Lottery

A successful lottery depends on many factors, some the Legislature can control and some it can’t, the Gaming Division of the General Legislation, Veterans Affairs and Gaming Committee learned Jan. 19.

While no universal definition of a successful lottery exists, House researcher John Williams says the most common one is “maximizing gross sales.” Conditions such as the dignity or welfare of the state sometimes may inhibit sales, he adds.

If sales measure success, then how much the lottery operates as a business rather than a government agency in purchasing, personnel, budgeting, marketing, and advertising may determine its success, Williams says. The capability of a lottery’s policymakers and administrators also determines a lottery’s performance.

The lottery’s age, state poverty levels, unemployment and competition from lotteries in adjacent states—factors which lawmakers and lottery administrators can’t control—also influence the game’s success.

Williams stresses the need for common understanding of success conditions. Those responsible for running a lottery need to know what a “good job” is and whether they’re doing it.

“If there’s a widespread lack of agreement on what a good job is, I think it greatly reduces the likelihood of anyone doing one,” Williams says.

Mental health care

Mental health care issues took most of the discussion time at the Health and Human Services Committee meeting Jan. 19.

Sandra Gardebring, Department of Human Services (DHS) commissioner, told legislators that the department’s focus again this year is to give people sufficient resources to make their own way to a normal economic life.

Gardebring, citing results from a 1986 study, says at that time, Minnesota ranked 37 among the 50 states in the delivery of mental health services, and now ranks 33. The DHS also plans to bring a proposal on children’s mental health services to the Legislature this session, she says.

Gardebring asked legislators to extend the Children’s Health Plan to people up to age 18. The plan currently provides basic outpatient health care to children up to age 8. She says it would be the beginning of an incremental program to provide health insurance to the uninsured and underinsured.

The DHS budget request focuses on three areas:

- transforming Minnesota’s regional treatment centers from old-fashioned institutional systems to structures that reflect modern treatment and program approaches;
- continuing PATHS, a welfare reform program, and approving the Minnesota Family Investment Plan; and
- targeting programs for increased child care, increased funding for child support enforcement activities, child abuse prevention, and permanency planning to prevent children from bouncing in and out of foster homes.

Nothing herein is admissible as legal proof of legislative intent.
Shipwreck

Minnesota isn’t going to war, but it may sink a ship in Lake Superior. Steve Thorne, deputy commissioner, Department of Natural Resources, presented the idea to the State Departments Division of the Appropriations Committee Jan. 18, along with other ideas to increase opportunities for the state’s divers.

Thorne presented a feasibility study proposing to sink a ship off Split Rock Lighthouse Park or another spot on the North Shore, build a facility for divers to use, and expand the area surrounding the state park. Study objectives include promoting economic development and tourism, enhancing diver safety, and protecting historic shipwrecks.

Minnesota has about 35,000 divers who spend about one-quarter of their time on the North Shore, the study says. If half of those divers make one trip a year there, the study estimates that the area could see an $8.7 million increase in tourism and development, and as many as 290 new jobs.

The study recommends creating a safe shipwreck and upgrading emergency medical and weather services to increase diver safety and protect historic shipwrecks from souvenir hunters.

MSPAN report

Minnesota needs to develop creative educational alternatives to keep its “educational advantage,” reports the Minnesota Postsecondary Access and Needs Project (MSPAN). The report examines current conditions and changing needs for postsecondary education among residents in Minnesota’s urban population corridor from St. Cloud to Rochester, including the Minneapolis-St. Paul metropolitan area.

SRI International, a California-based, independent consulting firm, presented the MSPAN report to the Education Division of the Appropriations Committee Jan. 18. The Higher Education Coordinating Board (HECB) is working with SRI to paint a picture of Minnesota’s postsecondary institutions. In the coming months, the two will provide an assessment of higher education to help the division map out the future for Minnesota’s schools.

SRI recommends in the MSPAN report, due in final form to the division in February, that Minnesota’s universities and technical institutes (TIs) respond to the changing needs of their students, evaluate underused programs, and develop areas of excellence.

SRI suggests options, including establishing: a new urban university in the Twin Cities, a new community college in St. Paul, a practitioner-oriented graduate program, and a stronger science and technology program in step with Minnesota’s economy, perhaps through development of a private institution. It also suggests creating alternative programs for non-traditional students, such as employer/college/TI partnerships for adult learning.

Transportation needs

Aging highways and bridges are key issues facing the Minnesota Department of Transportation (MnDOT), Transportation Committee members learned Jan. 18.

More than 31 percent of the state trunk highway system is at least 50 years old, says Transportation Commissioner Len Levine. Also, about 3,175 bridges are 60 years old.

Growth in truck travel is another issue. MnDOT is upgrading the strength capacity of state roads to eliminate seasonal load limits. The department wants a year-round, 10-ton road system, Levine says, adding that low volume roads also need examination.

Reducing traffic tie-ups in the state’s urban areas is another concern. Currently, the Twin Cities area ranks 11th among major urban areas in traffic congestion severity, Levine says. "By the year 2000, it could take twice as long for motorists to get to and from work in the Twin Cities area," he adds.

"Transportation is the lifeline that links products and markets, and connects people to jobs," says Levine. "It connects people to shopping and health services, and to recreational opportunities."

U of M policy review

Members of the Education Committee’s Higher Education Division were skeptical as University of Minnesota officials presented overviews on organizational structure and financial accountability at a hearing Jan 18.

The officials presented results of a self-study in finance and accountability, and the Governor’s Blue Ribbon Commission Report on Governance.

Rep. Mike Jaros (DFL-Duluth), division chair, declared support for the faculty and improvements in the university system for better service to students. But later he cited flaws in the Blue Ribbon report, and division members questioned its objectivity. Jaros also noted that the university had largely ignored a 1972 legislative commission study.

Members also questioned the

Minnesota astronaut George “Pinky” Nelson, center, presents Gov. Rudy Perpich, second from right, with photographs, a mission patch, and a miniature flag that he carried on the last space shuttle mission in December. Sen. Dean Johnson (IR-Willmar), left, and Rep. Alan Welle (DFL-Willmar), second from left, joined Nelson on stage for the Jan. 17 presentation. Nelson grew up in Willmar.
responsibilities and operations of the University’s Board of Regents. Some say the board depends too heavily on the administrative staff and should have an independent staff to gather and distribute information.

Consumer legislation

Home and car buyers, senior citizens, lawn care companies and radon testers are parts of a consumer legislation package from the Minnesota Attorney General’s Office.

Attorney General Hubert Humphrey III outlined the proposals Jan. 17 for the Commerce Committee.

Home buyers could get more information, such as appraisals or credit reports, under the Home Buyers’ Bill of Rights. The measure also would require that buyers get a list of all costs five days before closing the purchase agreement.

The auto defect bill would require new-car dealers to list any damages incurred or repairs made to a vehicle.

Another bill would cover scams aimed at senior citizens or other vulnerable adults. If the proposal becomes law, it would carry a $10,000 penalty per violation.

Two other consumer-oriented proposals would require written contracts with lawn care companies, and Department of Health regulation of radon testers.

DNR overview

“The key approach that we are taking in the Department of Natural Resources is balance. We have tried throughout all of our management to balance the needs for long protection and preservation against shorter term benefits,” says Steve Thorne, deputy commissioner, Department of Natural Resources (DNR).

Thorne talked about the need to balance environmental issues with economic issues at an Environment and Natural Resources Committee hearing Jan. 17. While the DNR continues to manage and preserve natural resources, it’s experiencing staff shortages, a rising use of outdoor recreation facilities, and a need for greater financial resources, he says.

John Chell, DNR regional administrator, says a Department of Administration report on DNR support staff work loads shows that a full-time clerk at the DNR processes 2,000 more accounting transactions per year than do clerks from the departments of Administration, Transportation, or Corrections.

“We do need an increase of $1.4 million,” Chell says. “It would represent a significant increase of 25 percent in our budget.” The increase would allow the DNR to add 67 staff positions, he says.

According to DNR data, the department’s present allocation from the state amounts to $14 per person in Minnesota. Other funding sources include fees/licensing, state taxes, and federal funds.

“With increased services that we’re providing at the local level, and the increased demands...on regional staff, we feel that those requests are justifiable,” Chell says.

The DNR has recycling, ground water, forestry, minerals, and outdoor recreation issues on its agenda this year.

Economic forecast

Economic forecasts, the budget reserve, and expectations of economic risk got a hearing in the Taxes Committee Jan. 17. Tom Triplett, commissioner of finance, gave the committee an economic forecast for Minnesota.

Even though Minnesota’s economy continued to remain strong through 1988, the Department of Finance and the Council of Economic Advisors expect a slowdown in the rate of real economic growth in the next biennium. A strong budget reserve can offset a slowdown in the economy, but not in a full-scale recession, says Triplett. Therefore, a budget reserve plays a key part in Minnesota’s risk management strategy, he says.

Education needs

President Nils Hasselmo, University of Minnesota, told the Appropriations Committee Jan. 17 that he would like to see a true partnership develop in higher education to meet Minnesotans’ concerns. He told the committee he intends to take personal responsibility for the institution’s actions.

Hasselmo asked legislators for $198.7 million to improve educational quality at the University. The figure includes $1.8 million for advising, particularly in the College of Liberal Arts. “Advising is very important. It’s not only a matter of admitting students to the University, but you must make sure that they can benefit from the education that is provided,” says Hasselmo.

Joe Graba, state director of technical institutes, told the committee that changing student demographics, changing technologies in the work place, and external economic factors are major components for their budget request. Graba asked legislators for $51.1 million for instructional expenses and $9 million for non-instructional expenses.

Chancellor Robert Carothers, State University System, cited statistics from a National Center for Higher Education Management study. It compared the Minnesota State University System with 43 other similar state systems, and found that Minnesota ranks 33 in per student
funding, $1,000 per student below the national average. Carothers asked legislators to make a commitment to get Minnesota to the national average of per student funding in the next four years.

World trade

Lawmakers examined the role Minnesota can play in today’s global economy at a Legislative Forum on International Trade Jan. 17 at the World Trade Center in St. Paul.

Rep. Todd Otis (DFL-Mpls), Economic Development Committee chair, told business leaders, world trade professionals, and his colleagues from the House that Minnesota is on the “threshold of a new era in international trade.” He stressed the importance of opening new markets for Minnesota products.

Richard Bohr, Minnesota Trade Office director, says Minnesota is on the forefront of the linkage between international trade and economic development. Minnesota’s tapping new markets in the Soviet Union and making breakthroughs in trade with China, he says.

Bohr and other speakers emphasized the importance of education in spreading the message about trade opportunities. Rick Nolan, World Trade Center president, advocates the “globalization of education,” saying it’s important that people gain an understanding of other cultures to understand foreign business practices. Nolan spoke of a telecommunications system that would allow schools to tap into conferences on international trade. Foreign trading partners use such a system for face to face meetings, he says.

Government officials and business leaders called for cooperation between public and private sectors in developing foreign trade policies. One trade consultant suggested such cooperation could lead to more continuity in trade policies as executive branch administrations change over time.

Cocaine

Cocaine trafficking and use in Minnesota cuts through all facets of society, from the rich all the way down to the lowest socio-economic class, says Mark Shields, Minnesota Bureau of Criminal Apprehension.

Shields told the Judiciary Committee Jan. 13 that many “undesirables have taken foothold in our state.” He says “the amount of cocaine…the number one area we’re confronted with, is simply unbelievable.”

Shields says the cocaine problem in Minnesota focuses on two forms of the drug: “crack,” the newest arrival, found primarily in the inner cities, is now making its way into the suburbs; and “flake” cocaine, the powder version of the drug, is now found in every county and almost every city in the state. Shields told lawmakers that problems with crack are minimal compared to those associated with flake cocaine.

Speaker Robert Vanasek (DFL-New Prague) appointed six representatives to the Committee on Ethics during a House session Jan. 19: Loren Solberg (DFL-Bovey), chair; Bob Anderson (IR-Ottertail); Dave Bishop (IR-Rochester); Dee Long (DFL-Mpls); Leo Reding (DFL-Austin); and Sidney Pauly (IR-Eden Prairie).

Should the state incorporate metropolitan regional parks into the state park system? The State Department’s Division of the Appropriations Committee Jan. 18 considered a study on the feasibility of this proposal. Cost of the land to the state would be $1.8 billion, according to study estimates, with an additional $23.4 million needed annually for the state to operate and maintain the parks. The study concludes that “the high expenses...of incorporating the regional park system into the state park system cannot be justified on the basis of cost efficiency, visitor characteristics or park use.”

The state would regulate appraisers and auctioneers if Department of Commerce proposals become law. Commerce Commissioner Mike Hatch told the Commerce Committee Jan. 19 that the bill to regulate appraisers also would set up a code of conduct. Auctioneers want to be regulated by Minnesota so they can call auctions in surrounding states that have regulations, Hatch notes.
Criminal justice specialists are on the verge of a major scientific breakthrough regarding DNA, according to Mark Shields, Bureau of Criminal Apprehension. DNA is the genetic make-up that determines an individual’s characteristics. Shields says blood and bodily fluids can help investigators identify criminal suspects because the substances are unique to individuals, as are fingerprints. Judicial Committee members will consider the breakthrough’s significance this session.

About 3.1 million Minnesotans are licensed drivers; according to Minnesota Department of Transportation (MnDOT) statistics. That means Minnesota ranks 21 in the U.S. MnDOT figures show that Minnesotans registered about 3.3 million motor vehicles with the state. And they drive those vehicles more than 35 billion miles across the Gopher State, according to MnDOT. That’s an average of about 10,000 miles per vehicle. Nationally, Minnesota ranks 20 in the registration category and 21 in the miles-traveled category.

Livestock farming contributes to the rural economy in more ways than does crop farming, says Commissioner Jim Nichols, Department of Agriculture. There are many secondary industries that support livestock farming such as feed stores, veterinarians, construction companies, and medicine. The livestock industry also keeps processing plants and jobs in the local area, says Nichols. In livestock farming, the farmer will make many trips to town. In crop farming, the farmer will make one trip to town to buy his seeds, and one trip to sell his product.

Minnesota minerals are a secret because they can’t be seen on geological maps, says William Brice, Department of Natural Resources Minerals Division director. Minnesota is covered with glacial drift. Under the drift is a mineral economy in taconite, silica sand, clay, perlite, and limes, among other minerals. Presently, Minnesota has an exploration economy of $14 million. “The more people we have out looking for minerals, the greater chance we have of finding them,” says Brice.

Private land owners need technical assistance in forest management, according to the Department of Natural Resources (DNR). They also need good information to avoid theft of precious trees and fraud in the cabinet industry. The DNR plans to acquire approximately 80,000 acres of privately held lands. Their goal is to manage and preserve Red Oak and Black Walnut trees. They also plan to develop a forest management plan with private land owners.

Jean Steiner, public information officer for the Minnesota House of Representatives Public Information Office for 15 years, retired Jan. 16. She thanks everyone—House members, staff, colleagues, friends, and readers of the Session Weekly—for their letters, cards, and gifts, for coming to her retirement open House on Jan. 13, and for supporting her over the years.

Committee Action

TAXES

Tuesday, Jan. 17

Local government—net debt limit
HF40/SF99 (Long, DFL-Mpls)—
recommended to pass as amended.
(SF in Senate Taxes and Tax Laws Committee)

Clarification

In the "Do you Know?" feature about the "Australian ballot" voting system on page 15 of the Jan. 6 issue of the Session Weekly, the third paragraph should have read:

It worked as follows: the voter would enter the booth alone, indicate his choice (at this time, women were not allowed to vote) by placing an "x" opposite the candidate's name, fold the ballot so the ballot clerk's initials appeared outside, and hand it to the election judge. The judge would deposit it in the appropriate box: white for state elections, blue for county.
