INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are nine categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government;
- 9) the Red Lake Chippewa Tribe.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the affect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 31. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

Fourth Quarter 1988 Covered Employment

Employment of workers covered by the Minnesota unemployment compensation tax law averaged 2,005,418 during the last three months of 1988. Since the same period a year ago, employment has increased 2.9 percent, or a total of 56,839 jobs. Total wages were almost \$11.3 billion for the quarter, up 8.6 percent from 1987. The average weekly wage was \$432, up \$22 from 1987.

Over the past year, all economic regions and all major industry groups except construction have experienced employment growth. (Construction employment dropped 1 percent). The Twin Cities Metropolitan Area, which has 63 percent of total state employment, accounted for 52 percent of the total state employment growth.

Employment in Mining increased at a faster percentage rate than the other major industries during the past year. The 9 percent growth rate can be attributed to increased metal mining activity in the Arrowhead Region with 624 additional workers.

Most new jobs were created in the Service industry (21,027). Health services led this field with 8,108 more employees than a year ago. Most (64 percent) of the health service employment increase occurred in the Twin Cities Metropolitan Area. The rest of the increase was distributed among the remaining economic regions - all of which exhibited employment gains in health services. Social services ranked second with an additional 2,978 workers. Except for Region 1 which posted a decrease of 12 percent in social services employment, all other Regions showed gain led by a 20 percent increase in Region 4, a 16 percent increase in Region 9, a 15 percent increase in Region 10 and a 7 percent increase in the Minneapolis-St. Paul Metropolitan Area.

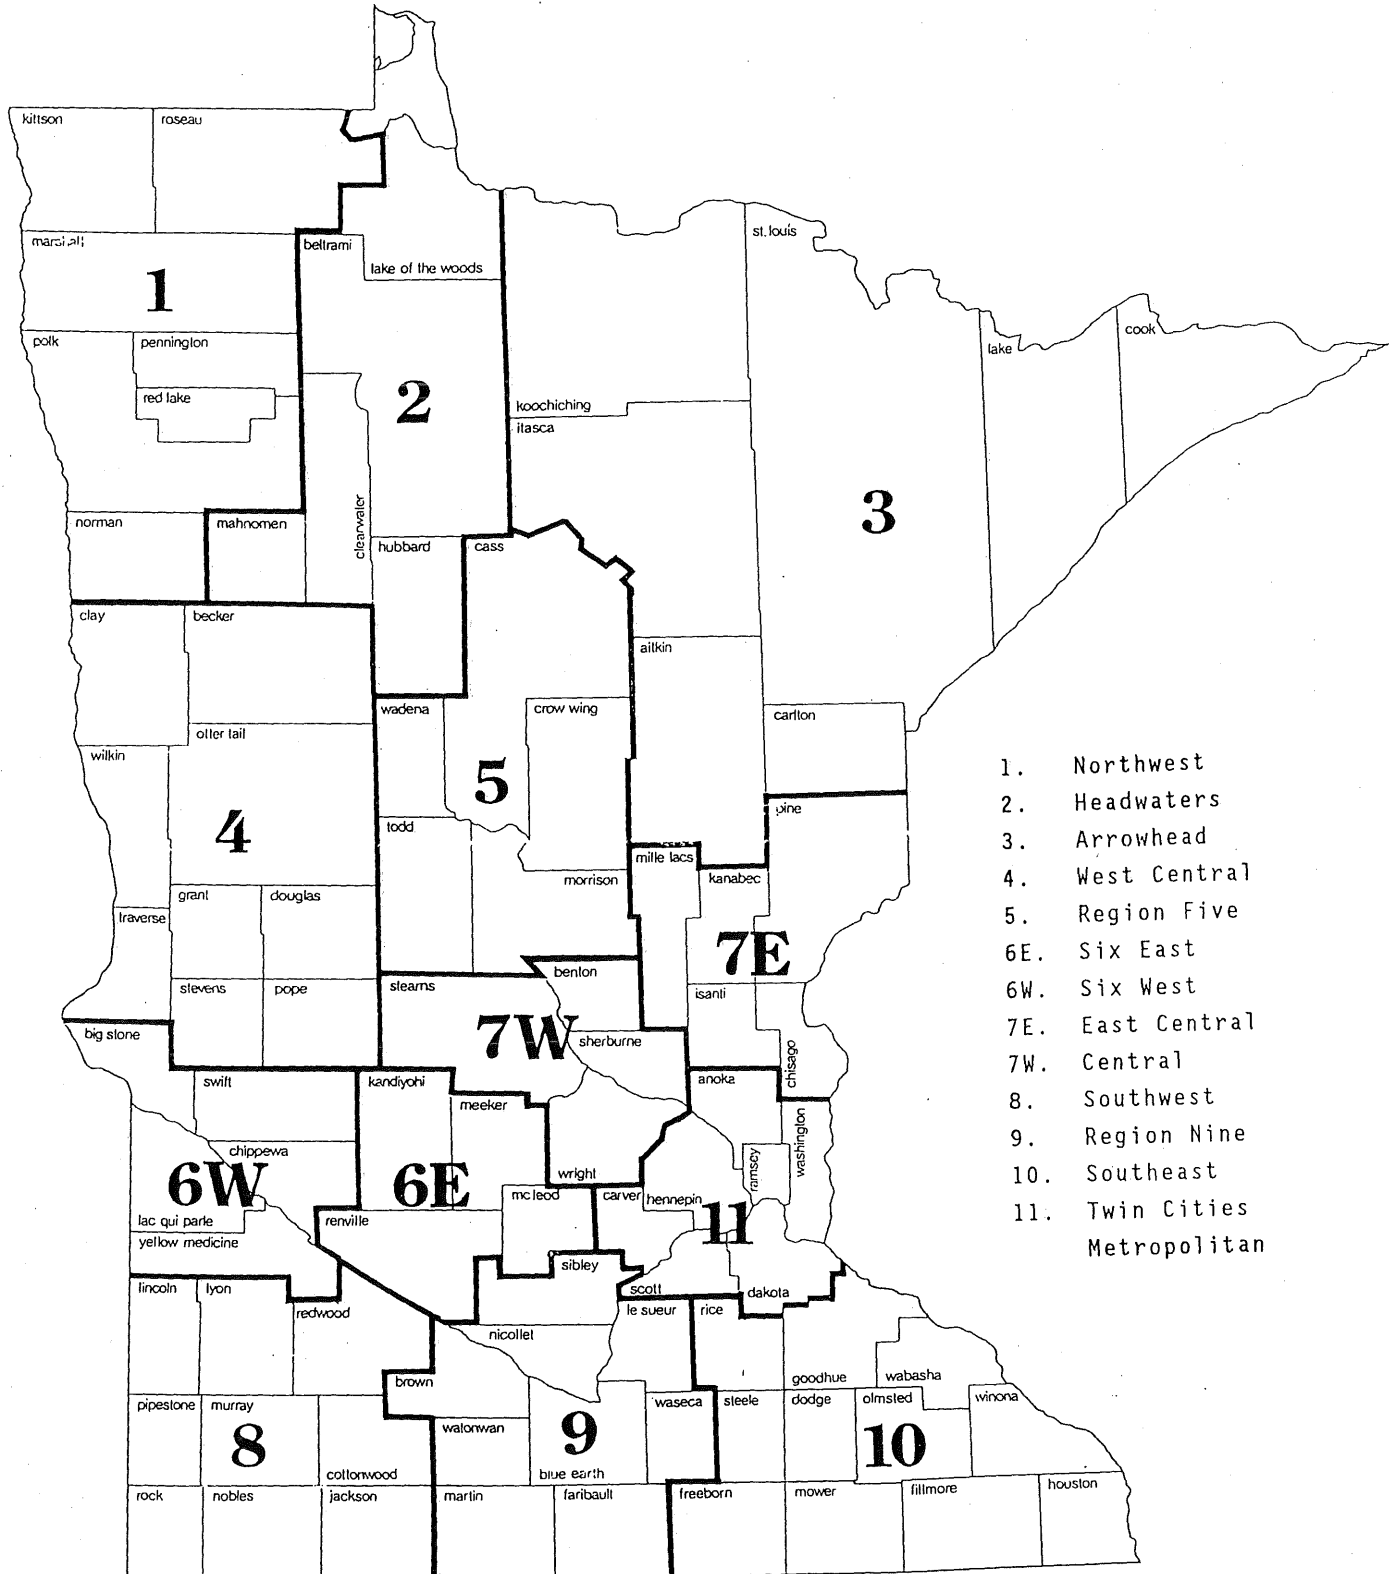

Overall, employment in Finance, Insurance and Real Estate remained practically constant; however, the ongoing shake-up in the banking industry is still manifesting itself as depository and nondepository credit institutions had a 3 percent decrease in statewide employment.

Transportation and Public Utilities found itself with 4,067 more people than a year ago. Ongoing competition from deregulation of the telephone industry and the increase of cable broadcasting have contributed to a 4.2 percent increase of jobs in communications.

The Manufacturing industry grew by 13,520 people. Industrial and commercial machinery and computer equipment added 3,870 workers to the industry. Demand for printed products continues as printing and publishing found itself with 3,157 more workers than last year.

Trade, Minnesota's largest industry, added 10,277 new workers during the year. All regions reported increases in employment except Region 6W which lost 15 firms and 222 workers. The largest employment increases for this industry occurred in retail trade - both grocery stores and general merchandise stores. In wholesale trade, both durable and non-durable goods showed substantial increases in employment.
