## INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Jobs and Training. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are eight categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government.

## TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 31. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

## FOURTH QUARTER 1992

Average covered employment and wages in Minnesota increased in the fourth quarter of 1992 by 45,800 or 2 percent over third quarter primarily because schools were fully staffed. The opening of schools not only increased government employment in education by 60,800 employees or 65 percent, but in the private sector **TRANSPORTATION** increased 2 percent with 2,700 school bus drivers returning to work. If only private employers are considered, employment fell between quarters by 0.4 percent, but employment overall was 3 percent ahead of fourth quarter 1991.

Most private industries behaved about as expected between third and fourth quarter. **AGRICULTURE**, **MINING**, and **CONSTRUCTION** all had normal seasonal declines in employment. **AGRICULTURE** was down 22 percent from third quarter. **MINING** was down 4 percent as sand and gravel pits, which make up between 20 and 25 percent of the employment in **MINING**, closed for the winter. **CONSTRUCTION** was down 10 percent. Only **MINING** of these industries was lower than the previous year, and this was caused by layoffs in iron ore mining in December. **AGRICULTURE** was 7 percent ahead of the same quarter in 1991 and **CONSTRUCTION** 2 percent ahead.

**MANUFACTURING**, which was down by less than 1 percent, saw fourth quarter seasonal declines in **food processing**, **petroleum and related products**, and **concrete products**. Compared to the fourth quarter of the previous year **MANUFACTURING** was up by 1 percent. A good part of this increase occurred in **printing and publishing**, one of **MANUFACTURING**'s steady performers. Computer manufacturing was up 1½ percent over the fourth quarter 1991.

**TRADE** showed a 2 percent seasonal increase based on holiday shopping. Employment in **TRADE** was also 3 percent ahead of the fourth quarter of 1991. Four **TRADE** industries showed impressive normal seasonal increases over third quarter: **department stores** increased by 12 percent; **apparel stores** also grew by 12 percent; **furniture stores** were 9 percent ahead of third quarter; and **miscellaneous retail stores** grew by 8 percent. All of these industries gear up for holiday shopping. **Eating and Drinking Establishments** dropped a normal seasonal 3 percent with the closing of drive-ins and some resort restaurants.

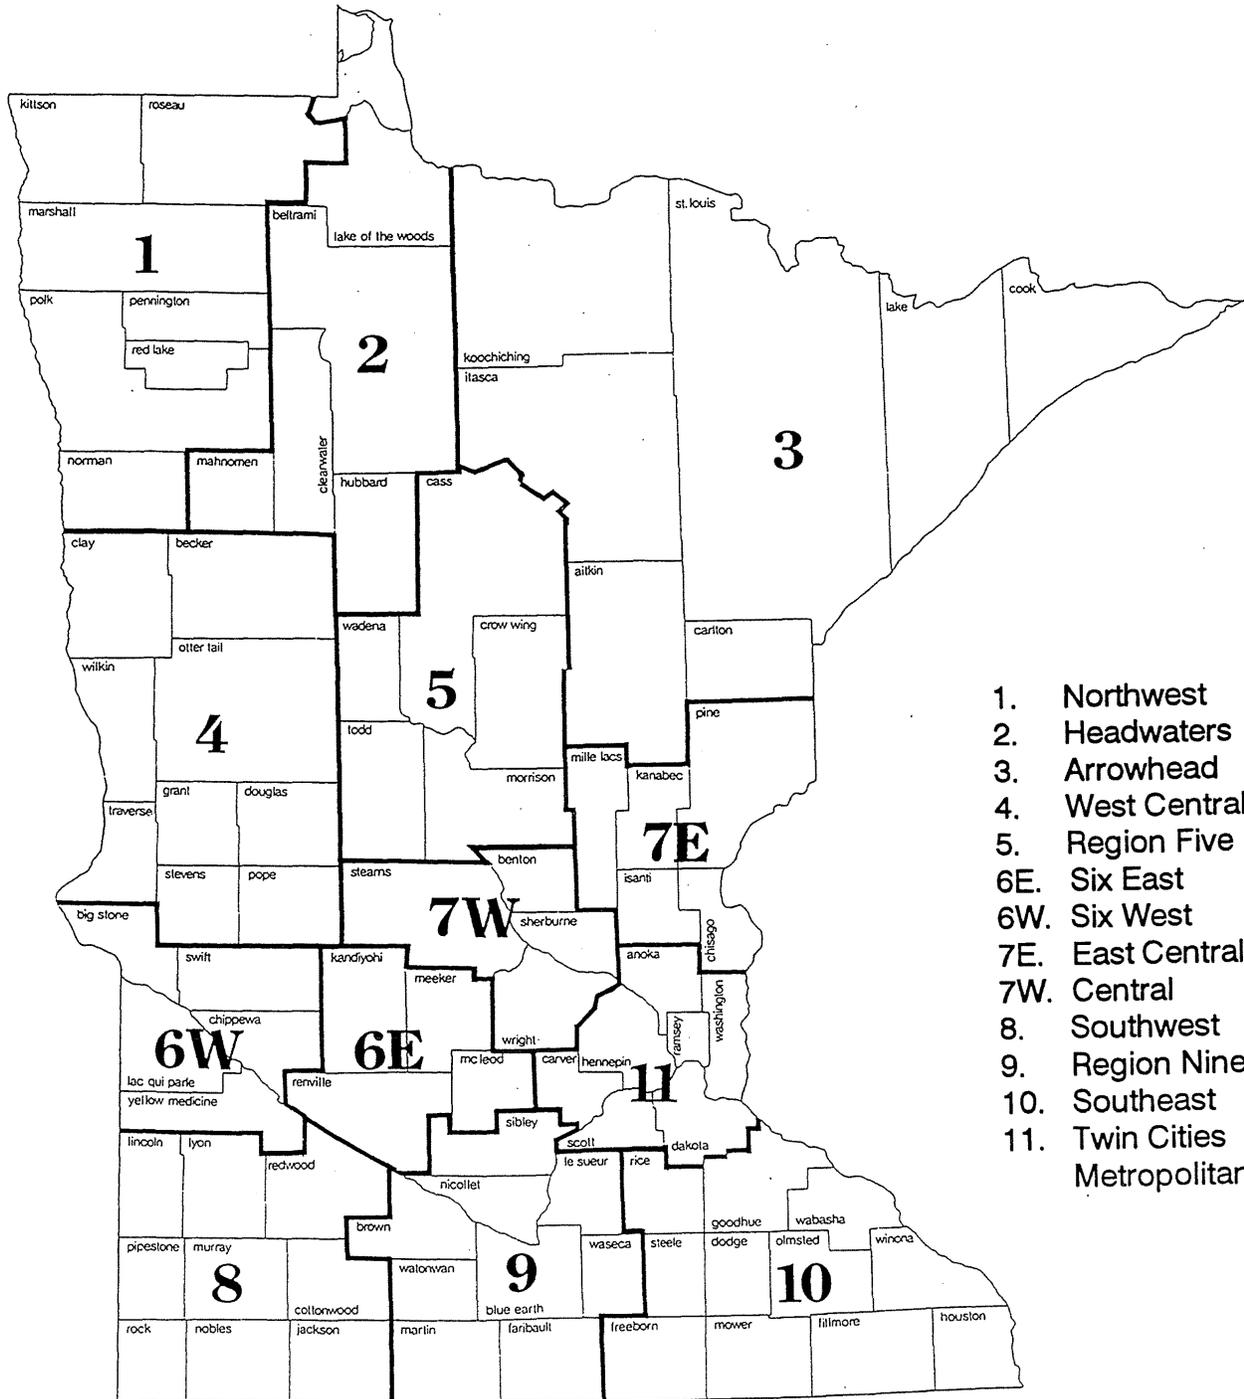

**FINANCE, INSURANCE AND REAL ESTATE**, while 3 percent ahead of last year, was unchanged from the third quarter of 1992.

**SERVICES**, 6 percent ahead of last year thanks to continuing employment growth at the casinos, was also unchanged from the third quarter. **SERVICES** had normal seasonal employment decreases in fourth quarter. **Hotels and lodging places** dropped 12 percent with the closing of resorts; **amusement and recreation** dropped 9 percent as golf courses and other summer outdoor activities ended their season; and **museums and zoos** with summer programs cut back 6

percent of their employment. **Educational services** in the private sector, however, increased a seasonal 8 percent which helped to balance the seasonal declines. **Health Services'** employment was unchanged from third quarter. The same was true in **Legal Services**. **Auto Repair** employment did not grow as it normally does since repair shops faced a three month period with no snow and did not hire the extra help normally necessary to keep Minnesota drivers on the road in the winter. **Business Services** grew about 2 percent in the fourth quarter, reaching an employment level exceeding 109,000.

**GOVERNMENT** increased a normal seasonal 19 percent with the opening of schools and colleges. The change was particularly noticeable in **Local Government** which increased 29 percent. **EDUCATION** employment in **Local Government** increased 79 percent.
