INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are eight categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

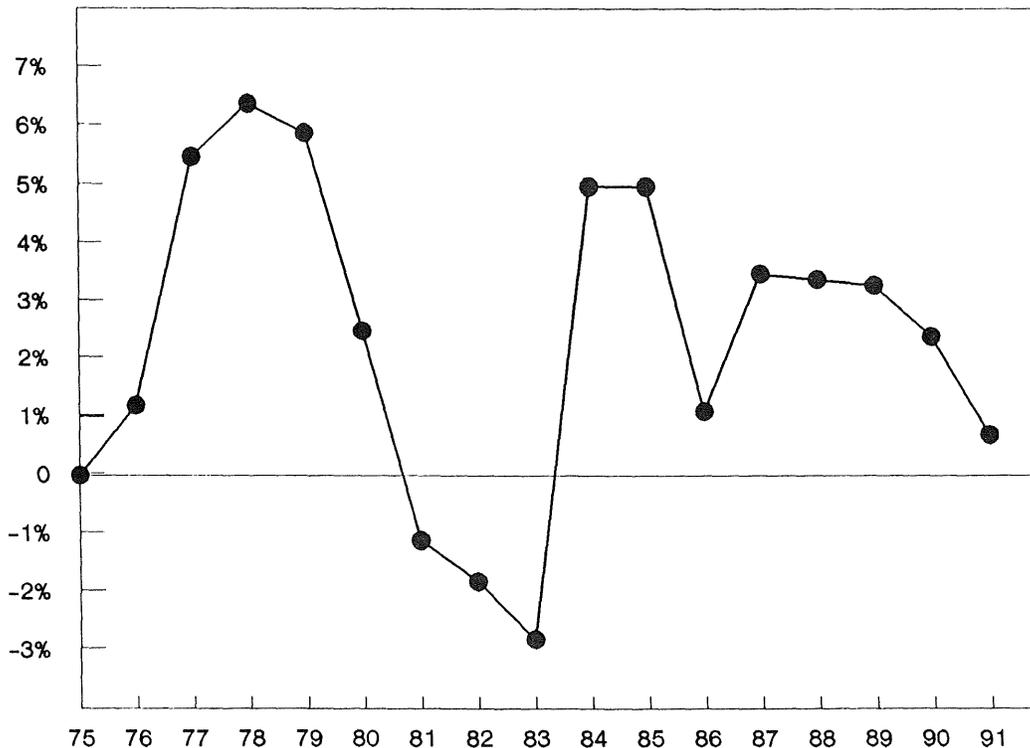

Unallocated employment is listed on page 31. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

FIRST QUARTER 1991 COVERED EMPLOYMENT

Covered employment in Minnesota declined more than seasonally in the first quarter of 1991. The 2,023,638 average for the first three months of 1991 was down 69,815 or 3.3 percent from the previous quarter. This decline is greater than the normal seasonal reductions experienced in recent years (1.7 percent in 1987 to 2.4 percent in 1990). All major industry groups except **FINANCE, INSURANCE, AND REAL ESTATE** registered employment declines between the two quarters. This industry would also have declined had it not been for an industry reclassification which moved about 2,700 employees from **SERVICES** into Insurance.

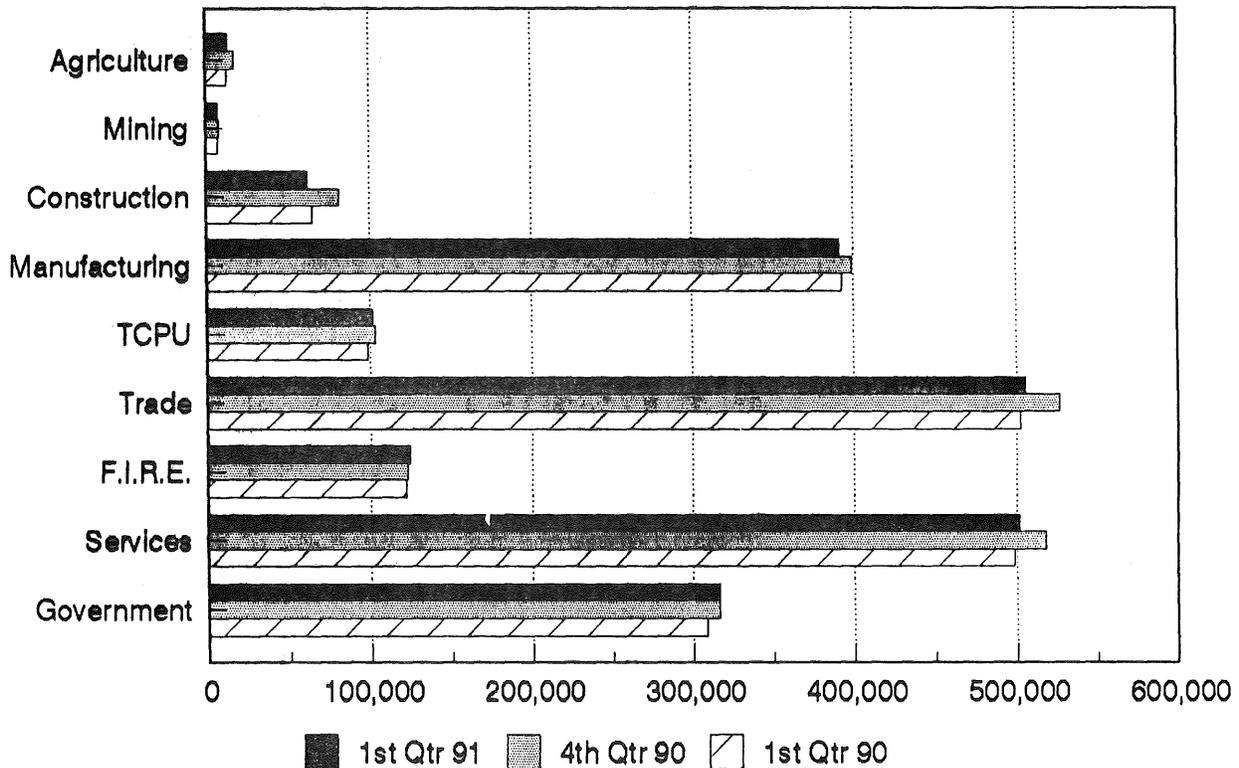

Employment is up only 15,014 or 0.7 percent compared to one year ago. This rate of growth is well below the 2.6 percent average over the last fifteen years. At the end of 1990, employment was at a level that was 34,759 or 1.7 percent higher than a year ago. After the first quarter of 1991 this margin dropped to 15,014 indicating that over two quarters the economy had worsened. The line graph below shows how this economic slowdown compares with the historical record from 1975 to 1991. **CONSTRUCTION, MANUFACTURING,** and **MINING** reported employment levels below a year ago of 3,342, 2,195, and 80 respectively. The **SERVICES** industry employment was reduced significantly in the first quarter of 1991 to a level that is less than one percent above a year ago. A review of the industrial classification of all firms in the **SERVICES** industry resulted in changes that moved employment to other industries. (See page iv for details)

**Growth Rates Between 1st Quarters
1975 - 1991**

Minnesota Covered Employment By Industry

1st Quarter 1991, 4th Quarter 1990, 1st Quarter 1990

SERVICE industry employment in the first quarter of 1991 totaled 501,865 a decline of 16,663 from the count of the previous quarter. About one half of this 16,663 decline is attributed to industry classification changes made effective in the first quarter 1991 as a result of a survey conducted in 1990 to verify the industry classifications of all employers in **SERVICES**. The survey uncovered business activity changes by employers, obtained more complete information from employers, and detected coding errors. As a result, there were approximately 1,500 **SERVICE** jobs moved to **TRANSPORTATION**, 2,400 to **MANUFACTURING**, 2,700 to **FINANCE, INSURANCE AND REAL ESTATE**, and 2,100 to **TRADE**. Within the **SERVICE** industry group, Business Services was most affected by the industry classification changes with employment of about 4,500 moved to other industry groups.

Aside from the changes attributed to the industry classifications, **SERVICES** also experienced seasonal employment declines in hotels and motels, personal services, and miscellaneous repair. Reductions attributed to a slowing of economic activity were also felt in Business Services, Engineering and Management Services, and generally throughout **SERVICES**. A significant 4,000 decline was reported by temporary help agencies.

The employment in Health Services and Social Services was up slightly between 4th quarter of 1990 and the first quarter of 1991 with an increase of 1,770 employees. Combined, these two segments of the **SERVICE** industry have 8,820 more employees than a year ago. Amusement Services, which includes gaming establishments, continues to expand, reflecting the popularity of legalized gambling.

MANUFACTURING continued its downward trend. During the first quarter, 1991 employment averaged 391,283, down 7,911 from the previous quarter and down 2,195 from the first quarter of 1990. Again, computer manufacturing suffered severe reductions, with 1,202 jobs lost since the previous quarter and over 3,500 from one year ago. Almost all of the decline since the fourth quarter 1990 occurred in the Twin Cities Region. Cutbacks in construction activity affected manufacturing industries that supply the lumber and wood, furniture and fixtures, and stone, clay and glass needed to construct and furnish buildings. In the first quarter of 1991, Lumber and Wood was down approximately 1,560 workers, Stone, Clay, and Glass down 1,721, and Furniture and Fixtures down 332. The three industries had combined employment that was 1,736 less than a year ago. Not all durable goods manufacturing reported employment declines in the first quarter of 1991. Instruments, Electronics, and Fabricated Metals reported employment gains of 1,043, 679, and 381 respectively, and all three industries are operating at employment levels above a year ago.

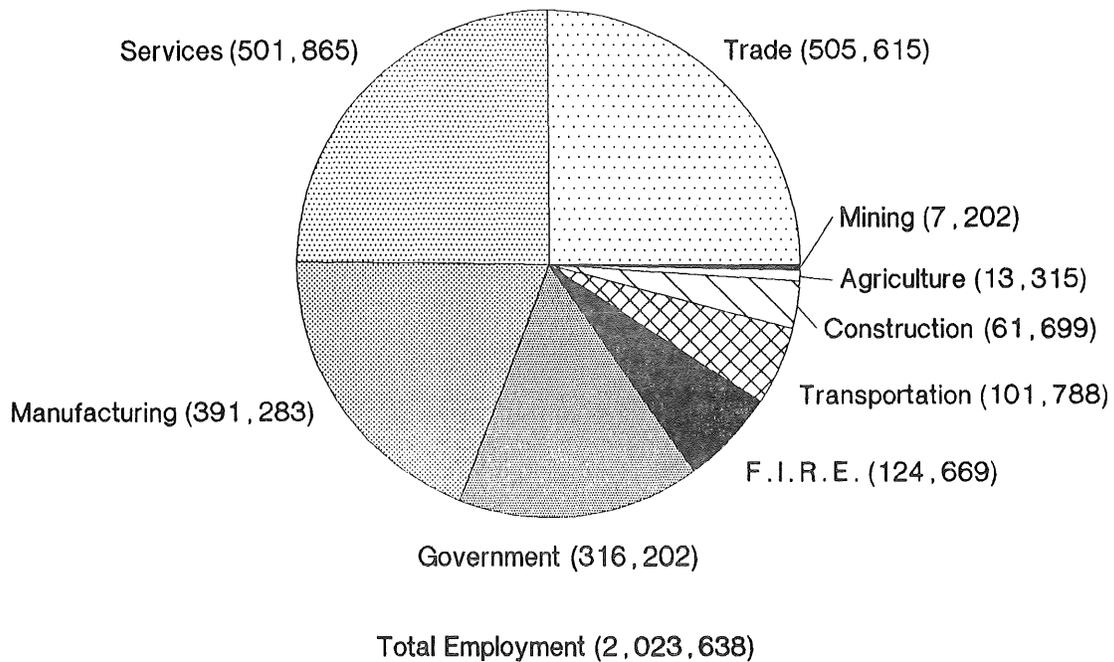

All nondurable goods manufacturing industries except Chemicals were operating at reduced employment levels in the first quarter of 1991. Most of the reductions from the previous quarter were seasonal in nature. The Chemical industry does not appear to be affected by the same seasonal influences as the other nondurable goods industries. Food processing in Minnesota is a growing industry that experiences a seasonal decline each winter. During the first quarter of 1991 the industry reduced employment by 2,378. Despite the seasonal cutback, Food Processing is operating at a level of employment that is 1,020 higher than a year ago.

TRADE is Minnesota's largest employing industry, with 505,615 workers during first quarter, 1991 (See chart on next page). This represents a drop of 21,031 from the seasonally high fourth quarter 1990, but an increase of 2,919 from first quarter, 1990. Approximately 2,100 jobs that were previously included in **SERVICES** were reclassified into **TRADE**, during the industry classification review survey that occurred last year. Factoring out these 2,100 jobs would give a seasonal decline between fourth and first quarter of approximately 23,130, which is just 547 more than the seasonal decline which occurred one year ago. **TRADE**, therefore, has retained a fair amount of strength in an otherwise slow economy. The industry classification changes resulted in 823 jobs going to Wholesale Trade, over 300 to Gasoline Service Stations, over 200 to Furniture Stores, over 260 to Restaurants, and 423 to Miscellaneous Retail. The remaining sectors posted very small gains from the industry reclassification.

Every sector of **TRADE** is affected by the seasonal downturns occurring each winter. Restaurants traditionally employ approximately 5,000 fewer workers during the first quarter each year than they did the previous fourth quarter. This year was no exception; the net first quarter decline was 4,648, but without the 261 gain from the industry reclassification, the loss

would have been over 4,900. Wholesale Trade, General Merchandise Stores, Food Stores, and Miscellaneous Retail Stores each usually drop 2,000-3,000 seasonal jobs. This quarter's decline since fourth quarter, 1990, was fairly typical for these sectors. Gasoline Service Stations this year dropped 794 workers. The total loss would have been 1,097 without the additions stemming from the industry reclassification. Apparel and Accessories Stores were down over 3,000 from the previous quarter and 1,590 from a year ago. The opening of several new grocery "superstores" created a net gain of 1,483 Food Store workers since one year ago.

Total Employment 1st Quarter 1991

CONSTRUCTION showed a greater than usual seasonal decline between fourth quarter, 1990, and first quarter, 1991. Nearly 20,000 workers were laid off during this time, as compared to approximately 17,200 during the same time period one year ago. The average employment of 61,699 was nearly 3,342 less than the total of one year ago, reflecting the soft market in new construction.

TRANSPORTATION, COMMUNICATIONS, AND PUBLIC UTILITIES also showed a seasonal downturn between fourth and first quarters, with **Motor and Air Transportation** and **Electric and Gas Services** experiencing a temporary, weather-related decline in employment. Since fourth quarter of 1990, **TRANSPORTATION, COMMUNICATIONS AND PUBLIC UTILITIES** was down by 1,147, with virtually all the downturn in the previously mentioned categories.

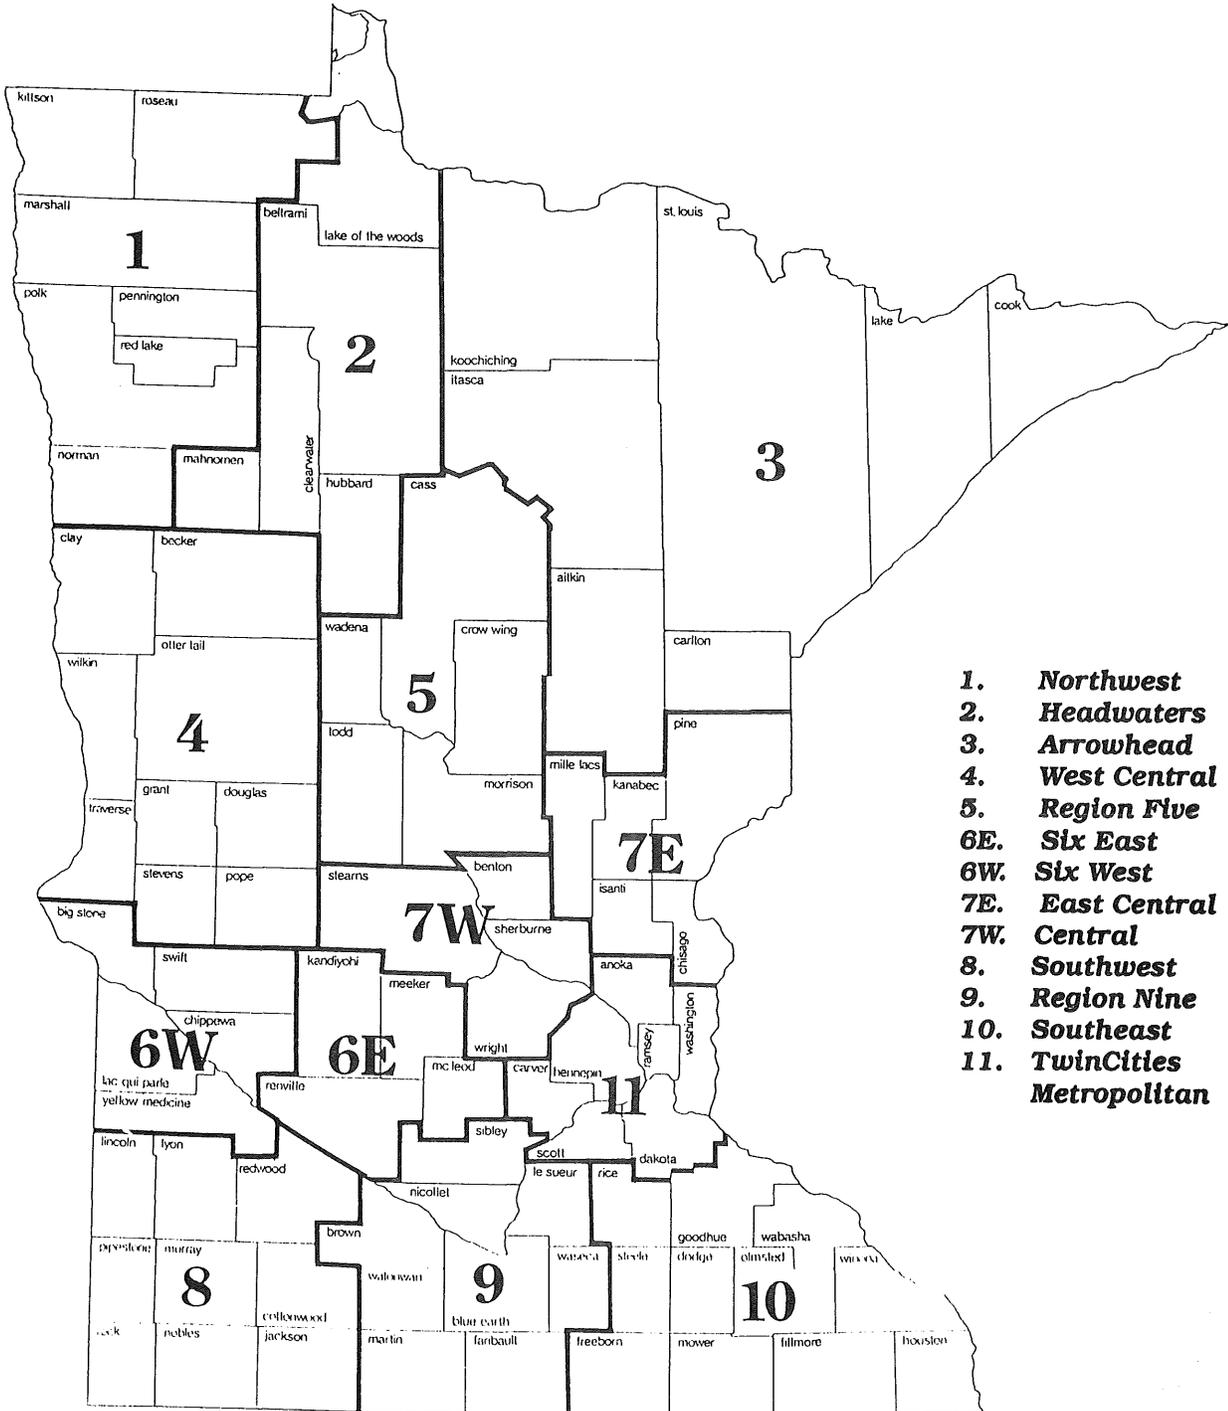

FINANCE, INSURANCE, AND REAL ESTATE added nearly 2,025 workers in the first quarter of 1991, reaching a total of 124,669 which is nearly 3,000 higher than a year earlier. All of this increase came from Insurance carriers, with over 2,880 workers added since the fourth quarter and 3,500 since one year ago. Over 1,625 of these jobs resulted from the industry reclassification. Ninety-four percent of the new jobs were located in the Twin Cities Region. Partially off-setting this gain was continued erosion of jobs in the banking industry, especially in depository institutions in the Twin Cities Region. Because of the consolidations and take-overs that have occurred recently, 904 bank employees have lost their jobs since the previous quarter. Small gains were posted in other regions throughout the state. **REAL ESTATE** employment drops during the winter months, and totaled 280 less than during fourth quarter. By March, **REAL ESTATE** employment begins its seasonal rise, and because of lower interest rates, first quarter totalled almost 800 more than one year ago, averaging 20,906 workers.

GOVERNMENT jobs were down 335 from the fourth quarter, 1990. Federal Government added 70 jobs while State Government gained 234 since fourth quarter. Local Government decreased by 639 positions since the past quarter. Over the past 12 months, sizeable gains in Local Government occurred in Health Services (up 835) and in the Administration of Human Resource Programs (up 978).

The Twin Cities, Economic Region 11, was the only region in the State to report fewer workers on payrolls than a year ago. A total of 2,221 fewer workers were reported. This is a complete reversal of a long standing record of the Twin Cities Region leading all other regions in employment gains from year to year. The region experienced employment losses because of production cutbacks in manufactured durable goods such as computer equipment, lumber and wood products, primary and fabricated metals, and electronic equipment. Part of the decline was due to refinements made to the data by correctly moving about 800 workers into the unallocated category. This category includes workers who work in more than one region; for example, salesmen. In addition, the Region experienced a slowdown in **CONSTRUCTION**, a drop off in **TRADE** sales, and a decline in **SERVICES** purchased. Together these four industries lost 10,700 workers. Partially offsetting these losses were employment additions totaling about 8,400 from **GOVERNMENT, FINANCE, INSURANCE, AND REAL ESTATE, and TRANSPORTATION, COMMUNICATIONS, AND PUBLIC UTILITIES.**
