,860 | 16,352 |
| NUmber of FEMALES | 2,467 | 2,807 | 3,246 | 3,476 | 3,011 | 1,373 | 1,494 |
| TOTAL | 19,273 | 18,843 | 20,280 | 21,903 | 21,271 | 17,233 | 17,846 |

Women account for about 1 in 12 trade-industrial students.

Of the 58 trade-industrial courses offered statewide, 48 are "male" courses and 10 are integrated courses. The integrated courses account for 17 percent of students.

There are no "female" courses. Seven courses have no female students.

## STAFF PATTERNS, 1983-84

Staff patterns provide another measure of sex equity in vocational education. Staff data in this report are expressed in full-time equivalents (FTEs).

There are 1,927 AVTI teachers in the seven curriculum areas. There are an additional 371 staff in vocational related activities. Overall, less than one-third of these staff are women. Women account for slightly more than one-quarter of the curriculum area and almost two-fifths of the vocationalrelated staff. The only school where the majority of all teachers and vocational related staff are women is East Grand Forks AVTI, where women account for almost 51 percent of students and slightly more than 51 percent of teachers. At Rochester AVTI 53 percent of instructors in the seven curriculum areas are women, 53 percent of the students at Rochester AVTI are women.

1,927 FTE TEACHERS

Female teachers have lower average salaries than male teachers at 30 of the 33 AVTIs, including 8 schools where the women have more years of service than their male counterparts.

Statewide, men now earn an average of $\$ 2,332$ per year of service, compared with 2,263 for women. (See Table 14 and 15.).

Women account for 19 percent of post-secondary administrators and supervisors in the state.

## TEACHERS BY CURRICULUM AREA, 1983-84

The chart below shows the distribution of teachers by curriculum area, excluding vocational related activities. Three-fourths of female teachers are in health or business-office programs, while more than three-fifths of male teachers are in technical or trade-industrial programs.

Only one in seven of the 1926.5 FTE teachers are women in technicai or trade \& industrial programs -- accounting for less than 2 percent of all teachers in these areas.

AVTI TEACHERS BY CURRICULUM AREA, 1983-84

The proportion of teachers who are female is lower than the proportion of students who are female in every program area except health. This is true even for some areas that are predominately female such as business-office, where women are 79 percent of the students but only 49 percent of the teachers.

## STAFF TRENDS

Since 1977-78, there has been a net increase of 34 FTE teaching positions at Minnesota AVTIs. This included a decrease of 48 male teachers and a gain of 82 female teachers. The statewide representation of female teachers increased accordingly over this period, from 25 percent to nearly 29 percent of all AVTI teachers.

There has been an overall gain in the representation of women among post-secondary vocational administrators and supervisors since 1977-78. Women have gone from 11 to 19 percent during this time.

## STUDENT FOLLOW-UP, 1983-84

Data are available for 12,467 women and 16,512 men who left AVTI programs in fiscal year 1983. There are few differences between women and men. The major exception is women's earnings - they are consistently lower than the average earnings of all students.

The students who leave an AVTI are classified as either dropouts or completers. There are some differences in dropout and completion rates of women and men. Overall, women are slightly less likley to dropout and more likley to complete than their male counter parts. Women have a higher dropout rate in agriculture, technical and trade-industrial. The difference in agriculture is greater than the other two curriculum areas. Women have a higher completion rate in distribution, health, home economics and business and office. The greatest difference is in business and office. (See Table 16.)

There is also information on placement of students who are available for work and are placed in a job related to their course of study. There is a very high placement rate of these students, with few differences by sex. The largest differences are in agriculture, where men have a higher placement rate, and in health and business and office, where women have higher placement rates. (See Table 16.)

The salary data is available only by all students and by female students. There is not a separate breakdown for male students. Overall, as well as by every curriculum area, women's salaries are less than men's salaries.

## DEFINITIONS

All data in this report are from the Minnesota Department of Vocational Education, as reported by local school districts. The following definitions are used:

Enrollment. The annual headcount conducted on October 1 includes every. student enrolled in an AVTI on that date, and does not control for the amount of time a student is enrolled.

Course or Program. For the purposes of this report, programs have been limited to courses of study related to an occupation such as Health Aide or Welding. Special needs programs and other administrative and support programs have not been included.

Curriculum Area. Curriculum areas are the seven program areas: Agriculture, Distribution, Health, Home Economics, Business-Office, Technical and Trade \& Industrial.

Segregated. Programs are defined as segregated if over 80 percent of their enrollments are of one sex.

Integrated. A program which is not segregated by sex is integrated.
"Male" Programs. A segregated program is defined as a "male" program if more than 80 percent of the students are male.
"Female" Programs. A segregated program is defined as a "female" program if more than 80 percent of the students are female.

Traditional. Students enrolled in programs where the total enrollment exceeds 80 percent of their own sex are defined as traditional students.

Non-Traditional. Students enrolled in segregated programs dominated by students of the other sex are defined as non-traditional students.

Average Yearly Salary. This salary is the total contracted salary based on full-time equivalence, and therefore controls for the number of weeks worked and for part-time employment.

Average Years of Service. Years of service refers to total years as a licensed teacher or administrator, not simply as an employee of a particular institution.

Dropout Rate. The percentage of male or female students who leave an AVTI that are dropouts.

Completion Rate. The percentage of male or female students who leave and AVTI that have completed their course of study.
