## Reflections

Gov. C. Elmer Anderson

Former Gov. C. Elmer Anderson, died on Thursday, Jan. 22, 1998, at the age of 85.

Not to be confused with two other governor Andersons (Elmer L. and Wendell R.) in recent decades, C. Elmer came to public office when he was only 26 years old as the lieutenant governor to 31-year-old Gov. Harold Stassen.

When Stassen and Anderson took office in 1939, the two were the considered "boy wonders" of the statehouse.

Anderson's political career began as the chair of the Young Republican League at the age of 24. He made his first trip to the state Capitol when he came to St. Paul to be sworn in as lieutenant governor.

Clyde Elmer Anderson was born in Brainerd, Minn., on March 16, 1912, the seventh of nine children and son of Swedish immigrants. He began school in the second grade, passed a high school entrance examination after grade seven, and skipped eighth grade.

Earlier, Anderson carried newspapers, worked on a farm, and worked for a news and magazine distribution center. Some time later, he bought the newspaper company and owned it for 26 years.

Anderson served with Stassen for two terms, but in 1942, the governor endorsed Edward J. Thye, from Northfield to run as lieutenant governor. Stassen had already decided to resign after he was re-elected, and then join the U.S. Navy to fight in World War II.

Thye defeated Anderson, serving as lieutenant governor for only three months before becoming the state's new chief executive.

Anderson ran again for the office in 1944 and won. He won again in 1946 and 1948, serving for a total of 11 nonconsecutive years — unmatched by any other lieutenant governor before or since. In this role, he served as the presiding officer of the Senate. Serving as lieutenant governor in 1951, Anderson moved up to become the state's 31st governor after Gov. Luther Youngdahl resigned.

In 1952, Anderson defeated DFL candidate Orville Freeman by amassing 785,125 votes — more votes than any other governor before him. Anderson completed a full two-year term as governor and left office after losing the November 1954 election to Freeman.

Anderson is remembered by some for a directive he once made to the Legislature as chief executive. He convinced the Legislature not to hide the clock to stretch the final day of the session. Covering the clock is no longer a procedure, but it did occur commonly back then. Even after Anderson's term in office and prior to the early 1970s, members often worked past midnight to enact one last law or two on the constitutionally mandated last day of the session. If the clock was not seen, then it was not necessary to adjourn by midnight. Anderson urged an end to the practice, and eventually it died out.

Anderson is survived by his wife, Lillian, two daughters, a son, two sisters, one brother, and many friends who respected his contributions to the state.

University of Minnesota . . .

## Yudof details \$252 million capital funding request

By Jim Thielman

University of Minnesota President Mark Yudof is urging lawmakers to provide the resources to fulfill his ambitious vision to link campus building improvements with the development of vital educational programs.

Yudof told the Higher Education Finance Division of the House Education Committee about his plans to spiff up most of the older Twin Cities campus buildings. He combined that goal with the aim to make the university one of the nation's top five research institutions.

He asked lawmakers at the Jan. 26 meeting to approve his \$252 million capital funding request for 1998.

"Previously, 70 percent of our bonding requests have gone into new buildings and 30 percent have gone into benefiting existing buildings. This four-year proposal reverses those designations," Yudof said. "Seventy percent of the money will go into restoring the historic buildings on the north and south mall and elsewhere, and only 30 percent of the money will go into new buildings."

Yudof's "Capital Plan for the Support of Academic Programs in the 21st Century" calls for a total investment of \$776 million during the next four years. The funds would be used

The historic campus mall at the University of Minnesota would get a facelift under the \$252 million bonding proposal advanced by Mark Yudof, the school's new president.

Entering what will be his last legislative session, Gov. Arne Carlson already has called his support of the University's budget request "non-negotiable."

In a statement from the governor's office, Carlson said, "A central principal of this administration has been to focus on quality jobs for Minnesotans. In order to achieve that goal, you need to provide citizens with the educa-

million would be used to restore the Walter Library and to create a digital technology center and a science-engineering library in the building.

Also, \$29.5 million would build a new science and math center on the Morris campus, upgrade the heating plant there, and make health and safety improvements.

The Duluth campus would use \$25.8 million to upgrade science labs, build a new library, make code improvements and renovate classroom and other academic space.

Yudof, in his first year as president of the university, explained how his plan differs from requests made by earlier administrations.

"The idea here was, in large measure, to tie renovation, to tie the bonding package to specific investments in key academic programs," Yudof said. "[It was] not to just fix up buildings for their own sake, but to say, 'How does this advance the academic interdisciplinary program of the University?'"

Yudof called the \$70 million request for the molecular and cellular biology building a "tremendous, tremendous investment." The program has been identified as the university's top academic priority.

"If any of you are thinking of turning to an academic career," he told the representatives, "this is where the big money is. These people are very difficult to recruit."

to preserve historic areas of the university campuses and to modernize classroom and lab space.

The \$252 million request for 1998 is much more than the U of M has received in recent bonding measures. Major bonding legislation is usually passed only in even-numbered years. In 1996, \$93.8 million was approved for construction and repairs involving the U of M system. In 1994, \$69 million went to the university.

tional opportunities needed to succeed in the working world."

Yudof described overall themes of his plan for the university, and he emphasized preservation of the historical buildings and districts on campus and enhancement of the school's academic reputation.

Under this year's bonding proposal, \$70 million would be used to build the institute for molecular and cellular biology. Another \$53.6

Yudof said regardless of the program, it is a struggle to pursue and retain blue-chip faculty without first-rate facilities.

"Let me just make the case in the strongest possible terms," he said. "In my judgment, many parts of this investment should have been made in 1987. That's one part. The second part of it is this is the critical area in science in the coming century, and not just in my judgment but the judgment of knowledgeable academicians across the country."

He quoted from experts who insist there are more than 1,200 physical and psychological disorders that have been tied to single genes.

"This research is absolutely critical," Yudof said. "We're doing a great deal of it, and we'll be doing more under this proposal. There are some who think virtually every disease will be shown to have some sort of connection to genes."

Yudof said other states that have invested in facilities and staff to conduct such research "have profited enormously, particularly in the pharmaceutical area." He said Minnesota's public-private partnerships would benefit from such and investment.

Yudof said the university already brings in \$150 million in grant funding, mostly through the National Institutes of Health. He said the university is thus "not starting at ground-level zero," but from a position of strength. And he said President Clinton has asked to increase the federal budget in molecular and cellular biology.

"We need to position ourselves to compete for this money," Yudof said.

The 53-year-old former executive vice-president at the University of Texas-Austin has also termed the Minnesota campus one the top five mall areas on the nation's college campuses. He says he is intent on preserving the historic value of the setting.

The 11 buildings on the mall area are among the older campus structures and all need major or minor work, he said. In the revitalization process, Yudof said he wants to modify Coffman Union and demolish the parking ramp that blocks a sweeping view from Northrop Memorial Auditorium to the banks of the Mississippi River.

Yudof said these changes would restore the concept of renowned architect Cass Gilbert, who designed the mall in 1907. The goal is to accomplish the work before the University's 150th anniversary in 2001.

The finance division took no action on the U of M's bonding proposal. The matter will be considered again later this session. 🐸

By Matt Wetzel

Gov. Arne Carlson said at the Jan. 29 installation of Chief Justice Kathleen Blatz that she brings to the state's highest court not only supreme legal skills but also important personal attributes.

"[She has] a sense of being the person to bring us all together. She has been given much — superb education, a superb opportunity to serve from her community — but as all true leaders, she has paid us back," Carlson said in remarks at the swearing-in ceremony at the Landmark Center in St. Paul.

Blatz, 43, Bloomington, a former member of the House of Representatives and now a justice on the Minnesota Supreme Court, was sworn in by outgoing Chief Justice A.M. (Sandy) Keith. She becomes the 19th chief justice of the Minnesota Supreme Court.

"It's with extreme gratitude I stand before you today. The journey of life is not a journey traveled alone," she said.

Also in attendance was her husband, Tom Berkelman, her sons, Hunter, Carter and Max, several Minnesota legislators, and judges from both the federal and state level.

Blatz said a judge's responsibility is not only listening to testimony, studying precedents, and then ruling, but serving on panels, on task forces, and in other roles that can help people and, ultimately, society.

"A judge can reach out to the community and prevent bad things from happening. That's a judge's responsibility," she said. Blatz said she found her work on a task force that addressed Fetal Alcohol Syndrome to be very rewarding.

A native of Bloomington, Blatz was in the Legislature from 1978 to 1994, and as a lawmaker, she built a reputation for leadership on family and children's issues.

She worked closely with current House Minority Leader Steve Sviggum (R-Kenyon), and the two were first elected in the same year. Sviggum was on hand for the swearing-in.

## Chief Justice Kathleen Blatz served House from '78 to '94

"I felt proud for Kathleen," he said. "I'm comfortable that a person of her quality will be heading to the Supreme Court, whether it's family issues or getting tough on crime. I know she's a dear friend, extremely talented, and well-qualified."

Blatz holds a master's degree in social work, and she graduated from the University of Minnesota Law School in 1984. She served in the Legislature and worked as an attorney and as a prosecutor until 1994, when Carlson appointed her as a judge in the Fourth Judicial District Court, which includes Hennepin County.

She married Berkelman in 1984, and Berkelman, who now works for AT&T, spent seven years in the House as a DFLer from Duluth. Blatz's father is Jerome Blatz, a longtime state senator from Bloomington. He provided the family Bible used to swear in Blatz.

She said a major difference between be-

Former House member Kathleen Blatz is sworn-in as the first woman and the nineteenth chief justice of the Minnesota Supreme Court by outgoing Chief Justice A. M. (Sandy) Keith, right, during ceremonies Jan. 29 at the Landmark Center in St. Paul. Joining Chief Justice Blatz during the swearing-in are her husband, Tom Berkelman, and sons, left to right, Max, Carter, and Hunter. Her father, Jerome V. Blatz, holds the Bible as his daughter is sworn in.

ing a legislator and being a judge is the feedback sought from the public in each position.

"When I was a legislator, you could go out and you could be asked several questions. You are expected to take a position. That's what voters expect," she said.

However, a judge cannot take a position until it's time to rule on a case, and that position must be based on the law, not on personal preference, she said, and she tries to explain that when she talks to people about the law and being a judge. 🐸

# Highlights

## AGRICULTURE

### Feedlots and the environment

Gov. Arne Carlson has recommended that \$1.2 million be spent to pay for a generic environmental impact statement (GEIS) for animal feedlots to assess their impact, both on the economy and on the environment.

Carlson's plan was discussed Jan. 26 in a meeting of the House Agriculture Committee.

Feedlots have become a critical agriculture issue in rural Minnesota, because they have grown in size, and they are unpopular with some rural residents.

Many are afraid of what the large corporate farms containing large feedlots will do to family farmers. Concern also is focused on what the sometimes-noxious odors that emanate from the feedlots will do to the health of the people living nearby.

Each of the estimated 45,000 to 55,000 feedlots in the state produces millions of gallons of manure that has to be taken care of, and critics worry that earth-walled basins that hold the waste leak and may eventually burst.

"The hope is the GEIS will help all interested groups sift through the controversy and, hopefully, together develop plans for animal agriculture into the 21st century," said Susan Schmidt, policy liaison for the Minnesota Pollution Control Agency (MPCA).

The first step is to develop an "inventory" of feedlots, according to the recommendation which is part of the governor's 1998 supplemental budget.

The project would be managed by the MPCA, the Environmental Quality Board, the Department of Agriculture, and the Department of Health.

The GEIS would outline the types and locations of the feedlots, describe the overall characteristics of animal farming in the state, and assess the impact on air and water. The study also would describe the related economic issues and trends.

The governor hopes the long-term impact is that people will use the GEIS to develop and revise land-use plans and that state agencies and counties will use the findings to make or change laws based on the potential risks to people's health and the environment.

The GEIS will cost \$2.3 million and take up to two-and-a-half years to complete, said

Schmidt. Permitting for new feedlots would continue while the GEIS is conducted.

The committee took no action on the matter, and testimony on the plan is expected to continue this session.

## BANKING

### ATM transaction fees

A bill that would eliminate transaction fees assessed by banks on automatic teller machines (ATMs) they own met opposition from the banking industry during a Jan. 28 hearing before a House panel.

**HF2292**, sponsored by Rep. Irv Anderson (DFL-Int'l Falls), would prevent banks that own and operate more than two ATMs from assessing a surcharge for use of the machines.

The bill was debated by the House Financial Institutions and Insurance Committee, which Anderson chairs. The committee took no action on the bill, but the matter is expected to come up again this session.

ATM users often are hit with two fees for each transaction. One fee is assessed by their bank; the other is by the bank that owns the machine. Anderson's bill would address only the fee from the bank that owns the ATM.

That fee usually comes in the form of a charge at the time of a transaction at an ATM that is not owned by the consumer's bank network. Consumers are warned by the machine that they will be charged a certain fee and are given the option to discontinue the transaction.

Consumers often find a separate fee assessed at the end of the month on their bank statement.

"I don't like to be charged twice for the same transaction. By the way, the chair uses ATMs all the time," Anderson said.

Speaking in favor of the bill was Lea Schuster, a consumer advocate for the Minnesota Public Interest Research Group. Banks have encouraged the use of ATMs, Schuster said, because they are cheaper for banks than paying tellers.

One group hit hard by the surcharges are college students who often have to work and study beyond bank hours, Schuster said. And for that, they get hit with costly ATM surcharges.

"In today's economy, students are needing to pay cash. [They] should have the same access to the same services as all consumers," she said.

Schuster also said ATM owners are compensated by the consumer's bank with an "in-

Rod Nelson, president of First American Bank in Crookston, Minn., testifies against a bill that would prohibit certain types of fees charged for the use of automated teller machines. Joining him to testify before the House Financial Institutions and Insurance Committee Jan. 28, is Joan Archer, *right*, vice president of governmental relations for the Minnesota Bankers Association.

terchange fee," so the fee charged by the ATM owner is unnecessary.

The attorney general is supporting the bill. Eric Swanson, of the attorney general's consumer enforcement division, said the state's three largest banks own most of the ATMs. Customers of those large banks are not charged for use of ATMs owned by their bank.

What could happen, Swanson said, is that people may move their business to those large banks to avoid the ATM surcharges. That would be anti-competitive, he added.

"We're opposed to price gouging and anti-competitive behavior, which is going to hurt consumers," Swanson said.

Critics of the bill said it could reduce the availability of ATMs and hurt competitiveness in the banking business.

Rep. Torrey Westrom (R-Elbow Lake) said a \$1 fee for an ATM transaction is not out of line.

"If you go to TCF with a check and ask them to cash it, either they would charge you a substantial fee or they would not cash it," he said.

Joan Archer, of the Minnesota Bankers' Association, said the Legislature should not interfere with bank pricing. ATMs are a convenience that are paid for by user fees, she said.

Archer also said the legislation is unfair because it targets only banks, not retailers. In some cases, ATMs are owned by retailers.

John Corbett, of the Minnesota Savings League, which represents community banks, also expressed opposition to the bill. "What you're paying for is the convenience of having your money transferred to another bank so you can have access to it," he said. "Fees are one way to generate a profit. We are better off with financial institutions that make a profit."

budget surplus to the \$32 million that was an end-of-session balance from 1997.

There's a story behind that \$32 million. The majority of the leftovers, \$24.5 million, can be attributed to the governor's veto of the attorney general's office operating budget for 1999. The governor is now recommending to give the attorney general's office \$22.5 million in his most recent budget proposal.

At the beginning of each session, the governor proposes a budget to the Legislature. Essentially, the governor sets the terms of the budget debate and then the Legislature responds according to its wishes.

This year, the governor and the Legislature seem to be in agreement on the desired level of total spending.

The governor wants to use the projected \$1.3 billion surplus for \$373 million in new spending, \$841 million in property tax rebates and rate reductions and tax breaks for education expenses, and \$207 million for a so-called "Asian market fund" to brace for potential fallout from instability in Asian stock markets.

Due to a desire to protect against any future economic downturn, the committee's resolution contains a clause that allows them, if needed, to revisit the budget resolution after the February 1998 forecast. The Department of Finance has announced that the February forecast will be available to the committee Feb. 27.

## CHILDREN

### Child care challenges

Can I get it? Can I afford it? Can I trust it? These are the three questions a parent asks when it comes to child care, according to Rep. Nora Slawik (DFL-Maplewood).

Slawik is sponsoring a comprehensive child-care bill (HF2459) that was discussed by the Family and Early Childhood Education Finance Division of the House Education Committee Jan. 28.

"There are three challenges in child care: availability, affordability, and quality," she said.

The panel also discussed another bill (HF2283), sponsored by Rep. Mike Delmont (DFL-Lexington), that aims to make more child care available during hours beyond the usual working day. The bill calls for grants to go to referral services for recruiting such after-hours providers.

Slawik said three out of four women with a child under the age of six are in the workplace. The number of parents seeking child care is projected to increase dramatically with new welfare reforms.

Recent findings about the importance of early brain development also lend credence to the cause for better child care, she said.

Slawik understands the dilemma of a working parent. Her second child is almost a year old, she said, and she agonized over finding good child care before the legislative session started.

Among the many goals of her proposal are a support system for child-care providers, incentives for low staff turnover, outreach into communities of color, and a loan forgiveness program.

Pat Gannon, of Starting Out Successfully, an Anoka County program that provides child-care operators with monthly phone contact, home visits, and training workshops, spoke about the importance of sound business advice.

"Providers are often isolated," Gannon said. "Home visits give them a connection to the infrastructure of the child care community."

Margaret Boyer, from the Alliance of Early Childhood Professionals, addressed the reasons for the high rate of turnover in the field. The biggest reason, she said, is low wages. Another contributing factor is emotional exhaustion.

Child-care workers often need two jobs to

Louis Alemayehu, project director of Cultural Beginnings, testifies before the House Family and Early Childhood Education Finance Division Jan. 28 in favor of a bill for quality child care. Alemayehu stressed the need for children to be exposed to child care that suits their particular cultural heritage.

## BUDGET

### Budget resolution approved

The House Ways and Means Committee approved a budget resolution Jan. 27 that calls for a maximum of \$1.36 billion in new appropriations for the 1998-1999 biennium.

The \$1.36 billion figure is the total amount of general fund money that is available to the Legislature this year for any purpose, whether it's new spending, tax relief, or new reserves.

Some of the money is already earmarked for specific programs. According to legislation enacted in 1997, education tax credits and some property tax reform measures were contingent on a surplus in the Department of Finance's November 1997 forecast.

To arrive at the \$1.36 billion figure, the committee added the projected \$1.33 billion

support themselves and on top of that, she said, "behavior management" becomes more difficult every day.

"There are a lot of children coming into day care whose families are very stressed and who are not receiving good care at home," Boyer said.

The early childhood division took no action on the two bills, but lawmakers on the panel did agree to form a child-care working group.

## CRIME

### Arson data system

An arson fire is reported in Minnesota every three-and-a-half hours, according to the state fire marshal. A bill approved Jan. 26 by the House Judiciary Committee would help investigators and prosecutors by establishing a statewide database to track these crimes.

"Arson is not a free crime when it comes to human beings," said Rep. Wes Skoglund (DFL-Mpls), sponsor of the bill. "Firefighters risk their lives every time they fight a fire."

The bill (HF2313) was initiated at the recommendation of the Attorney General's Arson Task Force, which was created in 1995 to develop methods to combat the problem of arson in Minnesota. The task force is made up of investigators and prosecutors as well as representatives of the insurance industry.

Last year, the Legislature followed a task force recommendation and passed a law establishing the Minnesota Arson Strike Force, a team of investigators and experts who assist local authorities in arson investigations.

Skoglund's bill calls for the creation of an arson data system that would contain only basic information at the state level but would provide links to local criminal justice agencies for more detailed information on specific cases. The database would be maintained by the state fire marshal.

The Judiciary Committee approved the bill for inclusion in the omnibus crime bill to be assembled later this session.

## DRUGS

### Penalties and methamphetamine

A bill that would increase the penalties for manufacturing, possessing, or selling methamphetamine was approved Jan. 28 by the House Judiciary Committee.

The bill (HF2312) would raise methamphetamine to the same status as cocaine and heroin and would make the manufacture of any amount methamphetamine a first-degree controlled substance offense.

Law enforcement officials who testified at the committee hearing said the manufacturing provision is necessary because of the dangers inherent in the production of the drug.

"There are people involved in these operations who are subject to life-threatening activities without knowing what's involved," said Dennis Boser, sheriff of Mille Lacs County. "December of 1996 was the first time we had any knowledge of a meth operation in our county, and that was because of an explosion."

Rep. Wes Skoglund (DFL-Mpls), the bill's sponsor, told the committee that the drug is made by mixing potentially explosive materials and, if it's done wrong, can be extremely dangerous.

"This is a product that is different from most of the chemicals that people abuse in that it doesn't come from across our borders," Skoglund said. "People can make it in their kitchens. And they do in this state."

Skoglund told the committee that in California, a state that has seen a dramatic increase in methamphetamine trafficking, one in five methamphetamine production labs is discovered because they explode.

Margaret Chutich, of the attorney general's office, compared the drug to "moonshine" because the ingredients can be purchased at drug stores.

"We believe that methamphetamine is equally as harmful as cocaine, maybe more because of the dangers of production," Chutich said. "They're cooking these things, and if

they do it wrong, they're making some very dangerous gases."

She told the committee that law enforcement is seeing an increase in methamphetamine activity. She said that in 1996, methamphetamine accounted for 8 percent of Minnesota Bureau of Criminal Apprehension lab work; in 1997, it accounted for 20 percent.

Four young people from Teen Challenge, a drug treatment program, spoke to members of the committee. The young people, who chose not to give their names, described their experiences as users of the drug.

"It's very easy to get," said a 19-year-old former user who suffered heart damage from methamphetamine. "It's as easy to get as marijuana, and because I'm underage, it's easier to get than alcohol."

A 25-year-old woman from St. Cloud, Minn., said, "I was injecting anywhere from a gram to a half a gram every three hours. I bought a camcorder and sat in a hotel for three days filming outside because I thought the police were chasing me. I thought they were hiding in the trees."

One of the former users told the committee that he had considered making his own methamphetamine to save money.

"After you use it for a while it gets expensive, and you think you can make your own," he said. The former user said he was dissuaded by a friend who told him how dangerous manufacturing could be.

The committee approved the bill for inclu-

### Youth summit

Youth delegates vote on a bill that would create a graduated driver's license system. The youths were part of the fourth annual Minnesota Youth Summit on Violence Prevention, a program that educates young people about the legislative process. The students come to the Capitol for a day to study legislation that affects young people. This year, 200 students participated in the Jan. 27 event.

sion in the omnibus crime bill to be assembled later this session.

## EDUCATION

### Gifted and talented students

Minnesota's gifted and talented students — how much attention they need, how much attention they're getting, and how much money should be spent on them — are the focus of two bills considered Jan. 23 by a House panel.

During a hearing before the K-12 Education Finance Division of the House Education Committee, one legislator said that "profoundly gifted" students who aren't getting the proper challenges are being placed at-risk by the public schools.

The finance division discussed two bills — **HF2319**, sponsored by Rep. Mindy Greiling (DFL-Roseville), and **HF2318**, sponsored by Rep. Peggy Leppik (R-Golden Valley) — that aim to improve services for gifted and talented students. No action was taken on the proposals.

Greiling's bill would expand state funding for its gifted and talented program from \$1.5 million in 1998 to \$8.5 million in 1999, and the bill would remove the requirement that local school districts provide matching funds.

Currently, districts can get state grants of \$25 per student each year for local gifted and talented instruction, but the districts have to match that dollar for dollar. And the funds are not always available in a tight school district budget.

"We've heard from districts who didn't have time to actually apply [for the grant]," Greiling said. "Even with all the constraints, the money was used up last year."

Greiling's bill also would direct the commissioner of the Department of Children, Families and Learning to designate a specific department staff member to serve schools and parents by being a resource on the gifted and talented program.

Bill Keilty, coordinator for gifted services at the Forest Lake Public Schools, said the state's current program is valuable, and with Greiling's proposed changes, would be even better.

"We've seen programs expand; we've seen programs that have not even existed in the past evolve," he said. "We're also very concerned about the need for a resource person for gifted and talented programs."

Keilty said the students and teachers in gifted and talented programs are frustrated by the inability to talk to someone at the state level about their concerns.

"Gifted programs have changed in time and are being requested to address a broader spectrum of students," he said. "The step to increase the funding seems appropriate."

Leppik's bill would direct school districts to pick up the pace of instruction to high-scoring students in elementary and secondary grades. Schools would have to ensure gifted pupils each have a written individual learning plan developed by a group that includes the student's teachers, parents, and counselors.

The plan would state the desired outcomes for the student and the curriculum and teaching methods to be used.

"If they are not doing this, the students are not getting an education appropriate to their above-average ability and are not being served by the school district," Leppik said.

Gifted and talented students who are not challenged eventually run into problems, she added.

"They will become extremely bored; they get into trouble," Leppik said.

Both bills were laid over for possible inclusion in the omnibus K-12 finance bill to be assembled later this session.

### School lunch program funding

A proposal to increase state aid for the school lunch program stalled in the House last year, but lawmakers are considering the matter again.

Rep. Matt Entenza (DFL-St. Paul), sponsor

of **HF2345**, said his bill would make up for losses due to inflation that school districts have been forced to absorb. The Legislature appropriates a fixed amount for school lunch and food storage aid, and that amount was last increased in 1991.

"As school enrollment increases, the amount available per pupil to districts decreases," Entenza said. His bill would increase the 1999 state appropriation for school lunches from \$7,254,000 to \$9,035,000.

Polly Podpeskar, director of food and nutrition programs at Grand Rapids Public Schools, testified that the program is in need of additional funding, especially considering the high percentage (about 33 percent) of students eligible for free and reduced-price meals.

"We are constantly striving to strike a balance between nutritious meals and ones that are appealing to children," she said. "We're very sensitive about passing on price increases to paying students, who are often the children of the working poor."

Linda Skrian, president of the Minnesota School Food Association, said that while the national school lunch program is often cited as one of the most successful federal programs, federal funding has not been keeping pace with rising costs to districts.

While the K-12 Education Finance Division of the House Education Committee did not vote on the issue during the Jan. 26 hearing, many members voiced support for the bill.

### New member

Newly sworn-in Rep. James Clark, a Republican from Springfield, gets a congratulatory kiss from his wife, Cara, who is holding their daughter Claire. Sister-in-law Cori Gunnels and nephew Ben Gunnels share in the moment.

"This is one of the things that has been shown to make a difference," Rep. David Tomassoni (DFL-Chisholm) said. "We should really grab it and run with it."

The division is considering the proposal for inclusion in this year's omnibus K-12 finance bill.

## Tax credits for education

Minnesota parents whose income puts them just over the eligibility level for taking advantage of tax breaks in a 1997 education law may get some good news in 1998.

The House Education Committee approved a bill Jan. 27 that would replace the specific income-level cutoff for claiming education tax credits with a gradual phase-out of the amount of credit a family can claim.

A law passed in the Legislature's 1997 First Special Session allowed families with incomes of up to \$33,500 to claim up to \$1,000 per child and \$2,000 per family as a tax credit for education-related expenses such as tutoring or educational summer camps. Families with incomes of \$33,501 and higher are currently not eligible for any credit.

"We're doing a disservice to Minnesota families by creating a cliff," said Rep. Ann H. Rest (DFL-New Hope). "We don't do this in any other tax policy that involves a credit in this state."

Rest is the sponsor of **HF2364**, which calls for gradually phasing out the education credit for taxpayers with incomes between \$30,500 and \$34,500. For each \$4 of income over \$30,500 that a family earns, the maximum per-child credit would decrease by \$1, under Rest's bill. At an income level of \$34,501, families would be ineligible to receive a credit.

Although the bill would decrease the amount of the credit for families who earn between \$30,500 and \$33,500, Rest said it would "treat Minnesota families fairly" by eliminating the cliff effect.

"It's unfair for families to get their expectations up about being able to spend extra money for a child's education, only to find out they're a few dollars over the limit," she said. She added that an unexpected \$200 bonus from a boss at the end of the year or interest from a savings account could cost families up to \$2,000.

But Rep. Alice Seagren (R-Bloomington) said that the proposed change would be unfair to families whose benefit would be reduced.

"The message has long been out that at \$33,500 you get the full credit," she said. "People may already be looking at computer purchases or tutoring to take advantage of that credit."

An amendment introduced by Rep. Barb Sykora (R-Excelsior) proposed to begin the phase-out at incomes of \$33,500 and extend it to \$37,500. Such a change would require an additional \$6.5 million from the state.

The amendment was voted down by committee members who said they did not want to sink more education money into what several called "inefficient and unaccountable" tax credits.

Under Rest's bill, the state would not have to increase spending above what is anticipated for the current tax-credit payments. More families would be eligible for the credit, but fewer would receive the maximum amount. With the current law, about 200,000 families are expected to receive credits.

The bill was referred to the committee's K-12 Education Finance Division to be considered for inclusion in this year's omnibus K-12 funding bill.

## Residential boarding schools

When former Minnesota Vikings tight end Joe Senser appeared before lawmakers Jan. 28, he assured them that "at no time will I be asking you to build me a new stadium."

Instead, Senser was testifying before the

Joe Senser, a former tight end for the Minnesota Vikings, tells the K-12 Education Finance Division about his positive experience growing up at the Milton Hershey Academy, a privately endowed academy for fatherless boys in Pennsylvania. The committee heard testimony on a bill Jan. 28 that would appropriate money to create residential academies for at-risk students.

K-12 Education Finance Division of the House Education Committee on the merits of residential boarding schools for at-risk youth.

Senser attended a school for fatherless boys in Hershey, Penn., after his father died.

"My mother worked 80 hours a week, and she knew this was a way out for me, a way for a better life," he said.

By the time he went to the school, at age 11, he said he was "already started on that wrong path in life. My talents . . . to play football would never have shown through had [I not gone to that school]."

A bill to provide \$12 million to establish three such schools in Minnesota is before lawmakers this session (See *Session Weekly*, Jan. 23, 1998, page 7). **HF2321**, sponsored by Rep. Alice Seagren (R-Bloomington), is being considered for inclusion in the omnibus K-12 finance bill.

## ELECTIONS

### Updating eligible voter lists

A bill advancing in the House would provide an efficient way of updating the lists of eligible voters and might make it more convenient for the people who move to vote in the next election, according to supporters.

The bill (**HF2387**), sponsored by Rep. Betty Folliard (DFL-Hopkins), would allow the secretary of state to periodically get names and addresses of Minnesota registered voters who have moved within the state and have given the U.S. Postal Service a change of address.

The secretary of state then would provide the names to county auditors, who would update their records and send the new resident a voting card with the location of their new polling place.

The House General Legislation, Veterans Affairs and Elections Committee approved the bill Jan. 26.

Rep. Bill Haas (R-Champlin) questioned if the bill might ask government to go too far out of its way to accommodate voters who move, when those people could easily take care of the necessary paperwork for voting along with all of the other change-of-address paperwork.

"Isn't that my responsibility rather than having the state trying to track [me] down? It seems like we have a good system in place," he said. "It's a responsibility to take the time to report that. It's that important."

Currently, people who move have to report their change of address to the local voting authority to get their new card.

"I don't think all citizens automatically take care of that," Folliard said. "It would be a convenience to citizens."

“... I get disappointed when I see the low voter turnout. Anything we can do at the Legislature to increase voter turnout, I’m for.”

Joe Mansky, director of the election division of the secretary of state’s office, said half the people registering on election day are doing so because they’ve moved and 20 percent of Minnesotans move during an average year.

The bill now moves to the House floor.

## EMPLOYMENT

### Employment contracts

A bill requiring written employment contracts to be in an employee’s main language received approval Jan. 26 from the House Labor-Management Relations Committee.

**HF216**, sponsored by Rep. Carlos Mariani (DFL-St. Paul), was laid over at the end of the 1997 legislative session in part because of concerns that requiring such contracts would be an unmanageable burden to employers.

But after hearing disturbing testimony last March from a poorly treated Spanish-speaking worker, several lawmakers pledged to support the bill this year.

The bill would expand a current disclosure law, which applies only to the meat-processing industry, to protect non-English speaking employees in all jobs. It also calls for funding for the Department of Labor and Industry to translate disclosure forms and to launch a public awareness campaign.

“As a result of not understanding the terms and conditions of employment... workers are abused,” said Margarita Zalamea, executive director of the Chicano-Latino People’s Affairs Council.

Isabelle Martinez, who said she was unfairly fired from her job at a home for the elderly, testified through an interpreter that her employer verbally misrepresented employment terms to her in Spanish and then forced her to sign an English document that contradicted the oral job description.

Also testifying in favor of the bill were representatives from the Urban Coalition, the AFL-CIO, the Council on Black Minnesotans, and the Council on Asian-Pacific Minnesotans.

But officials from the Minnesota Chamber of Commerce, Employment Law Council, and Retail Merchants and Employers Association all spoke against the measure.

The critics said they would support tougher penalties for employers who violate current laws — including one prohibiting employers from falsely representing job conditions or terms to prospective employees — but were

opposed to requiring written non-English contracts because of the obligation placed on employers.

“If [employers] are already violating the law on false representation, they’re probably not going to obey a new law requiring disclosure forms,” said Tom Hesse, of the Minnesota Chamber of Commerce. He also noted that Mariani’s bill does not provide for sanctions against employers who do not provide the translated forms.

But the committee rejected an amendment offered by Rep. Ken Wolf (R-Burnsville) that would have eliminated the disclosure-form requirements, increased penalties for violations of relevant current laws, and kept the plan for a public-awareness campaign in Mariani’s bill.

The bill now moves to the House Economic Development and International Trade Committee.

## ENVIRONMENT

### Minnesota Zoo faces shortfall

Due to a serious shortfall in gate receipts last summer, the Minnesota Zoological Gardens is asking the Legislature for \$1.5 million in supplemental funding for 1998.

Don Mereen, a volunteer for the Minnesota Zoo since 1991, holds a North American opossum for members of the House Environment, Natural Resources and Agriculture Finance Committee. Mereen and his companion were there to support Kathryn Roberts, general director of the Minnesota Zoo, who presented the agency’s supplemental and capital budget requests to the committee Jan. 27.

Kathryn Roberts, the Apple Valley zoo’s director, attributes the shortfall to bad luck, bad weather, and bad press. She presented the zoo’s supplemental and capital budget requests Jan. 28 to the House Environment, Natural Resources and Agriculture Finance Committee.

Roberts said 75 percent of the zoo’s yearly attendance occurs between Memorial Day and Labor Day. The summer of 1997 was a disappointment.

“Attendance failed in the summer months,” she said. “No matter how well we do in the winter months, we’re unable to catch up with those 90 days in the summer.”

In June, Roberts said, the new Discovery Bay building opened a month late facing serious competition from Underwater World at the Mall of America. Discovery Bay is a marine education center that features a shark exhibit and an indoor dolphin amphitheater. The zoo had been counting on a projected boost in attendance from the new exhibit, she said.

To make matters worse, Roberts said, several of the sharks in the Discovery Bay exhibit died, and the subsequent media coverage caused people to wonder if the exhibit had been closed.

July brought 17 days of rain and attendance continued to lag, Roberts said.

But the worst assault on attendance occurred in August, when an outbreak of cryptosporidiosis struck many children who had played in one of the zoo’s fountains. Cryptosporidium is a one-celled organism that causes diarrhea, stomach cramps, and fever when it infects people. The outbreak likely was caused by a child with a soiled diaper playing in the fountain.

Roberts said the zoo endured three more weeks of bad press related to the health scare.

The zoo will celebrate its 20th birthday this spring, she said, and this is the first time it has ever had to come to the Legislature for supplemental funding to cover operating costs.

Jeffrey Higgins, the zoo’s financial officer, said if the zoo doesn’t receive the money, it may have to lay off 25 percent of its workforce, close several trails, and shut down the conservation office.

The committee took no action on the matter. The zoo’s funding request will be considered again later this session.

If you will be visiting the Capitol in the near future, call the Capitol Historic Site Program at (612) 296-2881 to schedule a tour.

## Funding frog research

Research into the cause of deformities found in frogs across the state would receive an infusion of fresh cash under a bill sponsored by Rep. Willard Munger (DFL-Duluth).

Munger's proposal would appropriate \$500,000 to the Minnesota Pollution Control Agency (MPCA) for continued research and monitoring of frog deformities.

"The frogs are the most sensitive of the creatures in our environment," Munger said. "I think they are telling us a story."

His bill (HF2427) was approved Jan. 26 by the House Environment and Natural Resources Committee.

Under the proposal, the research funding would have to be shared with several other agencies and organizations studying the issue, including the Department of Agriculture, the Department of Health, the Department of Natural Resources, the University of Minnesota, and Hamline University.

The proposed \$500,000 appropriation matches the amount included in Gov. Arne Carlson's supplemental budget request.

Terry Fredin, of the Minnesota Frog Watch and A Thousand Friends Of Frogs project at Hamline University, listens as the House Environment and Natural Resources Committee approves a \$500,000 appropriation to continue the frog research. The research project was established to discover the reason why deformed frogs have been found around the state. Others testifying at the Jan. 26 hearing are Margaret Velky, *top left*, and Judy Helgen, *top right*, both of the Minnesota Pollution Control Agency, and Rep. Willard Munger, sponsor of the bill.

Munger said the issue is one of the governor's top environmental concerns.

The MPCA's first confirmed sighting of deformed frogs was in 1993. Interest in the issue increased after August 1995, when a group of students from LeSueur's New Country School discovered a large group of frogs with missing or deformed legs. After the students' discovery hit the press, there were similar reports from across the state.

Initial research was funded by the Legislative Commission on Minnesota Resources in cooperation with the MPCA. Research has been carried out in conjunction with several partners, including the U of M, Hamline University, the National Institute of Environmental Health Sciences, and the National Wildlife Health Center.

The 1997 Legislature authorized an additional \$200,000 for further frog research.

Currently, researchers are speculating that groundwater contamination or possibly ultraviolet radiation may be the cause of the deformities. The U.S. Environmental Protection Agency also has begun to examine the issue.

"We had better find out what's causing this environmental degradation," Munger said. "Or else, we're next."

The bill now moves to the House Environment, Natural Resources, and Agriculture Finance Committee.

## GAME & FISH

### Hunting, fishing privileges

A bill that aims to amend the Minnesota Constitution to protect hunting and fishing privileges stirred controversy Jan. 26 in the House Environment and Natural Resources Committee.

Sponsored by Rep. Mark Holsten (R-Stillwater), the bill (HF326) would submit the following constitutional amendment to voters in the 1998 general election: "Shall the Minnesota Constitution be amended to declare a privilege of legal residents to take game and fish in accordance with law and regulations?"

During the committee hearing, Holsten said, "According to my belief system, the constitution is a list of values that we, as citizens, want to protect."

By placing this particular privilege in the constitution, he said, the state would officially recognize the "cultural heritage" of hunting and fishing.

Members of the committee agreed to send the bill along without recommendation.

Holsten sponsored a similar bill in 1996. It passed the Senate but stalled in the House that year, in part because of dissatisfaction with the wording of the proposed amendment.

The 1996 bill sought an amendment protecting the "right" to hunt and fish.

Holsten has altered the proposed amendment to read "privilege" rather than "right." He said that "privilege" is more accurate because it implies that one still must be held to certain standards.

"The language has evolved, and the issue has matured," he said.

Supporters said the bill would be a first step in standing up to anti-hunting and animal rights groups who seek to curtail the activities of hunting and fishing enthusiasts.

Jim Klatt, of the Minnesota Outdoor Heritage Alliance, said he is concerned about the situation in some states with initiative and referendum where voters have outlawed certain hunting seasons and activities such as sport fishing after heavy-duty campaigning by animal rights groups.

Minnesota is not an initiative and referendum state, but Klatt said he wants to make it difficult for those same activists to target Minnesota in the future.

"We are far better stewards of the land because we participate rather than watch from afar," Klatt said in defense of hunters and anglers.

Roger Holmes, director of the Fish and Wildlife Division of the Department of Natural Resources, said the agency supports the bill because it aims to protect hunting, fishing, and trapping.

"It also affirms the way the state regulates the harvest of our natural resources," he said. "If it passed as a constitutional amendment, it may make our jobs easier."

Critics argued that there is no need for such an amendment and, if approved, it would only serve to clutter the constitution.

Linda Hatfield, representing Friends of Animals and Their Environment, the National Fund for Animals, the National Humane Society of the United States, and the Minnesota Humane Society testified against the bill.

"The constitution provides the basic framework for protecting basic liberties," she said. "It is not intended to protect recreational pursuits."

Joan Harp, of rural Isanti County, said that as a landowner she is concerned about hunters who trespass on private property. She said the language may give hunters the false sense that hunting privileges take precedence over property rights.

Rep. Willard Munger (DFL-Duluth), who chairs the committee, said that while he, too,

is a hunter and fisherman, he opposes the bill. "I feel that it is directed against one group of citizens in Minnesota," he said. "I don't relish that particular motive."

The bill now moves to the House Environment, Natural Resources and Agriculture Finance Committee.

## GOVERNMENT

### Tobacco investments

A bill that would require the State Board of Investment to divest 5 percent of its tobacco stock sparked debate Jan. 29 on the merits of Legislature-mandated social engineering and the demerits of smoking.

But Rep. Steve Trimble (DFL-St. Paul), sponsor of **HF2453**, said the tobacco issue is not even his top concern in the bill. His proposal calls for the proceeds from the sale of that stock to be invested in the Minnesota Technology Equity Fund, a program that assists development in rural Minnesota by offering investment capital.

"It's been historically difficult for small rural companies to find debt-free capital," he said in testimony before the House Governmental Operations Committee. "I'm saying that I know of a really good use for about \$15 million, and I'd like to take it out of tobacco investments."

The investment board manages more than \$27 billion in public money, in large part, the retirement funds for state employees, teachers, and public employees.

Some lawmakers, including Rep. Kevin Knight (R-Bloomington), said they would support selling off the tobacco-related investments, but felt it was not the job of the Legislature to tell the board where to relocate the funds.

But others said they supported the idea of investing in pro-Minnesota programs, but for varying reasons, were not in favor of discriminating against tobacco stocks.

"I know I was a co-author of this bill originally," said Rep. Mike Osskopp (R-Lake City). "But that must have been the day I quit smoking — I couldn't concentrate."

"It's a stupid thing to do investment-wise, when all testimony from the experts is that tobacco stocks are good investments."

Rep. Jim Farrell (DFL-St. Paul) said he does not want to engage in setting social policy through legislation.

"I'm worried about our system," Farrell said. "I don't really care about the investment."

Former Rep. Marc Asch testified as the vol-

unteer chair of the public advocacy committee of the American Heart Association's Minnesota chapter.

He called for the state to fully divest of all tobacco-related stocks, saying the drug is the nation's top killer.

"Minnesota is one of 10 states that have the most investments in tobacco," he said, adding that the state has more money invested in tobacco than do any of the tobacco-producing states.

The bill was sent to the committee's State Government Finance Division.

### An evenly divided House

For the first time in its history, Minnesota may soon have a contingency plan in place for electing a speaker in an evenly divided House.

A bill that would establish a policy to be followed under such rare circumstances was approved Jan. 29 by the House Governmental Operations Committee.

Across the 50 states, there have been 24 occasions when the seats in a state Senate or House of Representatives have been evenly divided between two political parties.

And just about every instance has yielded a different method for choosing the speaker or majority leader. Some states deferred to the governor's party, while others came up with more creative plans. (Wyoming elected to hold a coin toss.)

When Minnesota found itself in that position after the 1978 elections, the two parties negotiated a bipartisan leadership. Rep. Rod Searle (IR-Waseca) became speaker, but Rep. Irv Anderson (DFL-Int'l Falls) was named chair of the powerful Rules and Legislative Administration Committee. Other standing committee chairs were selected from both parties.

"It took an awful long time to resolve that situation," Anderson said.

Twenty years later, the former speaker has introduced a bill that would dictate how to proceed when there is a tie vote for speaker or any other office in the House.

"I want to say that the introduction of this bill in no way indicates that I expect the House to be evenly divided in the near future," Anderson said. Currently, DFLers hold a six-seat majority, with elections coming up in November.

Under Anderson's bill, the candidate nominated by the caucus of the governor's party would be elected speaker in an evenly divided House. But all committee appointments would then be equally divided from each party.

"If the people of the state have spoken [and said] that they want an even distribution of

political parties, we should abide by that," Anderson said. "If a speaker is chosen in this manner, then he's still not going to dominate the House because you need 68 votes to pass a bill."

The bill now moves to the House floor.

### State treasurer's office

Minnesotans may get the opportunity in the November polls to decide whether the office of state treasurer should be abolished.

A bill (**HF2355**) that would do away with the office and transfer the treasurer's responsibilities to the commissioner of the Department of Finance was approved by the House Governmental Operations Committee Jan. 27.

Bill sponsor Rep. Mindy Greiling (DFL-Roseville) and co-sponsor Rep. Jim Knoblach (R-St. Cloud) said the bill's goal is to streamline government.

"Such a statewide office should have significant policy ramifications to justify [maintaining it]," Knoblach said. "And we all know that most people don't even know who [the current state treasurer] is."

Proponents estimate that eliminating the office would save the state as much as \$2.5 million per year, in addition to increasing efficiency.

James Dunlop, the Reform Party candidate for state treasurer in 1998, tells the House Governmental Operations Committee that he would be happy to be the last person to hold the office. Dunlop, a deputy state treasurer from 1983 to 1987, testified before the committee Jan. 27. The committee approved a bill that would provide a vote on a constitutional amendment to abolish the office in 2002.

But opponents, including Rep. Kevin Knight (R-Bloomington) and Rep. Tom Rukavina (DFL-Virginia), said transferring duties to the commissioner of finance would concentrate too much power in one department, which is under the governor's authority.

"Does it excite anyone here to have all financial power rest on the governor?" Knight asked.

The bill calls for putting the necessary constitutional amendment to eliminate the office on the November ballot, at which time voters would also elect a final state treasurer. The office would be abolished in January 2001, at the conclusion of that officer's two-year term.

Greiling said the recurring discussion of whether to eliminate the office began in the 1940s.

The last time the issue came before lawmakers was in 1996, when a bill passed the Senate 54-1 but stalled in the House. That 1996 House proposal, also sponsored by Greiling, was approved by the House Governmental Operations Committee but did not come up for a vote on the House floor.

Greiling's current bill now moves to the House Rules and Legislative Administration Committee.

## Honoring Nellie Stone Johnson

Minnesota activist Nellie Stone Johnson may soon be honored as the first woman to have a sculpture of her image displayed in the state Capitol.

It took about two minutes for the House Governmental Operations Committee to approve a bill Jan. 27 that calls for a bust of the labor organizer and civil-rights activist to be placed in the Capitol.

The same bill was passed by the House last year, but because its Senate companion stalled, the House will need to repass the bill this year.

Since the 1930s, Johnson, who is now in her 90s, has been an active advocate for labor and human rights in Minnesota.

In the early 1930s, when her wages as an elevator operator at the Minneapolis Athletic Club were slashed, she helped organize the Minneapolis Hotel and Restaurant Workers Union, serving as the group's first female vice president.

A decade later, she was instrumental in orchestrating the merger of the state's Democratic and Farmer-Labor parties. In 1945, she was the first black Minneapolis resident elected to citywide office.

She also helped create the office which later became the Minneapolis Civil Rights Commission and the state Human Rights Department; helped win desegregation of the armed

forces; and was twice a representative to the Democratic National Committee in the early 1980s.

Rep. Joe Mullery (DFL-Mpls), who is sponsoring the bill, said Johnson continues to be an important activist.

HF1583 now goes to the State Government Finance Division of the Governmental Operations Committee.

## HEALTH

### Hepatitis B immunizations

Vaccinating a small segment of young children could help eliminate the serious liver disease hepatitis B, which can lead to cancer or liver failure.

Dr. Deborah Wexler, executive director of the Immunization Coalition, told the House Health and Human Services Committee Jan. 27 that a bill to immunize the state's students would make Minnesota the 33rd state to enact such legislation.

The bill (HF2681) was approved and sent to the floor.

Sponsored by Rep. Nora Slawik (DFL-Maplewood), the bill would require children enrolling in schools or child care facilities to receive hepatitis B immunizations. The immunization requirement would apply to kindergarten students beginning in the 2000-01 school year.

Hepatitis B is caused by a virus and spread by contact with an infected person's blood or other body fluids. It can also be spread by sharing washcloths, razors, toothbrushes, or needles, or in the process of tattooing.

Aggie Leitheiser, director of the Minnesota Health Department's Division of Disease Prevention and Control, said from 1990 to 1995, there were 591 known cases of hepatitis B in Minnesota, with 30 of those cases occurring in children 17 or younger.

But she said those who suffer from the disease are often without symptoms for years, so the exact number of people carrying the disease is unknown.

Wexler said about 80 percent of infants are now being vaccinated for the disease.

"This bill just catches those kids who have fallen into the cracks. It's a checkpoint," she said.

Rep. Lee Greenfield (DFL-Mpls) said the bill likely would come at no cost to the state.

## HIGHER EDUCATION

### MnSCU seeks \$185.6 million

A severe 1997 winter followed by massive spring flooding took an abnormally high toll on buildings in the Minnesota State College and University (MnSCU) system, according to officials from the schools.

That weather-related stress is part of the reason MnSCU is seeking \$185.6 million for capital projects this year, said Morrie Anderson, MnSCU chancellor, during a Jan. 28 hearing of the Higher Education Finance Division of the House Education Committee.

MnSCU's bonding request exceeds the \$162.8 million recommended by Gov. Arne Carlson, and is nearly twice as large as in 1996, when the Legislature earmarked \$86.5 million for MnSCU capital projects.

The largest item included in the current MnSCU request is for \$91 million in system-wide repair and maintenance projects. The request covers 335 individual projects for repair and replacement of buildings, equipment, and mechanical systems.

The largest proposed repair and maintenance projects at individual schools are \$16.2 million at Moorhead State University, \$11 million at Mankato State University, and \$9.6 million at St. Cloud State University.

The expenditures would be designated as Higher Education Asset Preservation and Replacement (HEAPR) projects, which fit into a capital request category that includes health and safety improvements, other projects that update the exterior, interior, mechanical or electrical systems, and other infrastructure repair.

As was the case at the division's hearing involving University of Minnesota President Mark Yudof earlier in the week, lawmakers wanted to ensure the funds were to be used for projects specified under HEAPR and not for new construction.

Rep. John Tuma (R-Northfield) wondered if the state had not been "too loose" in its previous interpretation of HEAPR projects.

Moorhead State University President Roland Barden presented a detailed account of all the school's repair needs so lawmakers could judge the nature of the individual HEAPR requests. Barden and Anderson both stressed that the cost to defer HEAPR projects would exceed price of doing them now.

"We think it is important to take care of our existing asset base now," Anderson said.

MnSCU was created in 1995 by the merger of Minnesota's technical, community, and state colleges. The number of institutions was

reduced from 45 to the current 36, plus a campus in Akita, Japan.

Members of the finance division also discussed the need for an alternative to the cyclical need to repair flat roofs on many of the MnSCU buildings.

"It's beyond my comprehension why we build flat roofs in Minnesota," said Rep. Gene Pelowski (DFL-Winona), who chairs the higher education panel.

Robert Erickson, chair of the MnSCU facilities committee, said pitched roofs are more expensive to build and are difficult to engineer on current larger buildings. Construction of pitched roofs requires additional support because of the design and weight of the roofs, he said.

Pelowski said the initial cost might be greater but ultimately money likely would be saved by constructing buildings with pitched roofs.

## Selecting U of M regents

A bill aimed at improving what many call a cumbersome and flawed process for selecting University of Minnesota regents was approved by the House Education Committee Jan. 29.

Under the plan, regents for the 12-member board would be selected based on rural and urban lines rather than congressional district lines, as they are currently chosen.

Five regents would have to reside in the seven-county metropolitan area, five would be required to live outside that area, and the remaining two would be at large. Currently, one regent is chosen from each of the state's eight congressional districts, and four at-large members are selected.

Rep. Rob Leighton (DFL-Austin), sponsor of HF2741, said the greatest benefit of the proposed change would be eliminating the district caucuses from the selection process.

"The issue has been scrutinized by [members of a joint House and Senate subcommittees], the media, alumni, students, faculty, former candidates for regent seats," he said. "It became crystal clear that [the process involving] congressional district caucuses is very time consuming."

The proposal also addresses an issue faced last year when the 7th Congressional District yielded two very desirable candidates for regent seats and legislators had to choose between them.

"I think that almost everyone who met those candidates understood that both should have been on the board," Leighton said. "Under this proposal, they both could have been elected."

The bill also reorganizes the 24-member

Regent Candidate Advisory Committee to increase input from both the governor and the minority parties of the House and Senate. Currently, 12 members of that committee are chosen by the speaker of the House and 12 by the Senate Rules Committee.

The advisory committee interviews candidates and recommends finalists, who are then considered by the House and Senate education committees. Those committees endorse candidates before the full House and Senate vote on the finalists.

Under the bill, the advisory committee would be reduced to 15 members to be chosen as follows: four each by the House speaker and the Senate majority leader, one each by the House and Senate minority leaders, and three by the governor.

Typically, four regent seats come up for election in each odd-numbered year; the 12 regents serve staggered six-year terms.

## Real brain

Robert Elde plopped a Tupperware container on the table, and quickly gained the attention of the Higher Education Finance Division of the House Education Committee. The container held a human brain. It was among the props Elde brought to help educate committee members about the work done at the University of Minnesota's College of Biological Sciences. Elde, a neurobiologist, is the dean of the college. Mike Martin, dean of the university's School of Agriculture, was last on the Jan. 26 agenda to make a pitch for his school. "Following Dean Elde and his traveling brain is a tough act for me," Martin said.

Legislators next will vote on regent candidates in 1999.

The bill will move to the House floor.

## HOUSING

### Housing discrimination

A proposal to provide grants to help solve the problem of housing discrimination was approved Jan. 27 by the Housing and Housing Finance Division of the House Economic Development and International Trade Committee.

The bill (HF2431) is sponsored by Rep. Michael Paymar (DFL-St. Paul), who said that he was motivated to action by reports of housing discrimination in his legislative district.

The bill would provide \$400,000 in grants to nonprofit organizations experienced in housing issues to deal with the problem of housing discrimination. The grants could be used to provide investigative and legal services to victims of discrimination or for fair housing testing and education.

Lawrence Winans, director of the Minnesota Fair Housing Center, testified in support of the bill. His organization does audits of landlords and property managers to study ways in which discrimination occurs.

"Discrimination in the field of housing is never blatant," he said. "A person does not come to the door and say, 'I do not rent to black people,' or 'I don't rent to Hispanics.'"

Christy Snow, who is the testing coordinator with the Fair Housing Center, described how audits are done. Two testers are sent to a housing agent. Both testers have the same scripted characteristics, such as income status and rental history, but differ on the characteristic being tested, most often race.

Larry Haqq and Shalia Lindsey, both testers who are African-American, read audit transcripts of exchanges they had with landlords. Snow read transcripts provided by white testers to show the differences in the behavior of the housing agents.

In one case, Lindsey said, she was asked to leave her driver's license in the rental office, and she was told it was necessary so that the property manager would have her identification in case something happened during the tour. A white tester with the same qualifications did not receive the same request.

"In one out of two audits, the person of color is treated less favorably than the person who is white," Snow said. "While neither tester was told they would not be welcome, the evidence is there that the African-American testers received different treatment."

The fair housing grants would be distrib-

uted by the Minnesota Department of Human Rights.

The bill now goes to the full committee.

## HUMAN SERVICES

### Hospital ownership

Nonprofit hospitals are generally viewed as charitable community assets, but from 1990 to 1996, a total of 192 nonprofit hospitals converted to for-profit status. In 1996, 60 nonprofit hospitals were converted.

A bill that would require nonprofit hospitals to provide 45 days of notice to the attorney general before making transfers involving 50 percent or more of hospital assets was approved by the House Health and Human Services Committee Jan. 28.

The bill (**HF381**) is sponsored by Lee Greenfield (DFL-Mpls). It would authorize the attorney general to make the transaction notices accessible to the public and to obtain public comment on any pending transaction.

While the attorney general's office already has the ability to investigate and stop such transactions that are not in the public interest, the bill ensures written notice would go to the attorney general's office well in advance of the deal.

Greenfield said it is easier to examine such deals before they are complete, rather than to "unscramble the egg" later.

"Often it's only after the deal is done that the public has any awareness that this transaction has taken place," said Cindy Jesson, of the attorney general's office. "The public learns afterward that maybe it was a sweetheart deal and the nonprofit seller did not get fair market value for the hospital. And that's important because if you get fewer dollars in the sale, then fewer dollars go into charitable trusts that help communities promote health care."

Before California adopted similar legislation, Greenfield said that state lost about \$2 billion in public investment. Greenfield said the law would help ensure that "a publicly owned hospital cannot just come in, take funds, and disperse them any way they want to. They have a responsibility to use this money in the public good in the health arena."

Greenfield also said the legislation would not prohibit companies exploring for-profit ownership in Minnesota.

"It's going to make for-profits think twice, but I don't think it's a prohibition," he said.

The bill now moves to the House Judiciary Committee.

## Nursing home salaries

Emotional testimony accompanied a committee discussion of a bill that would provide a 5-percent salary adjustment to nursing facility employees.

Jeanette Hanson, of Stillwater, her voice tense with emotion, told of understaffing, lack of supplies, and frequent falls during her mother's 30-month stay in a nursing home.

She said on the last night of her mother's life, a caring staff member gave her mother "an old-fashioned back rub, and you could almost hear my mom purr." But Hanson said understaffing precluded that type of attention routinely.

The measure would allow certified nursing facilities to apply to the state for a 5-percent salary adjustment for employees starting Oct. 1, 1998. Low wages in the field and a general shortage of workers in the state has made it difficult for nursing homes to attract and retain workers.

The House Health and Human Services Committee sent the bill (**HF2684**), sponsored by Rep. Luanne Koskinen (DFL-Coon Rapids), to the committee's finance division Jan. 29.

## LAW

### Medical malpractice lawsuits

A bill to extend the time allowed to file a medical malpractice case from two years to six years has stalled on a tie vote. A similar bill, however, which would extend the limit in certain instances has received initial approval.

Both bills were heard in the Civil and Family Law Division of the House Judiciary Committee on Jan. 28.

Current law requires that lawsuits dealing with medical malpractice must be initiated within two years of the occurrence of the malpractice in all cases.

Rep. Todd Van Dellen (R-Plymouth) is sponsoring a bill (**HF1151**) which would make an exception to the statute of limitations in certain instances.

Troy Donahue, a member of the public, testified for Van Dellen's bill. He said that his wife had a mole removed in 1993 and it was misdiagnosed as benign. By the time they discovered that an error had been made, the statute of limitations had passed, and attorneys told them that they did not have a malpractice claim.

Donahue was told that if the case had occurred in Wisconsin, he would still have a claim. His wife died of cancer in 1996, a month after the cancer was found.

"Had this been caught at the time, maybe she'd still be alive. It's just terrible," he said.

William Stoeri, an attorney who represents doctors in malpractice cases, spoke in opposition to the bill. He said that the statute of limitations strikes a balance between the rights of plaintiffs and defendants.

"A statute of limitations exists because it is unfair for defendants some years down the line to come in and defend themselves," he said.

Stoeri said that it is difficult to build a defense based on a doctor's memory of what he or she did years ago. He said that they have to go back and review the standard of care from the year of the claim. They have to research what the correct response should have been in order to establish that the doctor did not act negligently.

"The difference in medical cases is that medicine advances extremely quickly. To go from two years to six years is an exponential expansion," he said. "I don't think that any patient would want to be treated with the standard of care from six or eight years ago."

Bob Tracy, of the Minnesota AIDS project, testified against one of the provisions in **HF1151**. The provision would extend the statute of limitations in cases where the HIV virus is passed from a health care worker to a patient.

Tracy said that there have been no cases of this sort in the state. He said that there has only been one case in the United States, and that case has been recently called into question.

"Particularly with the HIV provision, we are looking at a solution that is trying to find a problem," he said.

Van Dellen's bill received the division's approval and now goes to the full committee.

The division also heard a bill (**HF2491**) sponsored by Rep. Betty Folliard (DFL-Hopkins) that would increase the statute of limitations to six years for all medical malpractice cases.

When the bill came up for a vote, there was a tie, and the bill did not advance.

### Making health care decisions

Rep. Dave Bishop (R-Rochester) told the House Judiciary Committee Jan. 28 why he is sponsoring a bill to rework legislation he helped write dealing with durable power of attorney and living wills.

"I had the unique opportunity as the author of a bill to go to my attorney with estate planning issues and have my own lawyer say, 'You know what? I don't like your durable power of attorney law, and if you don't like

that, find another lawyer," Bishop said, whose bill was approved by the committee.

HF2521 is based on the recommendations of a working group the Minnesota State Bar Association sponsored to review current law on health care decision-making and to suggest ways to make the laws more effective. The group is made up of government officials and representatives from health care organizations, consumer groups, and ethical and religious organizations.

Currently, a patient can create a document that designates the care to be received if he or she cannot communicate those wishes. The document is called a living will. In addition, a patient can name a person as his or her durable power of attorney, which authorizes that person to make health care decisions. The living will and durable power of attorney provisions are contained in two separate statutes.

"What we now have as a result is too confusing, and lawyers are choosing one or the other," Bishop said.

The bill would combine the living will and the durable power of attorney into one document called a health care directive. The bill provides the criteria necessary for a directive to be valid and directs the commissioner of health to appoint an advisory task force to create a uniform health care directive form.

Barbara Blumer, an attorney from the working group, said the convenience of the new language would encourage all people to make decisions about their health care before it is too late.

"Our goal is to give Minnesotans a tool to express their wishes on health care decisions," Blumer said. "This is a bill for young and old Minnesotans; it's a bill for all Minnesotans."

Helen Johnston from the Minnesota Board on Aging testified for the bill. She told the committee that last week a 97-year-old friend of hers was given medical treatment and that there were questions about whether the treatment was consistent with the friend's wishes.

Johnston said if her friend had a health care directive on file with the doctor, the situation could have been avoided.

Jackie Schwiertz, a lobbyist for the Minnesota Citizens Concerned for Life, told the committee that her organization has objections to the bill, especially a provision recognizing living wills from other states. She said if doctor-assisted suicide is made legal in other states, those living will documents may have to be honored in Minnesota.

The bill now moves to the House floor.

## LOCAL GOVERNMENT

### War against mosquitoes

The Metropolitan Mosquito Control District would have to let affected communities know when the agency's soldiers are coming with their pickup trucks and their chemical sprayers to wage war against mosquitoes, under a bill sponsored by Rep. Mindy Greiling (DFL-Roseville).

The bill (HF2320) was considered Jan. 27 by the House Local Government and Metropolitan Affairs Committee. It would require mosquito control to notify the local residents, affected property owners, and local government units before spraying mosquito-killing chemicals.

"The mosquito control district claims that everything they use is very safe," Greiling said. "Over time in history, there have been chemicals that people thought were safe, and we found out they're not so safe."

The bill would require mosquito control to provide a minimum 48-hour notification before an insecticide treatment on public land or water by posting signs.

And the bill would require a minimum 48-hour notice when the spraying will be within 300 feet of farmland or within 1,000 feet of a home. That notification must be made in person or in the form of an information card on the door at each residence.

The bill also would require a notice of seven to 14 days to any city or town where spraying would occur within its limits.

Judy Bellairs, legislative director for the Sierra Club, told the committee of an experience last summer when a spraying truck from mosquito control came into her neighborhood emitting a fine mist which seemed to have an oily smell. No one knew the truck was coming.

"People cannot object if they do not know when their property is being sprayed," she said.

The spray was made up primarily of chemicals that are toxic to fish and other forms of aquatic life, she said.

She also questioned the effects of residue left in the area. "People who are chemically sensitive should know about the spraying," she said, acknowledging that mosquito control has a hotline with updates on spraying.

"People don't know about the hotline," she said.

Some committee members wondered if the bill might become another "unfunded mandate" handed down from the state.

Washington County Commissioner Dave Engstrom said it would, but that that's part of doing business.

"We in local government look at anything as unfunded, but we do them. I think it's really critical to know what kind of environment [homeowners] are getting into," he said.

Joe Sanzone, director of the Metropolitan Mosquito Control District, said the district tries to "conduct a proactive notification program. We are open to change and to improve the way we do it."

The bill, which was laid over, is expected to be taken up again later.

## METRO AFFAIRS

### Trolley for tourists

A plan to promote south Minneapolis neighborhoods with a trolley to transport tourists to the area rolled easily through the House Economic Development and International Trade Committee Jan. 28.

HF2339, sponsored by Rep. Karen Clark (DFL-Mpls), calls for developing a transit system to connect the Minneapolis Convention Center with the Cedar-Riverside, Central, Phillips, Powderhorn, and Whittier neighborhoods in Minneapolis.

"This is a whole undiscovered part of the city that both tourists and residents don't patronize or know about," Clark said. She said the neighborhoods are full of ethnic restaurants and shops but the lack of accessibility keeps tourists away.

"By bringing some of the tourism into south Minneapolis, we generate added revenue for the state," she said.

The bill calls for \$400,000 for planning and operational costs for starting the program and another \$40,000 for promotional costs. Those funds would be expected to be matched by sources such as the city of Minneapolis, Hennepin County, and private businesses. A separate bill requests bonding for buying the buses.

The project is slated to include regular routes between the convention center and other areas, as well as chartered routes.

"This is a good investment in our economic development and in our inner city," Clark said. "It's the first attempt to develop inner-city tourism in Minneapolis."

Several lawmakers at the hearing said they used to live or work in some of the neighborhoods in question and are in favor of development efforts.

"I always got the feeling that this was one of those neighborhoods that could just tip either way," said Rep. Carlos Mariani (DFL-St. Paul), who used to work in south Minneapolis.

The bill now moves to the committee's Economic Development Finance Division.

# Homeowners, renters collect on budget windfall

By Nicole Wood

In an effort to return some of the state's budget surplus — then projected at a hefty \$2.3 billion — to homeowners and renters, the 1997 Legislature authorized a one-time property tax rebate.

Now it's time to collect on the budget windfall, but questions about eligibility and filing procedures abound.

To qualify for the rebate, homeowners must have paid 1997 property taxes on a homestead that was their principal residence. The taxes may have been paid directly, indirectly through an escrow arrangement with a mortgage lender, or under a purchase agreement for the property.

Likewise, renters must have paid rent in 1997 on a dwelling that was their principal residence.

The rebate amounts to 20 percent of property taxes paid for homeowners. Renters will be able to get a rebate of 3.6 percent of the rent they paid in 1997. That's about 20 percent of the estimated portion of rent that pays property taxes, according to the Minnesota Department of Revenue.

There is no dollar cap on the rebate, and its availability does not depend on income. Here's the tricky part: Although it is a *property* tax rebate, it must be claimed on the 1997 state *income* tax returns filed in 1998. The rebate is essentially a refundable credit against the state income tax.

The revenue department estimates that the rebate will cost the state \$500 million. Average individual rebates are expected to be \$300 for homeowners and \$175 for renters.

To collect the rebate, homeowners and renters — even those who are normally exempt from filing income taxes — must file Minnesota's individual income tax Form M-1.

In an attempt to make Form M-1's rebate section easy to identify, the companion booklets to Form M-1 have been updated with the slogan "Look for the Frog."

The revenue department has added a smiling frog symbol on Form M-1 that clearly marks the rebate section. It's a play on words that only an accountant could love. Get it? A frog says "rebate, rebate."

Homeowners will need their property tax statements issued by counties in 1997. A copy of the statement will have to be attached to the tax form to receive the rebate.

Landlords must supply renters with the documentation they will need to claim the rebate. The paperwork should be in the hands of renters before the end of January.

A rebate schedule on the back of the form details eligibility requirements. Many college students will be disappointed to read the fine print; renters who are listed as dependents on another person's income tax return do not qualify for the rebate.

At the moment, those who prepaid their 1997 property taxes in 1996 do not qualify, either. The law states that the rebate is based on a "percent of qualified property tax paid in calendar year 1997."

However, things could change for those who prepaid in 1996. The House Taxes Committee has approved a bill, **HF2294**, that would grant the rebate to early birds, too. The bill is headed for a vote on the House floor.

In the past, income tax refunds took anywhere from three weeks to two months to receive, depending upon when they were filed.

This year, the revenue department predicts that refunds may take twice as long — up to four months — because they expect to process

an additional 600,000 refunds more than the 1.2 million refunds handled last year.

It's a good idea to file early, and it's an even better idea to do so electronically. By electronic filing, the figures are automatically transferred

to the department's computer system, saving tedious data entry time and accelerating the rate of return.

In fact, electronic filers who arrange for direct deposit can expect a refund within 10 days.

For more information, contact the Department of Revenue Taxpayer Hotline at 296-3781 (Metro) or 1-800-652-9094 (Greater Minnesota), or to catch a bright green animated version of the rebate frog in action, visit the department's web page: [www.taxes.state.mn.us](http://www.taxes.state.mn.us). 

## How to do the paperwork for your property tax rebate

The property tax rebate approved by lawmakers will return an average of \$300 to homeowners and \$175 to renters. Here are some hints for completing the paperwork necessary to get the money.

Homeowners will find the qualifying amount of property taxes paid indicated on Line 1 of the 1997 property tax statement issued by counties last year. Homeowners who have misplaced the statement should call their county treasurer's office for a new copy. Property tax statement stubs and Truth in Taxation statements are not acceptable substitutes.

To calculate the rebate, homeowners should multiply the figure on Line 1 of the property tax statement by 20 percent.

Renters will get the paperwork they need from their landlord. Landlords must present renters with two copies of a 1997 Certificate of Rent Paid (CRP) no later than January 31, 1998. Line 1 of the CRP indicates the total amount of rent paid last year. To calculate the rebate, renters should multiply the figure on Line 1 of the CRP by 3.6 percent.

Why 3.6 percent and not 20 percent? For renters, the rebate equals 20 percent of "rent constituting property taxes," or the portion of rent that covers property taxes.

After calculating the rebate amount, there are three easy steps to complete the rebate section of Form M-1:

- 1) Check the homeowner or renter box on Line 14 (Look for the frog!)
- 2) Fill in the rebate amount on Line 14.
- 3) Attach a copy of your property tax statement or CRP.

The Department of Revenue expects to receive an additional 230,000 forms from people who are seeking the rebate but who don't qualify to file income taxes. People in that situation should write, "Do not meet filing requirements - rebate only," at the top of Form M-1, fill their name, address, and social security number, write in "0" for the amount of federal taxable income on Line 1, and complete the rebate section on Line 14.

The Minnesota Department of Revenue has added this frog symbol to the M-1 income tax form to mark the rebate section.

# Early Taft visit inspires Erickson's political career

By Nicole Wood

Newly elected Rep. Sondra Erickson (R-Princeton) has been a Republican since she was 10 years old growing up in Taft, N.D.

Her political awakening occurred in 1952 when the late President William Taft's son, U.S. Sen. Robert Taft, came through town. The younger Taft was seeking the GOP nomination for president, and he had vowed to visit every town named Taft in the country. Erickson's Taft was the smallest — population seven, with one sibling on the way.

Dwight Eisenhower got the nod from the Republican Party and went on to win the presidential election that year, but Taft's visit had a lasting effect on Erickson.

"That was my first real knowledge that there was a political process," she said. "My parents had already been proclaiming themselves Republicans, but it was my introduction to politics."

Erickson maintained her ties to the Republican Party when she grew up and moved to Princeton, Minn. Her first real campaign work, she said, was for John Zwach's congressional campaign in the 1960s. Zwach happens to be the father of one of Erickson's new House colleagues, Rep. Barb Sykora (R-Excelsior).

More recently, Erickson managed all four of former state Rep. LeRoy Koppendray's House campaigns.

"The experience of running his campaigns was absolutely essential," she said. "It paid off."

Rep.  
Sondra Erickson

Erickson is quick to credit her predecessor and the supporters they had gathered over the years for their assistance in what was a whirlwind campaign — she had less than a month to get organized and to campaign before the Jan. 6 special election.

"I spent my holiday door knocking," Erickson said.

The decision to run for the District 17A House seat was by no means an easy one, Erickson said, because of her commitment to Princeton High School, where she teaches English, advises the school newspaper, and oversees the yearbook staff.

She has taken a leave of absence, she said, but with so many responsibilities, it has been difficult for her to wrap up things at the high school.

"It has been my life to teach, and I love it," she said. "I teach with a passion."

Rep. Erickson brings this enthusiasm for teaching to the House Education Committee, where she hopes to continue down the path toward increased accountability and emphasis on outcomes.

"It's so important, having been in the classroom for 30 years, that we all know, whether we're teachers, parents, or communities, that our children are learning something that they can take with them in life," she said. "The community at large has found out in employing and further educating our students that they are not at the standard they expect. Thus, we started this reformation."

Erickson's legislative agenda isn't limited to education. She also serves on the Regulated Industries and Energy Committee and the Economic Development and International

Trade Committee and its Housing and Housing Finance Division.

In language typical of a teacher, Erickson said she did her "homework" immediately after the election, and already she is sponsoring several bills. She hopes to address other key legislative topics, such as animal feedlots, soon.

Erickson adamantly opposes a proposed moratorium on feedlots in the state.

"I don't want to see the family farmer face another roadblock," she said.

She also has definite ideas about what to do with the state's projected \$1.3 billion budget surplus.

"I would like to see the surplus given back to the people," she said. "That means property tax reform and possible income tax reform."

Erickson said she comes from a "property poor" district.

"Property tax reform is major in District 17A because we have little to no industry, a low tax base, and a lot of land that is tax-free because it is a reservation," she said. "I would hope that eventually the Legislature would understand that there are some districts that face that dilemma."

## District 17A

**1995 population:** 35,100  
**Largest city:** Princeton  
**Counties:** Kanabec, Mille Lacs, Morrison  
**Location:** east-central Minnesota  
**Top concern:** "To continue to promote quality education in Minnesota that has accountability."  
 — Rep. Sondra Erickson

# Jennifer James: 'Our favorite stories have grown stale'

By Sandy Donovan

Everybody loves a good story.

But the trouble with stories, says cultural anthropologist Jennifer James, is that too many of us don't recognize when our favorite ones have grown stale.

"Fetal Alcohol Syndrome is a prime example," James

told a group of lawmakers at the Minnesota History Center Jan. 28. "It took such a long time for people to even see that story. Most of us have walked by alcohol for our whole lives, but despite all the evidence, we were unwilling to believe it could be as damaging as marijuana [or] cocaine."

The reason, she said, is that people were too comfortable with the old story of alcohol as a relatively safe drug.

"It's not the evidence or the data that makes a difference, but how long we've been telling ourselves the story," she said. "There's nothing more painful than having your story invalidated."

James was addressing legislators and their staff as the second of two speakers in this year's Capitol Forum Series, sponsored by the McKnight Foundation and Minnesota Technology Inc.

She is a Seattle-based lecturer, writer, commentator, and former professor of psychiatry. Her books include *Thinking in the Future Tense* and *Success is the Quality of Your Journey*.

Her message to lawmakers was clear: Those who get stuck clinging to the parameters of old stories will be left in the dust.

"The key way to have influence is to be able to tell a compelling new story about the way things are or should be," she advised.

It's the speed at which society is changing that makes the invention of those new stories so difficult, she said.

One of the more compelling stories this decade, according to James, is welfare reform.

"Under the guise of welfare reform we have one of the most compassionate moves our society has made," she said. "Liberals are going crazy because the story they've been telling forever is changing."

But changing the welfare system, she insists, is a giant step forward.

"We finally understand in this increasingly sophisticated world that it is unacceptable to buy off a portion of society and move them to the side," she said. "We finally have to say that we do want these people in our society."

But while she praised the instigators of welfare reform as visionaries, she said there are many times in government when legislators need to stand back while the story writes itself.

In Minnesota, she said, the current proposal for hunting and fishing rights falls under that category.

"Give them the constitutional amendment to protect hunting," she said. "But understand that in the long run it doesn't matter — that story is already written."

"We've had far too many bunny books influencing the kids. Fourteen percent of adolescents claim to be vegetarian. Hunting is not in the future."

Having grown up on a farm and lived most of her life in a hunting and logging state, James says she's sympathetic to those interests, but, "the writing is on the wall."

"You can make far more money by protecting the environment than by not [protecting it]," she said. "In Washington, we lose federal

money every year for logging, which we continue in order to keep people employed.

"But at what time do you start to follow the new story?" she asked.

Lawmakers said they were particularly impressed with James, who spoke as part of the same series here last year, because she included so many Minnesota-specific topics in her talk.

However, she said she couldn't resist sharing her views on the recent, widely publicized news involving President Clinton.

"Of course we know the story we're all thinking about this week," she said. "It's really too soon for an anthropologist to talk about it, but heck, that'll never stop me."

She said polls showing that women overwhelmingly support Clinton this week indicate that gender is rewriting its own story.

"Women have increasingly less support for stupid women, for women who are unwilling to use their education, unwilling to do the decent thing," she said. "Women [are] waking up another notch."

James said that in the long run the story about Monica Lewinsky and Clinton won't have anything to do with character.

"Nobody really cares if he did it or not," she said.

But she did draw some chuckles from the audience for her opinion on the matter.

"It's probably true, and I say that only because she's his type — big hair and obviously not too bright," she said. "But the real story to come out of this will be that you can't have a private investigator pursuing your president."

She left the audience with some thoughts on how the story of lawmakers is being rewritten.

"The ways we divide politicians are becoming increasingly ineffective," she said, using herself as an example of the new constituent: fiscally conservative, but socially liberal.

She said leaders are having to address these new constituents.

"We're looking at a public that's going to make it increasingly difficult to hold leadership positions for a long time if there's no substance," she said.

At a reception following the talk, lawmakers said they found the evening inspirational.

"She really does stretch us and make us think," Rep. Gail Skare (DFL-Bemidji) said. "Unfortunately, sometimes it doesn't take long for us to slip back into the old routine." 

Dr. Jennifer James, cultural anthropologist, presents her perspectives on public policy issues. James lectured at the Minnesota History Center Jan. 28 as part of the 1998 Capitol Forum Series.

# Bill Introductions

HF2647-HF2999

## Monday, January 26

**HF2647—Tomassoni (DFL)**  
Environment & Natural Resources  
Environment and natural resources trust fund grants to local governments provided for upgrading individual sewage treatment systems and wells.

**HF2648—Tomassoni (DFL)**  
Economic Development & International Trade  
Taconite mining program appropriated money.

**HF2649—Wejcman (DFL)**  
Health & Human Services  
Office of health care consumer assistance, advocacy, and information created, health maintenance organization enrollee complaint system modified, informal complaint resolution process establishment date extended, and money appropriated.

**HF2650—Jennings (DFL)**  
Taxes  
Sales and use tax capital equipment definition expanded to include central office and transmission equipment used for telephone service.

**HF2651—Greenfield (DFL)**  
Health & Human Services  
Housing with services establishments licensing requirements modified.

**HF2652—Opatz (DFL)**  
Education

HF3000-HF3088 were not available at press time.

During a Jan. 23 meeting of the Higher Education Finance Division of the House Education Committee, Rep. Steve Dehler (R-St. Joseph) questioned an item in the governor's bonding proposal calling for money for a women's athletic field at the University of Minnesota.

"I think we're going down the wrong track when we assign a men's soccer field or a women's soccer field," Dehler said. "There shouldn't be titles on a men's facility or a women's facility. We do that with bathrooms. 'Is there a difference between a men's soccer field and a women's soccer field?' he asked.

Rep. Betty Folliard (DFL-Hopkins) answered, "It's pink."

Rep. Gene Pelowski (DFL-Winona), committee chair, noted for the record that a female had uttered the sarcastic response.

A heavy hitter was on hand Jan. 28 when light rail transit was discussed by the House Transportation and Transit Committee.

Former Minnesota Viking safety Paul Krause, now a Dakota County commissioner, attended the meeting. He is also a member of the Light Rail Transit Joint Powers Board. Krause played for the Vikings from 1968-1979.

A week earlier, Krause received the highest honor a former National Football League player can get. The league's career leader in interceptions with 81, he was voted into the Pro Football Hall of Fame in Canton, Ohio.

Morrie Anderson, chancellor of the Minnesota State College and University System, began the Jan. 28 meeting of the Higher Education Finance Division of the House Education Committee by congratulating the chair.

Anderson told Rep. Gene Pelowski (DFL-Winona), who is rather strict about starting hearings on time, that "House time is much better than Senate time."

"Chancellor," Pelowski said, "I think you'll find the House bills are much better, too."

10 State Office Building  
Chr. Rep. Gene Pelowski  
**Agenda:** Continuation of a.m. agenda.

**1 p.m.**

#### **Regent Candidate Advisory Council**

400N State Office Building  
**Agenda:** Report on status and plans of the University of Minnesota Board of Regents, William E. Hogan, II, chair, Board of Regents. Discussion of regent candidate recruitment strategies in 1998, Nedra Wicks. Discussion of RCAC document revisions for 1998-99.

**2 p.m.**

#### **Legislative Commission on Pensions and Retirement**

112 Capitol Building  
Chr. Sen. Steven Morse  
**Agenda:** To be announced.

## 'Cyber-employment' in Minnesota

*It's a fact!*

Minnesota is the "cyber-employment" leader in its seven-state region, and the state's high-tech workers earn about 50 percent more than their

lower-tech counterparts, according to a recent report by the American Electronics Association.

But that's not to say that high-tech workers in Minnesota are on top of the employment barrel: The same report shows that the wages earned by the state's high-tech employees ranked only 22nd in the nation.

The report by the country's largest high-tech trade association tracks the industry's rates of employment, salaries, and exports by state from 1990 to 1995 by using federal labor statistics.

According to the report, 55 of every 1,000 private-sector employees in the Minnesota were working in a high-tech field in 1995. Only five states had a higher ratio (California, Colorado, Massachusetts, New Hampshire, and New Jersey).

While Minnesota's total population is 20th nationwide, the state came in 13th for the number of workers employed by high-tech firms.

Computer developing, manufacturing, and servicing accounted for almost one-half of Minnesota's 109,000 high-tech jobs in 1995, while the others were mostly in telecommunications, industrial electronics, and electronic-component manufacturing for companies such as Honeywell and 3M.

On average, Minnesota high-tech workers earned \$42,618 in 1995 — far more than the statewide average salary of \$27,050. But in several other states, salaries for high-tech workers compared even more favorably with wages for the rest of the workforce, leaving the Minnesota with a rank of 22nd for high-tech salaries.

However, Minnesota did rank high — 13th — for its amount of high-tech exports. In 1995, a full 53 percent of the state's total exports were defined as high-tech. That amounted to \$4.6 billion in exports.
