INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are eight categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 27. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

FOURTH QUARTER 1991 COVERED EMPLOYMENT

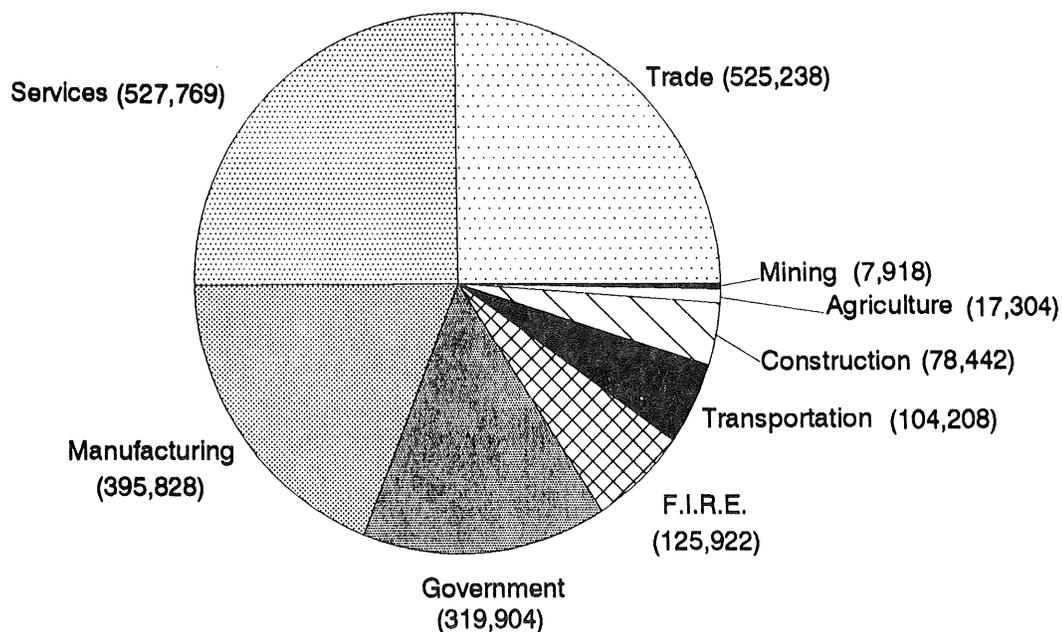

Minnesota's covered employment averaged 2,102,532 during the fourth quarter of 1991. This represents a gain of 31,440, or 1.5 percent, since third quarter, and an increase of 9,079 or 0.4 percent, from one year ago. Total wages were \$13.3 billion, up over \$512 million from one year ago, an increase of 4.0 percent. The average weekly wage rose \$17, or 3.6 percent, to \$488.

For the second consecutive quarter, **SERVICES** has outpaced **TRADE** as Minnesota's largest employing industry, with average employment of 527,769 during fourth quarter, or 2,531 more than in **TRADE**. (See Pie Chart). This amounts to 0.2 percent growth (+999) since third quarter, 1991 and 1.8 percent (+9,241) since one year ago. Ironically, since third quarter, **SERVICE** employment fell in all regions except 6W, 7W, 9, and Twin Cities Region 11, mainly due to seasonal declines in Motels and Hotels, and Amusement and Recreation. The Twin Cities region gained nearly 5,500 **SERVICE** workers for an increase of 1.6 percent since third quarter.

The two main **SERVICE** sectors which have seasonal declines between third and fourth quarters are Motels and Hotels, and Amusement and Recreation. Combined, these two sectors dropped nearly 6,400 jobs since third quarter. (For the same period one year ago these same sectors had a combined seasonal loss of over 7,000). Business Services experienced the loss of approximately 4,000 jobs due to changes in industrial classifications effective 1-1-91, but ended the year with over 4,400 new jobs. Social Services and Education Services also gained since third quarter, each adding over 1,000 new employees.

Total Employment

4th Quarter 1991

Total Employment (2,102,532)

Compared to one year ago, the strongest gains were made in Health Services (which grew by 5,070 positions), Amusements and Recreation (up nearly 3,700) and Social Services (3,057). With the opening of several new gambling casinos, growth in Amusement and Recreation can be expected to increase significantly in the upcoming quarters. Will the opening of the Mall of America in August, 1992 create enough new TRADE jobs so that TRADE is once again Minnesota's largest employing industry? Stay tuned...

December is historically the best month for TRADE employment and 1991 was no exception, with 529,394 workers employed. However, this total was down over 2,600 from the 532,044 employed during December, 1990, the all-time highest count. The average weekly wage for TRADE increased from \$334 in the fourth quarter, 1990 to \$344 in fourth quarter, 1991, perhaps indicating that employers hired fewer part-time workers and kept their existing work force working slightly longer hours. TRADE employment actually fell between third and fourth quarter, 1991 in all regions of the state except 7W, 9, 10, & 11. Region 9 in southern Minnesota had the highest percentage growth from third to fourth quarter (2.4 percent), but Twin Cities Region 11 added the most workers (5,112).

General Merchandise Stores which include department stores, variety stores, general merchandise stores and general stores added the most jobs since fourth quarter, 1990 (1,385) but this growth was all in greater Minnesota, as the Twin Cities Region lost 1,500 workers. Again, Regions 7W, 9, & 10 were strong, adding 488, 452, and 286 jobs respectively. This trend reflects the openings of several large discount department stores which have begun moving into Minnesota. Miscellaneous Retail has added just under 1,000 workers since one year ago, again, with most of the growth occurring in Greater Minnesota. Region 7W showed 600 new jobs in this sector, and Region 10, 143. Twin Cities Region 11 employment in Miscellaneous Retail remained unchanged since one year ago.

Restaurants across the state had seasonal reductions totalling 6,279 workers since third quarter, 1991, but the employment level during fourth quarter, 1991 was almost identical to that of one year ago. The seasonal decline between third and fourth quarters, 1990 was 7,500.

<u>Percentage of Total Employment 4th Quarter</u>		
	<u>1990</u>	<u>1991</u>
Agriculture	0.8%	0.8%
Mining	0.4%	0.4%
Construction	3.9%	3.7%
Transportation	4.9%	5.0%
FIRE	5.9%	6.0%
Manufacturing	19.1%	18.8%
Trade	25.2%	25.0%
Services	24.7%	25.1%
Government	15.1%	15.2%
TOTAL	2,093,453	2,102,532

MANUFACTURING lost 7,285 jobs since third quarter, 1991 but only 3,366 jobs since one year ago. The seasonal layoffs in Food Manufacturing involved 3,700 workers this year, compared to nearly 4,000 in 1990. The good news was the re-opening of a large Food Manufacturing plant in Southern Minnesota which returned 1,000 to the workforce after a year's shutdown. Lumber and Wood Products experienced the loss of nearly 1,100 jobs since third quarter. Chemical Manufacturing gained nearly 300 workers over the past year. This growth occurred in the Twin Cities Region 11 and was general growth, not specific to one company. Since 1987, approximately 1,000 new Chemical Manufacturing jobs have been created, averaging out at about 250-300 new jobs per year.

The decline of the Computer Manufacturing sector continued, but not quite as rapidly as one year ago. Between fourth quarter, 1989 and fourth quarter, 1990 over 5,500 workers lost jobs, while 4,100 were lost between fourth quarters of 1990 and 1991. Of the 4,100, the Twin Cities Region 11 lost 3,200 jobs, and Region 10 lost over 700. Fourth quarter average employment in the Computer Manufacturing Sector was nearly 81,000 in 1986, 80,300 in 1987, 85,350 in 1988, 83,500 in 1989, and 76,500 by the end of 1990. By the fourth quarter of 1991 the levels of employment in the industry dropped to 72,395.

Many manufacturing sectors besides computers were adversely affected by the recession, notably Lumber and Wood Products (down 250), Paper (down over 400), Printing (down 756), and Stone and Concrete (down 979) from one year ago.

CONSTRUCTION was dealt a double blow during fourth quarter, 1991. Not only did the recession still reign, the infamous Halloween blizzard accelerated the normal seasonal layoffs with thousands becoming jobless overnight. Between October and November of 1991, 3,000 more workers were laid off than in the same period one year ago. By December, 1991, 2,478 fewer workers were employed than in December, 1990. Again this year, employment fell by more than 9,200 seasonal jobs between third and fourth quarters. Employment levels generally begin building again toward the end of the first quarter as weather conditions permit.

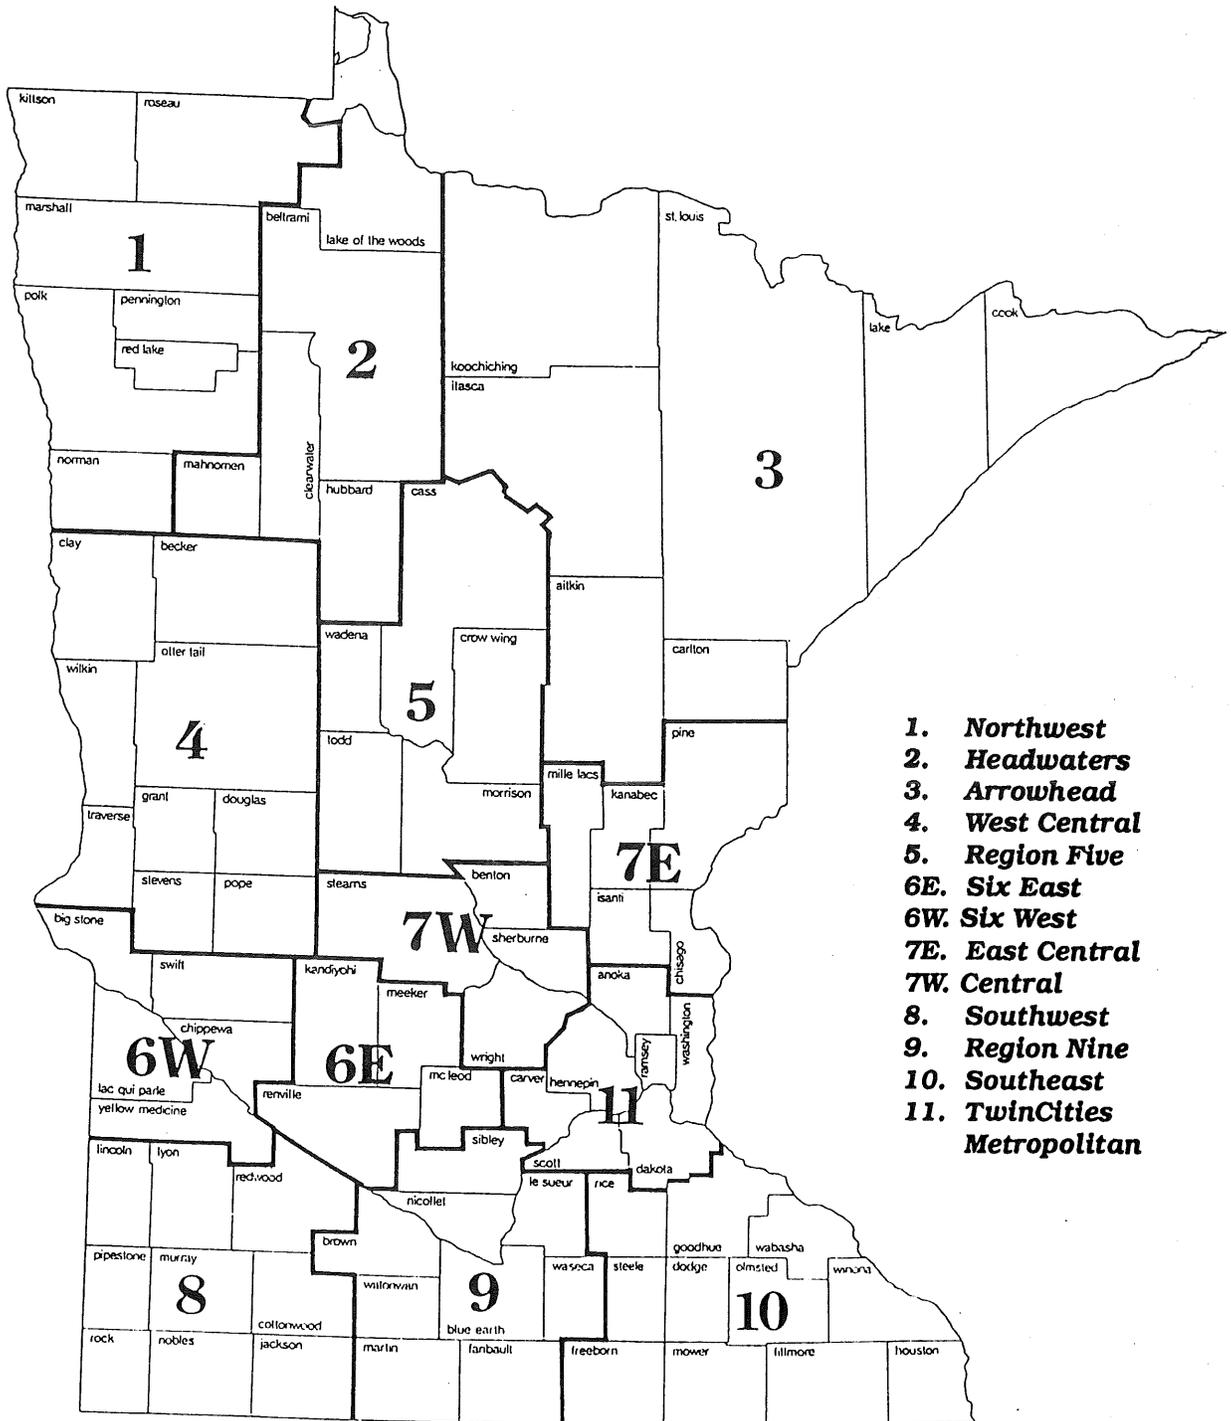

Although 4,776 **AGRICULTURE** jobs were lost between third and fourth quarters (compared to 4,100 during the comparable season one year) the net growth over the past year was 375 workers.

TRANSPORTATION also grew moderately, with 1,250 new workers since one year ago, and a seasonal third to fourth quarter gain of 2,000 workers.

Depository Institutions reacted to the recession by terminating 1,288 jobs over the past year, with over 400 of that drain happening in the fourth quarter. Virtually all of the loss was in the Twin Cities Region 11. Ironically, all other sectors of **FINANCE**, **INSURANCE** and **REAL ESTATE** grew over the past year. Insurance Carriers added over 2,200 new jobs, and Real Estate, 800 (although Real Estate showed a "normal" seasonal loss of 426 jobs since third quarter). **MINING** lost 264 jobs in the past year as a result of production cutbacks in both Metal and Non-Metallic Mining.

The seasonal increase in **GOVERNMENT** employment between third and fourth quarter, 1991 was almost identical to last year (+49,208). However, overall levels are approximately 3,200 higher than one year ago. Federal Government jobs were down 206 statewide since third quarter, but up 550 from one year ago. State jobs levels rose 843 since third quarter, but were down over 500 from one year ago. County and City jobs were up 3,163 since one year ago, and up seasonally since third quarter by 48,570, with teachers and staff returning to school.
