State of Minnesota
Minnesota Department of Corrections

March 1998

We are pleased to present the 1997 Probation Survey; the eighteenth edition.

This survey is a cooperative effort in documenting the use of community supervision of offenders and, as such, plays a significant role in the governor's, legislature's, and the department's response to probation crowding. It reflects the work being done by probation officers and corrections agents throughout Minnesota.

We are appreciative of the help we received in collecting the data, the promptness in responding to our requests, and for the cooperation with the department's Office of Planning and Research in completion of the survey.

Again this year there has been an increase in probationers on supervision throughout Minnesota. The additional probation officers and corrections agents made possible by the funding for workload/caseload reduction will assist in management of the ever-increasing probation population.

We welcome your suggestions on ways in which this survey can be made a more useful tool for you. Consideration is being given to including agent information in future editions of this survey.

Please call Deb Sjoberg at (612) 603-0180 for additional copies of this survey.

Thank you for your assistance!

Sincerely,

R. T. Mulcrone, Assistant Commissioner
Community Services Division

Daniel R. Storkamp, Director
Office of Planning and Research

I. Introduction

The Minnesota Department of Corrections (DOC) has collected probation data from Minnesota counties on an annual basis since the early 1980's. The reporting of entries, removals, year-end populations, and distribution by race and gender has remained largely unchanged since the 1984 survey. Throughout these years, one purpose of the Minnesota Probation Survey has been to collect data requested by the Bureau of the Census and the Bureau of Justice Statistics regarding Minnesota probationers. The organization of the Minnesota questionnaire and its definition of "probationer" is patterned after that used in the federal questionnaire. In addition to meeting federal reporting requirements, the findings of the probation survey are used by the Minnesota Department of Corrections, other state agencies, the Minnesota Legislature, county probation offices, and other parties for management and policy-making purposes.

"Probation officers" do much more than provide probation supervision. Other duties can include supervising individuals on supervised release, parole, intensive community supervision, pre-trial diversion, or CHIPS (child in need of protection or services), as well as conducting presentence investigations, processing transfer requests, and working with prevention programs. In addition to presenting probation data, this report includes a profile of some of these other contributors to the workload of probation service providers. The Minnesota Department of Corrections' Corrections Management Information System (CMIS) was used as the source for supervised release and parole data included in this report.

II. Methodology

This chapter describes the content of this probation survey and how the survey data was collected. Issues that arose in the course of this year's data collection are also addressed.

A. Survey Design

The 1997 probation survey instructions and questionnaire are shown in Appendix A. Throughout the years, the essential definition of "probationer" has been "those who have been placed under the supervision of a probation agency as part of a court order—regardless of whether they have been convicted." However, clarifications and changes have been made in the detailed instructions in recent years, to ensure that the data needed for reporting and management purposes is collected, and to promote more consistent interpretations of the instructions by all counties. For instance, prior to the 1993 survey respondents were told to exclude "cases for whom an agent is only monitoring compliance with a sanction such as a fine or restitution." However, the Bureau of Justice Statistics directs the DOC to report on all probationers, including those in "paper" or "administrative" classifications, so the Minnesota survey's instructions were changed to include these cases.

B. Survey Administration

Questionnaires were mailed in December 1997 to the following:

- Community Corrections Act (CCA) directors—to collect data on all probationers in their counties.
- County probation offices in non-CCA counties not served by DOC contract agents—for reporting all probationers under their supervision (generally juveniles and adult non-felons).

Minnesota Department of Corrections district offices maintain caseload data on probationers supervised by adult state agents and contract agents. The district offices were requested to generate and submit their probation survey data using a reporting feature built into their PROBER software.

C. Reporting

All probation offices completed and returned the survey.

III. Findings

This chapter provides an analysis of the 1997 probation survey data. Comparisons are also made to probation data from previous years.

A. Overview

Appendix B presents the data reported, by county, by the probation offices on their questionnaires. In the case of non-CCA counties, this was obtained by adding the numbers provided on the state agent and county agent questionnaires. After each county's data, Appendix B presents various aggregations of the data:

- by agent type (adult state agents, CCA agents, contract agents, and non-CCA county agents)
- by CCA status (CCA counties, non-CCA counties)
- by metro/non-metro status (where "metro" is defined as consisting of Hennepin, Ramsey, Anoka, Washington, Dakota, Scott, and Carver Counties)

as well as statewide totals of all probationers.

Appendix B column headings correspond to questions 1 through 8 of the questionnaire (Appendix A). The first three columns report the 1996 year-end population, as well as movements (entries and removals) during 1997. After establishing the December 31, 1997 population, (column 4) the remaining columns show the distribution of the year-end probationer population by gender, race, Hispanic status, and offense category.

Appendix B shows that on December 31, 1997, there were 90,707 adults and 17,182 juveniles under probation supervision in Minnesota. Below is a comparison of 1996 and 1997 probation populations:

Table 1: Comparison of 1996 and 1997 Year-End Minnesota Probation Populations

	12/31/96	12/31/97	Change
Felony probation	27,373	29,052	+ 6.1%
Gross Misdemeanor probation	20,736	21,169	+ 2.1%
Misdemeanor probation	<u>39,930</u>	<u>40,486</u>	+ 1.4%
Total adult probationers	88,039	90,707	+ 3.0%
Juvenile probationers	<u>15,835</u>	<u>17,182</u>	+ 8.5%
Total probation population (adults and juveniles)	103,874	107,889	+ 3.9%

Figures 1 and 2 present the Table 1 data graphically. The distribution of the December 31, 1997 probation population is given in Figure 1, while Figure 2 provides a comparison of year-end 1996 and 1997 populations. Figure 3 shows that during 1997 non-CCA counties showed an increase in probationer population at all levels. The CCA counties showed an increase at the felon and juvenile level, however the number of gross misdemeanants and misdemeanants decreased slightly.

Based on 1995 population estimates from the State Demographer's Office, the total probation population of 107,889 means that approximately one out of every 32 Minnesotans, age 18 and over, was on probation on December 31, 1997 (although not all were under active supervision). One out of 23 juveniles, ages 12 through 17, statewide were on probation on that day. The Bureau of Justice Statistics reports that as of December 31, 1995 (the most recent nationwide per-capita probation data available, published 1996), only five states had more adult probationers per 100,000 adult population than Minnesota.

Figure 1: Distribution of 12/31/97 probation population

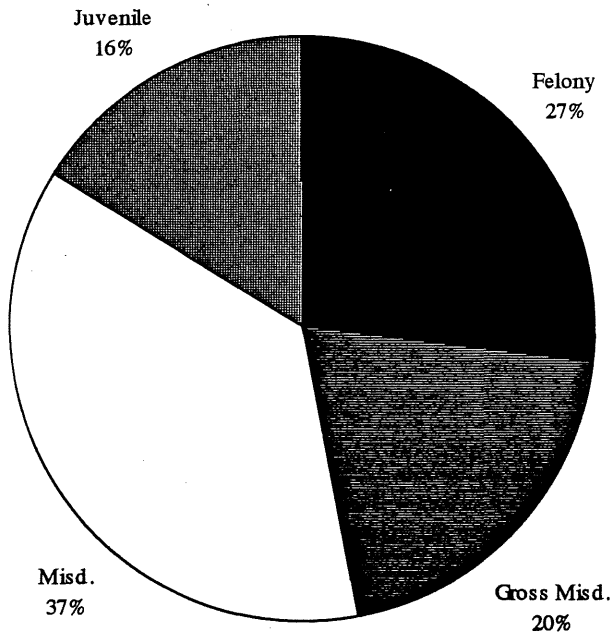

Figure 2: Comparison of 1996 and 1997 year-end probation populations

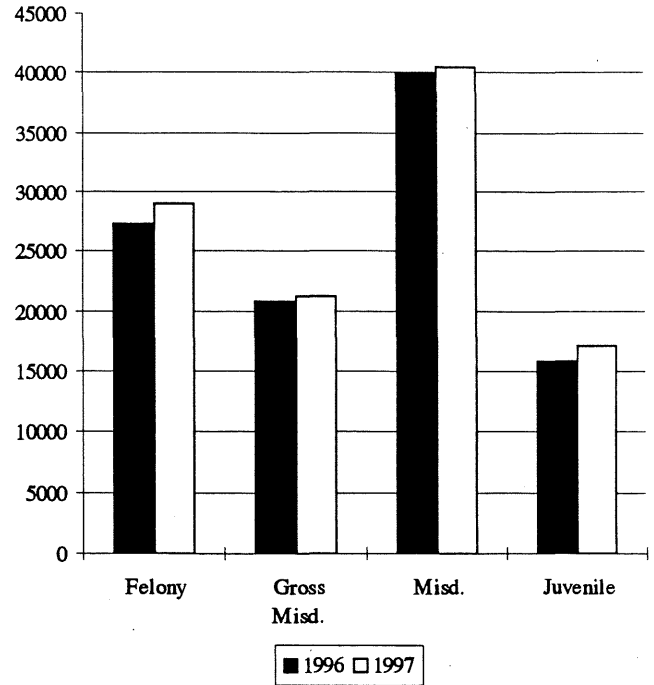

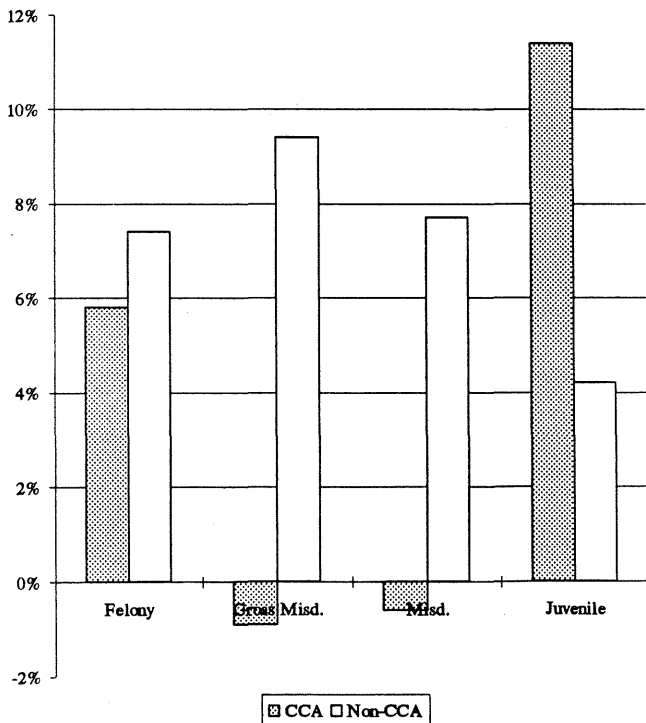

Figure 3: Percentage change in year-end populations from 1996 to 1997 in CCA and non-CCA counties

B. Minnesota Probationer Population, 1984-1997

The probation population increased at all levels during 1997. The greatest rate of increase was at the juvenile level. Table 2 shows the year-end probationer population by offense level for each year from 1984 to 1997, while Figure 4 presents the same information graphically.

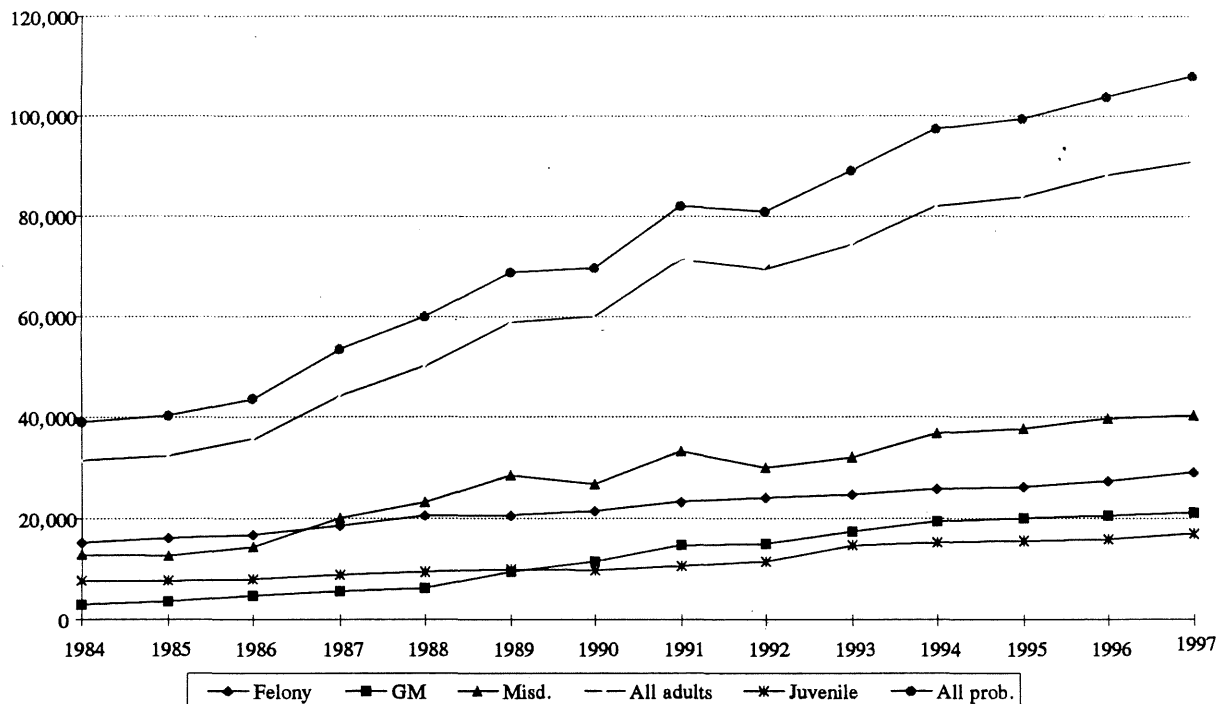

The Table 2 numbers were obtained from probation surveys conducted over the years. The pre-1993 data is supplemented with annual statewide counts of felony probationers supervised by DOC felony agents. (DOC felony agents did not participate in the probation survey before 1993.) From 1990 to the present, all probation offices have completed and returned the probation survey each year, and participation was nearly 100 percent before 1990. In the three instances before the 1990 survey where a populous county failed to submit probation data, the missing numbers were estimated, using the county's population data from the year before and after, so that Table 2 and Figure 4 represent a complete accounting of the Minnesota year-end probation population for each year from 1984 through 1997. With the exception of a slight dip in 1992, adult probation populations have increased annually. The adult probationer population increased by 103 per cent during the ten-year period from December 31, 1987 (53,225) to December 31, 1997 (107,889.) By comparison, the population of Minnesota-committed inmates in state correctional facilities increased by about 108 percent during that period.

Table 2: Minnesota Probation Population, 1984-1997

	Gross					All
	<u>Felony</u>	<u>Misdemeanor</u>	<u>Misdemeanor</u>	<u>All adults</u>	<u>Juvenile</u>	<u>Probationers</u>
1984	15,341	3,012	13,087	31,440	7,674	39,114
1985	16,350	3,510	12,683	32,543	7,781	40,324
1986	16,730	4,602	14,310	35,642	8,039	43,681
1987	18,659	5,747	19,957	44,363	8,862	53,225
1988	20,774	6,234	23,176	50,184	9,541	59,725
1989	20,677	9,490	28,481	58,648	10,158	68,806
1990	21,395	11,540	26,851	59,786	9,715	69,501
1991	23,300	14,782	33,325	71,407	10,544	81,951
1992	24,233	15,054	30,001	69,288	11,360	80,648
1993	24,667	17,265	32,254	74,186	14,822	89,008
1994	25,874	19,345	36,753	81,972	15,346	97,318
1995	26,114	19,966	37,698	83,778	15,655	99,433
1996	27,373	20,736	39,930	88,039	15,835	103,874
1997	29,052	21,169	40,486	90,707	17,182	107,889

Prior to 1993 respondents were instructed to exclude cases where the agent was "only monitoring compliance with a sanction," whereas in the past three years these cases have been included. If these cases had been counted prior to 1993, it would have increased the number of probationers for those years, and would lessen the percentage of probation population increase when comparing any year prior to 1993 to any year after that. Since the probation survey has never collected information regarding the supervision level of probationers, attempts to adjust the pre-1993 numbers would be speculative. However, the general trends of steady growth in probation populations from 1984 to 1997, plus the observation that the rate of adult population increase from 1992 (with administrative cases excluded) to 1993 (with administrative cases included) was little different than the average annual increase in previous years, suggests that including administrative supervision cases had only a small impact on the total adult probation numbers, so that Table 2 and Figure 4 represent the probation population situation fairly accurately, even without adjustment of the pre-1993 data.

Figure 4: Minnesota probation population, 1984–1997

Source: 1984–1997 Minnesota Department of Corrections probation survey data

Table 2 shows that the sharpest population increase has been in gross misdemeanants. The year-end 1997 gross misdemeanor probationer population of 21,169 was seven times the number of gross misdemeanor probationers at the end of 1984 (3,012). The least increase has been in felony probationers, whose numbers have increased about 89 percent from 1984 to 1997. It should be noted that the designation of an offense as a felony, gross misdemeanor, or misdemeanor, is not always clear-cut. Thus the data on the total adult probationer population over the years provides another useful perspective.

The juvenile probation population increased markedly from 1992 to 1993 (about 31 percent). This may be largely due to the change in the 1993 instructions described above (including administrative supervision cases for the first time). The juvenile probation growth has subsequently returned to a slower rate.

C. Minnesota Probationer Demographics, 1985-1997

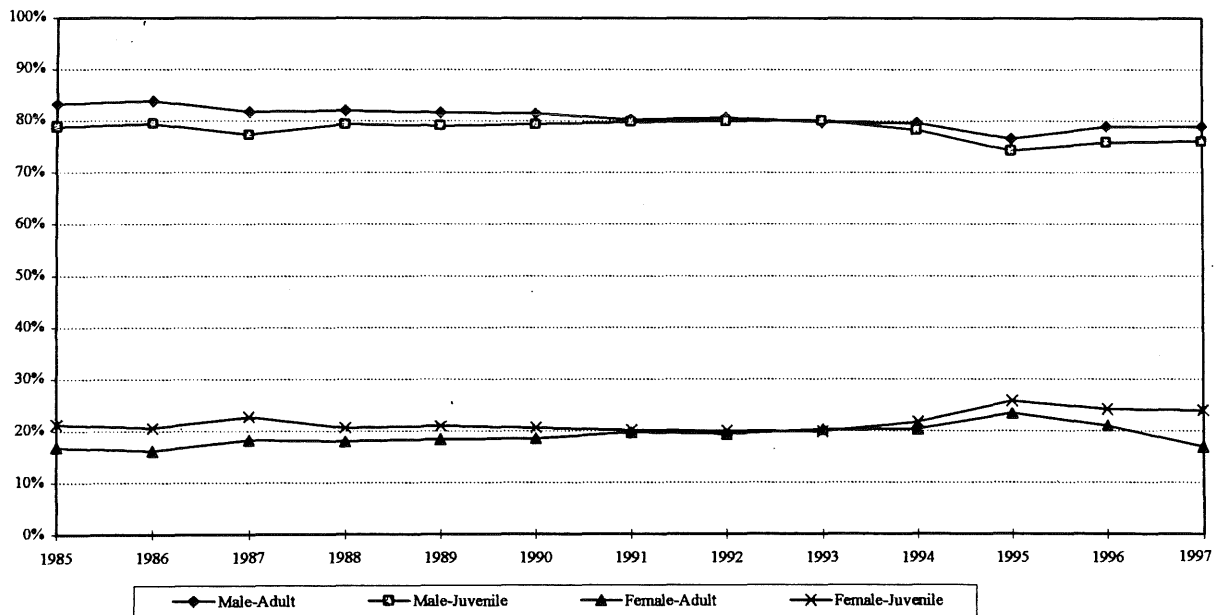

A common element of the probation survey over the years has been the reporting of the gender and race distribution of the year-end population. The first year in which gender data was reported for a clear majority of probationers was 1985. Race data is presented from 1986 to the present for all four offense levels—adult felony, adult gross misdemeanor, adult misdemeanor, and juvenile. The 1997 data used in this section is given in Appendix B. This appendix also provides the breakdown of demographic data, on a by-county basis, for readers interested in examining this level of detail.

Probationers supervised by adult state agents are included in the demographic data only in 1989 and from 1993 to the present, since these are the only years within this span in which adult state agents participated in the survey. However, since county-supervised felony cases outnumbered state felony cases by ratios of two- or three-to-one over these years, the findings presented in this section should not be substantially distorted by the missing data. With the exception of adult state agent cases, race and gender were reported for virtually 100 percent of the probationer population from 1987 to the present.

The composition of the adult and juvenile probationer population by gender is shown in Figure 5. At year-end 1997, 79 percent of adult probationers and 76 percent of juvenile probationers were male. The percentage of females among adult probationers has increased from 17 percent in 1985 to 21 percent in 1997, and the percentage of females in the juvenile probationer population increased from 21 percent to 24 percent during this period. Females constitute a much higher percentage of the probationer population than the adult prison population. (As of January 1, 1998, 4.7 percent of the adult Minnesota correctional facility population is female.)

Figure 6 shows that probationers at all offense levels have been predominantly white, from 1986 to the present, but that the proportion of minority probationers has increased over this time. The proportion of white felons on probation was about 68 percent at year-end 1997. At present, whites constitute about 82 percent of the gross misdemeanor and misdemeanor probation population, and about 72 percent of the juvenile probation population; in each case this figure has declined about eight to fourteen percentage points from that of 1986.

Figure 5: Probationers by gender, 1985–1997

The percentage of blacks among felony probationers increased very slightly in 1997. There has been a sharp increase in the percentage of black gross misdemeanants and misdemeanants, and a gradual increase in black juveniles, over the period shown in the graph. The proportion of American Indian probationers has held quite constant over the years at all offense levels.

The 1997 year-end population of Minnesota's state correctional facilities displays some notably different racial characteristics from the felony probation population. The racial distribution of Minnesota's adult inmate population is 48.4 percent white, 36.6 percent black, 7.0 percent American Indian, 6.2 percent Hispanic, and 1.7 percent other. ("Hispanic" is counted as a racial category in the CMIS.)

D. Probationer Distribution by Agent Type

Table 3 shows the distribution of December 31, 1997 probationers by agent type and offense level. The first three data columns include only probationers processed in adult court; all juveniles are reported in the fourth column. (This data can also be found in Appendix B.)

Figure 7 uses these numbers to present the statewide probation population served by each agent type. As might be expected of "felony agents," about 70 percent of the probationers under the supervision of adult state agents are felons, with most of the remainder being gross misdemeanants. Among probationers supervised by agents in CCA counties, 28.9 percent are felons, 18.7 percent are gross misdemeanants, 38.8 percent are misdemeanants, and 13.6 percent are juveniles. Contract agents (DOC employees providing non-felon probation services in non-CCA counties) had a caseload consisting of approximately 22 percent gross misdemeanants, 30 percent misdemeanants, and 48 percent juveniles. Probation agents employed by non-CCA counties served a caseload of which 47 percent were misdemeanants and 28 percent were juveniles, with the remaining 25 percent being gross misdemeanants.

Figure 8 looks at the data in the table from the other perspective; that is, how cases at each offense level are distributed among the agent types. About 71 percent of the state's population live in CCA counties, and 77.3 percent of the state's probationers were supervised by CCA agents. CCA counties are supervising over three-fourths of the statewide felony probationer population, with the adult state agents being responsible for the remainder. CCA counties supervise 68.7 percent of the gross misdemeanant, 76.6 percent of the misdemeanant probationers in the state, and 61.3 percent of the juvenile probationers.

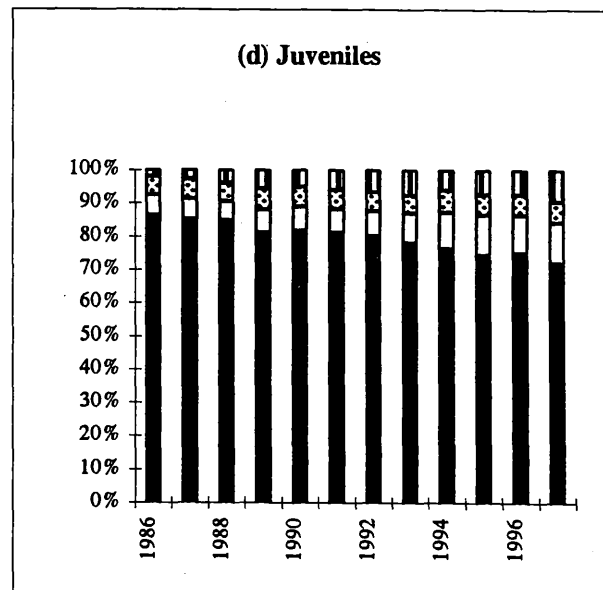

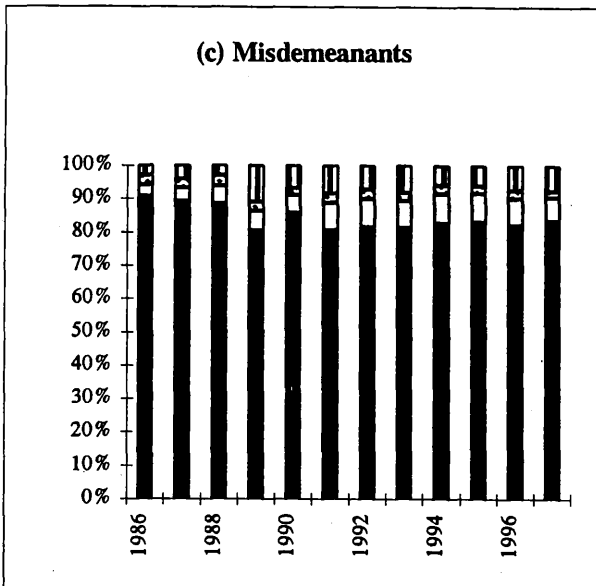

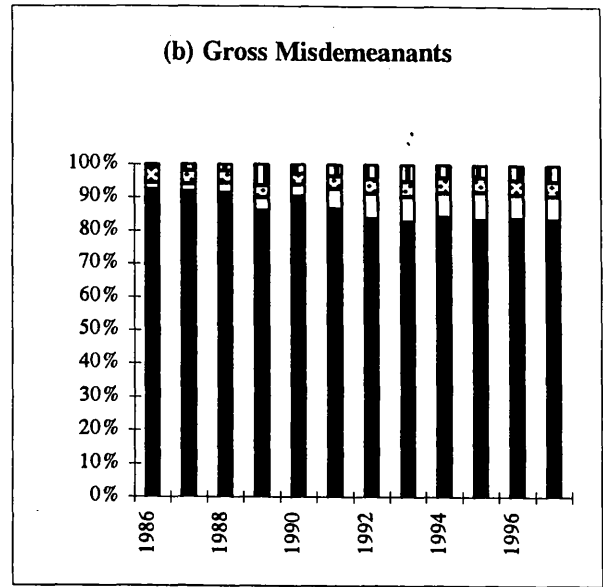

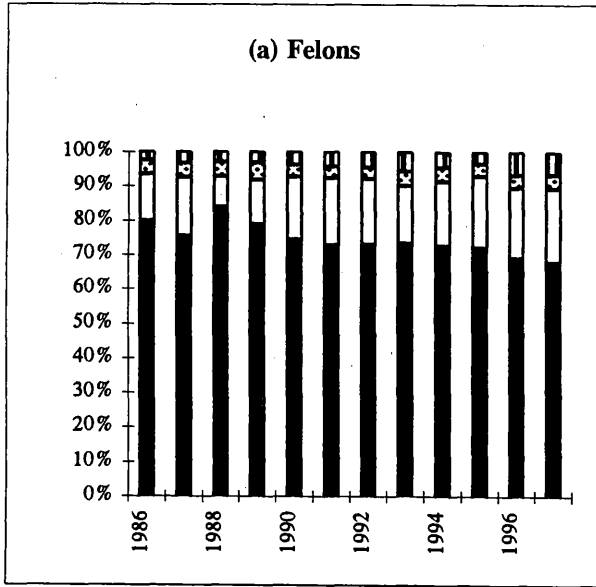

Table 3: December 31, 1997 Probationers by Agent Type and Offense Level

Agent type	Felony	Gross Misdemeanor	Misdemeanor	Juvenile	Total
Adult State Agents	6,596	1,573	1,191		9,360
CCA Agents	22,447	14,547	30,097	10,531	77,622
Contract Agents		892	1,213	1,941	4,046
Non-CCA County Agents	9	4,157	7,985	4,710	16,861
Total	29,052	21,169	40,486	17,182	107,889

E. Probationer Distribution by Type of Offense

The probation survey has included an "offense category" question since 1993. The offense categories used in the questionnaire were derived from the Minnesota Offense Code general index categories, with the main differences being the creation of separate categories for DWI and juvenile status offenses, due to the frequent occurrence of these offenses in the probationer population. Probationers frequently are under

Figure 6: Probationer Distribution by Race, 1986-1997

■ White □ Black ▨ Indian ▩ Other

Note:

The sharp decline in black felony probationers in 1988, as shown in Figure 3(a), is due to that year's report showing only 221 black felons for Hennepin County, as compared to 1242 in 1987 and 1482 in 1989. Almost certainly this indicates a data quality problem, rather than an actual fluctuation in the racial distribution of probationers.

supervision for more than one offense, but survey respondents were directed to count each individual only once, according to their most serious offense.

Appendix B provides the numbers of probationers in each offense category (i.e., arson, assault, burglary, etc.) by offense level (felony, gross misdemeanor, etc.) by county, and also provides summary data by agent type, county type, and statewide. A more concise summary of the offense data is provided in Appendix C. In Appendix C, offense categories have been collapsed into "offense types" as shown below:

Person: assault, criminal sexual conduct, homicide, kidnapping, robbery

Property: arson, burglary, forgery, property damage, stolen property, theft, theft related, vehicle theft

Other: crime against family, crime against administration of justice, crime against government, disturbing peace, escape, gambling, obscenity, sex related, weapons, other

In addition, the survey's offense categories for "drugs", "DWI", "juvenile status offenses", "traffic/accidents (except DWI)", "other", and "unknown/not applicable" are each represented as an offense type in Appendix C.

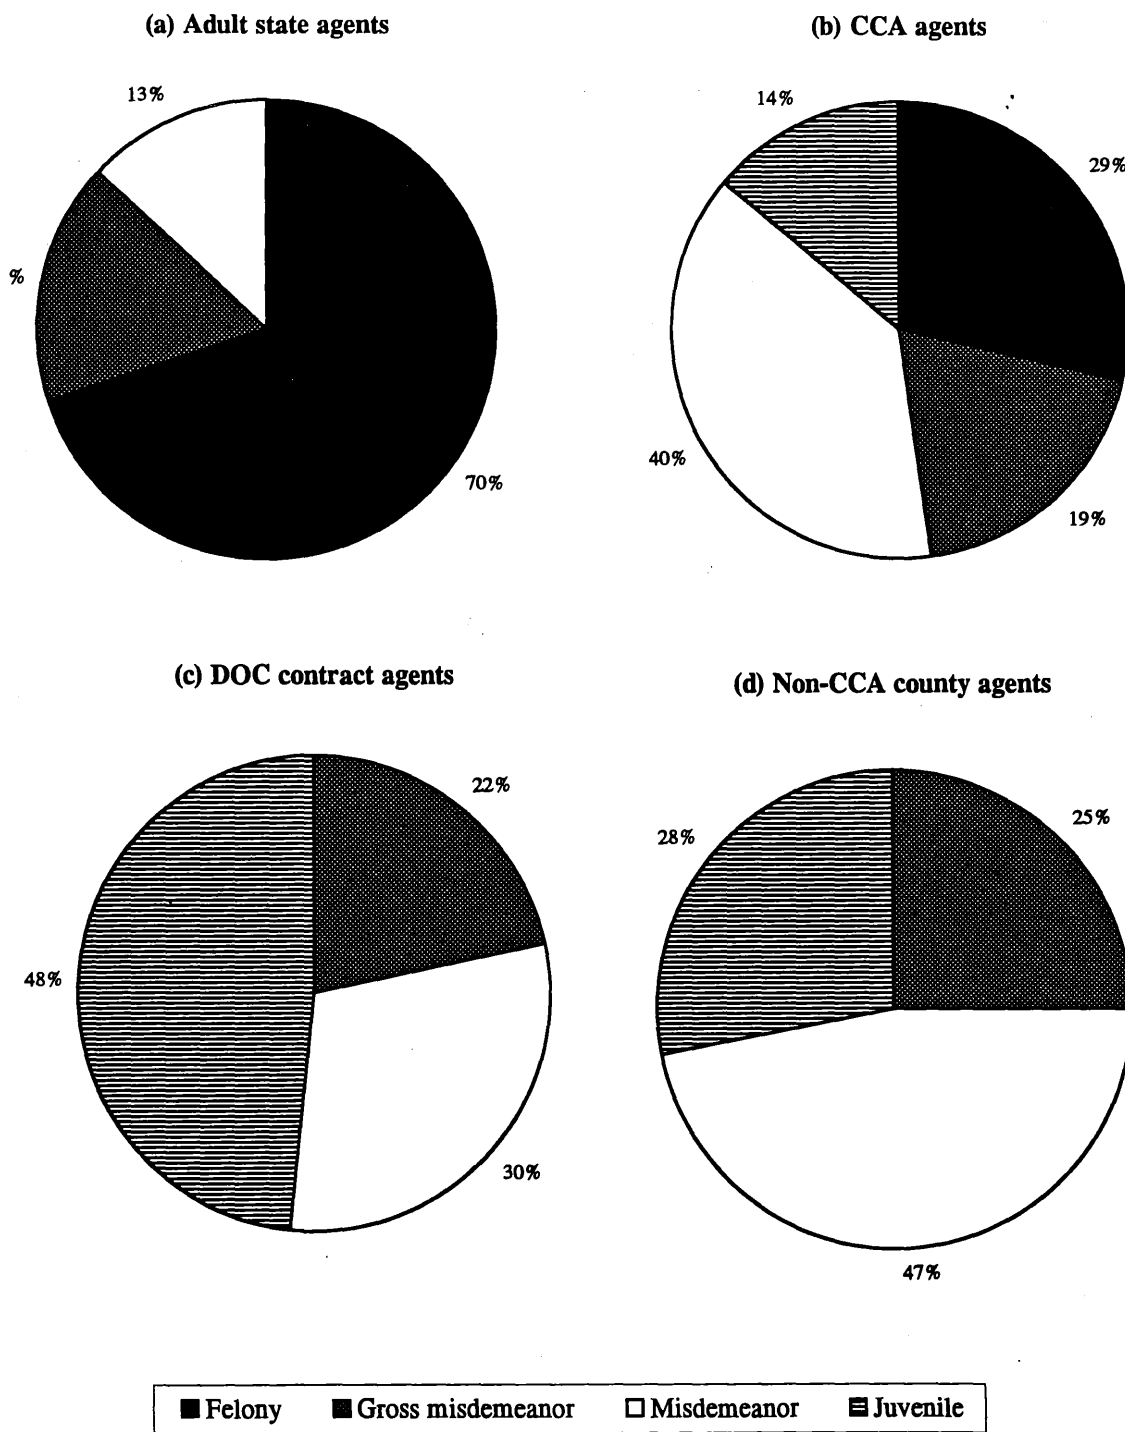

Figure 9 shows the types of offenses represented in the probationer population at each offense level. About half (46 percent) of Minnesota's felony probationers were under supervision for a property offense, with most of the remaining felons divided fairly evenly between person offenders (24 percent) and drug offenders (21 percent). In comparison, the 1997 year-end adult population of Minnesota's state correctional facilities included 62.6 percent person offenders, 19.9 percent property offenders, and 11.8 percent drug offenders.

Sixty-two percent of the gross misdemeanants were DWI cases; another ten percent were property offenders. Forty seven percent of the misdemeanants were under supervision for a DWI as their most serious offense. The most serious offense of juvenile probationers was property at 39%. Next most common among juveniles were person offenders (22 percent).

F. 1996 Probation Population by County

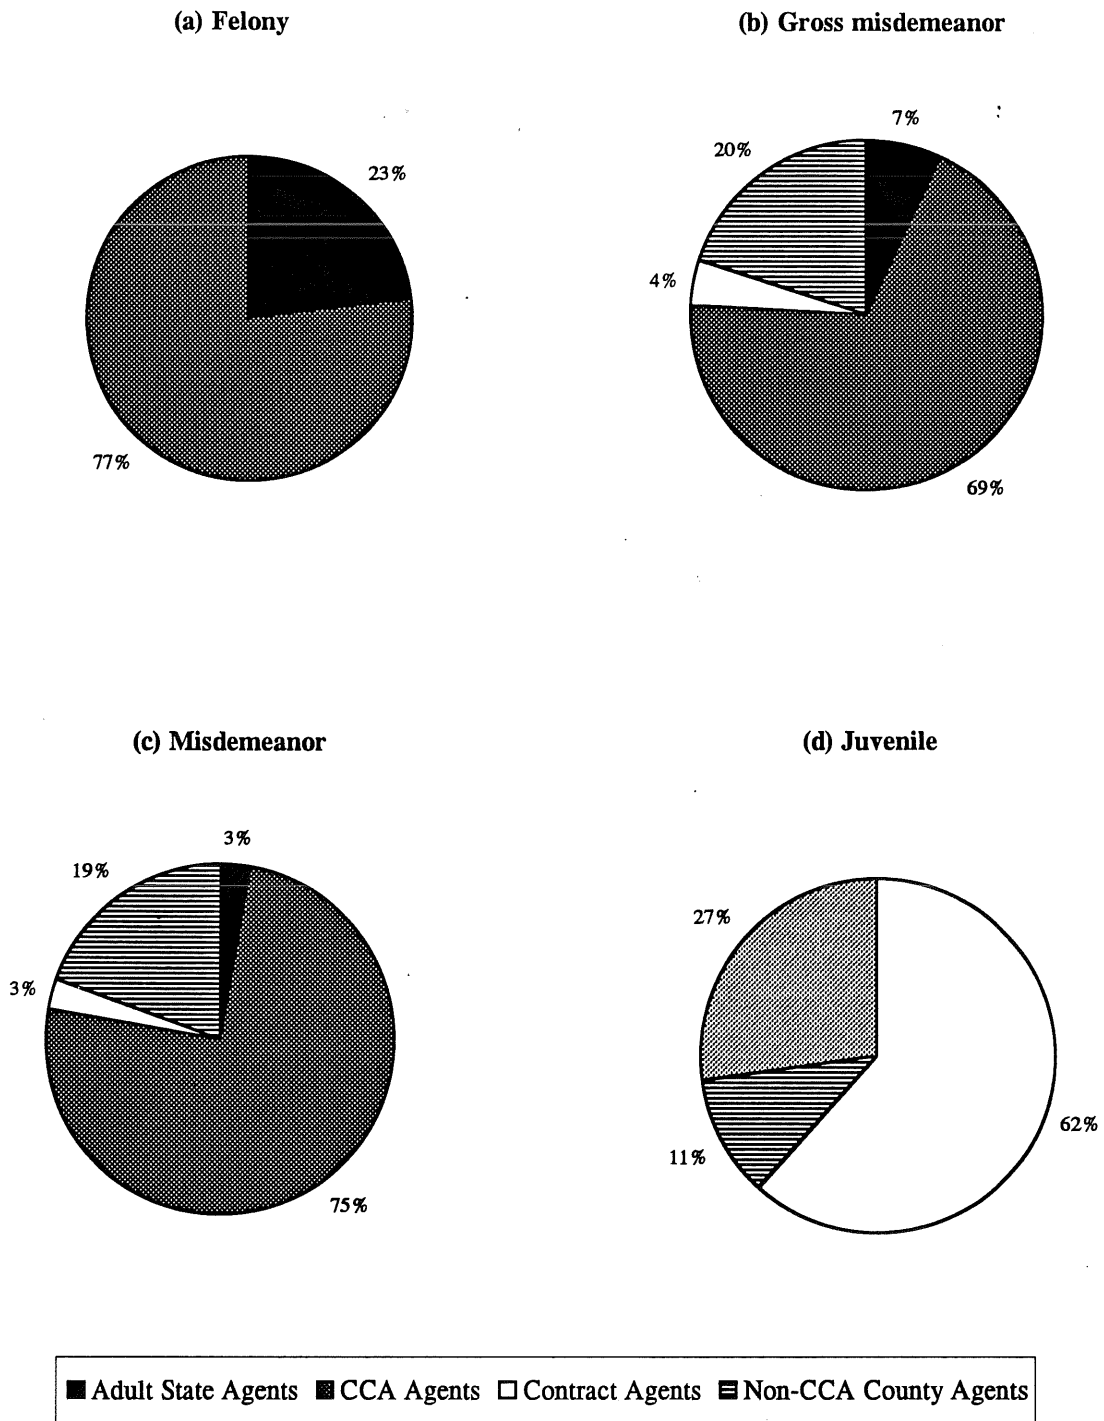

The ten Minnesota counties with the largest December 31, 1997 adult and juvenile probationer populations are shown in Table 4. About 70 percent of all adult probationers in the state are in the ten counties listed in Table 4(a). These ten counties have about 63 percent of the state's general adult population. About 53 percent of all juvenile probationers in the state are in the ten counties listed in Table 4(b). These ten counties have 59 percent of the general juvenile population of Minnesota.

(a) Adult probationers				(b) Juvenile probationers			
	n	Percent of state total	Cumulative percent		n	Percent of state total	Cumulative percent
Hennepin	20,005	22.1%	22.1%	Hennepin	3,643	21.2%	21.2%
Ramsey	12,925	14.2%	36.3%	Ramsey	1,552	9.0%	30.2%
Anoka	7,143	7.9%	44.2%	Anoka	869	5.1%	35.3%
Dakota	5,781	6.4%	50.6%	St. Louis	756	4.4%	39.7%
Washington	5,301	5.8%	56.4%	Dakota	666	3.9%	43.6%
St. Louis	3,959	4.4%	60.8%	Itasca	477	2.8%	46.4%
Stearns	2,266	2.5%	63.3%	Wright	433	2.5%	48.9%
Wright	1,702	1.9%	66.4%	Washington	371	2.2%	51.1%
Scott	1,698	1.9%	68.4%	Stearns	361	2.1%	53.2%
Crow Wing	1,352	1.5%	69.9%	Olmsted	358	2.1%	55.3%

Table 5 shows the number of adult probationers per 1000 adults (age 18 and older) for each county, as well as on a summary level. The adult county populations were obtained using projections from the state demographer's office. In the table, counties are listed in descending order of their per-thousand adult probationer population. The four counties with the highest proportion of their population on probation, and nine of the top eleven counties in this ranking, are contiguous counties to the north and east of Hennepin and Ramsey Counties. In all the years that this analysis has been done (1993–1997) this pattern has been present, that east central Minnesota counties have the highest percentage of their adult population on parole. The lowest usage of adult probation has also followed a geographical pattern throughout the 1993–1997 surveys. The five counties with the fewest adult probationers per 1000 population are Lac Qui Parle (CCA), Murray, Lake of the Woods, Traverse, and Marshall.

The table shows that while about 27 of 1000 adults statewide are on probation, the median county figure is 22 per 1000. This difference between the mean and the median is due to the more populous counties tending to have higher proportions of their adult populations on probation.

Table 6 shows the "probationers per 1000 population" data for juveniles. In this table, the December 31, 1997 juvenile probationer population in each county is compared to the population of 12 through 17 year-olds in that county, and expressed on a per-thousand basis. The counties with the highest "juvenile probationers per 1000 population" ratios at year end 1997 were Watonwan (163), Itasca (123), Mahnomon, (122, and Faribault (110). The lowest usage of juvenile probation was in the counties of Clearwater and Murray (16 probationers per 1000 juveniles, and Renville (12). Overall there is no statistical correlation between a county's rank as a user of juvenile probation and their rank as a user of adult probation.

The greatest use of juvenile probation was in non-CCA counties which provide their own court services for juveniles; they had 52 juveniles on probation per 1000 juveniles in the population. In CCA counties the overall figure was 39 juveniles on probation per 1000 population.

The statewide figure of 43 juveniles on probation per 1000 is over significantly higher than the proportion of adults on probation (27). To express this finding in other terms, one out of 27 Minnesotans of age 12-17 were under probation supervision at year-end.

G. December 31, 1997 Supervised Release/Parole/ICS Population

Appendix D presents demographic information concerning offenders under community supervision in Minnesota after being released from state correctional institutions. This data was not collected using the probation survey, but was extracted from the DOC CMIS database.

Table 5: Adult Probationers per 1000 Population

Source: 1997 Minnesota Department of Corrections probation survey data, State Demographer's 1995 and 2000 population projections.

Adult releasees in non-CCA counties are supervised by Department of Corrections agents. Juvenile parolees in non-CCA counties are supervised by county probation agents in some counties, and by Department of Corrections "contract agents" in counties where the counties contract with the DOC to supervise their juvenile probationers and parolees. Adult and juvenile releasees living in Community Corrections Act counties are supervised by CCA county agents, except that releasees in intensive supervision programs (Intensive Supervised Release, Intensive Community Supervision, and Challenge Incarceration Program community supervision) are sometimes supervised by DOC agents. Due to the more serious nature of their crimes, supervised releasees/parolees tend to require higher levels of supervision than probationers. Thus it is important to include prison releasees in considerations of the overall workload of agencies providing community supervision.

Over half of all adult releasees live in Hennepin or Ramsey Counties. In fact, the number of adult releasees living in these counties is disproportionately large in comparison to the populations of these counties. Juvenile parolees are distributed more evenly throughout the state.

The offense distribution of adult releasees includes higher percentages of property and drug offenders and a lower percentage of person offenders than is found in the correctional institutions. This is due to the longer prison sentences served by person offenders. The percentages of female offenders and white offenders in the adult releasee population are higher than in the prison population, due to these groups having shorter sentences, on average, than males and non-whites, respectively.

H. Summary

The number of Minnesotans on probation again increased in 1997. At year-end, over 90,000 adults and over 17,000 juveniles were under probation supervision. Additionally, 2,261 adults and 260 juveniles are being supervised in Minnesota as releasees from state correctional institutions. This adds up to over 110,000 offenders under community supervision in Minnesota. Thousands of additional Minnesotans were in pretrial diversion programs at year-end.

While it is important to count the number of offenders on probation, additional information is needed to determine the workload represented by these probationers. Standards for face-to-face contact with a probation agent vary according to the risk represented by the offender, the sanctions pronounced in court, the number of offenses for which the offender has been sentenced, the offender's compliance with the probation conditions, and local probation policies. "Weighting" probationer data to reflect supervision requirements for individual probationers allows probation services providers and the State of Minnesota to allocate resources in proportion to needs. While individual providers of probation services have caseload management systems, at present no procedures exist to uniformly measure probation workloads statewide. The Minnesota Legislature has taken several steps to address this concern:

1. *Minnesota Session Laws* 1992, Chapter 571, Article 11, Section 15 appointed a "probation standards task force." *Session Laws* 1993, Chapter 326, Article 10 directed this task force to report to the Legislature concerning statewide probation officer and funding needs, and to make recommendations to facilitate uniform case classification and reporting. In their December, 1994 report, *Probation in Minnesota: Putting the Pieces Together*, the task force proposed a method of weighting probation survey population data to estimate the workload represented by the probation population.
2. In *Minnesota Session Laws* 1995, Chapter 226, Article 1, Section 11, Subdivision 3, the Legislature asked the Legislative Auditor's Office to conduct "a weighted workload study to be used as a basis for fund distributions across all three probation delivery systems, based on uniform workload standards and level of risk of individual offenders." The study was to "recommend to the Legislature... a statewide uniform workload system...; a standardized data collection system...; and a new mechanism or formula for aid distribution based on the data." The Legislative Auditor's report (*Funding for Probation Services*, January 1996) explains that subsequent discussions with legislators led to some modification of the focus of their study. The Legislative Auditor concluded that "a weighted workload study based on the risk of individual offenders cannot be done at this

time." However, the Legislative Auditor's report made suggestions on how to implement a statewide method of offender risk assessment.

3. The 1996 Omnibus Crime Bill directed the Office of Strategic and Long-Range Planning to develop "a weighted workload study to be used as a basis of distributing probation officer caseload reduction funding across all three probation delivery systems, based on uniform workload standards and level of risk of individual offenders." This document was published February, 1997 by MN Planning.

The Minnesota Department of Corrections plans to conduct its next probation survey at year-end 1998, to meet the ongoing need for information on the number of individuals on probation. In addition, the DOC is presently working with CCA and DOC probation offices to compile a felony probationer database with individual-level offender data. Given the widespread interest in evaluating probation outcomes, distributing state funding for probation based on the risk represented by individual offenders, and making individual probationer data available for law enforcement purposes, this database will be a valuable resource for research and evaluation, and for exploring future possibilities for individual-level data collection and data management.

Appendix A

1997 Probation Survey

Instructions and Questionnaire

INSTRUCTIONS FOR COMPLETING THE 1997 PROBATION SURVEY

Thank you for your participation in this annual probation survey conducted to provide supervision information to legislators, policy makers, Minnesota Department of Corrections, Minnesota counties, and other government agencies. This 1997 probation survey is being mailed to:

- Community Corrections directors for all CCA county probation information,
- Department of Corrections district supervisors for all data on probationers supervised by DOC felony and contract agents, and
- chief probation officers in non-CCA counties for data on all probationers supervised by non-CCA county agents.

One survey is enclosed for each county in which your office provides probation services. Please answer the questions for all probationers under your supervision.

Who should be included as a "probationer" for purposes of this survey?

- All probationers, regardless of conviction status, who were under the supervision of a probation agency as a part of a court order at any time between December 31, 1996 and December 31, 1997.
- Probationers for whom there is a court order for supervision and/or services such as restitution, community services, or monitoring.
- Persons placed on probation under Minnesota Statutes 152.18 ("deferred adjudication" for certain drug offenders) and 609.135 (stay of imposition or execution) if you are providing probation supervision or services.
- Probationers sent to your county from another county or state for supervision.

Who should be excluded as a "probationer" for purposes of this survey?

- Persons on investigative status only, such as PSI's, pre-pleas, bail evaluations, etc.
- Persons on "bench probation", "court probation", or "summary probation", who have not been placed under the supervision of a probation agency.
- Pre-trial diversion and pre-trial supervision cases.
- Juveniles receiving services under a CHIPS petition.
- Persons released from state correctional facilities who are on supervised release, parole, intensive community supervision, etc.

In all questions on this survey, report each individual **probationer** only once, not the number of offenses or open files. If an offender is on probation for offenses of differing severity, count him or her in the category of highest severity. If a probationer is under both juvenile and adult supervision, place the individual as juvenile **OR** adult, using the most serious offense. If you are unable to eliminate double counting under juvenile and adult supervision, asterisk the juvenile total on line 4 of page 1 and in the "Comments" section on page 2, estimate the number of juveniles who may also be counted as adults.

Please return your completed survey(s) by **January 31, 1998** to:

Ethel Jackman
MINNESOTA DEPARTMENT OF CORRECTIONS
1450 Energy Park Drive, Suite 200
St. Paul, MN 55108-5219
Phone: 612/642-0450
Fax: 612/643-2575

Notes:

Question 1. The 1996 year-end population reported on line 4 of last year's survey has been entered on line 1 of the enclosed survey(s). If these numbers have changed, insert in the amended number.

over>

Question 2. Count individuals who entered probation supervision during the year. Do not count offenders who picked up another offense while on your caseload.

Question 3. Count individuals removed from probation supervision during the year (e.g., offenders discharged from probation, sent to another county or state for supervision, or incarcerated upon revocation of their probation; absconders removed from your caseload; or those who are deceased). Do not count an offender discharged from probation for one offense while he or she remains on probation for another.

Question 4. Year-end populations reported are the **most important data**. Questions 5 through 8 request provision of the breakdown of question 4 population by gender, race, Hispanic origin, and offense category.

Line 1 + line 2 - line 3 = line 4 is the correct formula for the "total" column.

Question 5. Self explanatory.

Questions 6-7. The department reports aggregate statewide data from this probation survey to the Bureau of Justice Statistics (BJS) on their nationwide probation survey. The race and ethnic origin categories used in questions 6 and 7 are identical to those used by the BJS survey. The federal government regards "Hispanic" as a designation of ethnicity, not race. Hispanic probationers will generally be counted as White or Black in question 6 and as Hispanic in question 7. The following U. S. Census Bureau definitions may be useful:

White (race): - A person having origins in any of the original peoples of Europe, North Africa, or the Middle East. (Note: this is true of most Hispanics. If your agency records Hispanic original as a racial category but does not have a white/black distinction, include them in the white category.)

Hispanic (ethnic origin) - A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

Question 8. A probationer being supervised for more than one offense should be counted once. Report the most serious offense for which the probationer was under supervision on 12/31/97.

Offense categories used in question 8 are derived from the Minnesota Offense Code (MOC) general index categories, except that juvenile status offenses and DWI were made into separate categories, and some MOC "miscellaneous" offenses (liquor, conservation) were added to the "crime against government" category. Please consult the table in the MOC system if you have questions in categorizing offenses.

Examples:	Offense	Offense category
	terroristic threats	Assault
	criminal vehicular homicide	Traffic/Accidents
	witness tampering, probation violation	Crime against administration of justice
	tax evasion	Crime against government

How to determine the "most serious offense" for the probationer who is under supervision for more than one offense.

Strict application of the suggested approach -- using the statutory maximum sentence for each offense to determine that which is most severe -- may not be feasible in your reporting but provides a guiding principle you may find applicable. For example, if one offense is a felony and the remainder are gross misdemeanors or misdemeanors, report the felony offense.

Users of PROBER caseload management software and CSTS+ software can automatically produce the probation survey report; however, that data lacks detailed offense selection logic. The ranking of the question 8 offense categories used by PROBER and CSTS+ is given below for your information:

Homicide, Criminal Sexual Conduct, Kidnapping/False Imprisonment, Assault, Robbery, Arson, Escape/Flight, Burglary, Drugs, Crime Against Administration of Justice, Crime Against Government, Liquor, Conservation, DWI, Obscenity, Sex Related, Crime Against Family, Vehicle Theft,, Theft, Theft Related, Forgery/Counterfeiting, Property Damage, Stolen Property, Traffic Accidents (excluding DWI), Weapons, Disturbing Peace/Privacy, Gambling, Juvenile Status Offenses, Other
