INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are eight categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 31. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

THIRD QUARTER 1991 COVERED EMPLOYMENT

Average employment in Minnesota dropped approximately 7,600 positions from second quarter to a level of 2,017,068 in third quarter of 1991. For the third straight year seasonal summer employment and economic growth failed to offset the normal declines in Educational Services, Busing, and Local Government that occur when schools close for the summer.

The private sector did manage to add over 39,000 jobs in the third quarter, over 25 percent (10,500) of them in **CONSTRUCTION**. **MANUFACTURING** employment grew by almost 6,700 jobs, though most of these (5,300) were seasonal positions in the Food Industry, as vegetable canneries and other food processors added employment to handle Minnesota's abundant harvest. Other industries that added seasonal employment were Agriculture, Eating Establishments (fast food, State Fair, Taste of Minnesota), Resorts, and Amusement and Recreation Services. Altogether, about 65 percent (25,500) of the increase in private sector employment in the third quarter can be attributed to short term jobs.

Of the 13,150 new jobs in the third quarter that might be considered "permanent", slightly over half (7,020) were in just two industries - Business Services and Health Services. No other industries had significant growth between quarters.

There was one rather notable occurrence during the third quarter of 1991. Total employment in the **SERVICE** Industries rose to an average of 526,770, eclipsing total employment in **TRADE** by 3,260. For the First time in Minnesota employment history, **SERVICES** reigns as the employment leader. The graph on page v compares third quarter employment levels in the four largest industrial divisions in Minnesota over the last 16 years. Notice that, with the exception of a brief pause in 1981-1982, employment grew continuously in **SERVICES** during this period.

GROWTH BETWEEN THIRD QUARTERS

As evidence of the continuing effects of the recession, Minnesota's covered employment gained only 2,246 jobs since the third quarter of 1990. A look at various industries shows some gainers and some losers. The "jobs lost" category includes General Building Contractors, down 3,400, Durable Goods Manufacturing, down 3,500, and Retail Trade, down 3,900. The industries that gained significant numbers of jobs over the same period are Health Services with a net gain of 6,050, Social Services with 3,200, Amusement and Recreation Services with 3,525, Insurance Carriers with 2,250, and Crop Production and Agricultural Services, which shared a net gain of 1,050.

(Some of the losses and gains mentioned above are partially the result of industry code changes in January 1991 after a survey of the **SERVICE** industries done in 1990. For a discussion of how this survey affected employment changes in 1991, see page IV of the article in our 1st Quarter, 1991 publication.)

TWIN CITY AREA

Most of the job growth in Minnesota in recent years has been in the seven counties that make up the Twin Cities Metropolitan Region 11, but not so between third quarters of 1990-1991. Almost all other regions of the state had at least a small net gain in employment, but Region 11 lost a net 10,840 jobs. While that loss amounts to less than 0.1% of Metropolitan employment, it is significant that the decline shows in most of the major industrial areas. Only **FINANCE, INSURANCE, AND REAL ESTATE** is up, with a gain of 3,150 jobs, but 2,670 of those positions were the result of the coding changes from **SERVICES** in January 1991, so fewer than 500 are really new jobs.

Even with the ongoing work at the huge Mall of America, **CONSTRUCTION** was down 2,685 jobs in the Twin Cities Metropolitan Area from third quarter 1990, mostly in General Building Contractors and Special Trades. At 5.1 percent this was the largest rate drop of any industrial division. **TRADE** was also adversely affected during this period, especially Retail with 7,050 fewer positions, a 3.0 percent drop. The biggest losses came from Eating and Drinking Establishments (down 2,130), General Merchandise Stores (down 1,840), and Apparel and Accessory Stores (down 1,400). Durable Goods **MANUFACTURING** continued a slow decline, losing 2,600 jobs in Region 11 since third quarter 1990. Approximately 1,800 of these were jobs related to Computer Manufacturing.

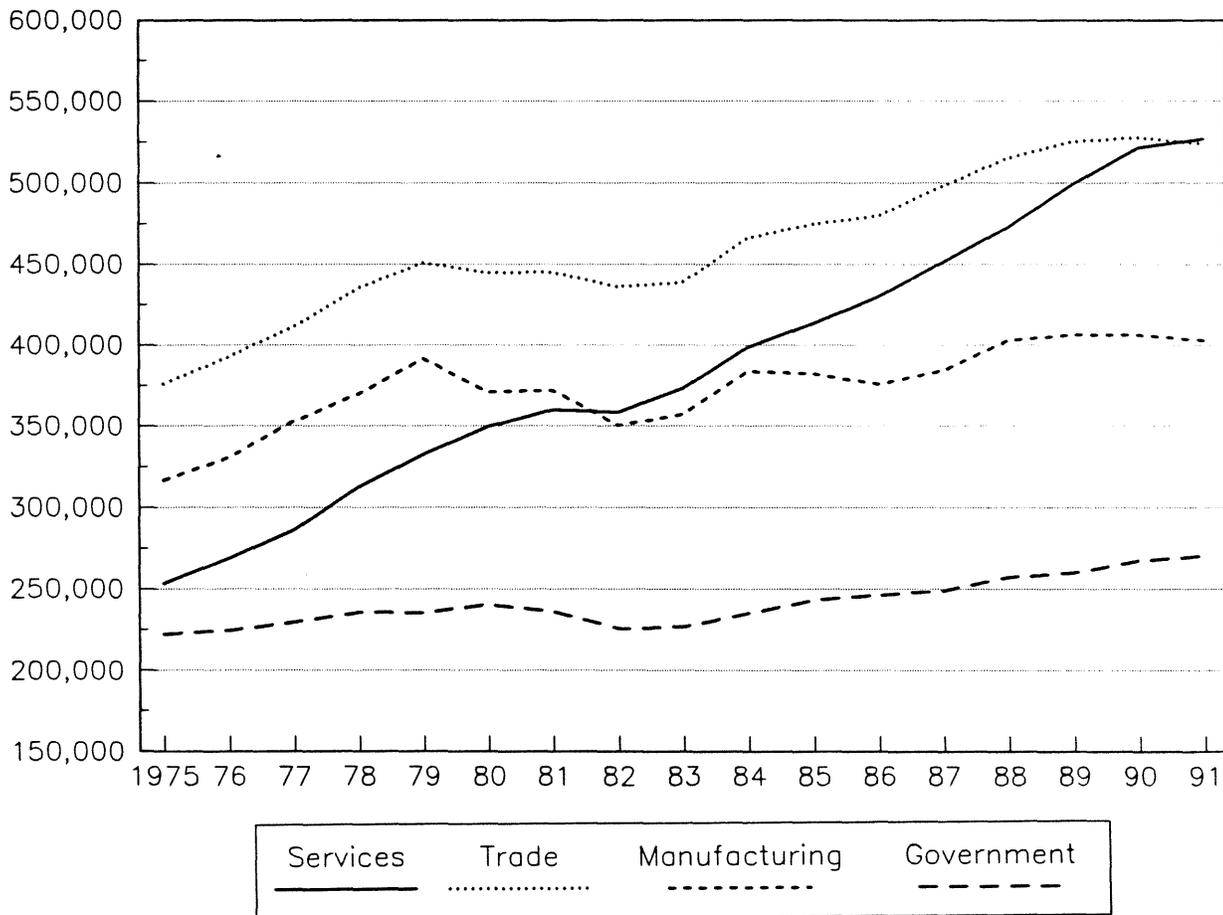

GREATER MINNESOTA

For the first time in recent years the employment outlook in Greater Minnesota seemed brighter than in Metro Region 11, with a net gain of 13,000 new jobs since third quarter 1990. While that figure does not exactly indicate a plethora of jobs around the State, it looks good in comparison with the Twin City area. Actually much of the economy in Greater Minnesota was also stagnant, with **MANUFACTURING, MINING,** and **CONSTRUCTION** down slightly, and most other areas showing only slight gains. Over 60 percent (7,900) of the employment increase occurred in three specific industries, Medical Services (3,180), Amusement and Recreation Services (2,340) and General Merchandise Stores (2,374). The immediate effects of this employment increase on the economy of Greater Minnesota remains unclear, as these three industries do include many part time, low paying jobs.

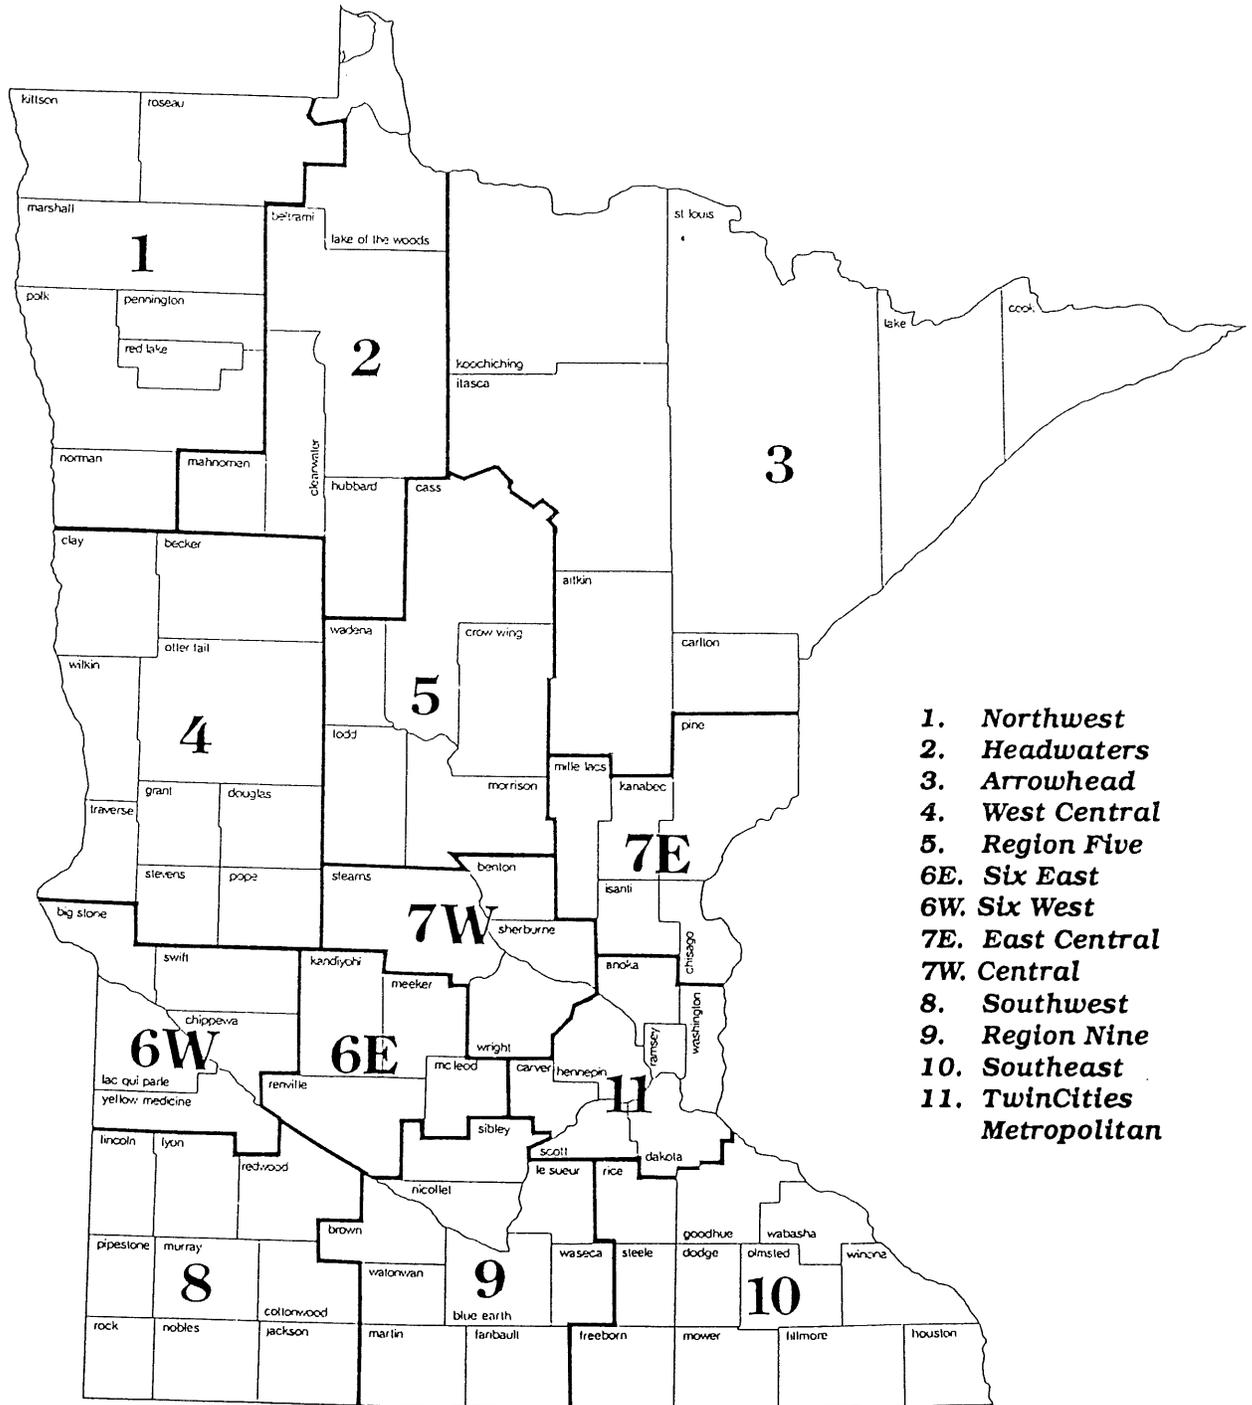

Medical Services employment grew in almost all areas of Greater Minnesota, with all regions having at least 2.0 percent growth except Regions 1 and 4. Region 10, of course, with the largest medical related employment outside the Twin Cities, had the greatest numerical increase, 1130. The employment increase in Amusement Services, on the other hand, was largely confined to Regions 6E and 10, where casino gambling expansion helped to add 800 new jobs in each of those two regions.

The growth of employment in General Merchandise stores in Greater Minnesota, contrasting sharply with the drop in such employment in the Twin City area, resulted almost entirely from the opening across the state of 14 discount merchandise stores operated by three rival discount chains. These 14 stores accounted for 2,335 new jobs, over 600 each in Regions 4, 5, and 6E.

Third Quarter Employment In Four Major Industries , 1975-1991
