

# CODEBOOK

## Minnesota Legislative Reference Library

This codebook is an index to the following  
special collections:

Newspaper Clipping Files  
Organization Files  
Personality Files  
Vertical Files

(April 2006 edition)

## *A note on using the codebook –*

- Codes and topics in **bold print** are primary codes. Articles on these topics are always coded.
- The remaining codes are secondary codes. In many instances, articles on these topics are not coded. \*But sometimes they are coded. Some guidelines:
  - \*The issue is currently – or will likely be – on the agenda of the Minnesota Legislature.
  - \*There is something unique about an issue.
  - \*A Minnesota State agency is involved with the issue. (For example, not all articles on trail systems are coded; but if the Minnesota DNR is involved with decision-making on a particular trail, the articles are coded.)
  - \*An issue is a big deal in a particular area. (For example, in general, many articles on railroads are not coded. However, because it has drawn the attention of many levels of government, all articles on the proposed expansion of the DM&E Railroad line through Southern Minnesota are coded.)
  - \*In many cases, only selected articles on a secondary issue are coded (initial articles, overviews, and case wrap-up) instead of every article that appears.
- Cross-references do not appear in bold, even if they refer to a primary code.
- Secondary codes will be turned into primary codes when necessary.

## *An historical note –*

The Library's clipping file collections started in the early 1970s. At that time, when electronic access to newspapers was very limited, coding of articles was much more extensive; all codes were primary codes.

In recent years, with much newspaper content available on the Internet, new criteria for article selection has been established. The focus is on articles relating to the actions of the Minnesota Legislature, Minnesota State government, and – to a lesser extent – local government. Articles are selected for their current value - and for their future historic value as a record of Minnesota issues and government. The system of primary and secondary codes was established in 2005.
