INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are nine categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government;
- 9) the Red Lake Chippewa Tribe.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the affect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 31. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

First Quarter 1989 Covered Employment

Normally, first quarter employment declines seasonally approximately 3.5 percent from the fourth quarter of the previous year. This year the seasonal decline was only 2.1 percent, due to smaller seasonal declines in Agriculture, Mining, and Construction resulting from more favorable weather than usual. Also, last year there were small declines statewide in Services and Government employment between the fourth quarter of 1987 and the first quarter of 1988, whereas, in the comparable period this year, Services gained 5,699 jobs.

Minnesota covered employment during first quarter 1989 averaged 1,962,499, an increase of 62,981 (or 3.3%) over first quarter 1988, but down 42,919 from fourth quarter 1988. Total reported wages grew to \$10,638,542,635 statewide, up from \$10,155,455,150 one year ago.

Mining employment showed the largest percentage growth (up 10.5%) but the actual count was small, only 653 over the first quarter 1988 total of 6,176. In terms of actual numbers, Services gained most, with approximately 30,000 additional persons compared to one year ago (6.5% increase). The largest gains were in hotel, business, health, and social services.

Trade again is the largest sector of Minnesota's economy, with 497,953 employed, or 25.4% of the total for the State. Traditionally there are more people employed in trade during the fourth quarter of each year because of the holiday season. With 476,918 employed, Services encompasses 24.3 percent of the State's employment while Manufacturing accounts for 20.0 percent of all employees in the State, with 392,731 jobs. These three industries account for almost 72 percent of the increase in employment in the State since first quarter 1988, and represent 69.7 percent of the total covered employment.

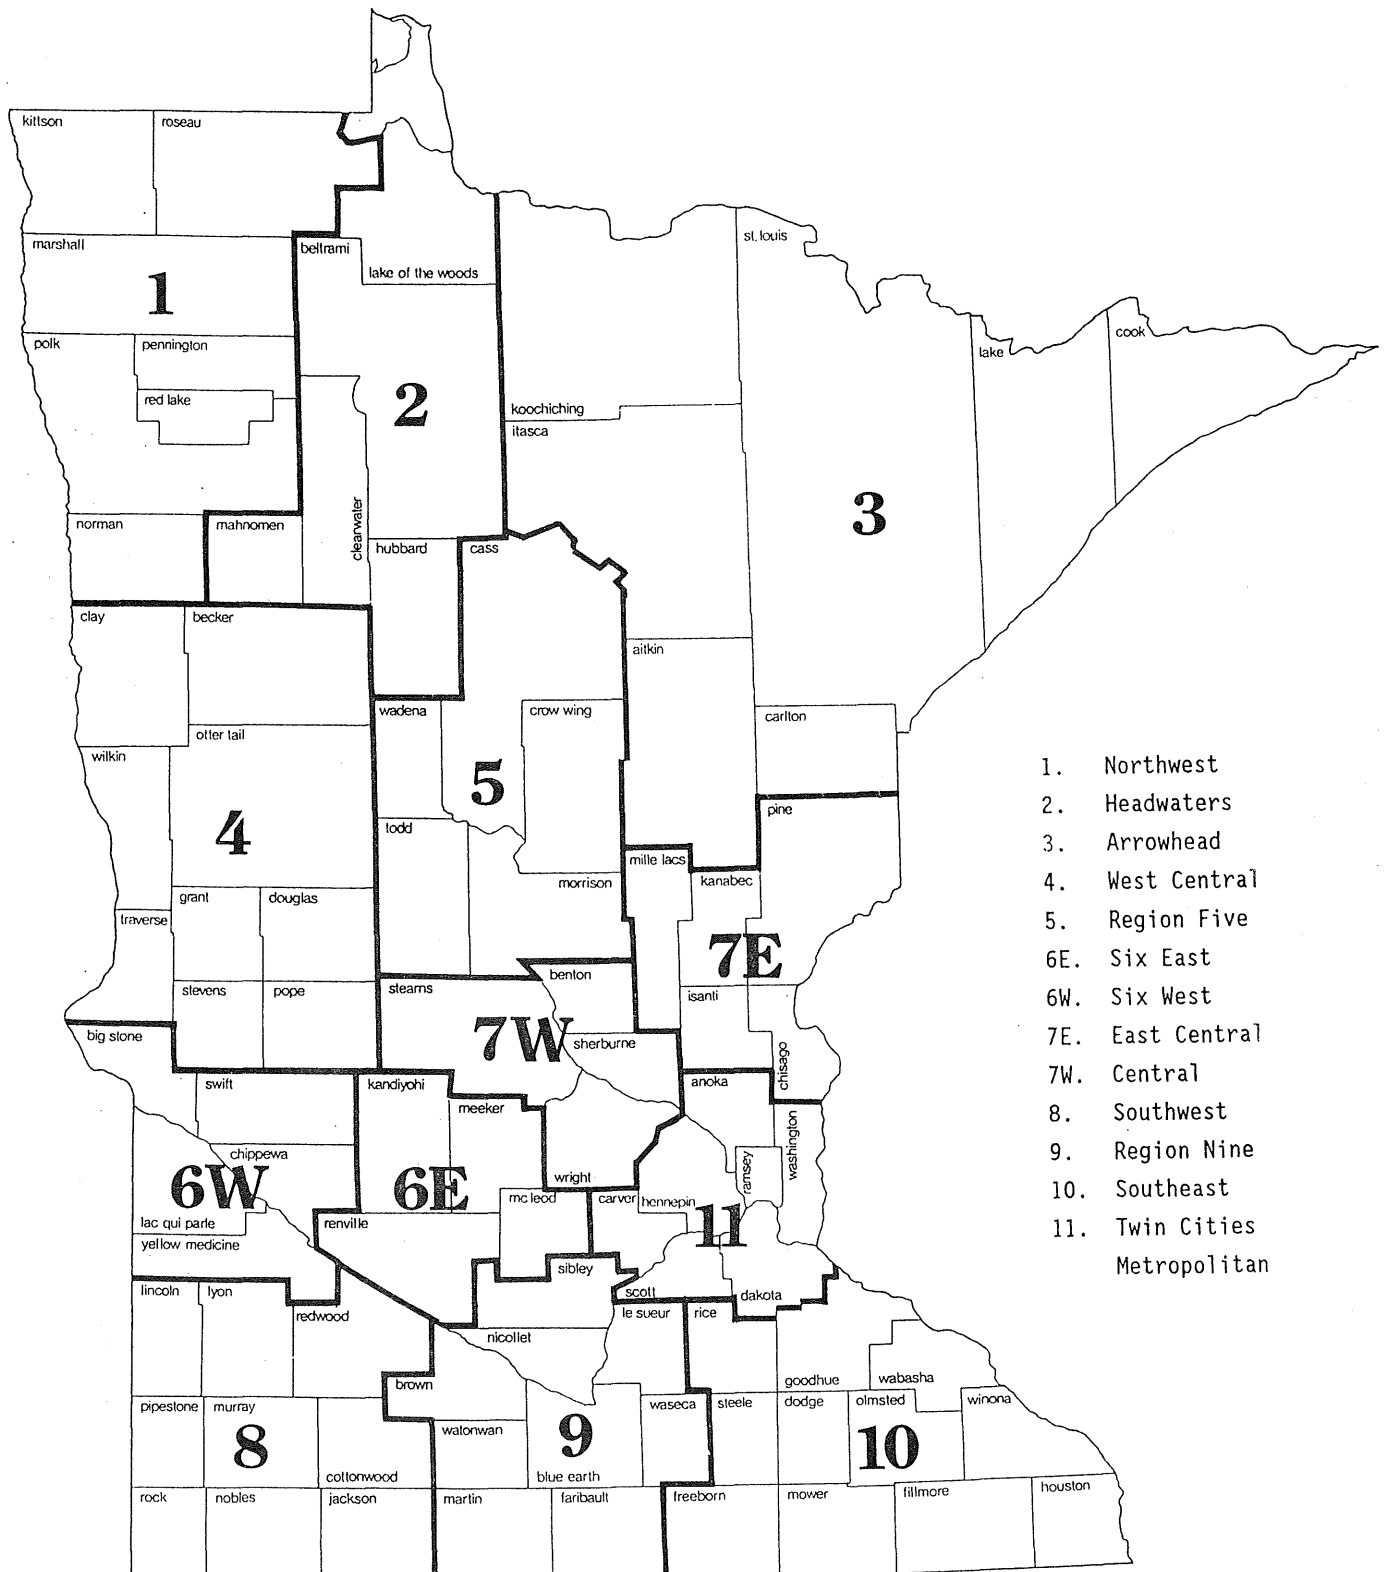

Compared to fourth quarter of 1988, employment in the Construction industry was down 18,230 due to normal winter weather conditions. The Arrowhead Region alone lost almost 800 construction jobs compared to last winter, with the heaviest losses occurring in St. Louis County where all categories were down: general contractors (-113), heavy construction (-262), and special trades (-406). The other counties in the Region showed either small losses, or stayed the same, with the exception of Koochiching County, which showed a small gain due to the start of a paper mill expansion. In the Metropolitan Area, some counties gained slightly, but Hennepin County lost 837 jobs; so overall, over 1,100 jobs were lost compared to one year ago. However, employment in construction usually begins its seasonal upswing in March.

The three largest industries in the State, Trade, Services, and Manufacturing, all had increases in covered employment since the first quarter of 1988. Manufacturing grew at a statewide rate of 2.9 percent (11,272 jobs) and at a 1.2 percent rate (3,253 jobs) in the metropolitan area, while Trade grew by 1.6 percent or 8,318 jobs statewide, and by 535 jobs (.1%) in the Metro Area. Services increased 6.9 percent statewide, with 30,913 new jobs, with 21,333 of those jobs in the Minneapolis-St. Paul Metropolitan Area (up 7.2%). Two thirds of the increase of the Service industry was in the Twin Cities Metropolitan Area.

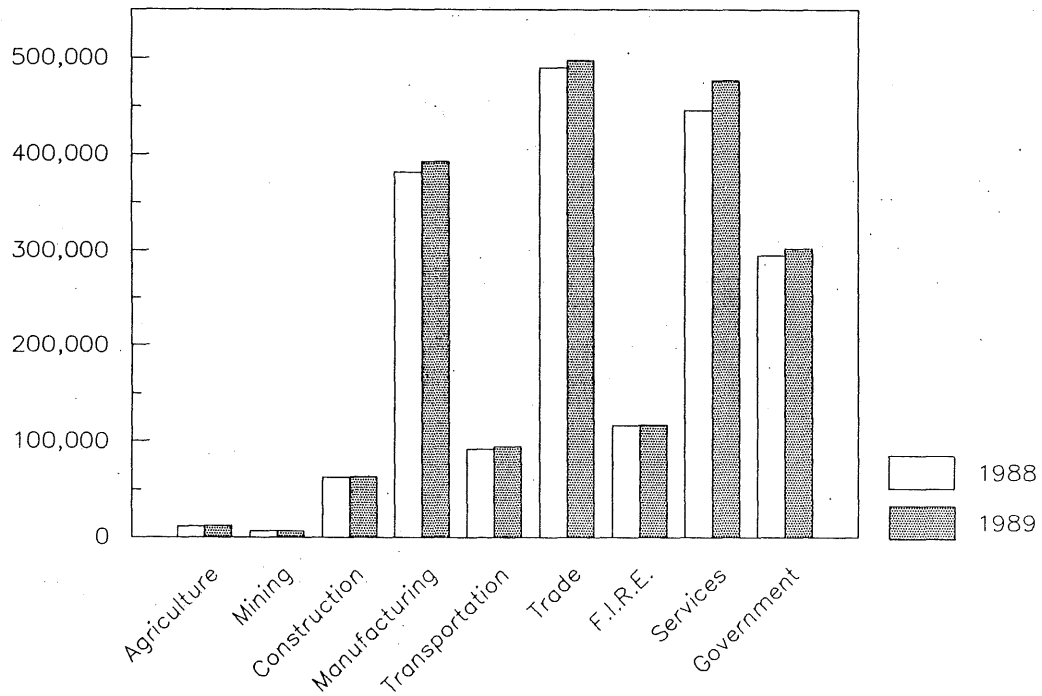

Since the first quarter of 1988, there have been over 6,600 new employees in the Minneapolis-St. Paul Metropolitan Area in business services, 1,190 new jobs in the automotive services, 1,823 newcomers to the social services, and 5,483 new health service positions. The other service areas together grew by close to 7,000 persons.

Agriculture added 445 new jobs statewide, for a 3.9 percent increase from a year ago, with 196 of these new jobs in the Twin Cities Metropolitan Area (up 4.6%). Finance Insurance and Real Estate's growth was 826 new jobs statewide (up .7%). There were 950 jobs added in the Metropolitan Area (up 1.0%) offsetting a loss of 124 jobs elsewhere in the State. Government added 7,732 jobs throughout the state, up 2.6 percent, with 4,211 of these new positions in the Minneapolis-St. Paul Metropolitan Area, up 2.7 percent. Transportation had 2,393 jobs (up 2.6%) statewide, with 1,961 of these in the Twin Cities Metropolitan Area (up 3.1%) (See graph).

Minnesota Economic Regions and Counties

Covered Employment 1st Quarter 1988 – 1st Quarter 1989
