Introduction

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1972 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are nine categories of workers excluded from covered under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local level of government;
- 9) the Red Lake Chippewa Tribe.

Terms

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and that figure by 13. Average weekly wage figures should be used with caution. Some industries employ more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower paid seasonal workers were laid off.

Unallocated employment is listed on page 31. It represents employment of traveling salesperson who have no attachment to a specific work site on those few employers who are not able to report multiple business locations separately.

Fourth Quarter 1987 Covered Employment

Minnesota covered employment averaged 1,948,579 during the fourth quarter of 1987. Since the fourth quarter of 1986, employment increased 4.1%, or a total of 77,124 jobs. Total wages were almost \$10.4 billion for the quarter, up 9.8% from 1986. Average weekly wages increased 5.7%, from \$388 in 1986 to \$410 in 1987.

Minnesota private sector employment generally declines between the third and fourth quarters, while public sector employment increases dramatically with the beginning of the school year. This year was no exception. Private sector employment declined by .4% or 6,349 jobs (compared to 1.2% in 1986). Large seasonal decreases in construction (9,070 jobs) and agriculture (3,195 jobs) were partially offset by seasonal increases in trade (8,420 jobs).

Since the fourth quarter of 1986, all major industry groups have experienced employment growth, with the largest gains occurring in trade (5.6% or 26,724 jobs), services (5.4% or 23,192 jobs) and manufacturing (3.7% or 13,662 jobs). With the exception of Region 6W (which lost 16 jobs), all regions have grown since 1986. The Twin Cities Metropolitan Area, which accounts for approximately two-thirds of all employment in the state, also accounts for almost two-thirds of the growth in employment over the past year.

The largest industry in the state, Trade, also experienced the largest rate of growth. Most of the new jobs occurred in the Twin Cities (18,949), especially in general merchandise stores and eating and drinking establishments. The second largest industry, Services, experienced the second largest growth rate. Again, most of this growth occurred in the Twin Cities (15,150). Business services accounted for half of these jobs.

Manufacturing Employment Rises in Greater Minnesota

Unlike trade and services, most of the growth in Manufacturing occurred outside the Twin Cities. Manufacturing employment increased by 6.6% or 8,296 jobs in Greater Minnesota compared to 2.2% or 5,366 jobs in the Twin Cities. Most of this growth occurred in Regions 6E, 7W and 10, which surround the Twin Cities. Major industries of growth in these regions included food products, fabricated metals, non-electrical machinery and electrical and electronic equipment.

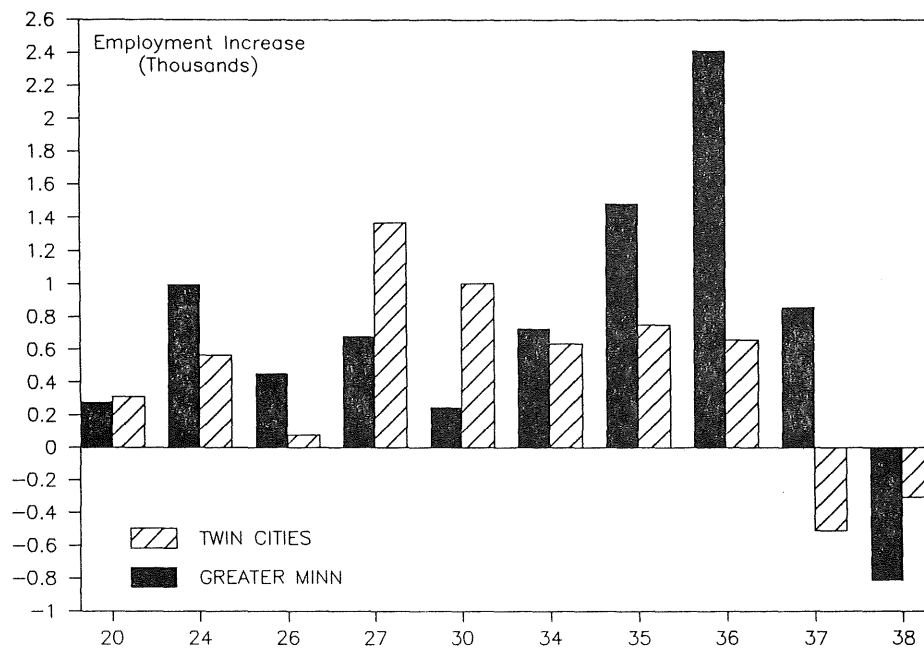

Of the thirteen economic regions in Minnesota, manufacturing is the largest industry in only two, Regions 6E and 9. Since 1986, manufacturing grew the fastest in Region 6E, 17.1%, and the slowest in Region 9, .3%. Region 6E is strong in food products, paper and allied products and electrical and electronic equipment.

Food products, printing and publishing and electrical and electronic equipment are major industries in Region 9. However, the area suffered employment declines in the manufacturing of food products and instruments and medical products.

Statewide, electrical and electronic machinery was the fastest growing industry in the manufacturing division with an 11.7% increase since 1986. This industry also generated the greatest number of new jobs (3,080). Again, most of this growth occurred in Greater Minnesota. It was the result of expansions within existing firms rather than new firms. Other industries of growth included printing and publishing, lumber and wood, and rubber and plastic products. Fabricated metals and non-electrical machinery began to rebound, although employment is still below previous levels, while instruments and miscellaneous manufacturing continued to decline.

The graph on the following page shows a comparison of employment increases occurring in the Twin Cities Metropolitan Area and Greater Minnesota for the ten largest manufacturing industries in the State.

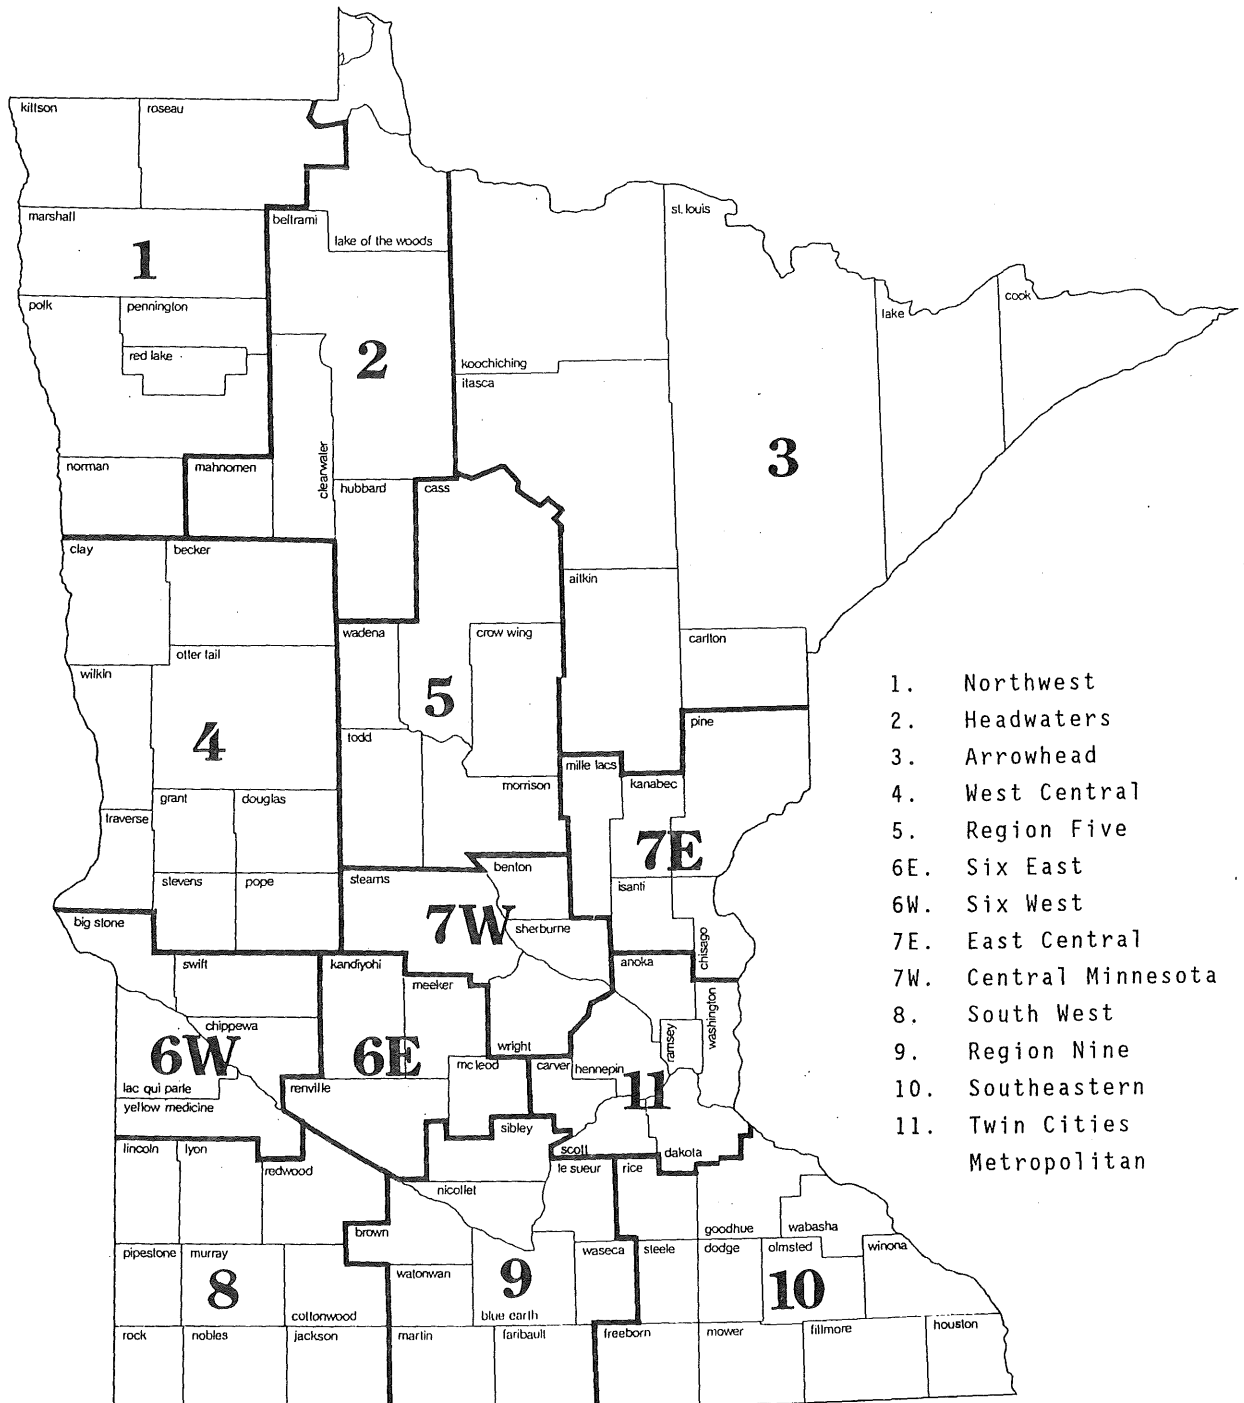

Employment Increases – Manufacturing Industries Twin Cities Metropolitan Area and Greater Minnesota Fourth Quarter 1986 – 1987

Two Digit Manufacturing Industries

Industry Code	Industry Titles
20	Food Products
24	Lumber & Wood Products
26	Paper & Allied Products
27	Printing & Publishing
30	Rubber & Misc. Plastic Products
34	Fabricated Metal Products
35	Machinery except Electrical
36	Electrical & Electronic Equipment
37	Transportation Equipment
38	Instruments & Medical Products
