INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are nine categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government;
- 9) the Red Lake Chippewa Tribe.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the affect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 31. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

Third Quarter 1988 Covered Employment

Minnesota covered employment averaged 1,979,400 during the third quarter of 1988. This was 67,824 more than the average for the same period in 1987, an increase of 3.6 percent. The total payroll for the period was over \$10.5 billion, a jump of 10.4 percent from third quarter 1987. On average, workers were paid \$409 per week, \$16 more than the year before. Compared to the previous quarter, private sector employment increased 2.9 percent.

Minnesota's primary industry groups continued to add the most jobs. Trade, the largest, grew by 17,860 jobs, or 3.6 percent over third quarter 1987. Services added 21,650 jobs (4.8 %) and Manufacturing 17,980 (4.7%). Government, the fourth largest industry in Minnesota, grew by 3.2 percent, adding 7,860 people. The much smaller Mining industry had the largest percentage increase (11.7%) by adding just over 800 new jobs. Transportation, Communication, and Public Utilities, almost matched overall state growth by adding 3,070 jobs (3.4%).

The other industry groups grew very little, or not at all. In all of Agriculture, Forestry, and Fishing, fewer than 300 jobs were added, a gain of 1.7 percent. Finance, Insurance, and Real Estate remained at almost exactly the same level as in 1987. After steadily increasing over the last several years and seeming to peak in 1987, Construction fell back slightly in 1988, averaging 1,765 fewer jobs per month, a 2.0 percent decline.

Twin Cities Metropolitan Area (Region 11)

Twin City area employment continued to grow somewhat faster than the rest of the state, as over 38,000 (56%) of the new jobs since third quarter 1987 were in the seven county Metropolitan area. More than one-third (13,822) of these jobs were in the Services industry, giving it a 4.7 percent growth rate and maintaining its place as the second largest industry in Region 11. The largest industry, Trade, added 10,302 jobs (3.3% growth), and Manufacturing increased by 9,414 jobs (3.8%). Government grew by 4,268 (3.2%).

The lion's share of this growth occurred in Hennepin County, as over 16,000 (42.3%) of the new jobs were located there, mostly outside the city of Minneapolis. Dakota county had the highest rate of growth (10.0%), as it added 8,448 jobs since third quarter 1987. Ramsey County garnered 15.6 percent or 5,946 of the new jobs and Anoka County 11.2 percent (4,246). Only a little growth occurred in Washington (1,820 new jobs), Scott (1,162) and Carver (337) Counties.

Greater Minnesota

Economic growth in Greater Minnesota has been mostly negative or sluggish over the last ten years. The period from September of 1978 to September 1988 realizes a net gain of only 44,529 new jobs. The very last year of that period, however, saw 29,774 or 68 percent, of that total gain. That figure also represents 43.9 percent of all the new jobs in the State in that year, the largest share of the "pie" to go to Greater Minnesota in many years. Only time will tell if this year was only an aberration or a real reversal of recent trends, but it is nice to see a little economic vigor out there again.

Manufacturing led the way in Greater Minnesota with an increase of 6.3%, or 8,567 net new jobs. That was almost half (47.6%) of all the new manufacturing jobs in Minnesota in that twelve month period. All Regions except 1, 2, 4, and 6W in Northern and Western Minnesota added at least 500 manufacturing positions, and Regions 9 and 10 in the South Central and Southeast added 1,009 and 2,015 respectively. Over 60 percent of the new employment in Region 9 occurred in "Electronic Equipment and Components", with the remainder mainly in "Industrial and Commercial Machinery". This industry also accounted for over 60 percent of the increase in Region 10.

Other industrial divisions with significant growth were Services with 7,834 jobs (5.0%) and Trade, with 7,562 (4.0%).

A Closer Look at the Northern Tier

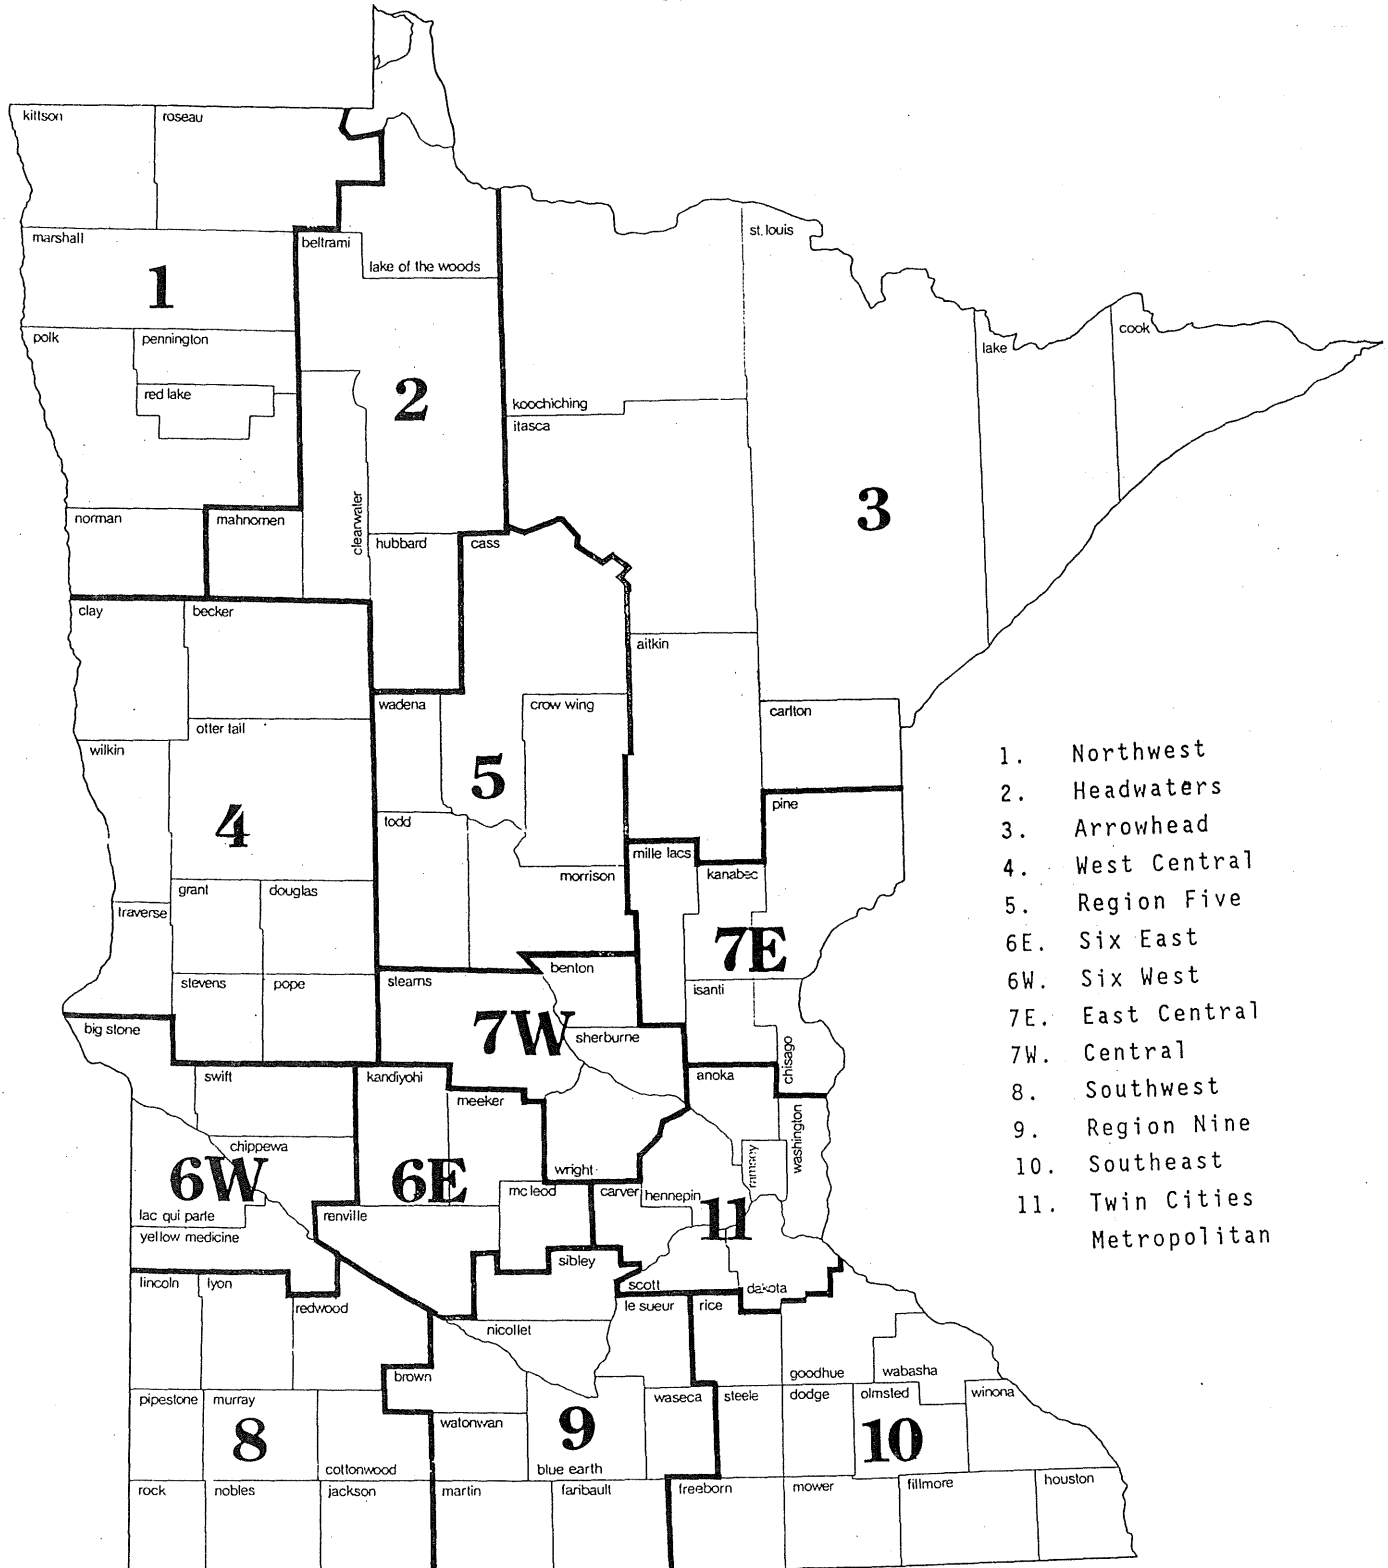

Average total employment in the Northwest (Region 1) grew by almost 800 jobs (2.9%). The majority of the new employment was in Manufacturing (368), Trade (255) and Government (172). Roseau County has 63 percent of the jobs in manufacturing and Polk, Roseau and Pennington Counties split 78 percent of the covered employment in this region.

For at least the nine plus months of the school year Government is the largest employer in the Headwaters Region (2), and indeed it also added the most new jobs (280) since third quarter 1987. Trade (181), Manufacturing (140) and Construction (102) also saw a little growth. Sixty percent of the covered employment is in Beltrami County.

Though it lost over twenty thousand jobs between 1978 and 1982, the Arrowhead (Region 3), is still Minnesota's third largest region in terms of employment. The city of Duluth is the hub of the Arrowhead, having approximately 42 percent of its covered employment. The completion of a major Construction project in 1987 contributed to the loss of some 660 jobs in that industry. Yet Duluth still managed a net increase of over 1,300 jobs compared to third quarter 1987, most of the jobs being in Services (993), Government (402), and Trade (384).

Overall, Region 3 seems to have stabilized and even recovered somewhat. Average third quarter employment in 1988 was some 4,360 (4.1%) above 1987 and the highest level of employment since 1981. Helping to fuel the mini-recovery were Manufacturing, with 585 new jobs (up 4.7 percent from the year before), and iron ore mining, with an increase of 763 (15.6%). Though Mining is not the dominant force of years ago, it still packs a potent punch in the Arrowhead, providing over 5 percent of total employment and almost 10 percent of total wages.

Minnesota Economic Regions and Counties
