INTRODUCTION

The Minnesota Employment and Wages by Economic Region and County is published quarterly by the Research and Statistics Office of the Minnesota Department of Economic Security. The data contained in this publication includes two digits of industry detail wherever possible. To avoid violating data privacy laws and to maintain the mandated confidentiality of individual firm data it was necessary to combine industries wherever there are too few firms in an industry cell. For this reason, some counties show less industry detail than others.

The source of the information is data developed and analyzed by the Research and Statistics Office of the Minnesota Department of Economic Security. The data is selected from quarterly tax reports submitted by employers covered under the Minnesota unemployment compensation tax law. All individual employer data is confidential. The data selected is reviewed for accuracy and organized in accordance with the U.S. 1987 Standard Industrial Classification Manual. Approximately 97 percent of the total nonagricultural wage and salary employment in Minnesota is included. There are eight categories of workers excluded from coverage under Minnesota State law:

- 1) the self-employed;
- 2) farms with less than four employees in 20 weeks;
- 3) all railroad transportation employment;
- 4) insurance and real estate salespeople who work only on commission basis;
- 5) students working for the school while a full-time student;
- 6) those employed by a church or synagogue for religious work;
- 7) minor children, spouse and parents working for owner of a business;
- 8) elected officials at the Federal, State and Local levels of government.

TERMS

This section defines a number of key terms necessary to use this data.

The term units refers to the number of plant locations or work sites within the industry and county. For example, there are seven units of the U.S. Post Office in Morrison County.

Monthly employment is reported by job site, not residence of the employees and represents a count of workers on employer payrolls for the week including the 12th of the month.

Average employment is calculated by summing the three monthly figures and dividing by 3. Sub-totals do not necessarily add to totals because of rounding.

Total wages represent wages paid during the entire quarter.

The average weekly wage is calculated by dividing total wages paid by average employment and then dividing again by 13. Average weekly wage figures should be used with caution. Some industries have more temporary or part-time workers than others and this has the effect of lowering the average weekly wage. Also, average weekly wages in some industries may be high because of bonuses paid at the end of a year, or because lower-paid seasonal workers were laid off.

Unallocated employment is listed on page 30. It represents employment of traveling salespeople who have no attachment to a specific work site or those few employers who are not able to report multiple business locations separately.

SECOND QUARTER 1993 COVERED EMPLOYMENT

In the second quarter, Minnesota's average employment was 2,182,036, a gain of 3.4 percent or 70,915 jobs over first quarter's average employment of 2,111,121. Since the same quarter a year ago the quarterly average employment rose by 2.5 percent or 53,947 more jobs. The average weekly wage in the second quarter of 1993 was \$483, compared to \$470 in the second quarter of 1992, a 2.8 percent increase. The second quarter average weekly wage also increased by 2.8 percent over the first quarter of 1993, compared to a 0.63 percent decrease between these same quarters in 1992.

Normal seasonal increases showed up strongly in the second quarter. **MINING** employment increased by 907, a gain of 13.1 percent from the first quarter, but was down 113 or 1.4 percent from the same quarter a year ago. **AGRICULTURE, FORESTRY, and FISHERIES** employment grew by 5,851, or 39.9 percent, and was virtually unchanged from the same quarter a year ago. **CONSTRUCTION** employment in the second quarter increased by 15,830 jobs, up 25.1 percent from first quarter, but up less than one percent from second quarter 1992. **Special Trade Contractors**, the largest segment of **CONSTRUCTION**, provided most of the job growth with a seasonal increase of 7,867 jobs, an 18.7 percent increase since the first quarter. It was also 2.8 percent ahead of last year.

MANUFACTURING employment grew by 1.9 percent or 7,475 jobs between first and second quarters. Since the second quarter of 1992, it grew by 10,452 jobs or 2.7 percent. Over the same period, the average weekly wage increase by \$16, a 2.6 percent increase. In the durable goods sector employment was up 2.0 percent from first quarter. **Industrial and Commercial Machinery and Computer Equipment** increased by 665 or 0.9 percent from the previous quarter. This sector generated 3,669 jobs up 5.1 percent from one year ago.

Non-durable **MANUFACTURING** increased by 3,022 job or 1.8 percent from first quarter 1993. The growth from the second quarter one year ago produced 3,965 jobs for a 2.3 percent increase. Within Non-durable **MANUFACTURING** **Printing and Publishing** showed a 2 percent increase from first quarter 1993, adding 1,084 jobs. There was also a 3.3 percent increase over the same quarter last year. **Food and Kindred** also reported an employment gain. Between first and second quarter of 1993, 849 jobs were added, primarily a seasonal increase.

Employment in **TRANSPORTATION, COMMUNICATION and PUBLIC UTILITIES** during the second quarter was 102,526 workers, 893 more than the previous quarter but 1,380 fewer in the second quarter of this year than in the second quarter of the previous year, a decrease of 1.3 percent. Part of the loss was caused by the flood of 1993 which disrupted water and rail transportation.

TRADE is now the second largest industry in Minnesota. The **Retail Trade** sector had quarterly average employment of 405,748, 3.3 percent more than the previous quarter and 2.7 percent more than the second quarter one year ago. Much of the employment increase between these two years in **Retail Trade** was in four of the eight industries within **Retail Trade**: **Apparel and Accessories, Eating and Drinking Places, Home Furniture, Furnishing, and Equipment Stores, and Miscellaneous Retail Stores.**

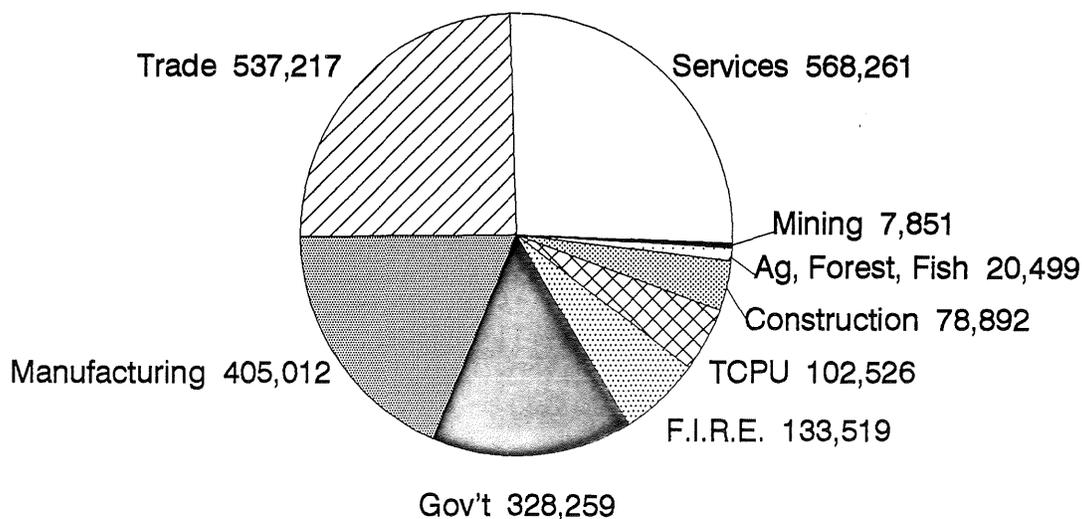

Furniture, Home Furnishings, and Equipment Stores had the highest growth rate, a 9.2 percent increase over the second quarter of 1992. The largest employment increase came in the Home Furnishings division with an increase of 739 jobs. The increase of 562 jobs in Radio, Television and Consumer Electronic was the other major increase.

Employment in Apparel and Accessories Stores increased 7.8 percent over 2nd quarter 1992; Miscellaneous Retail Stores increased 5.5 percent; and Eating and Drinking Establishment had a normal seasonal increase of 1.9 percent. The 6,600 job increase in Region 11 in Trade accounted for just over half of the total increase in the State. Retail Trade reported an average weekly wage fo \$244, a \$12 or 3.7 percent increase since the second quarter of 1992.

Employment in the FINANCE, INSURANCE AND REAL ESTATE industry grew by 2.2 percent, 2,913 from first quarter's 133,526. Minnesota's fourth largest industry showed an atypical employment gain. Average employment in the second quarter for Insurance Carriers increased 3.8 percent or 1,360 jobs. The increase in jobs was the result of property destroyed by the flood and the many workers who were added to assess damages. During the same quarter one year ago, this industry averaged 127,569 workers. In the Second Quarter of 1993, employment increased to 133,526, a 4.7 percent increase, or 5,957 more jobs.

SERVICES, the industry with the greatest employment, ended the second quarter with an average employment of 568,372, which was 16,992 more than first quarter and a 3.1 percent increase. All SERVICE industries showed substantial growth. Those with the greatest employment gains were Business Services, Health Services, and Social Services. These industries account for 348,767 jobs, 4.5 percent more than second quarter last year. This was an increase of 14,924 jobs, 2.6 percent more than first quarter of this year. Business Services showed the largest employment growth, 5,072 more than the previous quarter; Health Services grew by 2,312 and Social Services by 1,394 jobs.

Second Quarter 1993 Employment

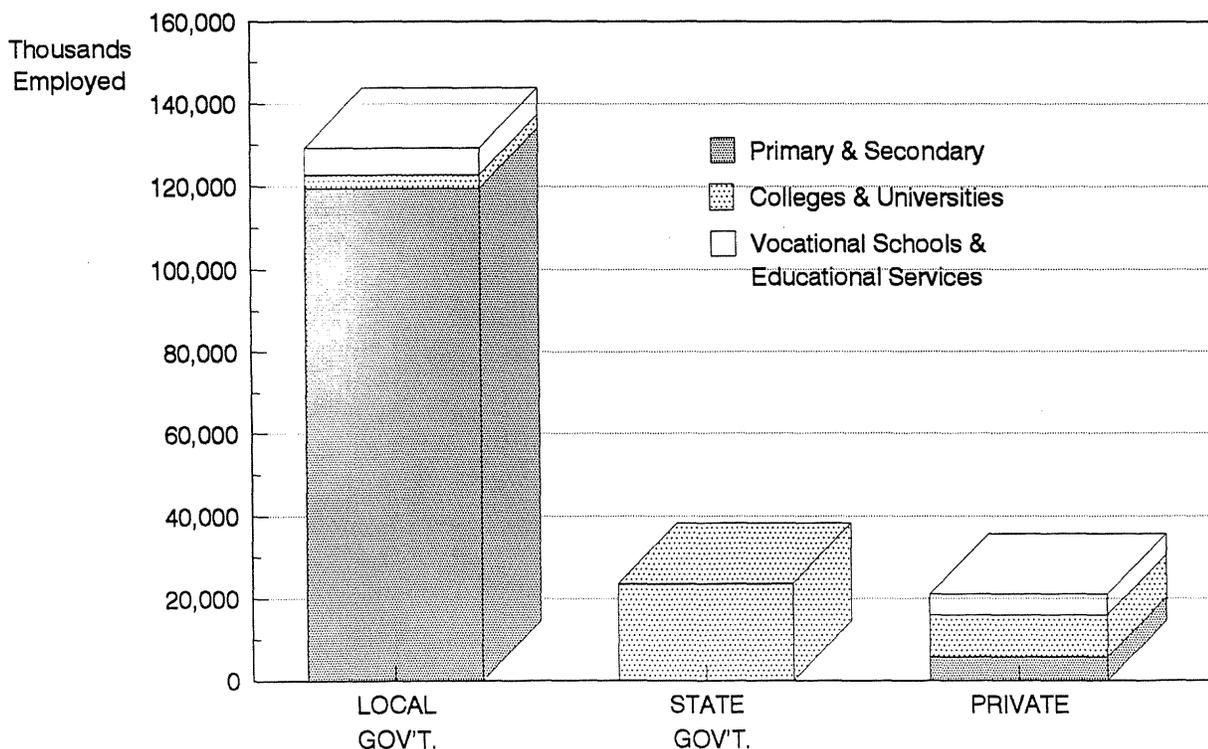

EMPLOYMENT IN EDUCATION

While there has been endless boasting by a variety of industries over which is the largest (or most important) industry in Minnesota, never mind what you heard. After health care, we are the "Education State." The average total employment in education for the second quarter of 1993 was 174,364 which is 3 percent greater than the same quarter a year ago and 16 percent greater than the same quarter in 1987. Although legislative initiatives have mandated many new programs in the public elementary and secondary schools, some of this growth has been offset by consolidation of school districts, primarily in the outstate regions.

Employment in **EDUCATION** is spread through three sectors of the economy: the private sector, State government funded educational institutions, and local government educational institutions. The private sector is the smallest portion of the industry with 12 percent of the **EDUCATION** employment. During the second quarter of 1993 it had 21,099 jobs, a one percent increase over the same quarter a year ago but a 23 percent increase over the second quarter figure in 1987. Forty-nine percent of the employment in the private sector was in colleges and universities.

Education Employment

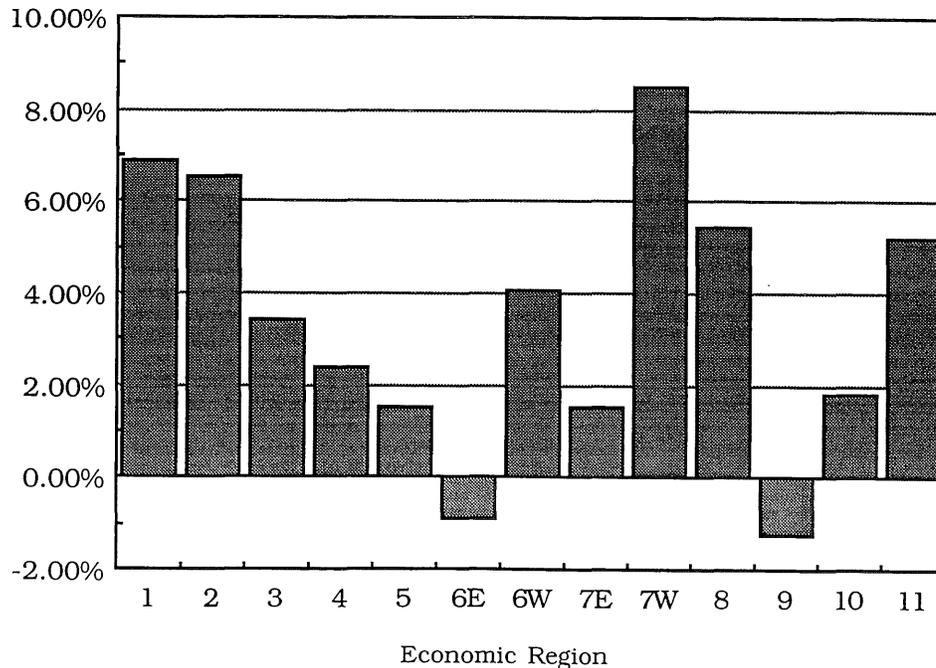

In the State funded sector of **Educational Services** 99 percent or 24,012 employees in the second quarter of 1993 worked at colleges and universities. The **State government** sector, 14 percent of total **Educational Services** employment, actually dropped one percent from the same quarter in 1992, but half of this drop can be accounted for by the closing of the Waseca branch of the University of Minnesota. The second quarter of 1993 employment figure was still nine percent ahead of the same period in 1987.

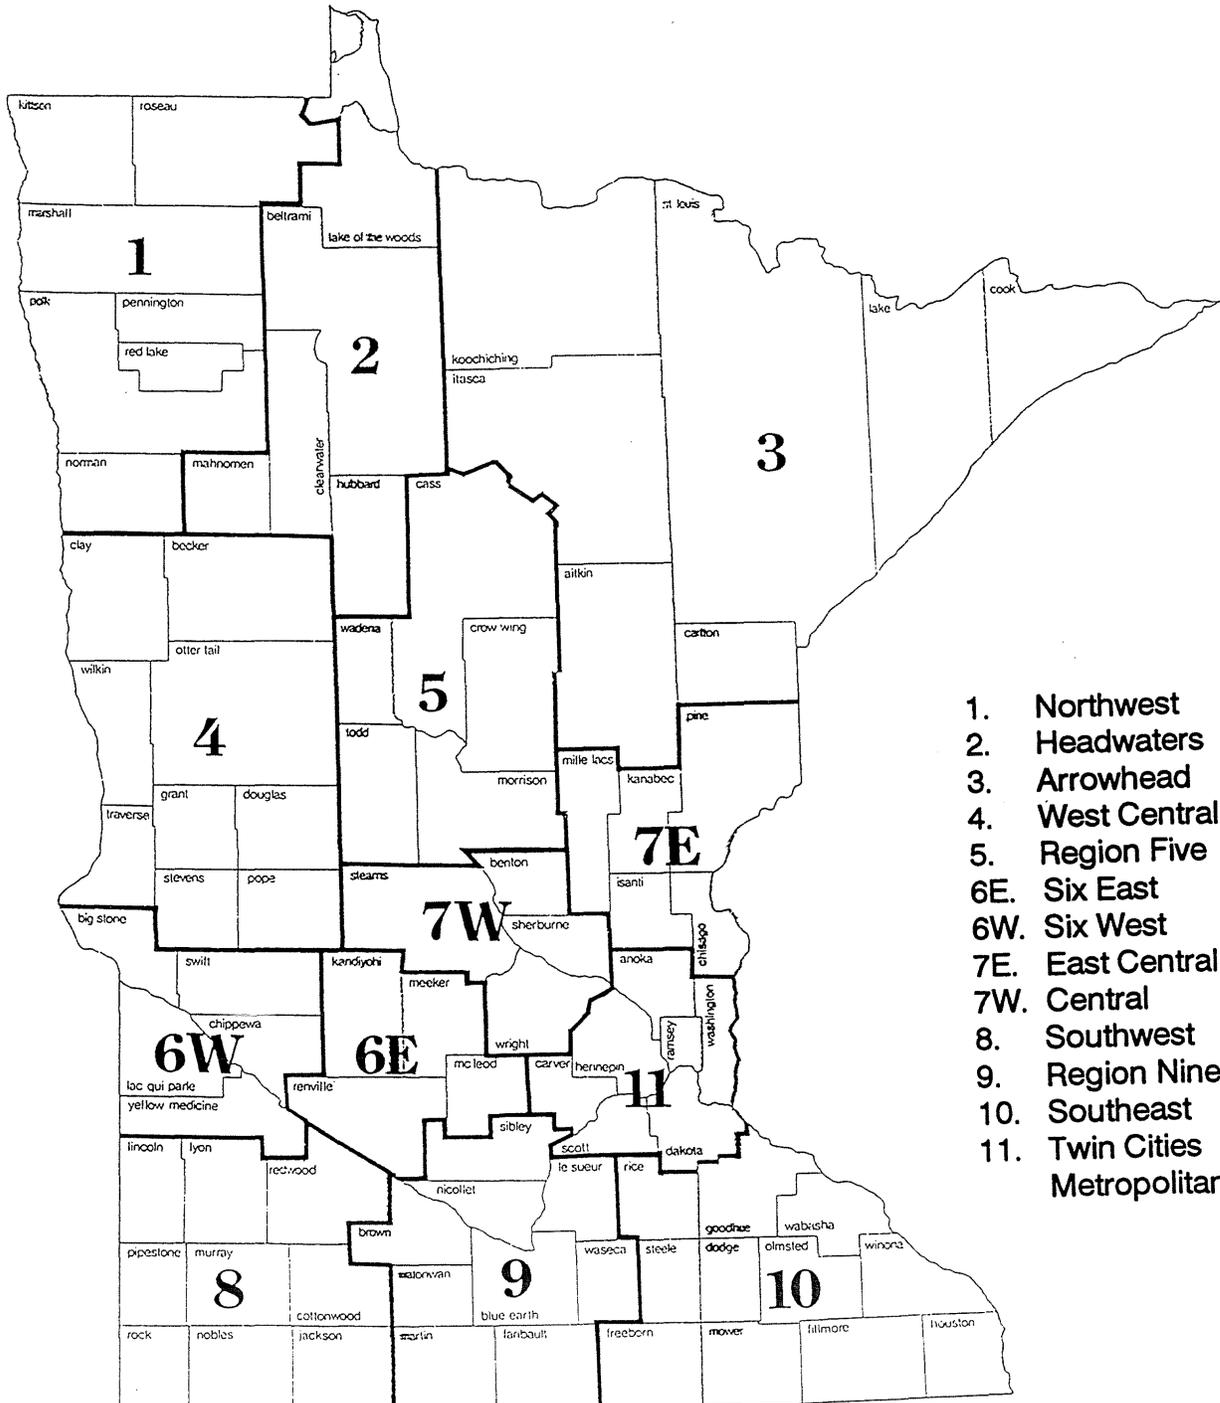

The **local government** sector of **Educational Services** has 86 percent of its employment in primary and secondary schools. This sector also represented 74 of the total **EDUCATION** employment in Minnesota. Because most of the newly mandated programs have been directed at this level of education, this sector has had the strongest growth. In the second quarter of 1993 this sector had average employment of 129,253, a 4 percent increase or 5,000 jobs over the same quarter a year ago and 17 percent more than the same quarter in 1987. Of the 5,000 increase since 1992, 3,000 or 60 percent of the new employment occurred in the Twin Cities Metropolitan Area.

In the outstate area two regions, 6E and 9, actually lost public school jobs. The total loss for the two regions, however, was only 116 positions. Region 7W, on the other hand, led the remaining regions in increases adding almost 700 jobs for an 8.5 percent increase. Regions 1,2, and 8 each added about 200 positions since this same quarter last year.

**Local Education Employment
Percent Change, 2nd Quarter 1992 & 1993**
