Restructuring funding
Pair of bills would alter the way that local government aid is allocated to Minnesota cities

By Miranda Bryant
The system by which the state gives money to cities and counties for the provision of government services needs a major overhaul, according to top-level officials, including the governor himself.

A short-term fix has been proposed in Gov. Tim Pawlenty’s 2004-05 budget, which includes a deep $1.16 billion cut in state aid. And while cities and counties continue to assess how the reduction would alter services provided to residents, two bills presented March 4 would create a longer-term solution.

Local government aid has two purposes: to reduce property taxes, and to bring equity to communities by providing state money for services, including police and fire, road maintenance, and administration.

Advocates say local government aid is critical to communities with low population growth and low property values, as well as for large urban cities with ever-growing needs. But critics say local government aid is flawed because it distributes money based on previous spending habits. Indeed, part of the complicated funding formula guarantees cities their 1993 state allocation.

The history of local government aid can be traced to a 1971 property tax reform measure called the “Minnesota Miracle,” ushered in by Gov. Wendell Anderson, that relieved local property taxes of much of K-12 education funding. Likewise, local government aid also aims to keep property taxes in check by distributing state sales and income taxes to needy cities.

While the program began with provisions for cities, counties, towns, and special taxing districts, today only cities receive local government aid. Counties continue to receive state money, but since 1991 the funds have been targeted for specific mandated programs, including Family Preservation Aid and County Criminal Justice Aid.

So exactly how is an individual city’s aid allocation determined?

A two-part formula considered the “grandfathered” 1993 aid appropriation, and a city’s “need” and its “ability to pay.” The formula for determining need considers population, population decline, housing built before 1940, and commercial and industrial property values.

In 2002, $565 million was distributed to cities. Many recipients rely heavily on the aid, including Albert Lea, Duluth, Willmar, St. Paul, and Minneapolis. And some get no aid, such as Edina, while others receive minimal amounts, such as Twin Cities suburbs Eagan, Woodbury, Shoreview, Plymouth, Mendota Heights, and Chanhassen.

Property taxes and local government aid are the two biggest revenue sources for most of the state’s 850-plus cities.

HF172 and HF593 deal exclusively with city aid formulas and do not address county funding. Both were presented by Rep. Ann Lenczewski (DFL-Bloomington) to the House Taxes Committee March 4. No action was taken, but both bills may be included in the committee’s larger omnibus tax bill, according to Rep. Ron Abrams, (R-Minnetonka), the committee chair and a co-sponsor on both bills.

HF172 would gradually remove the 1993 grandfathered amount from the formula — which is the most contentious portion — and replace it dollar-for-dollar with the “needs” vs. “ability to pay” component.

The most any one city stands to lose under HF172 is 3 percent annually of local government aid, Lenczewski said. However, some cities would eventually lose all state aid if the new formula finds a city doesn’t need it.

Abrams said the bill appears to redistribute money from suburban and non-metro regional areas to smaller cities.

Lenczewski responded by asking members to focus on the bill’s policy and not on the amount their community would lose or gain.

The bill, she said, would do away with two things: the argument that local government aid is unfairly allocated based on previous spending habits and not on need; and interest on the part of legislators and governors in tampering with the formula to make it fairer.

“We have a lot of members across the state who are in similarly situated cities where one gets a lot of aid and one doesn’t and they can’t really explain why,” Lenczewski said.

She added, “I know this bill is threatening, but I think it’s the right thing to do.”

The bill, which has been introduced in prior years by both Republicans and DFL members, was enacted into law as part of a 1993 local government aid reform package, but was repealed in 1994 before it took effect.

HF593 is probably more controversial, Lenczewski said.

It would add to a city’s tax base the monetary amount a city gives up by dedicating property taxes under tax increment financing to improvements in the TIF zone. Adding this amount to the formula

Lawmakers are grappling with proposed changes to the state’s local government aid system, which cities use for such services as public safety. Gov. Tim Pawlenty and State Auditor Patricia Awada have recommended large cuts in aid to cities to help balance the budget for 2004-05.
would show that the given city has a greater ability to pay for its own government services, thereby reducing its need for state aid.

Tax increment financing is a development tool that allows the additional property taxes generated by a new or improved development to be used to pay for the costs of the development if the city finds that the development would not occur without such assistance. Thus, the added property taxes generated from a development could pay for land acquisition, site preparation or other development costs as opposed to general government services.

Lenczewski said that cities voluntarily engage tax increment financing, and should not be able to argue for more state aid as a result. “A municipality is voluntarily choosing to divert revenue when it decides — and no one can make them do this — to create the tax increment finance district,” she said.

Abrams put it another way. A city could allow a department store to pay for its development costs under tax increment financing. Under current law, the city can then declare a larger need for state aid and a lesser ability to pay for its own governmental services — even if the property taxes it’s diverting provide for installation of marble floors in that department store.

But Rep. Morrie Lanning (R-Moorhead) said that in 28 years of city government service he never heard of a city intentionally using tax increment financing to claim a larger need for state aid. If the issue is truly tax increment financing, then that matter should be addressed separately, he added.

Lenczewski argued, however, that the matters are intertwined in legislation. Some cities, she added, are not receiving aid they deserve because other areas have utilized tax increment financing. And some cities receive no aid, such as Edina, even though its taxpayers’ money contributes to the larger state aid program.

“It’s easy to say there’s a drug out there and the state’s addicted to it and if everybody’s gonna have it well give me some, too,” Lenczewski said.

Neither bill has a Senate companion.

Pawlenty’s proposal would cut city aid by 29 percent, or $435 million, leaving a $722.8 million appropriation. His cuts did not go as far as the 43 percent city aid reduction recommended by State Auditor Patricia A. Awada to cities with populations larger than 2,500.

A multitalented Minnesotan

Miller served the state on the front lines, in the State Capitol, and elsewhere

The names Sibley and Ramsey dominate historical accounts of the state’s early days and receive much of the acclaim for the success of the state in its early days. And Ramsey can be partially credited for the impact of another early governor: Stephen M. Miller.

Miller served as the state’s chief executive from 1864 to 1866 — during the trying times of the Civil War and the American Indian conflicts in the state. He originally came from Pennsylvania, on the advice of his friend Alexander Ramsey who touted the positive effects the climate of Minnesota would have on Miller’s health.

Miller spent more than half of his life in Pennsylvania, primarily near Harrisburg, where he added Miller, merchant, editor, and county and state official to his list of credentials.

He moved to Minnesota and settled near St. Cloud in 1858, where he set up an mercantile. His political activism that began as editor of the Whip newspaper, the Telegraph, in Pennsylvania continued and in 1860 he was selected as a delegate to the Chicago convention for the newly formed national Republican Party. Miller was a strong supporter of Abraham Lincoln.

When the Civil War broke out in 1861, Miller and his son, Wesley, enlisted in the U.S. Army. Miller, 45, had no prior military experience, yet within a month of his enlistment he was appointed as lieutenant colonel of the First Minnesota Regiment of Volunteers, known for its willingness to support the Union’s efforts in the war. Wesley would ultimately die among the thousands at Gettysburg.

“Colonel Miller seemed instinctively to grasp tactical matters and his personal bravery was never called into question,” wrote future governor Joseph A.A. Burnquist. That bravery and resolve would be tested in December 1862.

Miller left the First Minnesota to accept the commission as colonel of the Seventh Regiment. An injury after a fall from a horse left him in charge of military camps in south-central Minnesota during the contentious days of the Dakota wars.

An incident on Dec. 4, 1862 forced Miller into what Burnquist called “a particularly difficult and delicate task.” While stationed at Camp Lincoln, near Mankato, Miller was guarding about 300 Sioux Indians who had been condemned to death for war crimes. In one of many instances, a group of enraged settlers attacked the camp with the intentions of killing the Indian prisoners.

Wrote Burnquist, “Though in sympathy with the public sentiment against the Sioux murderers, Colonel Miller pledged to oppose mob law, and did so firmly.”

President Lincoln would ultimately grant clemency to 265 of the Sioux, though 38 others were hung after Christmas that year in the largest mass execution in U.S. history. Miller was promoted again, this time to brigadier general in late 1863, but resigned a short time later after being elected governor.

He was described as a plain and practical governor, and during his early days he drew attention to the financial plights of soldiers and their families. “His administration of a single term of two years was mainly devoted to closing Minnesota’s connection with the various interests growing out of the Civil War,” wrote Burnquist.

Minnesota ratified the 13th Amendment abolishing slavery under Miller’s administration. And he also proposed that the state begin using development advances, such as gas lights in the State Capitol.

After leaving the governor’s office, Miller worked first for the Minnesota Gold Mining Company and then took a job as a superintendent for the St. Paul and Sioux City Railroad Company. In 1873, he was elected to the Minnesota House where he served one term.

In the last few years of his life, he lived in the southwest Minnesota communities of Winnow and Worthington. Some accounts suggest his final years were lonely and economically poor ones for Miller. At age 65, he succumbed to gangrene, which had started in his left foot.

the study raising health concerns regardless of
Finance Committee, said she was troubled by
House Agriculture and Rural Development
Al

Regulated by state law for several decades,
 lots, buildings, or a combination of the
two, are for breeding and raising livestock.
Regulated by state law for several decades,
feedlots are in confined areas and include
manure basins for the drainage of animal
waste.

Although no specific examples were cited,
Rep. Elaine Harder (R-Jackson), chair of the
House Agriculture and Rural Development
Finance Committee, said she was troubled by
the study raising health concerns regardless of
a feedlot’s size. She said the study expressed “a
bias about living with livestock.” Johnson said
feedlot management, “not the size,” determines
its impact on environmental quality.

A number of committee members ques-
tioned Johnson and Gregg Downing, a re-
search coordinator for the board, about citizen
petitions that have halted some farm feedlot
expansions in recent years.

State environmental law allows 25 individu-
als from anywhere to sign a petition and raise
potential environmental concerns regarding
feedlots. Farmers and farm organizations have
complained to the committee that the petitions
provide an easy way for environmental groups
to block feedlots. Downing said four out of ev-
ery five citizen petitions requesting environmen-
tal assessment worksheets are denied by the
board. The study did not address that issue.

Feedlot impacts on air, water, and soil qual-
ity have been a longtime environmental con-
cern since large farm operations have become
dominant in agriculture during the last 25 to
30 years. Within the last 10 years, the state has
lost “more than 6,000 farms,” Johnson said.
“We have fewer farms and they’re becoming
larger.”

Besides health and environmental impacts
of feedlots, the study includes extensive sum-
maries on agriculture economics, government’s
role, soil, water quality and land
use issues, as well as social and community
concerns.

A 25-member citizens advisory committee,
appointed by the board, provided oversight of
the study and made 77 policy recommenda-
tions, including the 12 priority items.

Responding to possible cuts

Two semi-autonomous state agencies and
a horticulture society that traces state fund-
support back to 1873 face major changes,
under the Pawlenty administration’s proposed
2004-05 biennium budget.

Representatives of the Minnesota Board of
Animal Health, the Agricultural Utilization
Research Institute, and the Minnesota State
Horticulture Society testified March 4 before
the House Agriculture and Rural Development
Finance Committee.

Gov. Tim Pawlenty recommends cutting the
institute’s two-year budget by $5 million, trim-
ing the animal health board by $800,000,
and eliminating state funding for the horti-
culture society. He also proposes that the ani-
mal health board and the institute become part
of the Agriculture Department effective
July 1, 2003.

The committee took no action on the
 governor’s budget recommendations.

William Hartmann, state veterinarian and
executive director of the animal health board,
said the 28-employee agency’s $5.6 million
budget was cut $329,000 by the governor dur-
ing the current fiscal year and faces an addi-
tional 14 percent cut for 2004-05. The board
monitors state livestock herds for disease, con-
ducts research and lab tests, and advises ani-
mal owners on disease prevention.

Hartmann is currently appointed each year
by a five-member advisory board made up of
three livestock producers and two veterin-
arians, all appointed by the governor. If the ani-
mal health board becomes part of the
Agriculture Department, the agriculture com-
missioner would appoint the director.

The 1,500-member Minnesota Veterinary
Medical Association opposes the proposed
consolidation.

Ben Pomeroy, chair of the group’s govern-
mental affairs committee, urged agriculture
committee members to oppose the governor’s
proposal, saying it would “destroy the inde-
pendent status and effectiveness of the (ani-
mal health) board.”

“When change our effective program for an
unknown?” Pomeroy said.

Institute Executive Director Edgar Olson
said the proposed 67 percent cut to the non-
profit organization’s budget would render it
“non-functional.”

Created in 1987 by the Legislature, the insti-
tute conducts research and training for
small and medium-sized, agriculture-related
companies to help them develop value-added
products, like the renewable fuel biodiesel and
soy plastics. Olson said the group has projects
in 73 of the state’s 87 counties.

Perry Aasness, assistant agriculture com-
missioner, said the department would exam-
ine the institute’s core functions should the
agency be merged with the department. “We
don’t know what it would look like in the end,”
he said.

Members of the state Horticulture Society had
been expecting $164,000 from the state for fis-
ca l years 2004-05, and said that eliminating the an-
 nual state subsidy the group has received for
130 years might trigger cuts in education pro-
grams to rural Minnesota, fewer issues of the
group’s magazine or elimination of children’s
programs. The group has 20,000 dues-paying
members and publishes Northern Gardener,
which generates advertising revenue.

BUSINESS

Chinese competition

Manufacturers in Greater Minnesota are
facing increased competition from China. Yet
most do not fully understand the degree to
which China has made technological improve-
ments to compete in a global economy.

Such are results of a recently completed
study by Minnesota Technology Inc., a manu-
facturing and technology economic develop-
ment group funded partially by the state.

The report was discussed March 5 at a meeting
of the tourism division of the House Commerce,
Jobs, and Economic Development Policy
Committee.

Specifically, the study found that companies
surveyed believed China was realizing
manufacturing gains simply because of a cheap labor pool. They indicated that China could not produce high-quality goods, and that the country's level of technology was inferior to theirs.

In addition, many Greater Minnesota manufacturers stated that they could address some of these competitive pressures through sales and marketing measures.

Such beliefs are seriously in error, indicated Minnesota Technology President Jacques Koppel.

There is, he said, “increasing recognition that the Chinese government, as well as companies setting up businesses in China are investing heavily in technology and building state-of-the-art manufacturing facilities.”

To compete, Minnesota manufacturers must develop new business strategies, such as developing propriety products and higher-tech processes.

For example, said Koppel, northwest Minnesota is the only area served by Minnesota Technology that has seen a slight increase in manufacturing employment, and that increase is only 0.5 percent. Koppel said this is due to companies like Arctic Cat recreational vehicles and Marvin Windows and Doors that own proprietary rights to their products.

Specifically, the survey found that 52 percent of manufacturing companies surveyed are facing Chinese competition. Thirty percent said that Chinese competition would hurt them, with the average business loss at 20 percent in 2003 and increasing to 35 percent in three to five years. And, 36 percent said tax breaks and tariffs are necessary to address competition.

The Minnesota manufacturing industry lost 38,000 jobs between its peak employment in August 2000 and August 2002. Losses came largely in industrial machinery and equipment, electronic equipment, printing and publishing, and air transportation.

The committee did not act on the report.

CHILDREN

Keeping children safe

Efforts to reduce child abuse and neglect would be hit hard under the governor's proposed cuts to county aid, according to those testifying Feb. 27 before the House Taxes Committee.

Under a state aid program, counties receive funds for certain mandated programs, including the Family Preservation Act and out-of-home placements. Family preservation aid aims to reduce the increased costs associated with removing children from their homes by helping those families function better. When that fails, out-of-home placements are ordered.

The volume of out-of-home placements is unpredictable, making it difficult for counties to anticipate the number that will arise in a given year and the related cost. According to Jim Mulder, executive director of the Association of Minnesota Counties, counties spent $180 million in 2002 on such placements.

Under Gov. Tim Pawlenty's proposed 2004-05 budget, a change in county aid funding formulas would eliminate the Family Preservation Act and out-of-home placement program in 2005. The former represents $24 million; the latter, $53 million, said Jim Koppel, director of the Minnesota Children's Defense Fund, a nonprofit organization devoted to children and working families.

The sum of these two cuts, Koppel said, represents 43 percent of the reductions counties would experience in state aid.

"Our concern is that while a lot of these programs are run out of the Department of Human Services, they end up really hitting the ground at the county level," Koppel said.

Every year about 11,000 children in Minnesota are reported as victims of abuse. And about 20,000 are removed from their homes, he added.

"This is going to strain local budgets and it's going to compromise those programs, and it's a compromise we can't afford," Koppel said.

"We've never really gotten our arms around, in Minnesota, the whole issue of child abuse and neglect."

Pawlenty's proposal would reduce county aid by 20 percent. Individually, counties would realize cuts averaging 1.6 percent of total revenues in calendar year 2003, and 2.8 percent in 2004. Total aid to counties would total $722.8 million in the next biennium, a reduction of $180 million in 2002 on such placements.

Koppel said the effect on children is broader when cuts to the state Health and Human Services budget are considered.

Helping through work

Youth who've obtained jobs and avoided lives of crime packed a hearing room March 4 to advise against budget cuts to four state-funded youth employment, intervention, and jobs skills programs.

Gov. Tim Pawlenty's 2004-05 proposed budget contains $3.7 million in budget cuts to the programs. Participants in the programs of Minnesota Youth, Earn While You Learn, Youth Intervention, and the Minnesota Youthbuild Coalition testified before the House Jobs and Economic Development Finance Committee. They indicated more youth would be left to lives without direction if budget cuts were realized.

"The streets recruit very hard," said Kevin Dildy, who works with youth in South Minneapolis through MInnesota Youth Program. Added participant Jennifer Robertson, "It turned my life around. It got me on track.

The governor's budget would chop $2.5 million from Minnesota Youth Program, leaving it with a base budget for 2004-05 of $10.8 million. Cuts to other programs include:

- Youthbuild: $394,000 cut, leaving $10.8 million.
- Youth Intervention: $780,000 cut, leaving $2.5 million base budget; and
- Earn While You Learn: $110,000 cut, leaving a $366,000 base budget.

Minnesota Youth provides economically disadvantaged and at-risk youth with employment and training services year-round. It works in all 87 Minnesota counties with participants ranging from 14 to 21. In 2002, about 5,039 youth were placed in jobs. Eighty percent of participants increased their reading and math skills, and 50 percent received academic credit.

Youth Intervention consists of community-based programs throughout the state that keep troubled youth living with their families and out of more costly correctional institutions, foster homes, and residential treatment facilities. An average of 21,000 youth participate annually.

Of the participants in 2001, 83 percent referred for truant behavior had improved their school attendance record. An additional 89 percent referred for illegal activities had no further involvement with the juvenile justice system six months after program completion.

Minnesota Youthbuild has nine programs throughout the state with participants building and rehabilitating low-income housing for communities. In the process, said spokeswoman Joyce Eissinger, they work toward a
high school diploma or GED certificate and learn technical skills, work behavior, and the importance of civic engagement.

In 2002, participants constructed or renovated 150 units of low-income housing throughout the state, benefiting 401 homeowners and tenants and 195 homeless people.

Tina Sweatt, representing the Beltrami and Cass counties chapter, said Youthbuild is crucial in what are two of the poorest counties in the state.

“Rural kids need this program — there is virtually nothing else,” Sweatt said.

The committee took no action on the budget proposals at the meeting.

CRIME

Handling proposed cuts

Minneapolis Department of Corrections officials said that despite rapidly increasing prison populations, their agency will be able to absorb the cuts proposed by Gov. Tim Pawlenty for the upcoming biennium.

Under the governor’s proposal, the department budget would be reduced by $56.4 million. Most of that money will come from its operating budget and cuts in grants to local organizations. About $19 million would come from housing short-term offenders in county jails and double-bunking cells at some prison facilities.

Corrections Commissioner Joan Fabian told the House Judiciary Policy and Finance Committee March 5 that Minnesota’s correctional program and its budget “would be reduced by $56.4 million. Most of that money will come from its operating budget and cuts in grants to local organizations. About $19 million would come from housing short-term offenders. The amount of money that comes from this department’s budget is $144.3 million.”

Correctional Commissioner Joan Fabian told the House Judiciary Policy and Finance Committee March 5 that Minnesota’s correctional program and its budget “would be reduced by $56.4 million. Most of that money will come from its operating budget and cuts in grants to local organizations. About $19 million would come from housing short-term offenders.”

Tina Sweatt, representing the Beltrami and Cass counties chapter, said Youthbuild is crucial in what are two of the poorest counties in the state.

“Rural kids need this program — there is virtually nothing else,” Sweatt said.

The committee took no action on the budget proposals at the meeting.

DEVELOPMENT

Tax-free zones

Calling it the most important piece of legislation the committee will deal with this year, the House Jobs and Economic Development Finance Committee approved a tax-free zone bill March 4 designed to give rural Minnesota a shot in the arm.

Sponsored by Rep. Doug Magnus (R-Slayton), HF3 now moves to the House Taxes Committee.

The bill would allow the state to designate 10 business zones of up to 5,000 acres each and five agricultural zones throughout Greater Minnesota in which businesses would be free of most taxes for up to 12 years. The idea is to stimulate economic development by creating high-paying jobs beyond the Twin Cities metropolitan area.

We’ve gotta do something to make some changes here,” Magnus said, referencing growing income and population disparities between Greater Minnesota and the metropolitan area.

Under similar programs, Michigan and Pennsylvania each have created 5,000 new jobs, Magnus said in a previous interview.

“We will die out there, if we haven’t already,” Gunther said, noting school closures in his district. “We need this.”

If approved, cities, counties, townships, and school districts could apply for a zone to the state Department of Trade and Economic Development later this year. Zones could be subdivided and be located in more than one government jurisdiction.

Qualifying zone businesses would forgo sales, income, and property taxes. Individuals investing in the zone business would be exempt from applicable income and capital gains taxes.

To qualify, businesses must increase employment by 20 percent in the first year, or make a capital investment in the zone equaling 10 percent of its previous year’s gross revenues. If neither measure is met, businesses must pay the waived taxes.

Businesses could not, however, forgo property taxes resulting from school levies or local general obligation bond debt service measures already in place. Furthermore, the property tax waiver applies to commercial and industrial property, but not to land.

The program would cost the state $4.7 million in lost tax revenue in 2004-05 and $9.6 million in 2005-06.

Legislators indicated that the program’s success may depend on where zones are designated.

A Senate companion bill (SF496), sponsored by Sen. Tom Bakk (DFL-Cook), awaits a hearing before the Senate Jobs, Housing, and Community Development Committee.

EDUCATION

Department name change

A bill that would restore the name, “Department of Education,” to the state agency responsible for K-12 public schools and personnel was approved March 4 by the House Education Policy Committee.

Sponsored by Rep. Randy Demmer (R-Hayfield), HF517 was referred to the House Governmental Operations and Veterans Affairs Policy Committee.

In 1995, the former Department of Education was renamed the Department of Children, Families and Learning by the Legislature, which approved a state agency reorganization led by Gov. Arne Carlson. At the time, more than a dozen programs, including Head Start support, early childhood education, family services, child-care, child abuse, drug policy, and violence prevention were moved from state agencies and combined with K-12 education.

Gov. Tim Pawlenty recommended the department’s name be changed in his Feb. 6 State of the State address. The name change “gets back to keeping the main thing the main thing,” Demmer said, partially quoting Pawlenty’s speech. “It’s about educating kids.”

The department is discussing reorganization and may recommend moving some programs under its jurisdiction to other state agencies, said Jim Bartholomew, the department director of government relations. He said an announcement could be made the week of March 10. “Our main focus is success in K-12,” Bartholomew said.

If approved, the department’s name change would cost an estimated $38,000,
Bartholomew said, mainly for changing the name on legal documents and the sign outside the department’s leased office building in Roseville. Existing stationery would be used until supplies are exhausted, he said.

Rep. Nora Swallow (DFL-Mankato) said the name change and possible reorganization was causing “a lot of unrest” in the department because of potential impact on staff.

The bill’s Senate companion (SF296), sponsored by Sen. Geoff Michel (R-Edina), awaits action in the Senate Education Committee.

Creating charter schools

The House Education Policy Committee approved a bill Feb. 27 that would make it easier for school districts to create charter schools.

Sponsored by Rep. Alice Seagren (R-Bloomington), HF452 would add a section to the state’s charter school law and allow school boards “and one or more licensed teachers” to form a charter school without the approval of the commissioner of the state Department of Children, Families and Learning (CFL).

The charter school, under the proposal, must implement the local school board’s “strategic plan for public education.” The sponsoring school board would select up to two members of the charter school’s board of directors. “Elected school boards run schools every day,” Seagren said. “They should have the capability to charter (a school) without going through the hoops of the CFL.”

The bill was referred to the House Education Finance Committee, which Seagren chairs. There is no Senate companion bill.

There are 78 charter schools in the state, created under a 1991 state law. A school board; an education district; a non-profit organization that’s registered with the state Attorney General’s Office and has $2 million of assets; or a public or private four-year university or college, community college, or technical college can create charter schools.

Joseph Graba, a senior education policy fellow at Hamline University, and former House member from 1971-77, testified in support of the bill. He said current charter school sponsoring organizations often don’t operate the school as a priority. “They all tell us this is not our main business,” he said. The bill could potentially lead to “new models” of charter schools, founded by organizations solely focused on the school.

Seagren said fears that charter schools would take “the best and the brightest” students in a school district have not been realized. “It’s been the opposite,” she said. “Charters have been created for at-risk and high-risk students.”

Seeking to be spared

Four meetings’ worth of testimony from parents, school administrators, and lobbyists before the House Education Finance Committee has revealed more than a few points of contention regarding the Pawlenty administration’s proposed K-12 education budget for the next two years.

Supporters of after school programs, extended-day/extended-school year programs, early childhood and family education, and English language programs — all proposed for cuts by the administration in the 2004-05 biennium budget — testified between Feb. 26 and March 5. The committee took no action on the budget proposal at the hearings.

“Please do not cut the after school program budget,” said Khao Insiengmay, of Minneapolis, executive director of the Lao Parents and Teachers Association. “The southeast Asian student is not doing well at school,” he said.

The Southeast Asian Community Council, which the Lao PTA works with, has received about $40,000 from the state through After School Enrichment Grants to sponsor tutoring and homework help programs for students in Hennepin County, said Cha Lee, the council’s executive director.

Pawlenty proposes to eliminate the after school program grants in the 2004-05 budget and save $11 million, while noting that federal funding may be available for after school programs. In the current fiscal year, after school grants were funded for $5.5 million, but $3.8 million of that amount was held by the state to help balance the 2003 budget deficit.

Kim Stanley, of Bloomington, brought her autistic son, Alex, to the March 4 meeting to testify in support of early childhood special education in her school district. The program helps children with learning disabilities “become functioning adults,” Stanley said, while 3-year-old Alex had fun playing with the committee room microphones. “It’s not the life he chose, but it is the life he lives,” she said.

The governor’s budget proposes no cut in Early Childhood and Family Education (ECFE) programs in fiscal 2004, but an $11.8 million reduction for fiscal year 2005.

Pawlenty’s proposal would keep early childhood programs, targeted for pre-school youth, at little or no cost for low-income recipients but require higher-class fees for parents with higher incomes. Critics of the proposal said it would harm the “universality” of the programs that are popular with parents in higher income suburban districts, as well as lower income parents in urban areas.

Jim Grathwol, representing Minneapolis public schools, said Pawlenty’s proposal, “is really bad in some respects, but it could have been worse.”

Cutting the funding formula for extended day and extended school year programs, as proposed by the governor, will hurt the district, Grathwol said, because Minneapolis has 10,000 students in after school programs and 16,000 in summer school.

A cap on the number of students enrolled in English language learning proposed by the governor could adversely affect 4,000 of the 12,000 Minneapolis students enrolled in those programs, Grathwol said.

Prevailing wages

The state’s prevailing wage law for construction labor sparked some controversy March 4 before the House Education Policy Committee approved a bill that would release school districts from following that state requirement, among others.

Sponsored by Rep. Jeff Johnson (R-Plymouth), HF365 would also remove statutory restrictions that require school districts to reserve small percentages of their general fund budgets for teacher and staff development and class size reduction. The bill was referred to the House Education Finance Committee.

Johnson accepted an amendment that removed from the bill a proposed repeal of the
School board primaries

A bill that would require school boards to hold a primary if there were more than two candidates for a school board position, or more than twice as many candidates as positions available, was approved March 5 by the House Governmental Operations and Veterans Affairs Policy Committee.

Rep. Jim Knoblauch (R-St. Cloud), the sponsor of HF471, described a 2001 school board election in St. Cloud where 12 people were running for four seats. With so many candidates he said the "will of the majority is in question."

Bob Meeks, director of governmental relations with the Minnesota School Board Association, said that association members agreed with the primaries, but they were concerned about how the school districts would pay for them. Under HF471, the school district is responsible for the cost of the primary. He also said the bill would affect fewer than 15 districts.

Knoblauch said that in his district for the last election, the cost would have been approximately $30,000-$40,000. Because the primaries are held once or twice in a decade, he said it’s "not an unreasonable expense."

Rep. Keith Ellison (DFL-Mpls) said the decision to hold a primary should be up to the school district, not the Legislature, since the action is not state funded.

The bill next goes to the House Education Policy Committee where Knoblach said he would take a closer look at the local costs of the bill.

The Senate companion (SF490), sponsored by Sen. Dave Kleis (R-St. Cloud), awaits action in the Senate Education Committee.

Elections

Political contributions

The House Governmental Operations and Veterans Affairs Policy Committee approved a bill March 5 that would prohibit potential ballot questions to be submitted by a deadline prior to an election to be considered for placement on the ballot.

Rep. Tony Kielkucki (R-Lester Prairie), the sponsor of HF504, says the legislation is to
clarify timelines that petition organizers must meet in order for their proposals to be considered.

Kent Sulem, an attorney for the Minnesota Association of Townships, said petitions have been received as late as one week before an election in the past. Because of a lengthy process to put the questions on a ballot, officials were unable to comply.

Because current election law doesn't specifically state that a petition must be submitted by a deadline, there isn't anything to show a resident why a question can't be accepted, said Sulem.

The bill doesn't require a city to schedule a special election when a submission is made, however. Minnesota statute requires a special election if 20 percent of the voters at the last municipal general election signed the petition and the question hasn't been submitted in the previous six months.

Approved by the committee, the bill next goes to the House floor.

A Senate companion (SF384), sponsored by Sen. Jim Vickerman (DFL-Tracy), awaits action in the Senate Rules and Administration Committee.

**ENVIRONMENT**

**Sprinklin' in the rain**

It's home and garden show time across the state and many consumers are dreaming up construction and landscape plans for this summer.

If Rep. Denny McNamara (R-Hastings) has his way, folks would set aside about 30 bucks to install a simple rainfall monitoring device on their new outdoor sprinkler systems.

McNamara brought a bill (HF335) before the House Environment and Natural Resources Policy Committee Feb. 27 that would require all new landscape irrigation systems to be furnished with sensors to prevent sprinklers from operating during rainstorms and at times when the ground is saturated to a programmed level.

"It has great environmental value," McNamara said, and it would reduce water bills.

The most common rain sensor on the market costs $29.87, John Mickman of the Minnesota Nursery Landscape Association told the committee, and typically only one device is needed for a residential system.

"I'm sure you've all seen lawn sprinkler systems going off in a rainstorm," Mickman said. "It's like, 'Give me a break.'"

Although this is a common sense measure, Mickman said, many installers do not include rain sensors in a competitive bidding situation.

Similar legislation passed the House and Senate in 1999, but was vetoed by then-Gov. Jesse Ventura.

"Citizens who are heavy users of irrigation systems and are concerned about the conservation of water should be willing to pay a little extra for these devices in return for lowering their water bills, without the burden of a government mandate that will virtually impossible to enforce," wrote Ventura in his veto message. "Manufacturers who are concerned about being competitive would do well to either absorb the costs of these devices or demonstrate the value to consumers, without turning to government to force all competitors to act in a similar manner."

Rep. Jean Wagenius (DFL-Mpls) said she supports the concept and would like to see future discussions move toward mandatory installation on old sprinkler systems that draw from depleted groundwater sources.

The bill now moves to the House floor. The Senate does not currently have a companion bill.

**Pay to protect and play**

Minnesotans could pay more for winter aeration permits and to camp in state parks, under a plan presented by the Department of Natural Resources (DNR) to the House Environment and Natural Resources Finance Committee March 4.

The DNR issues approximately 250 to 300 permits per year to lakeshore property owners, lake associations, hunting and fishing clubs, and others to aerate public waters during the winter months.

Aeration is a management tool to prevent winterkill of fish in ponds and lakes, but it does present a public safety risk, said Ecological Services Director Lee Pfannmuller. Six people died and there were several accidents associated with open water caused by aeration systems before the DNR stepped up permitting efforts in 1988. There has been one fatality since then, and the aerator was not negligent, she said.

There is currently no fee for the program, although the department estimates that training, "Danger – Open Water" signs, and inspections cost the state an estimated $62,000 annually. Under the proposal, the department would establish a $250 permit fee to recoup those costs.

A second adjustment would increase three state park camping fees:

- rustic camping would increase $3, from $8 to $11; and
- semi-modern camping would also increase $3, from $12 to $15.

Based on recent campsite occupancy figures, the change would generate an estimated $734,000 annually.

Deputy Commissioner Mark Holsten explained that campgrounds are one of the department's biggest "cost drivers." When budget discussions came down to keeping parks open and supporting campgrounds, he said, the department determined it would have to increase some fees to match those increased costs.

Some committee members also questioned whether the DNR had looked at increasing state park daily and annual sticker fees.

The department currently charges a daily fee of $4 at state parks and $20 for an annual sticker. Sales figures for the annual sticker are 110,000 per year, according to Parks and Recreation Division Director Bill Morrissey.

"It seems to me it would help people make a market decision" to put surcharges on those parks that are heavily used and stressed, said Rep. Dennis Ozment (R-Rosemount), the committee chair.

Perhaps the daily fee at popular parks could be increased to discourage overuse and encourage people to switch from a daily to an annual sticker purchase, suggested Rep. Phyllis Kahn (DFL-Mpls).

The department's proposed fee increases could be considered for possible inclusion in the omnibus environment and natural resources finance bill.

**Soil and water semantics**

The laws governing Minnesota's 91 soil and water conservation districts were first drafted in 1937 in response to Dust Bowl environmental conditions. A bill sponsored by Rep. Ray Cox (R-Northfield) would update those policy statements to reflect modern land and water management concepts.

The bill (HF414) also would change the petition process to establish or terminate a conservation district and grant districts levy authority.

The House Environment and Natural Resources Policy Committee approved the bill Feb. 27.

According to the Minnesota Association of Soil and Water Conservation Districts, additional financing authorities would help districts address a variety of emerging areas, including the state's contribution to oxygen depletion, or hypoxia, in the Gulf of Mexico, leveraging conservation programs associated
with the 2002 federal farm bill, and implementing requirements associated with the pollutant load that water bodies can handle, known as the total maximum daily load.

Current law states that "improper land use practices have caused serious wind and water erosion of the land of this state, the runoff of polluting materials, increased costs to maintain agricultural productivity, increased energy costs and increased flood damage."

The bill would strike that introduction and replace it with what proponents describe as more positive language.

"Maintaining and enhancing the quality of soil and water for the environmental and economic benefits they produce, preventing degradation and restoring degraded soil and water resources of this state contribute greatly to the health, safety, economic well-being, and general welfare of this state and its citizens," the bill reads.

Members on both sides of the aisle questioned what the district representatives meant by "enhancing" soil and water quality and what kind of obligations the new language would place on the private owners who hold 78 percent of the land in Minnesota.

"I think it's valid to question their ambiguity," said Rep. Maxine Penas (R-Badder).

The bill now moves to the House Government Operations and Veterans Affairs Policy Committee with the understanding that Cox, who would continue to work with the Farm Bureau, Minnesota Association of Wheat Growers, and others on clarifying the intent of the proposed language.

Its companion (SF392), sponsored by Sen. Steve Murphy (DFL-Red Wing), awaits a hearing in the Senate Environment and Natural Resources Committee.

FAMILY

Changing calculation formula

The way child support payments are calculated in Minnesota would change under a bill approved March 4 by the House Civil Law Committee.

Sponsored by Rep. Steve Smith (R-Mound), HF110 would use a so-called "income shares" model to determine the payments required of a non-custodial parent.

Under the system, courts hearing child custody cases would have to take both parents' combined income into account when setting a payment rate for basic child support. The current system is based only on the income of the non-custodial parent.

To figure out the exact amount, the bill would direct judges to use statistics from a 2001 U.S. Department of Agriculture report to dictate how much money it will cost to raise the child or children. The report lists the average cost of raising children for parents of various incomes. For example, the report specifies what kind of obligations the new language would place on the private owners who hold 78 percent of the land in Minnesota.

"I think it's valid to question their ambiguity," said Rep. Maxine Penas (R-Badder).

The bill now moves to the House Government Operations and Veterans Affairs Policy Committee with the understanding that Cox, who would continue to work with the Farm Bureau, Minnesota Association of Wheat Growers, and others on clarifying the intent of the proposed language.

Its companion (SF392), sponsored by Sen. Steve Murphy (DFL-Red Wing), awaits a hearing in the Senate Environment and Natural Resources Committee.

Deleting PrintComm

The Department of Administration's printing and duplication services are slowly being eliminated.

Legislators in the House Governmental Operations and Veterans Affairs Policy Committee heard testimony March 4 on how the division has continued to lose money for the state, and why it's in the middle of a lawsuit between the state's unions and the state itself.

Current law says the administration commissioner is appropriated money annually to operate a central duplication and printing service, called PrintComm. In addition, all state agencies must make reasonable efforts to determine if a state employee is available before entering into a contract for professional or technical services.

A bill (HF555) sponsored by Rep. Phil Krinkie (R-Shoreview) would repeal those statutes.

He said there are two reasons why the print shop let go 34 employees in December when administrators tried to shut the facility. Business has declined because people now have desktop printers, thereby eliminating a need for sending orders to the state division. Also, the department hadn't spent large amounts of money to update equipment, so it's more beneficial to contract out printing jobs.

Representing the Minnesota Association of Professional Employees, Brian Bergson said, "PrintComm never had a fair shake." Because the previous administrations ignored the statutes, the state unions sued over the portion of law relating to using state employees for services, he said.

Kirsten Cecil, deputy commissioner for the Department of Administration, said PrintComm has lost roughly $200,000 since a judge issued an order for it to continue operations and about $800,000 in the previous three years. Eight people worked there now. She said private sector printing companies are also seeing a decline in business because printing is an optional expense.

Rep. Loren Solberg (DFL-Grand Rapids)
asked if the department was violating the law by eliminating the majority of jobs in the printing division. Krinkie said by enacting HF555, the lawsuit would be void.

Rep. Bill Haas (R-Champlin) said the printing division has been looked at extensively and “it should be self sufficient, but it couldn’t be,” and therefore couldn’t compete with the private sector. He also said the more responsible approach is to save money by contracting out printing to the private sector.

The bill was approved and goes to the State Government Finance committee. There is currently no Senate companion to the bill.

HEALTH

Notice before an abortion

Lawmakers on the House Health and Human Services Policy Committee approved this session’s first abortion-related bill March 4.

Sponsored by Rep. Mary Liz Holberg (R-Lakeville), HF668 would require abortion providers to provide women with certain information at least 24 hours before performing an abortion.

Under the bill, a physician would be required to explain to a woman seeking an abortion, in person or over the phone, the risks associated with the abortion procedure, the probable age of the fetus at the time of abortion, and the medical risks associated with carrying a child to term.

Additionally, the bill would require that a woman be told about the father’s obligation to support the child if it were carried to term and any state Medical Assistance benefits that might be available for prenatal, childbirth, and neonatal care. Women would also be given the opportunity to review pictures and printed information about the probable physical and physiological development of the fetus.

Women would be required to certify in writing before the abortion that they received the required pieces of information.

The bill would also define an “unborn child” as a human from fertilization until birth. Rep. Thomas Huntley (DFL-Duluth) called the language vague and said it could apply even to embryos created in fertility clinics but never meant for producing a pregnancy. An amendment that would have stricken the definition from the bill was defeated.

A handful of other amendments sponsored by DFL representatives were also defeated. Among them was one moved by Rep. Michael Paymar (DFL-St. Paul) that would have exempted rape and incest victims from the 24-hour information review requirement.

Another, proposed by Rep. Neva Walker (DFL-Mpls), would have required abortion providers to also provide women with information about family planning and birth control options.

The bill has no Senate companion. It goes next to the House Civil Law Committee.

Safe drinking water

People interested in building or buying homes in one portion of Washington County would be informed that their drinking water is polluted, under a bill discussed March 4 by a House committee.

The House Commerce, Jobs, and Economic Development Policy Committee took no action on HF276, sponsored by Rep. Eric Lipman (R-Lake Elmo), and the committee is expected to continue discussing the bill at a future meeting.

The bill applies specifically to the Baytown special well construction area, which includes portions of the cities of Bayport and Lake Elmo and the townships of Baytown and West Lakeland. The area was designated in 1987 with the discovery in the drinking water of trichloroethylene, a chemical agent used to degrease airplane parts and is known to cause cancer. At low levels, said Lipman, it can cause headaches and skin irritation. At higher levels it can knock a person unconscious.

The risk can be eliminated, however, through the use of carbon water filters that Lipman said cost $2,000. “It’s not Chernobyl,” said Lipman, but the risk is nonetheless significant.

The bill, he said, addresses how potential home builders and buyers should be informed of the pollutant and by whom. This is particularly important as the area develops, Lipman added.

Current statute, according to Cindy Weckwerth with the Washington County Public Health and Environment Department, requires that real estate agents, developers and land sellers disclose only the presence of a well.
and its level of functionality. It does not require that potential buyers be told of contaminants.

The committee was given three letters written by homeowners who didn’t know of the trichloroethylene until they began drilling wells on their property.

But Susan Dioury, representing the Minnesota Association of Realtors, said current disclosure measures simply need enforcement.

The larger environmental problem shouldn’t wait until the point of sale to be addressed, she added.

The pollution source is under investigation, but it’s believed to be related to the dumping of several hundred gallons of recycled trichloroethylene off the Lake Elmo airport runway in the 1970s, Lipman said.

A companion bill (SF163), sponsored by Sen. Charles Wiger (DFL-North St. Paul), awaits a hearing before the Senate Judiciary Committee.

HIGHER EDUCATION

Joint convention elects regents

The House and Senate met in joint convention March 3 to elect nine members of the University of Minnesota Board of Regents. Four of those elected were previously appointed by Gov. Jesse Ventura.

The 12-member board, which must be elected by the Legislature, governs the university. By law regents must be selected by May 7 of each odd-numbered year. Terms are staggered, resulting in one-third of the board coming up for appointment every two years.

This year’s selection included so many candidates because the Legislature was unable to reach agreement on regents in 2001, and Ventura was left to appoint members that would be officially elected by the Legislature during the subsequent regular round of elections.

Though some observers suggested this year’s selection might be contentious, there was relatively little discussion of the candidates during the joint convention’s lengthy voting process. No other candidates were nominated other than the slates approved by the joint education committee Feb. 26, though several members abstained from voting or specifically named other candidates in their votes.

The members elected by the Legislature that were previously appointed by Ventura include:

- Peter Bell, current chairman of the Metropolitan Council, will represent the Fifth Congressional District for the remaining four years of his term;
- Lakeesha Ransom, at-large student representative to the board who is currently a graduate student at the Twin Cities campus, has four years remaining on her term;
- Frank Berman, at-large representative for four more years; and
- Richard “Pinky” McNamara, at-large representative with four years remaining on his term.

In addition, the Legislature elected current board chairwoman Maureen Reed to fill the remainder of a term vacated by the death of William Peterson. Reed was not renominated to fill the Sixth Congressional District seat she held previously. However, the education committee nominated Reed to fill the at-large seat that Ventura appointed former-Regent Jean Keffeler to fill in 2001. The full Legislature confirmed Reed’s nomination.

In addition, three new members and one reappointed one, who will all serve six-year terms, were elected to the board:

- Dr. Patricia Simmons, a pediatrician from Rochester, will represent the First Congressional District;
- David Metzen, current regent from Sunfish Lake, will represent the Fourth Congressional District;
- John Frobenius, a retired health care executive from St. Cloud, will represent the Sixth Congressional District; and
- Clyde Allen Jr. of Moorhead, the state revenue commissioner under Gov. Al Quie, will represent the Seventh Congressional District.

Potential tuition costs

University of Minnesota President Robert Bruininks said he cannot see how tuition at the university will not increase by at least double digits in each year of the upcoming biennium.

"We'll do all we can to keep tuition rates down and live within the 15 percent," he said, referring to Gov. Tim Pawlenty's request that tuition be capped annually at that percent increase to deal with proposed cuts to the university.

Speaking March 5 before the House Higher Education Finance Committee, Bruininks said tuition at the Twin Cities campus is currently $6,280 annually, and about the same at the Crookston, Duluth, and Morris campuses. He said the total cost for a student with all associated costs, such as room, food, and books, is now in the $12,000 to $14,000 range.

As part of the governor's budget reduction plan for the 2004-05 biennium, the university is to be cut by $179 million in general fund dollars ($89.5 million each year) to $540.7 million in fiscal year 2004 and nearly $543.9 million in 2005.

BRUININKS...
Jerry Fallos, president of Local 4108 of the United Steelworkers of America, testifies March 4 before the House Commerce, Jobs, and Economic Development Policy Committee in support of a bill that would specify duties mining owners and operators must perform when a mining operation is closed.

of America, said the bill could prevent a recurrence of a 1980s situation. Then, the Erie Mining Company plant (which later became an LTV Steel Mining Company plant) in Hoyt Lakes closed its south side. The owners' initial diligence to maintenance later waned, and the fine ore in the machines became like cement. Only jackhammers could clean it up.

“In essence it cost millions and millions of dollars to get the south side back into running shape,” Fallos said.

When LTV closed again, this time in 2001 under different owners, many maintenance chores also were left undone, he added.

Under the bill, plant owners would be required to rotate major equipment, keep the facility heated to enhance machinery lubrication, and maintain fire prevention systems, security, and utilities.

Cliff Tobey, a National Steel worker, said such duties are not extraordinary and are typically performed during annual maintenance shutdowns.

Rep. Arlon Lindner (R-Corcoran) expressed concern that the bill micromanages plant operations. And Bill Brice, director of the lands and minerals division of the Department of Natural Resources, said plant closures are best dealt with individually, and should not be dictated by statute.

However, Rep. Tony Sertich (DFL-Chisholm) said the state could be left funding closure costs of about $38,000 per plant. Two mining operation bankruptcies are pending on the Iron Range, he added.

A Senate companion bill (SF308), sponsored by Sen. David Tomassoni (DFL-Chisholm), awaits a hearing before the Senate Jobs, Housing, and Community Development Committee.

INSURANCE

Ambulance costs

Insurance costs for ambulances have skyrocketed in the past year and operators want to know why, as well as what they can do about it.

They would get help in studying the situation through a bill (HF177) approved Feb. 27 by the House Commerce, Jobs, and Economic Development Policy Committee. The bill now moves to the House Jobs and Economic Development Finance Committee.

According to O.J. Doyle, representing the Minnesota Ambulance Association, vehicle and malpractice insurance premiums for ambulances have risen so dramatically that some providers found it extremely difficult to obtain this year. The largest ambulance provider, named by Doyle, saw general liability premiums rise from $3,497 in 2001-02 to $128,650 in 2002-03. Vehicle liability premiums shot up from $31,251 in 2001-02 to $112,473 to 2002-03.

There has not been a spate of lawsuits, leaving the industry perplexed at the increases, Doyle said.

The problem is exacerbated, he added, by changes in federal Medicare reimbursement policies for medical transportation.

In April 2002, ambulances throughout the United States were placed on a national fee schedule and are prohibited from billing Medicare patients for the non-reimbursable amount. Medicare accounts for about 40 percent of all ambulance revenue in Minnesota, he said.

"The ambulance services in Minnesota are facing a true crisis," Doyle said.

Ambulances are examining a myriad of cost reduction methods, including looking at insurance premiums. HF177, sponsored by Rep. Greg Davids (R-Preston), would help the industry address this particular element.

The study would be overseen by the Department of Commerce. Two options exist—either a low-cost study by the House or Senate research staff, or a study by Department of Commerce staff at a cost of $25,000. However, the committee was told the department does not have the time to perform a thorough study and would require the assistance of a consultant. In either case, the Minnesota Joint Underwriting Association would also be asked for help.

Doyle said ambulance services would help gather study information, bringing down the cost.

The bill would require the study to be submitted to the Legislature by Jan. 10, 2004.

A Senate companion bill (SF299), sponsored by Sen. Dallas Sams (DFL-Staples), awaits a hearing before the Senate Commerce and Utilities Committee.

LAW

Public notice required

The House Governmental Operations and Veterans Affairs Policy committee approved a bill March 4 that would require a public notice to be sent out when an administrative law judge uses the “good cause exemption.”

Sponsored by Rep. Marty Seifert (R-Marshall), HF534 would also allow the chief administrative law judge to review any disapproved rules by another administrative judge proposed under the exemption.

Kenneth Nickolai, chief administrative law judge in the Office of Administrative Hearings, said the process has created uncertainty in the public, because the agency doesn’t have to inform the public when enacting an exemption, and has “lessened public trust in rulemaking.”

The mission of the office is to “provide a fair, prompt and impartial hearing process for citizens who disagree with actions taken by government.”

According to its Web site, the office hears and decides cases in three main areas: Administrative Procedure Act (APA) state agency contested cases and rulemaking hearings, local government licensing and personnel cases, and workers’ compensation benefit hearings.

The judges in the independent state agency can enact a “good cause exemption” in four sets of circumstances, including: to address a serious and immediate threat to the public health, safety, or welfare; and to make changes that do not alter the sense, meaning, or effect of a rule.

Under the bill, a public notice would include an electronic notice on the state’s Web site, and a notice sent by mail or electronic mail to people who have registered to receive this type
The bill now goes to the House floor. A companion bill (SF30), sponsored by Sen. Don Betzold (DFL-Fridley), was passed by the Senate March 3.

**LOCAL GOVERNMENT**

Paying more for a hospital
Cook County property owners could be subject to higher taxes for their district’s hospital operations, under a bill approved March 4 by the House Local Government and Metropolitan Affairs Committee.

HF312, sponsored by Rep. David Dill (DFL-Crane Lake), now moves to the House Taxes Committee.

Currently, the hospital district can levy for taxes up to $300,000 in a year. HF312 would allow the hospital district to annually raise the levy by 3 percent for inflation without voter approval.

A similar measure was requested last year, but legislators were unable to agree on the matter, according to nonpartisan House research staff.

Rep. Carla Nelson (R-Rochester) expressed concern about the tax levy being raised without voter approval. But Rep. Ron Abrams (R-Minnetonka) said this provision could be discussed further in the taxes committee, which he chairs.

The hospital, located in Grand Marais, is the only hospital for many miles in any direction. The district operating the hospital was created in 1909 and is controlled by an elected board of directors.

A Senate companion bill (SF614), sponsored by Sen. Tom Bakk (DFL-Cook), awaits a hearing before the Senate Taxes Committee.

The bill (HF462) would appropriate $8 million in 2004-05 to the Department of Natural Resources for grants to the Metropolitan Council to operate and maintain the regional parks system. In addition to state funds, park operations and maintenance are supported by local property taxes and user fees.

The system is jointly managed by the Metropolitan Council together with Anoka, Carver, Dakota, Ramsey, and Washington counties; the Three Rivers Park District of Hennepin and Scott counties; the cities of Bloomington and St. Paul; and the Minneapolis Park and Recreation Board.

"I find that they are very frugal in how they spend their money and that's very refreshing here at the Legislature," Tingelstad said of the park system management and volunteers.

"This money goes a long way with our community and with our citizens."

Park visits have increased from 5 million per year when the system was first created by the 1974 Legislature to nearly 30 million annually.

"The parks attract tourism and the dollars that flow into the state from tourism," said Anoka County Parks and Recreation Director John VonDeLinde.

Other benefits of a thriving parks system include promoting fitness, reducing youth crime, and nurturing family ties, VonDeLinde said. Regional trails also offer alternative transportation routes and support 525,000 commuter trips annually, he added.

"The rationale behind state funding is that regional facilities serve the same function for metropolitan area residents that state parks do in other parts of the state, and that the state as a whole should pay its fair share of the acquisition and development of the regional system as it does for state parks based on visitor origin data and tax origin data," according to the Metropolitan Council’s Regional Recreation Open Space Policy Plan.

The bill will be considered for inclusion in the omnibus environment and natural resources finance bill. The Senate companion (SF647) sponsored by Sen. Ellen Anderson (DFL-St. Paul) awaits a hearing in the Senate Finance Committee.

**RECREATION**

Twin Cities region jewels
The Twin Cities metropolitan area regional parks system includes 34 parks, 10 reserves, four special recreation areas, and 135 miles of multi-purpose trails.

"It's really our public jewel here for our quality of life in the region," said Rep. Kathy Tingelstad (R-Andover) in support of a biennial regional parks funding bill she presented to the House Environment and Natural Resources Finance Committee March 5.

Young officials
Youths between ages 11 and 14 would be allowed to work as sports officials for youth sports events without filing for a child labor law exemption, under a bill approved Feb. 27.

The bill (HF446), sponsored by Rep. Lynn Wardlow (R-Eagan), was approved by the House Commerce, Jobs, and Economic Development Policy Committee. It now moves to the House floor.

Wardlow said the bill arose when youth sports organizations were facing investigation from the Minnesota Department of Labor and Industry for employing children between 11 and 14 years old as referees, umpires, and officials.

The Child Labor Standards Act states that no child younger than 14 years old may be employed, save for as an actor or model, newspaper carrier, or in the agricultural field.

Exemptions can be granted by the state on an individual basis. The bill, however, would outright allow 11- to 14-year-olds to officiate at sporting events.

It includes safety mechanisms by restricting youth sports officials to overseeing games played by children younger than themselves.

Adult supervision by a member of the relevant state or local sport organization would be required on the playing ground, as well as written acknowledgement by the child’s parent.

Rep. Paul Kohls (R-Victoria) and Ray Vanderveer (R-Forest Lake) wondered aloud if the bill wouldn't set a trap by prohibiting youth sports officials from overseeing older age bracket games. An unintentional violation, such as having a younger official fill in if a regularly scheduled official becomes ill, could subject the child's employer to a $500 fine.

Both representatives, however, voted for the bill.

Testifying in favor of the bill were the department and numerous Minnesota youth soccer and hockey organizations.

"With the growth of hockey within Minnesota, the local organizations rely on this age level to officiate for their younger games," said Bill Leslie, chief referee for Minnkota Hockey, a division of USA Hockey.

Added John Olson, president of the Lakeville Soccer Club, "It’s a learning experience for them not only as players, but once they earn their certification as a United States Soccer Federation referee they also learn other aspects of the game that they haven’t been exposed to previously.”

No Senate companion bill has been introduced.

Trail connections
Rep. David Dill (DFL-Crane Lake) introduced himself at new member orientation last fall as the only legislator who drove a snowmobile to work that day.

He meets regularly with snowmobile clubs in the northeastern region of the state to discuss the "joys and concerns over recreational opportunities up there," he told the House Environment and Natural Resources Finance Committee March 5 in support of a bill he is sponsoring that would help complete a 2,100-mile snowmobile trail around Lake Superior.
The bill (H F255) would provide the Department of Natural Resources with $300,000 from the snowmobile trails and enforcement account in the natural resources fund to purchase easements in areas where there are snowmobile trails. This includes a 1.5 feet right of way of the Willard Munger State Trail and the North Shore State Trail just outside of Duluth.

Clubs must obtain formal permission from landowners to create trails along private properties. These friendly propositions in most cases, but snowmobile trail easements are "like a dairy chain," Dill said. "They can be interrupted anywhere along the line."

Although it is unusual to purchase a permanent snowmobile trail easement, Dill said, "the Hermantown land is in play at all times." Development pressures are making it more difficult to finalize negotiations, Dill said. "We are trying to close the final gap of 50 to 70 landowners."

Dill assured the committee that easement funds would come strictly from snowmobile dollars generated by registration fees and the gas tax. Easement rights would be held by St. Louis County.

The bill will be considered for possible inclusion in the omnibus environment and natural resources finance bill. The Senate companion (SF173) sponsored by Sen. Tom Bakk (DFL-Cook) awaits a hearing in the Senate Finance Committee.

Seasonal property leases

Escalating lease rates on prime state-owned property could drive a few elderly tenants away from their cabins along the North Shore, the House Environment and Natural Resources Finance Committee was told March 5.

A bill, sponsored by Rep. David Dill (DFL-Crane Lake), would modify the lease rates for three seasonal properties on Horseshoe Bay in Cook County.

"It is absolutely one of the most beautiful places in all of Minnesota," Dill said of the land in question.

Rates for the current leases are based on appraisal values, Dill said, and two of the three leases are very near forfeiting at this point because of rates that have risen more than 60 percent to $4,500 per year.

The current lease agreements are finite and the land will return to the state when the lessees die and their heirs are reimbursed for the value of the structures and improvements to the property. The bill (H F498) would not modify those terms, but it would adjust the rate structure.

Dill said the proposal was not something he would normally present to the Legislature given his background in civic affairs, but his initial reservations were tempered by the knowledge that these are the only cases in Lake, Cook, or St. Louis counties.

The lessees live on fixed incomes, Dill said, and sometimes public policy decisions should be made "err ing toward accommodating people and their lives."

"I had some sensitivity to this," he explained, because similar concerns caused his mother to give up land in Voyageurs National Park.

Rep. Denny McNamara (R-Hastings) said the bill would set a bad precedent. It's sad, he agreed, but the issue is bigger than these examples.

"We've set bad precedent before," countered Rep. Tony Cornish (R-Good Thunder). "It helps us look more humane" to show compassion for people in their elderly years.

The state could lose between $3,000 and $8,000 per year under the modified rates, according to Paul Pojar of the Department of Natural Resources Lands and Minerals Division. The department does not feel this is a good policy, but due to the circumstances will not oppose the bill, Pojar said.

McNamara suggested that the committee look at other ways to restructure the terms such as recouping the lost lease income from the final payoff to the lessees' beneficiaries.

The bill will be considered for possible inclusion in the omnibus environment and natural resources finance bill.

A Senate companion (SF465), sponsored by Sen. Tom Bakk (DFL-Cook), has been referred to the Senate Environment and Natural Resources Committee.

Safety

Extinguishing costs

Fire departments would gain another mechanism to be reimbursed for extinguishing car fires, under a bill approved March 4 by the House Local Government and Metropolitan Affairs Committee.

The bill now moves to the House Transportation Policy Committee.

Sponsored by Rep. Greg Blaine (R-Little Falls), HF213 requires the commissioner of transportation, as a last option, to reimburse fire departments for expenses incurred while extinguishing motor vehicle fires in trunk highway or interstate rights-of-way. The maximum reimbursable amount is $300 per incident.

However, fire departments would be required to employ other reimbursement methods prior to seeking money from the account. The bill creates another such method by allowing fire departments to ask county auditors to add the vehicle fire fee to the person's property tax bill.

Currently, most vehicle owners pay fire department fees resulting from vehicle fires through their auto insurance policy. If the vehicle owner doesn't have comprehensive insurance coverage or simply ignores the bill, the fire department can turn to a collection agency. But this is often an expensive endeavor, said John Dooley, legal counsel for the Minnesota Association of Townships.

The new provision allowing a property lien would not work, however, if the vehicle owner is a renter or does not otherwise own taxable property, Dooley said. In this situation that fire departments would most likely seek reimbursement from the state account, he said.

The account would not receive any state money, but would instead be funded by fire service bills paid by people whose vehicles caught on fire.

However, it's unlikely that the commissioner of transportation would collect much money for the account from bill payers, Dooley said.

In response to a question, Rep. Morris Lanning (R-Moorhead) was told by Dooley that HF213 could lead to similar legislation allowing fire departments to seek reimbursement for responding to vehicle accidents.

A Senate companion bill (SF78), sponsored by Sen. LeRoy Stumpf (DFL-Thief River Falls), was approved by the Senate State and Local Government Operations Committee and referred to the finance committee.

A similar bill was passed by a number of House and Senate committees last biennium, but failed to survive when the Senate transportation funding bill died.

Taxes

Pay more for cigarettes

Minnesota is missing out on a revenue enhancer and health care cost reducer by not raising cigarette taxes, according to the Minnesota Smoke-Free Coalition.

The non-profit entity, representing more than 300 organizations, testified Feb. 27 to the lack of a cigarette sales tax increase in Gov. Tim Pawlenty's proposed 2004-05 budget.

Raising the tax by $1 would generate an additional $260 million annually and save the state $1 billion in long-term health care costs, Jeremy Hanson, the group's advocacy director, told the House Taxes Committee. More importantly, he added, is how the increased cost could prevent 63,300 children from smoking.

Every year, 5,600 Minnesotans die from
tobacco-related illnesses. "That’s like having a small town, like my home town, Ada, Minn., disappear completely from the state every six months," said Hanson.

Since 1992, Minnesota has imposed a 48-cent sales tax on a 20-cigarette pack. Tobacco products, such as cigars, pipe tobacco, snuff, and chewing tobacco, are subject to a separate tax that equals 35 percent of the product’s wholesale price.

According to nonpartisan House Research staff, the two tobacco taxes will generate $182 million between fiscal years 2002 and 2005.

Hanson said 21 states increased their cigarette tax in 2002 and each saw a decrease in cigarette consumption and an increase in state revenues.

A 2002 statewide poll found that 63 percent of Minnesota voters support a $1 tax increase. "In fact, the cigarette tax is possibly the only tax that voters actually like to increase," Hanson said.

The Minnesota Smoke-Free Coalition recognizes that many legislators have taken a no-new taxes pledge, Hanson said. But, he added, legislators could raise the cigarette tax while decreasing other taxes.

Rep. Fran Bradley (R-Rochester) has introduced a bill (HF29) that would raise the cigarette tax by $1 in order to repeal the gross earnings and health insurance gross premium taxes charged of MinnesotaCare hospitals and health care providers. A Senate companion bill (SF114) has been introduced by Rep. Sheila Kiscaden (IP-Rochester). Both await committee hearings.

TRANSPORTATION

Replenishing the airports fund

The House Transportation Finance Committee is considering a bill that would replenish any funds taken for budget-balancing purposes from the state’s airports fund.

The bill (HF251), sponsored by Rep. Michael Beard (R-Shakopee), was heard March 5, and will be considered for the committee’s omnibus finance package.

Gov. Tim Pawlenty had proposed taking $15 million from the balance of the state airport fund to balance the 2003 budget. However, the move would have required legislative action, and since the Legislature did not reach agreement on the 2003 cuts, Pawlenty could only unallocate general fund money – which does not include the airports fund.

The airports fund is administered by the Minnesota Department of Transportation (MnDOT), specifically by the office of aeronautics, which also takes its operating money from the fund. Revenue collected from three major areas supports the fund: aviation fuel tax, airline flight property tax (imposed on commercial airlines in lieu of property taxes), and aircraft registration taxes.

The fund has a balance of $16.5 million. Beard said the intent of the bill is to recover any money in the fund that may be used to help balance the 2004-05 budget whenever surpluses again become available – whether that’s at the end of fiscal year 2005 or some future biennium.

"This is a specific user group," Beard said, referring to the fact that the fund is fully supported by aeronautics-related taxes. "This is not general fund money."

Brian Ryks, executive director of the Duluth Airport Authority and chair of the Minnesota Council of Airports, testified about the airports fund situation on behalf of the Minnesota Council of Airports. The organization presented specific issues they hope the Legislature will address with regard to the fund:

- Borrowing up to $10 million from the fund for budget-balancing in 2004-05, to be repaid by July 1, 2006;
- Increasing flexibility for airports to meet matching requirements for state and federal funds;
- Spending unreserved balances in the fund for construction and maintenance grants;
- Increasing the capacity for the hangar loan program; and
- Appropriating $1.5 million in the coming biennium from the fund to complete a long-range radar system in Alexandria.
MnDOT cutbacks questioned

Members of the House Transportation Finance Committee received a more detailed breakdown to the proposed reductions to the Transportation Department's state road operations budgets March 4.

Gov. Tim Pawlenty's budget proposes $53.5 million in reductions to state road operations for 2004-05, all paid for from the trunk highway fund. The reductions represent about 3 percent of the $1.9 billion state road budget.

Department officials testified that the reductions would not affect road construction projects, but are intended to accommodate any additional road construction funding the governor may propose. The cuts would be absorbed by three general areas of service in the department: infrastructure investment and planning, infrastructure operations and maintenance, and electronic communications.

Dick Stehr, program support director for the department, discussed the $17.5 million in proposed reductions to infrastructure investment and planning. The cuts would specifically reduce administration and district operating costs, as well as reduce central support for district operations in such areas as training, troubleshooting for project development, and other technical problem solving.

In addition, the proposed reductions would slow the replacement cycles for equipment, including computers, Stehr said.

Also, materials and research to support the MnRoad data collection and analysis project would be reduced.

Stehr said the MnRoad project, which has been in operation for about 15 years, helps the department during its seasonal weight restrictions and has extended pavement life as a result. He estimated at least $20 million in savings from the research.

In the areas of operations and maintenance, the department proposes trimming $35 million, primarily in reduced service levels to maintenance and operations activities such as snow and ice removal, roadside mowing, and litter and graffiti removal along state highways and interstates. The proposal also includes closing some rest areas in the state to save about $4 million.

Bob Winter, district manager for the department, said the reductions would affect a number of performance measures for the division, including travel time reliability, pavement marking visibility, rest areas, and the lifecycle of vehicles in the maintenance fleet.

Rep. Alice Hausman (DFL-St. Paul) questioned how the department chose the reductions it did, particularly when they could affect safety.

"Safety is a paramount concern," Winter said. The department is trying to keep the state positioned "to continue to develop and expand our existing system," and those considerations drove the decision-making, he said.

In addition, the governor's budget proposes a $1 million reduction to electronic communications functions in the department. Andy Terry, director of the office, said the department provides the primary technical support for high-frequency radio and electronic communications for all state agencies, though the agencies purchase their own equipment and contract for service.

The reductions, Terry said, would slow replacement of general equipment by 50 percent, and eliminate about 90 percent of the department's scientific equipment replacement budget. He said the reductions could have long-term implications regarding the ability of public safety radio systems to be able to communicate with another statewide.

Terryl emphasized, however, that the department's primary goal with regard to the communications system is public safety.

The committee took no action on the proposals at the meeting.

Notes

The conversation in the House

Environment and Natural Resources Finance Committee March 4 strayed ever so briefly to speculate on the cause of fatalities on Minnesota's frozen lakes.

Committee chair Rep. Dennis Ozment (R-Rosemount) said he could see a "Kahn bill" coming, in reference to some of her past proposals, including a bill that would eliminate the prohibition of marriage between first cousins.

"So, if I want to marry my first cousin...?" asked Rep. Joe Hoppie (R-Chaska) in jest.

"Don't do it on a snowmobile while you're drunk," replied Kahn.

February forecast represents smallest anticipated change in a decade, some additional reductions necessary

BY PATTY JANOVEC

As the Feb. 27 release of the state’s February forecast, state Finance Commissioner Dan McElroy said that although “there are no big surprises” in the financial document, both Minnesota and the nation as a whole face an uncertain economic future.

As the budget situation now stands, the state will have to make up to $125 million in reductions to balance the budget through fiscal year 2005.

Finance Department officials explained to members of the House Ways and Means Committee that the forecast indicates an additional $25 million deficit from the previous forecast. However, the department accelerated forecasts for human services and educational programs so Gov. Tim Pawlenty could include some of those numbers in his budget recommendations Feb. 18. As a result, an additional $100 million in reductions must be made to Pawlenty’s 2004-05 budget recommendations.

As a result, the new forecast deficit is $125 million more than the previous $4.2 billion projected for 2004-05.

Assistant Commissioner Peggy Ingison testified that Pawlenty accounted for the reduced spending projections in human services and education, but information regarding decreased revenues was not yet available when he put together his budget recommendations. That created the $100 million difference.

McElroy told the committee that the additional $11 million in cuts for fiscal year 2003 could be expected from the governor in early March, along with any other adjustments he will make to the budget. He also emphasized the February forecast was the “smallest change between two forecasts in a long time.” The last forecast was done in November 2002.

Various sources are used to determine the state’s outlook including how much the state spends, how much is collected in revenue, and the state’s budget reserves.

Reductions in spending account for part of the balancing act in the current and next biennium. The forecast shows a reduced $80 million in K-12 education funding, based on fewer pupils in the system for calculation purposes. Health and human services spending shows a $40 million reduction due to drops in spending associated with the General Assistance Medical Care program, and Medical Assistance long-term care waivers.

Forecasts also measure the overall economic outlook both nationally and in Minnesota, where the economy continues to lag behind the national averages for employment growth.

More than 64,000 jobs have been lost in the past two years in Minnesota, about 40,000 of those in manufacturing. The forecast says employment in transportation, communications, and the utilities sector fell significantly more in Minnesota than nationally and government in Minnesota, while growing, did not increase as rapidly as national averages.

The forecast indicates that the national recession appears to be over, but the U.S. economy is emerging slowly and continues to struggle. However, the impending war with Iraq, said State Economist Tom Stinson, makes this forecast the most uncertain since the November 1990 forecast prior to the Gulf War.

The Department of Finance used forecasting models by an economic consulting company, Global Insight Inc. The company’s predictions depend on two factors, possible war with Iraq and a federal economic stimulus package.

On those topics, the models assign probabilities to how the economy will react to both factors. As a result, the models suggest there’s a 60 percent chance of a short, successful war with Iraq and substantial economic stimulus package in late 2003 or early 2004; a 20 percent chance of a favorable victory without war scenario; and a 20 percent likelihood of a pessimistic outlook with war extending until at least summer 2003. The latter also contains a two-quarter recession for 2003.

Rep. Loren Solberg (DFL-Grand Rapids) asked Stinson if he would “bet the farm on it” referring to his confidence in the predictions. Stinson said he would not.

Explaining the outcomes further, Stinson said when he last talked with Global Insight representatives, they were less optimistic, but he doesn’t know where they are today. Furthermore, he said, a no-war scenario isn’t necessarily good for the economy unless one of two things happen: Saddam Hussein has a heart attack, or the United States continues to posture as if we’re going to go to war.

Stinson explained there will be a special forecast done in the fall to see if anything material has changed. McElroy indicated one could be done before the end of the legislative session if necessary.

Both House Republicans and Senate DFL leaders said although not much has changed, the outlook doesn’t look as positive as the governor continues to assume.

Senate Majority Leader John Hottinger (DFL-St. Peter) said there are a lot of “ifs” in the budget forecast with the potential for continual downfall in Minnesota’s economy. “Details do make a difference,” Hottinger said.

Republicans continue to hold the line on “no new tax burdens” for Minnesotans said House Speaker Steve Sviggum (R-Kenyon). Sviggum said the additional cuts make it “more difficult rather than less difficult.”
Court concerns

Officials paint a dire picture for what governor’s funding proposal would mean for timely justice in the state

BY JEFF JONES

The difference between what Gov. Tim Pawlenty is proposing for the state's judicial system in the next biennium and what officials say they need could have a dire effect on the way cases are handled in Minnesota, court system officials say.

The Minnesota Constitution requires the governor, as head of the executive branch, to recommend a balanced budget. However, the other branches may also submit budgets to legislators for consideration. For that reason, two separate budget proposals for the state's judicial branch sit side by side in legislators' thick budget books — one from the governor, and one from the courts themselves.

For his part, Pawlenty recommends a 10 percent cut from the base budget of Minnesota's judiciary for the next biennium. A letter from Finance Commissioner Dan McElroy says the governor suggests the courts should "in-state redesign their operations to increase efficiencies while minimizing the disruption to public services as much as possible."

Court officials told the House Judiciary Policy and Finance Committee Feb. 27 that is impossible.

In a letter accompanying the governor's budget, Minnesota Supreme Court Chief Justice Kathleen Blatz said the state runs the risk of running afoul of the state constitution if anything less than current funding levels are maintained. In fact, she suggests an overall increase in court budgets in order to maintain "core justice operations."

State Court Administrator Sue Dosal said the governor's proposal would result in a 30 percent reduction in court staff due to rapidly rising insurance prices, the high cost of layoffs, and fixed costs like rent and judges' salaries that cannot be reduced.

In a court system already stretched to the limit, such massive layoffs would have a devastating effect, Dosal said. "The bottom line today is we are handling a mountain of cases," she said. A recent report from the legislative auditor found that Minnesota judges handle 49 percent more cases each year than comparable states. Iowa, with a smaller population than Minnesota, has more judges.

Even at current funding, the report found, significant delays in case processing are caused by too few judges, too few public defenders, and little time for attorneys to prepare for cases.

Despite delays, Second District Chief Judge Thomas Mott said the system has handled the problem well so far, but can’t be asked to sustain any more cuts. "We have clearance rates of cases of about 100 percent. As many cases that come in a year, we resolve in a year and go out," he said. "This 30 percent reduction in staff will mean the annual clearance rates for all cases will drop to 78 percent." After a year, Mott anticipates 500,000 cases would be backlogged. "Do that for two years, and we’re buried so far under in the mess, that you’ll never get out," he predicted.

Mott said backlogs would result in slowdowns in child custody hearings, delays in issuing restraining orders for battered women, injured people unable to collect damages, contract disputes put on hold, and criminal cases dismissed for lack of reliable evidence.

"You’ve got cases deteriorating over time, witnesses disappearing, memories fading," he said. And he fears fewer out-of-court settlements would occur because attorneys wouldn’t face the urgency of going before a jury.

Besides the administrative mess that could result, court officials say that delays of such magnitude could be in direct conflict with the Minnesota constitution. Among the state’s Bill of Rights, is the guarantee of judicial remedy in civil and criminal actions that occurs "promptly and without delay."

"The upshot of all this is that it results I think in a very clear constitutional violation," Mott said. "This is not to say that we’re going to be irresponsible about the way we approach this. We will look at case processing priorities and certainly a homicide case is going to take priority over a speeding trial."

Federal requirements that courts appoint a guardian ad litem to all children in all cases of child abuse or neglect have never been met, according to Blatz, putting the state at risk of losing some federal funding. State requirements that judges appoint similar guardians in cases of truancy and run-away children are also expensive. Committee Chair Rep. Steve Smith (R-Mound) suggested the committee could look into giving judges more discretion in such cases. Mott said without such relief, courts would incur $2.9 million in further expenses.

Other suggestions include increased use of video or telephone conferencing in trials, closing some court facilities in Greater Minnesota, changing certain laws to reduce caseloads, and raising court user fees or filing fees.

As for raising fees, Rep. Keith Ellison (DFL-Mpls) said courts need to retain the right to waive filing fees in cases of hardship.

The committee took no action at the hearing.

Court officials are concerned that Gov. Tim Pawlenty’s proposed budget cuts for the judicial branch will create backlogs of thousands of cases.

Backgrounds in business, religion, transportation have led Beard to the House of Representatives

By Jeff Jones

Rep. Michael Beard (R-Shakopee) says even a cloudy day is a nice day in Minnesota.

That might be easy to say for an amateur pilot like Beard, who enjoys soaring above the clouds at least as much as driving beneath them, but that optimism has deeper roots.

Growing up in the foothills of Pennsylvania, Beard often lived in the shadow of mountains. “The sun would come up at 6:30 in the morning, but you wouldn’t see it ‘til after nine,” he said. “The sun might not set ‘til eight in the middle of the summer but the last you saw of it was after six.”

And on cloudy days? “They’d be right down in the hills and we just felt kind of claustrophobic. Here (in Minnesota), the clouds can be 600 feet above the ground and you can still see halfway to Hutchinson. It looks like a nice day to me.”

When he and his wife, Karen, came to Minnesota to attend Bible college, they knew they wanted to spend their lives here. “There was more of an entrepreneurial spirit about it. There’s a feeling that government is a necessary evil,” he says. “And after you’ve done it for 10 or 12 years — fattening up in the good times and cutting back in the lean times — you get a little less emotional about it.”

Along with his business experience, Beard brings a strong faith background to his work as a legislator. His daughter, Amy, is the bookkeeper and general manager for the Minnesota Christian Chronicle, where her father still serves as publisher. “He wants to make the world a better place,” she says. “He isn’t in charge, but he’s a tool being used.”

Beard says his relationship with God keeps him from thinking too much of himself. “He’s the king, I’m a creature, I understand the relationship there,” he said, laughing.

His employees have seen his faith at work. “He spends a lot of time in prayer before he makes a big decision,” says Michael Norman, the Chronicle’s graphic designer. “He likes to know all sides of a problem before making a decision.”

Lisa Beard calls her father a visionary. “He has big ideas,” she says. “His ability to network is amazing.”

Beard is happy to be sitting on the House Transportation Policy and Transportation Finance committees. “If it floats, if it rolls, if it flies, I enjoy it. I’m in love with it,” he said.

After college, Beard returned home and worked as an engineer trainee for the Pennsylvania Central Railroad, which he calls the best job he ever quit.

He left the job after a couple of years to come to Minnesota, but admits to missing it at times. “There’s something about rolling through town and blowing your whistle and waving at the kids that’s just every boy’s dream come true. There’s nothing like pulling that throttle and feeling 14,000 horsepower kick you in the butt.”

Transportation is among the things government ought to be about, Beard says. When it comes to building roads and infrastructure, maintaining a court system, and providing quality education, state dollars are well spent. Beyond that, though, he suggests taking a hard look at the way sales taxes are collected from cities and counties, the way money is distributed to local governments, and the way social services are administered.

“We’ve got a great state that has done a lot of things. Some great things. Some good things. But a budget crunch like we’re in now gives us an opportunity to get connected to reality. What is the best stuff? We may have to sacrifice the good to retain the best.”

— Rep Michael Beard
Part of the plan
From the time she was a little girl, Brod has been preparing for her a life of public service and her new role as legislator

By Patty Janovec

While the siblings of Rep. Laura Brod (R-New Prague) were watching cartoons, she turned her attention, during her formative years, to the news of the day. She said that her father claims she has been interested in government since she was four. We're talking about the specific cuts, the ways government can work better, ways that government is being wasteful, quality of employees that work for it.

Her attention to the functions of local government led her into urban and regional studies at Minnesota State University, Mankato. She said that education helped her land a position on the New Prague City Council, an experience, she said that helped in her understanding of how local government works.

Said Jerry Bohnsack, city administrator for New Prague, “She was only with us for four years, but we miss her.”

When Brod was first elected to the council, Bohnsack said she reminded him of a “little girl,” listening and gaining knowledge on issues. Later, he said, she tackled a street reconstruction project and, “she asked questions you wouldn’t think of.” Her perspective, he said, lent valuable insight into a complex situation.

Bohnscak said Brod would later stand up to a Citizen’s League report that surveyed taxes in several communities, including New Prague. The report labeled the city with the highest taxes in the seven-county Twin Cities metropolitan area. He said Brod “got to know the tax system, asked a lot of questions” and the city was eventually excluded from the survey after she found that potentially unfair comparisons were made. He says she is “super intelligent, but yet has a lot of common sense.”

As a legislator Brod now represents a district comprised of small towns, where the largest population of any municipality is nearly 5,000. “It’s a fabulous collection of small towns that are individual,” she said. “They each have their own different characteristics.”

Brod admitted that balancing family life is a challenge, but she said, “luckily I have extended family that live in my town, and my husband has a flexible job.”

Along with her job as a legislator, Brod is an appraiser of agricultural and residential property. Because of the experience, she said that she understands market values, growth, and tax issues. And with two children in public schools, she said she can relate to the educational needs of the area, as well.

Schools, education, and economic development are all important to her district, Brod said. But transportation is also coming more to the forefront since more residents drive into the Twin Cities metropolitan area to work. Minnesota needs to get people moving, she said, and “if there is a way we can increase the ability for people to get to their jobs without losing money by sitting on a highway, I’m all for it.”

Also becoming important, Brod said, is local government aid. She said her area, like many rural communities, depends heavily on those funds. Although Gov. Tim Pawlenty has proposed caps on the cuts, “most communities would be at the greater end of the cap” in her district, Brod said.

Much like she did as a new city councilor, Brod has spent much of her time as a new legislator “really getting my arms around the mechanics of this place.”

“I’m on a quest for information, a quest for understanding how the Legislature works from the inside,” Brod said. “Once I understand that I’ll be able to present my arguments, present my issues, and represent my district better than if I just dove in.”

The first bill Brod sponsored (HF450) would give people who drive vehicles operating on fuel with an 85 percent ethanol blend the ability to use the high-occupancy vehicle (HOV) lanes. Brod said a citizen brought forth the idea at a town meeting.

She said that at a time of possible war alternative fuels are important and that the state needs to increase the ethanol market by understanding the need to reduce reliance on foreign oil.

HF450 awaits a hearing by the House Transportation Policy Committee. Its Senate companion (SF466), sponsored by Sen. Thomas Neuville (R-Northfield), also awaits a committee hearing.

“I’m on a quest for information, a quest for understanding how the Legislature works from the inside. Once I understand that I’ll be able to present my arguments, present my issues, and represent my district better than if I just dove in.”

— Rep. Laura Brod

2002 population: 36,729

Largest city: New Prague

Counties: Le Sueur, Scott, Sibley

Location: south-central Minnesota

Top concern: “When I talk to people, the budget is definitely one, two, three and four. We’re talking about the specific cuts, the ways government can work better, ways that government is being wasteful, quality of employees that work in government.”

— Rep. Laura Brod
Unlikely lawmaker

From aspiring priest to city prosecutor, Lesch hopes to connect with constituents as new member of the House

BY MICHELLE KIBIGER

Rep. John Lesch (DFL-St. Paul) says he never really imagined himself as a lawyer, or even a legislator. In fact, as a teen, he began studying to become a priest.

But a few key experiences in his life led him to the Minnesota House of Representatives and gave him a passion for public service.

He was initially drawn to the Legislature through an internship with former Rep. Andy Dawkins during the 1997-98 session. Lesch said he became fascinated with the legislative process and the commitment to public service that members exhibited, including Dawkins.

"He was not a typical legislator," Lesch said of Dawkins. "He had an idea and he ran with it, no matter what people thought of it."

Now Lesch says he's trying to employ the same principles in his new role as legislator. He has established two goals for this term: one is to exhibit with the legislative process and the commitment to public service, and meeting more residents of District 66A, which includes parts of north and east St. Paul.

"Many people don't feel connected to what's going on at the Capitol because they've never been asked what their opinion is. And I tried to do that when I went out to hit the doors (last) summer. But that was before I was elected, too, so I want to get to know a lot more of the folks."

He hopes to help ease regulations so builders can provide the housing that people need. He also said he will work to stay aware of their concerns, such as housing, jobs, economic development, and public safety.

Lesch said he's keenly aware that a number of people in his district live paycheck to paycheck. He said they all want is the opportunity to have a good paying job and a roof over their heads.

"When they need something like busing or when they need employment or when they need housing, it's critical," he said. "It's the difference between stability and poverty in a single paycheck."

In addition, Lesch said, he thinks that government has been standing in the way of developers who are willing to build quality housing in the locations that need them most.

"I think John is going to be a star in the House - a bright guy who is very committed to what he is doing."

After seminary, Lesch said the order sent him to Saint Louis University to continue his studies. But after meeting and seriously dating the woman who would become his wife, Lesch decided not to continue pursuing the priesthood, and ultimately returned to the Twin Cities to attend the Hamline University law school. Lesch and his wife, Tina, settled into an apartment near the Hamline campus. The couple now have a young daughter.

He said over the next several years they have chosen to stay in the neighborhood, moving about a half-mile east in each of their new residences.

"The district that he lived in and that he volunteered in and he got known in was the district he was elected in," Dawkins said.

Now a prosecutor with the city of St. Paul, the 30-year-old Lesch works with community law enforcement programs - the kind that work to enhance the livability of neighborhoods by reducing crimes such as prostitution and drug dealing.

He said he hopes to stay connected with his district by continuing to stay active in the community and listen to the needs of his constituents. He also said he will work to stay aware of their concerns, such as housing, jobs, economic development, and public safety.

Lesch said he's keenly aware that a number of people in his district live paycheck to paycheck. He said they all want is the opportunity to have a good paying job and a roof over their heads.

"When they need something like busing or when they need employment or when they need housing, it's critical," he said. "It's the difference between stability and poverty in a single paycheck."

In addition, Lesch said, he thinks that government has been standing in the way of developers who are willing to build quality housing in the locations that need them most. He hopes to help ease regulations so builders can provide the housing that people need.

DISTRICT 66A

2002 population: 36,523
Largest city: St. Paul
County: Ramsey
Location: north and east St. Paul
Top concern: You hear employers, Republican business owners, complaining about housing, because they also know that part of the reason we don't have housing is because government has regulated it out. You can't even approach the job issue, until you have a housing arrangement at least. That's number one."

- Rep. John Lesch
True to his roots
From township board to St. Paul, Lindgren wants to continue sculpting quality legislation for his area

BY TOM LONERGAN

Wherever Rep. Doug Lindgren (R-Bagley) goes, a bit of his creativity is not far behind.
In his House office in St. Paul, there’s a small reception table Lindgren welded together from car engine parts. On the campaign trail last year, a 1963 Jeep that Lindgren restored pulled a caterpillar-like 16-foot-long welded piece of empty Freon tanks. Painted green, Lindgren’s “recycle-pillar” had spark plugs for antennas. The piece “became a visual trademark of my campaign,” he said. “The kids got a kick out of it.”

Lindgren has made a number of art pieces from car parts and other scrap material readily available from the family-run gas station he owns in Bagley, west of Bemidji.

Creating legislation as a freshman representative, Lindgren said, may prove to be a bit more challenging than his sculpture. “It’s really hard coming down here and getting hit with this huge budget deficit,” said the 52-year-old Navy veteran. “A lot of your pre-conceived notions are stripped away.”

For 18 years, Lindgren served on the Copley Township Board of Supervisors. His wife, Colleen, is the Bagley city clerk and accountant for the family business. He first taste of making government work, Lindgren recalled, came when he wanted a road repaired in front of his house. “I was told, ‘Run for the township board and fix it yourself,’” Lindgren said.

As with many new Republican representatives, Lindgren was encouraged to run for the House by Speaker Steve Sviggum (R-Kenyon). “I didn’t know him,” Lindgren said. “He called and said he wanted to meet me.” After lunch and a week to think about it, Lindgren said he was “hooked.” He won last November’s election by just 443 votes (2.94 percent).

Lindgren said he’s the first conservative elected from the district in many decades. Yet, during his introduction to the House, he said he’s found a different tone than strict partisanship. “I’m finding out it’s more issue-based,” Lindgren said. His committee assignments include the House Environment and Natural Resources Finance, Environment Policy, and Agriculture Policy committees.

The difficulties small towns in Greater Minnesota are having due to declining population and slack economic development will be uppermost in his approach to issues, Lindgren said. Jobs are scarce in towns like Bagley, and the southern portion of his district—which includes popular recreation areas like Itasca State Park—offers mostly seasonal jobs, he added.

State tax breaks for new or expanding businesses in economically depressed areas are important, Lindgren said, “but I’m not for giving stuff away.” He favors approaches like tax increment financing which, he said, has been “a boon for Bagley.” The incentive approach helped the town land Team Industries, a company that makes transmissions for Polaris. In a tax increment district, a company’s tax bill is relieved initially, but eventually paid as the business prospers, Lindgren said.

He said Gov. Tim Pawlenty’s proposal to create up to 10 tax-free zones for businesses in rural Minnesota, “sounds like a good deal but it could create a lot of controversy between different cities.” But, Lindgren added, the state needs to respond to neighboring states like South Dakota “enticing business away with tax breaks.”

Local government aid is another issue that hits close to home. The state’s financial assistance provides 30 percent of Copley Township’s annual budget, he said. “We didn’t like unfunded mandates” from the state, Lindgren added, “but then I get here and see why they happen.”

He said he plans to take a “strong look” at the funding formula for local government aid. “I have a hard time understanding why Minneapolis, St. Paul, and Duluth get local government aid when they have a tax base and can create revenue,” Lindgren said.

“How does Bagley create a tax base? It’s just not there,” he said. With a population of just over 1,000, losing 60 people a year is “a big deal” in Bagley.

And education is a key issue, with a son in college and a daughter in high school, he said.

Lindgren’s gas station, which he worked at as a young man and now run by his son, Jeremiah, provides service at the pump, with windshield washing, an oil check, small repairs, and daily shoptalk. Lindgren said the latter helped him develop a “common sense” approach to issues.

“He sure has a knack for that political thing,” Jeremiah said. “He’s a pretty good talker and he really, really listens to people.

“During the campaign we heard from a lot of people that lawmakers in general seem more concerned about the Twin Cities area and lump everywhere else as Greater Minnesota,” Jeremiah said. He said his father will “represent this area everywhere else as Greater Minnesota.” Jeremiah said. “He’s a pretty good talker and he really, really listens to people.”

— Rep. Doug Lindgren

DISTRICT 2B

2002 population: 36,482
Largest city: Park Rapids
Counties: Beltrami, Clearwater, Hubbard, Pennington, Polk
Location: northwest Minnesota
Top concern: “Government is moving away from the common man. I don’t like what that looks like. Common sense and accountability has left government and we need to bring that back.”

— Rep. Doug Lindgren

Agenda: To be announced.

THURSDAY, March 13

8:15 AM
Environment and Natural Resources Finance
Room: 5 State Office Building
Chair: Rep. Dennis Ozment
Agenda: Department of Natural Resources budget.
Reflections

With its strong Scandinavian heritage is it any wonder that the Minnesota Legislature has been filled with those whose last names end in “son” or some close variation?

A record 87 lawmakers since 1858 have carried the Johnson surname and an additional three held the name of Johnston. The first Johnson in the Territorial Legislature was Parsons K. Johnson from St. Paul (1849 and 1856). In 1859 R.M. Johnson from Anoka became the first Johnson to serve in the state's Legislature.

The Legislature now has four individuals with Johnson as a surname: Sen. Dean Johnson (DFL-Willmar), now in his seventh term, and three members now serving their second term: Sen. Debbie Johnson (R-Ham Lake), Rep. Jeff Johnson (R-Plymouth), and Rep. Sheldon Johnson (DFL-St. Paul).

Despite the popularity in the Legislature, just one person named Johnson has served in the state’s top post. That was Gov. John A. Johnson from St. Peter who served one term in the Senate before he became the first governor to occupy the new Capitol building in 1905.

Of the 11 John Johnsons who served, another John A. Johnson from Preston, served eight years in the House, including three terms as Speaker of the House (1925-31). He then returned as a senator for another eight years. Two other Johnsons – Alfred I. (1941-58) and George W. (1925-36) – also served as speakers, from 1955-58 and 1935-36, respectively.

Minnesota has also had two people named Johnson represent the state in Congress. Dewey W. Johnson from Minneapolis (1937-39) and Magnus Johnson of Kimball (1923-25, 1933-35). Both also served in the Minnesota House, and Magnus Johnson also served in the state Senate.

Harold J. Anderson, who recently called to renew his Session Weekly subscription, is one of 59 Andersons who has served in the Legislature.

He represented Minneapolis from 1951-61 and 1963-71. For 12 of his 18 years in the House, he shared his first and last name with Harold R. Anderson (1949-1965) from North Mankato.

The two were in the Legislature in 1955 when the Chief Clerk's office had the duty of not only keeping accurate voting records for the two Harold Andersons, but for four other Andersons, as well. In the Senate, the clerks had three Andersons to keep track of that year.

The first Anderson elected to state office in 1859 was John A. Anderson from La Crescent. The newest Anderson to hold office is freshman Rep. Jeff Anderson (R-Austin).

At the other end of the longevity scale is Rep. Irv Anderson (DFL-Int'l Falls) now serving his 16th non-consecutive term. His 30 years of experience tie him for being the most senior member in the House.

Irv and Jeff are currently joined in the Legislature by two others with the same surname: Rep. Bruce Anderson (R-Buffalo Township) in his fifth term, and Sen. Ellen Anderson (DFL-St. Paul) in her fourth term.

Three lawmakers — two Andersons and one Andersen — also served as governors of the state: Wendell Anderson (1971-76), C. Elmer Anderson (1951-55), and Elmer L. Andersen (1961-63).

Also, one Anderson (Sydney) and one Andersen (Herman C.) represented Minnesota in Congress. Herman Anderson was a state House member in 1935 before he was elected to Congress in 1939. Sydney Anderson served in Congress from 1911 to 1925.

At the other end of the longevity scale is Rep. Richard Andersen from New Brighton (1967-74).

While a prolific number of Andersons and Johnsons have contributed to the legislative process over the years, hundreds of others with very different names and backgrounds continue to contribute to the well-being of the state by making laws.
